NK61: Hjørneliste med større radius.....	129

NK01: Panbo-bjælke

Panbo-bjælke 70x145 mm. Der er mulighed for at justere bredden (145 mm) både mindre og større.

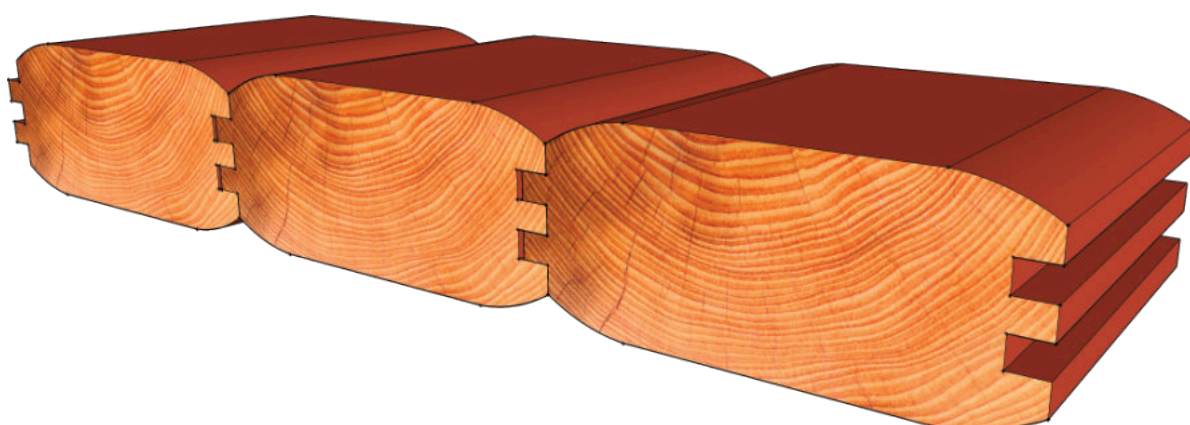

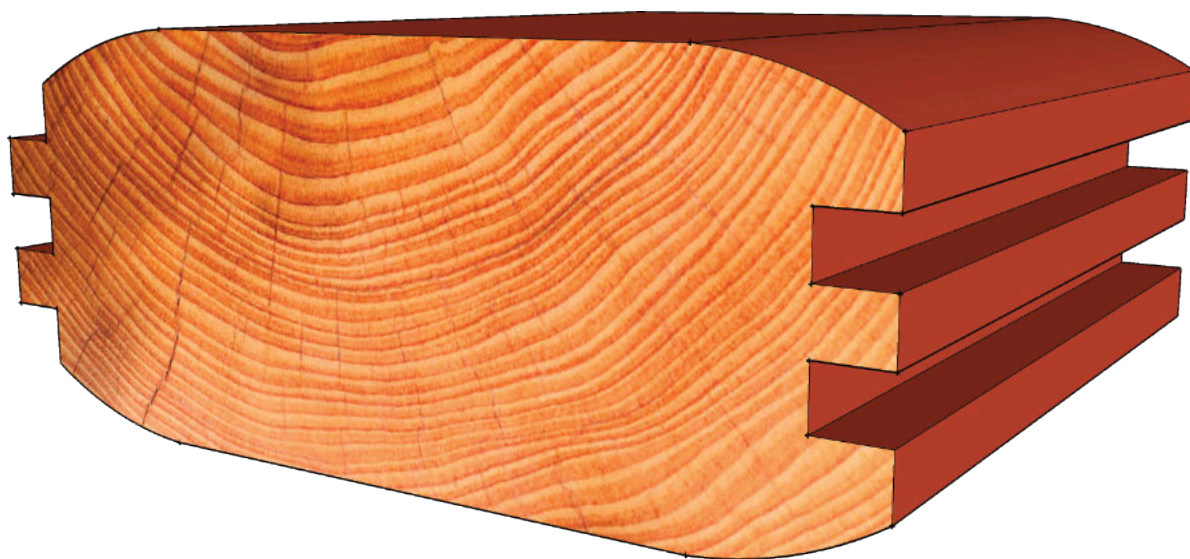

NK01: Panbo-bjælke

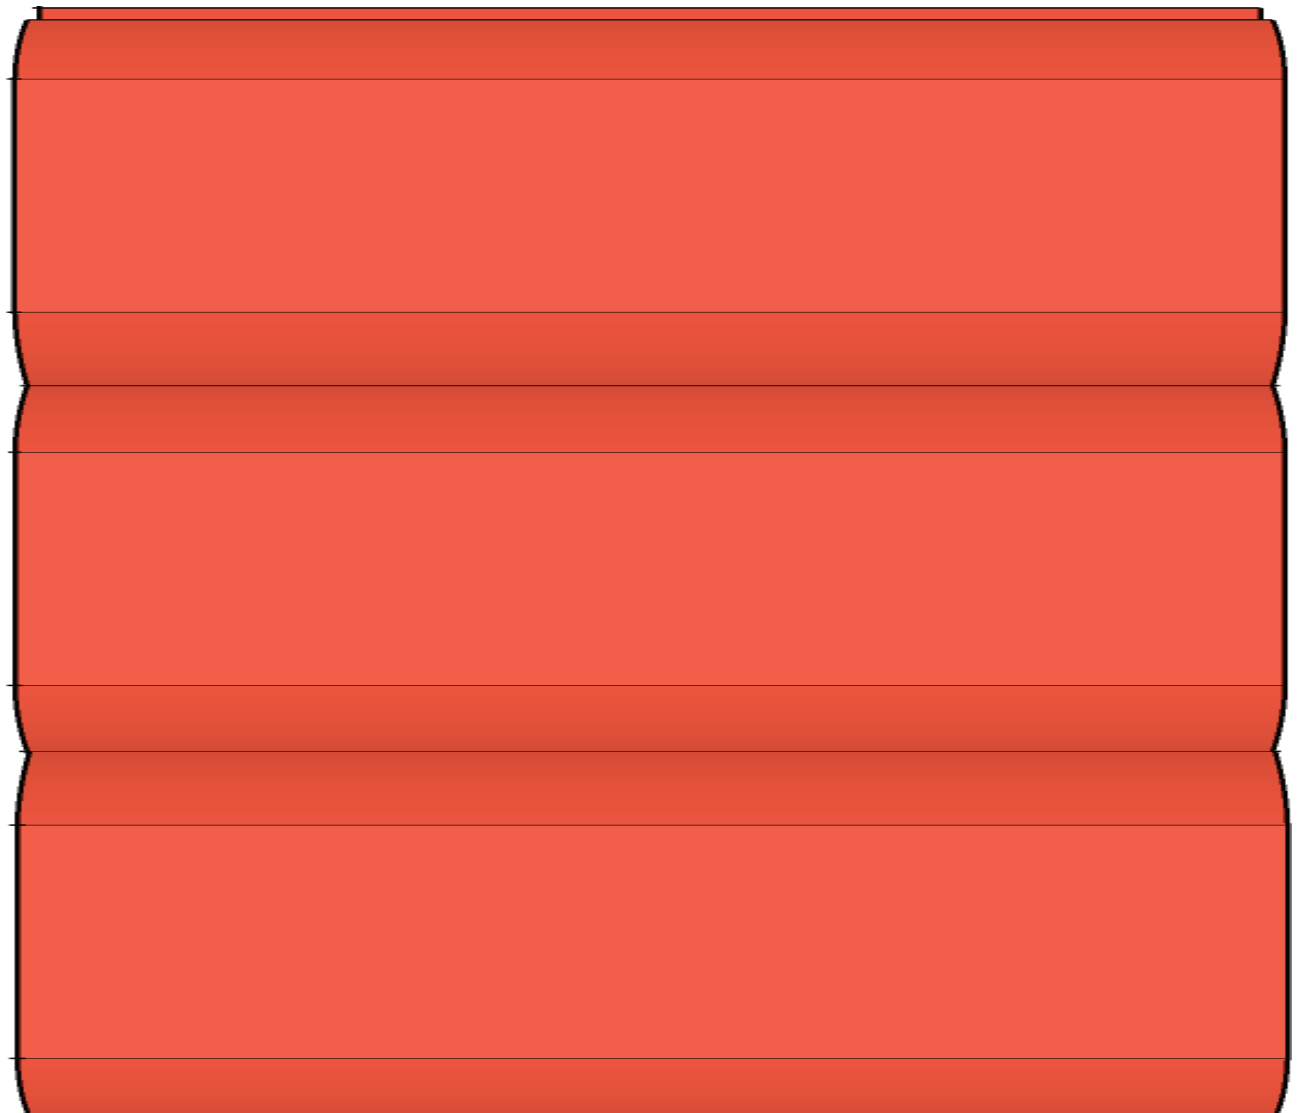

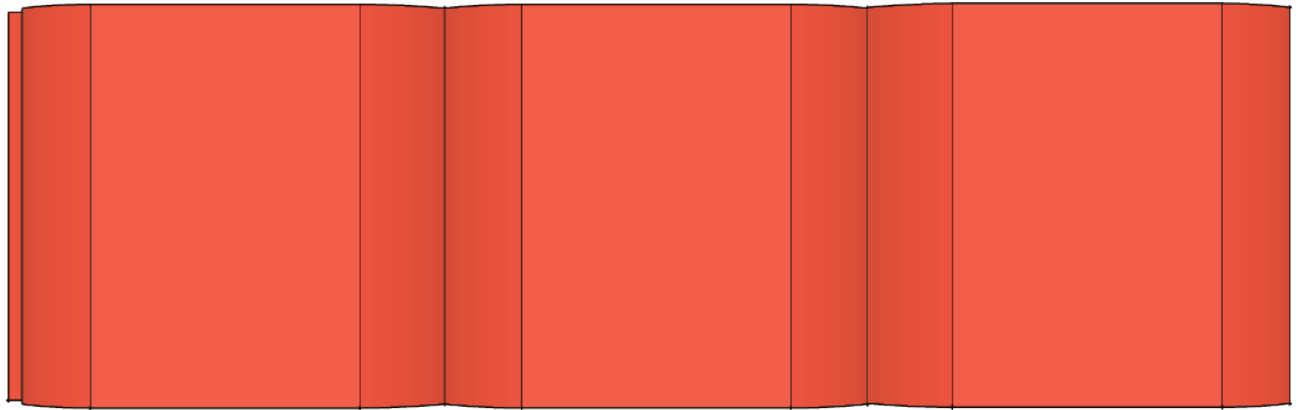

NK02: Panbo/Jeppesen bjælke

Panbo/Jeppesen bjælke 70x145 mm. Bredden (145 mm) kan gøres både mindre og større.

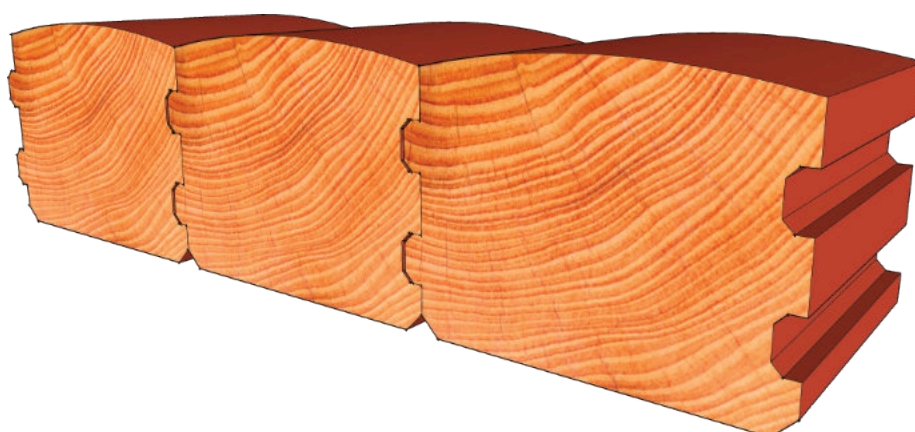

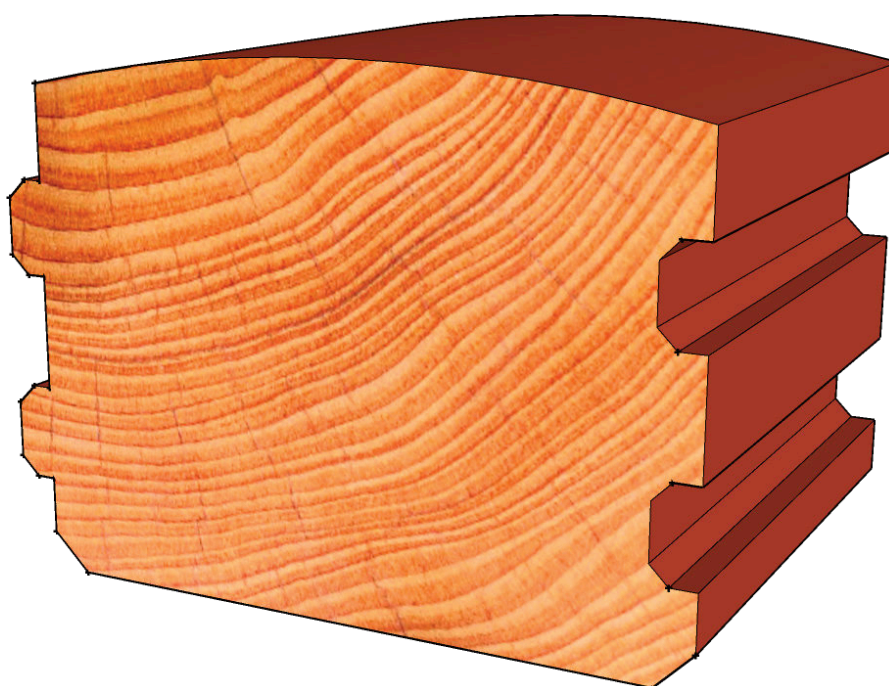

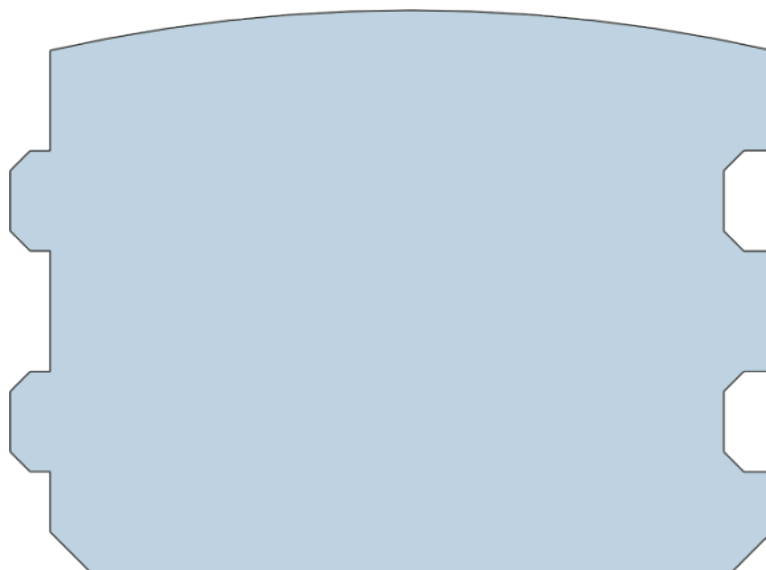

NK02: Panbo/Jeppesen bjælke

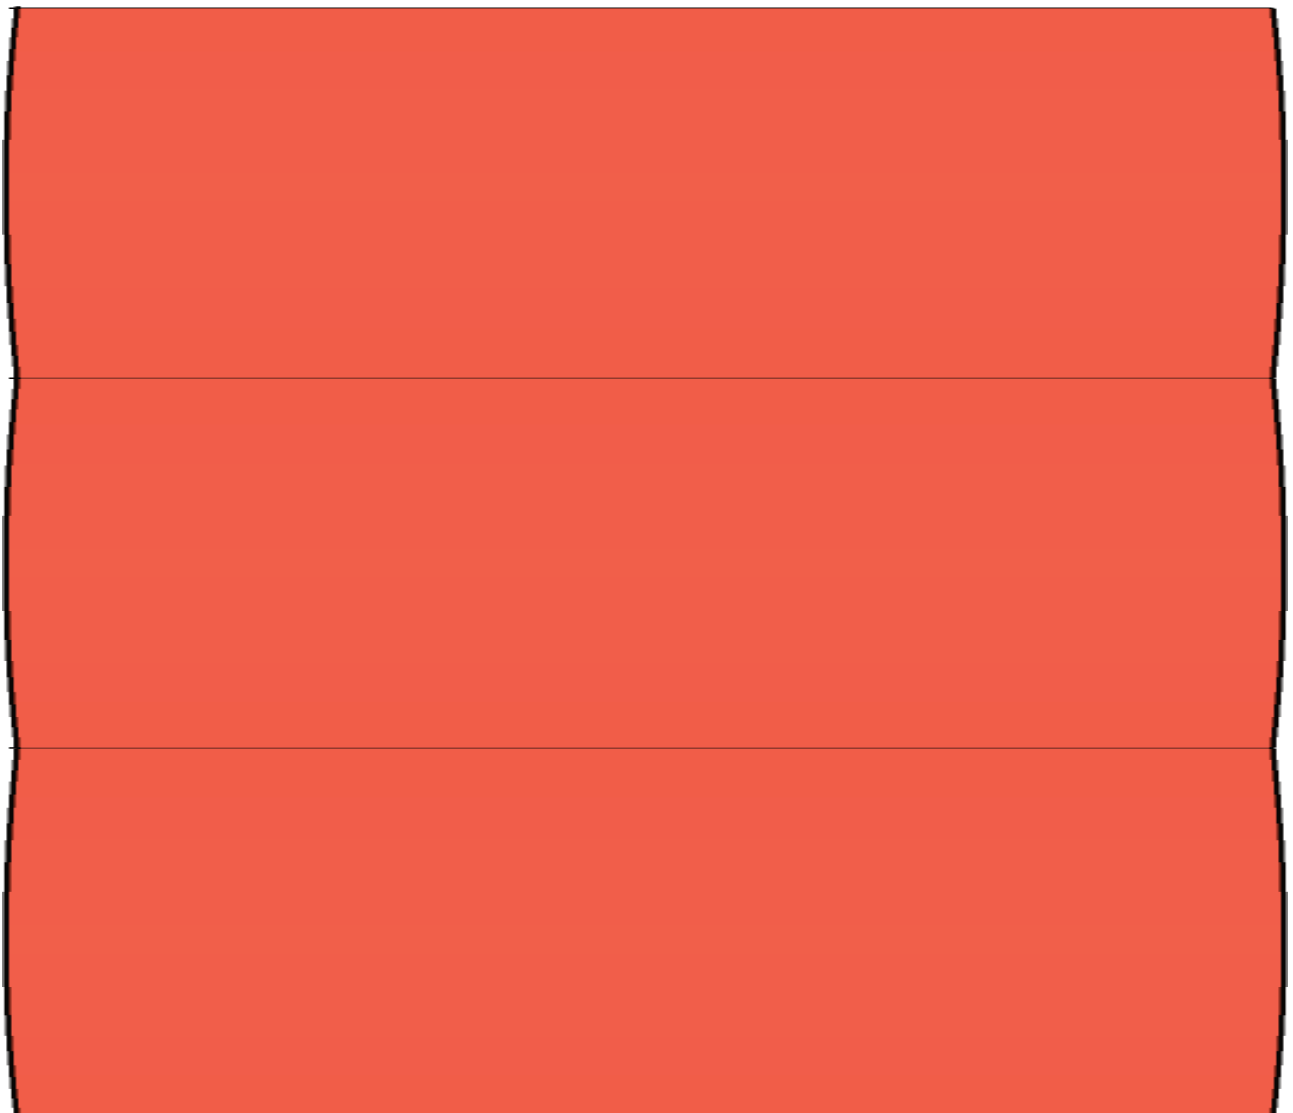

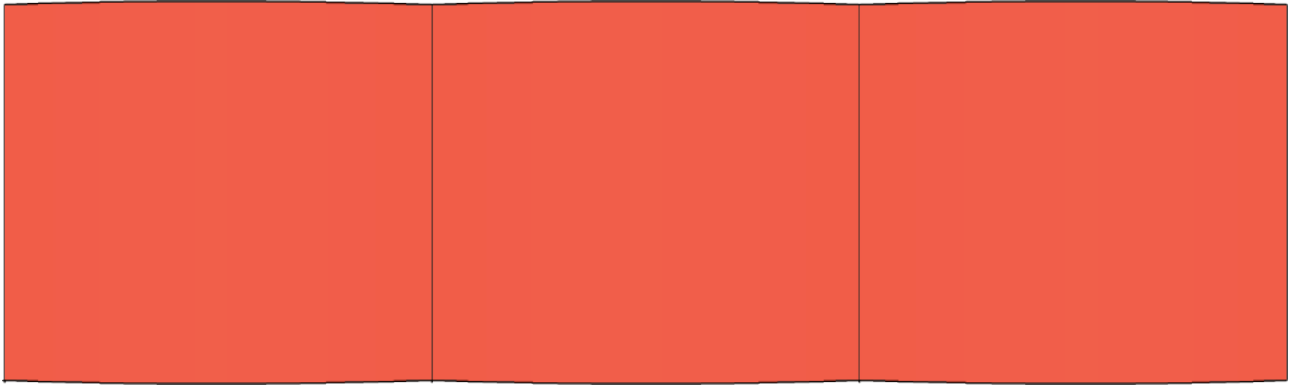

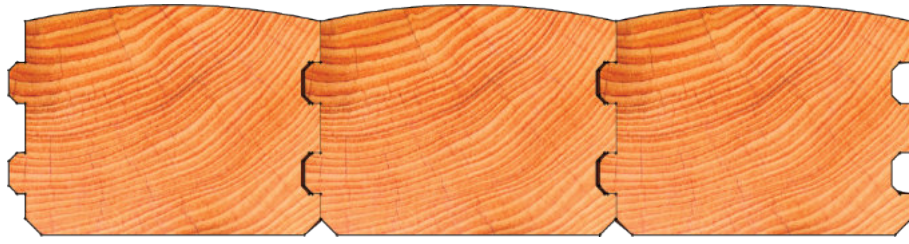

NK03: Amerlog bjælke

Amerlog bjælke 160x185 mm. Denne findes i to versioner med henholdsvis 10 og 15 mm fer og not. Bemærk, at buen på den udvendige side ikke er ens på de to bjælkeprofiler.

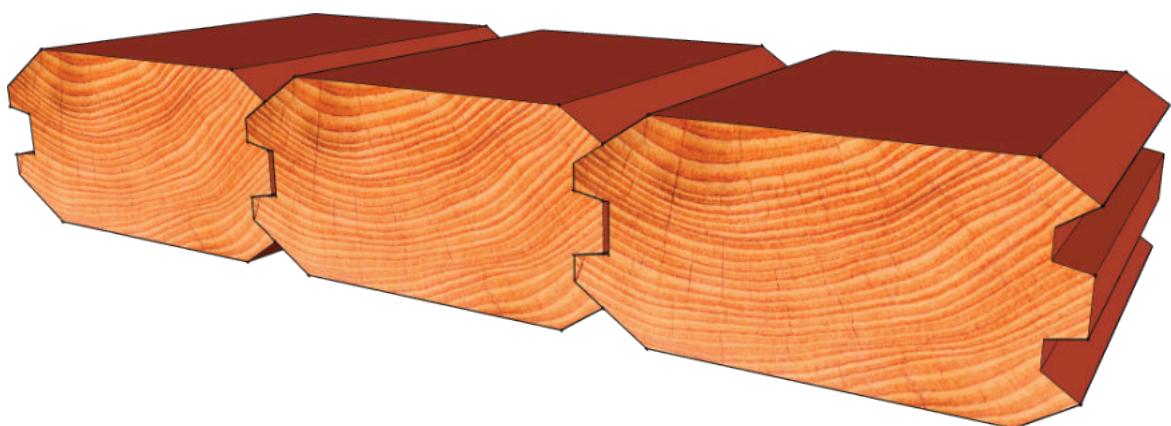

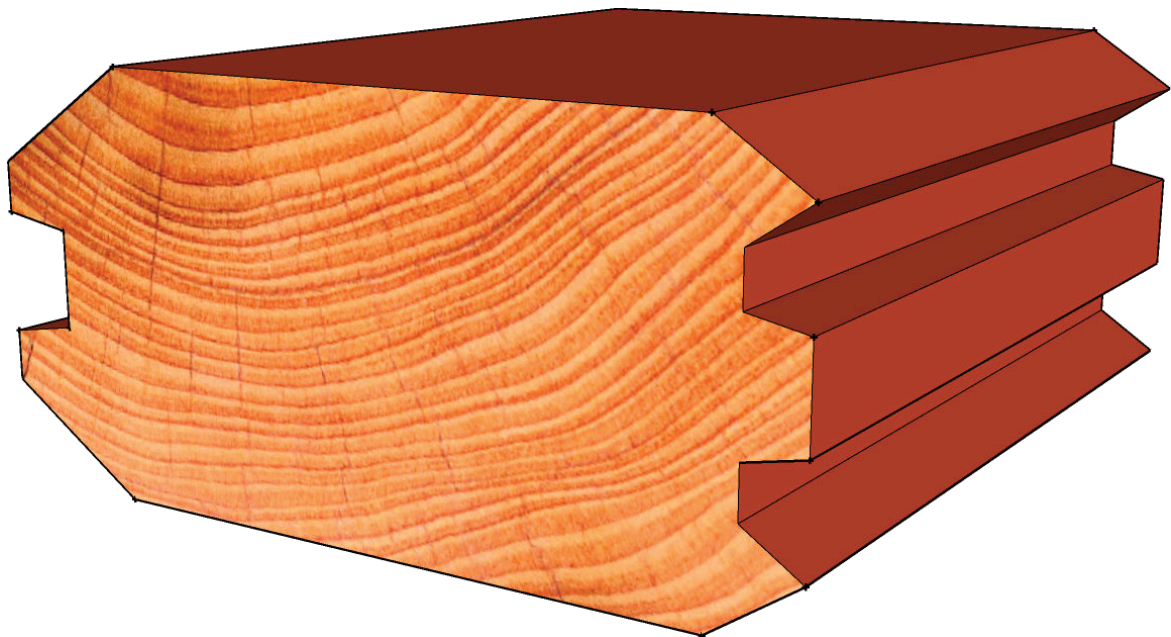

NK03: Amerlog bjælke

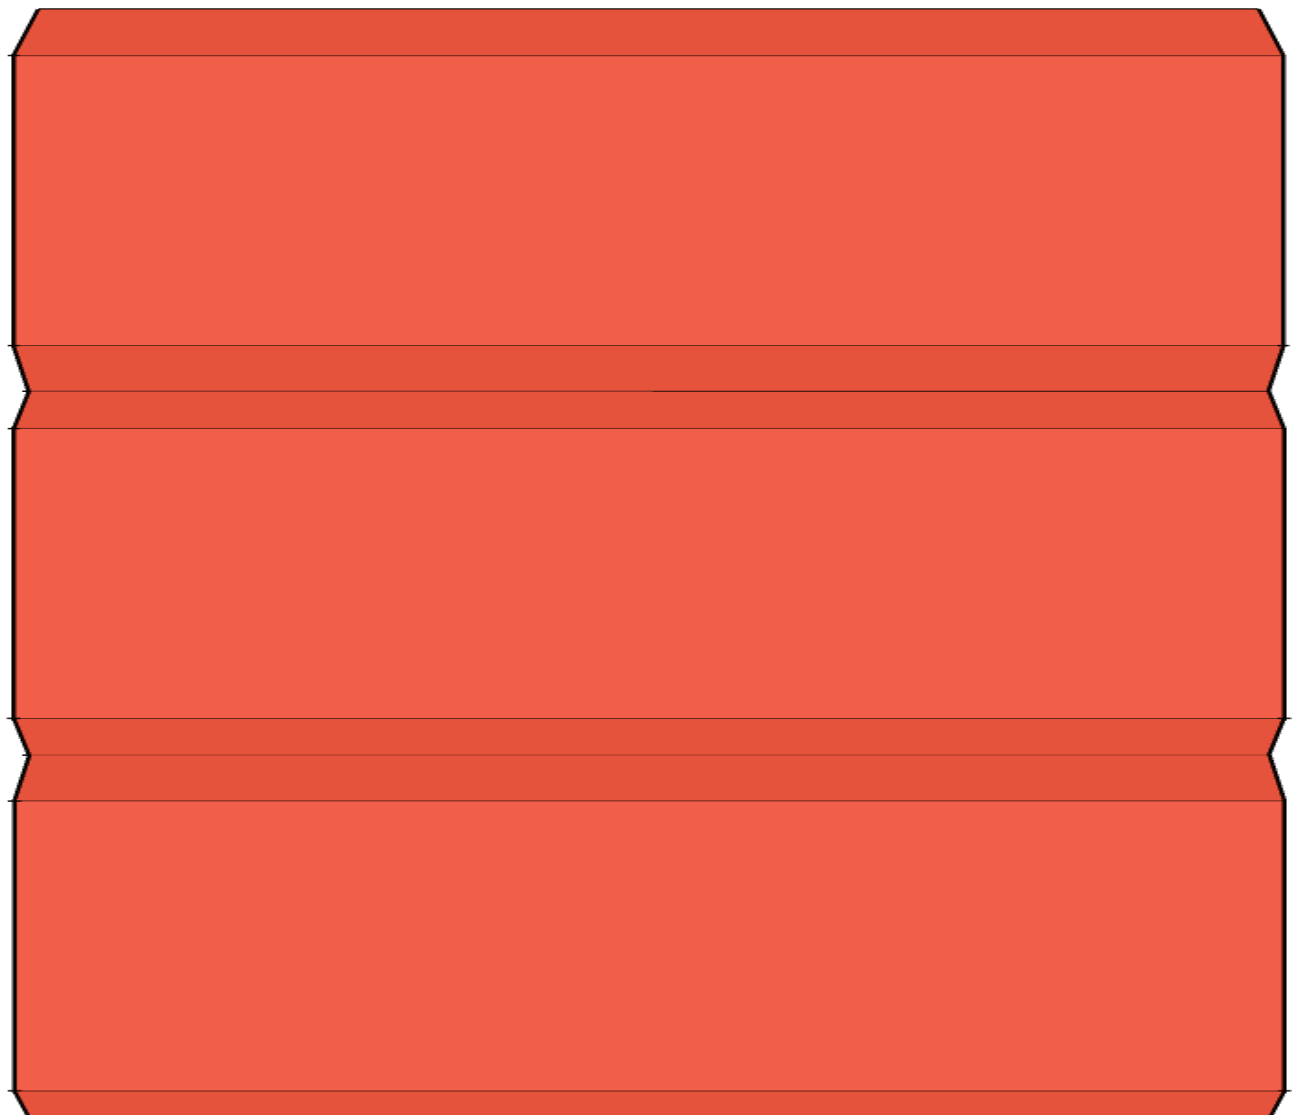

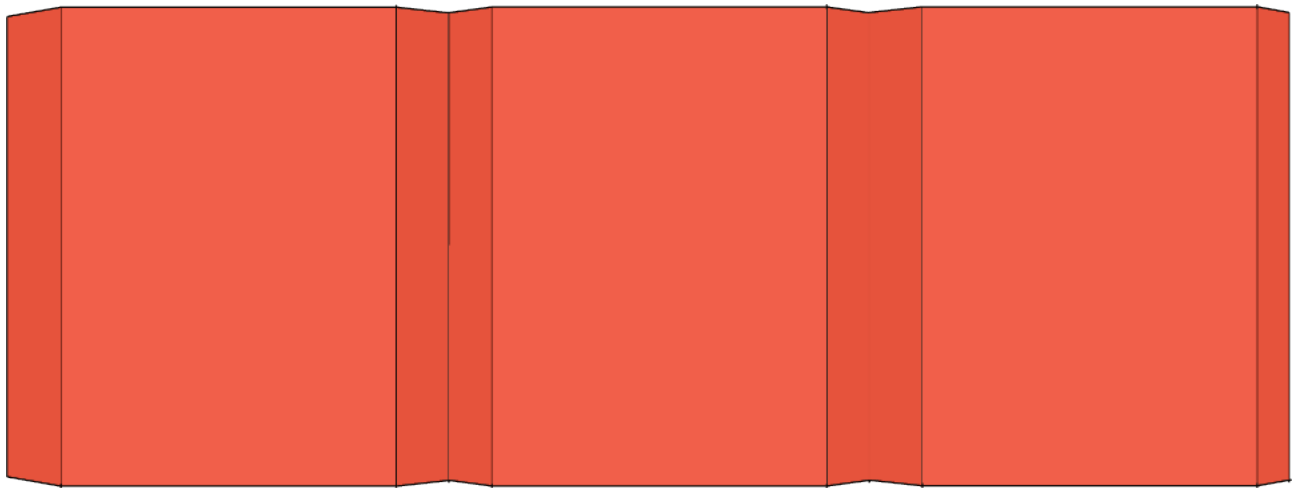

NK04: Bjælkeprofil med skrå kanter

70x140 mm bjælkeprofil med skrå kanter. Denne findes i to versioner med forskellige dybder på not og forskellige vinkler på bjælken.

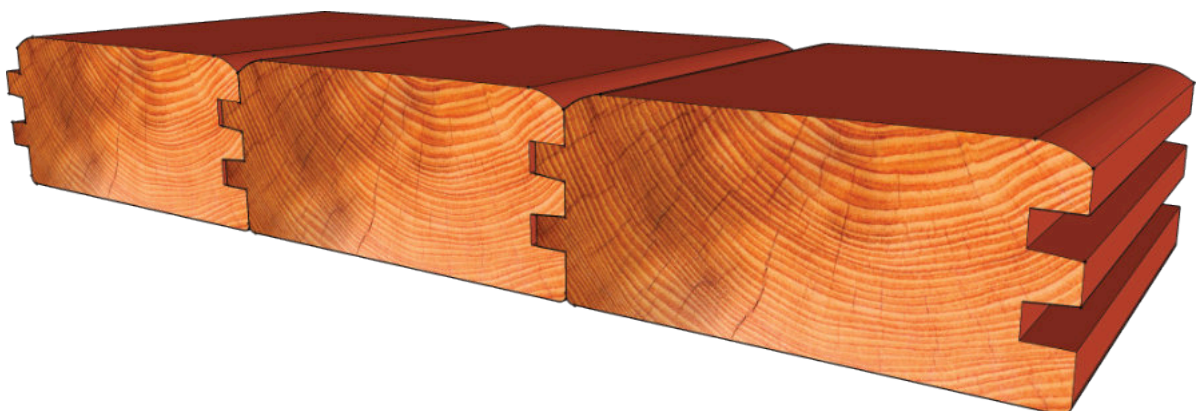

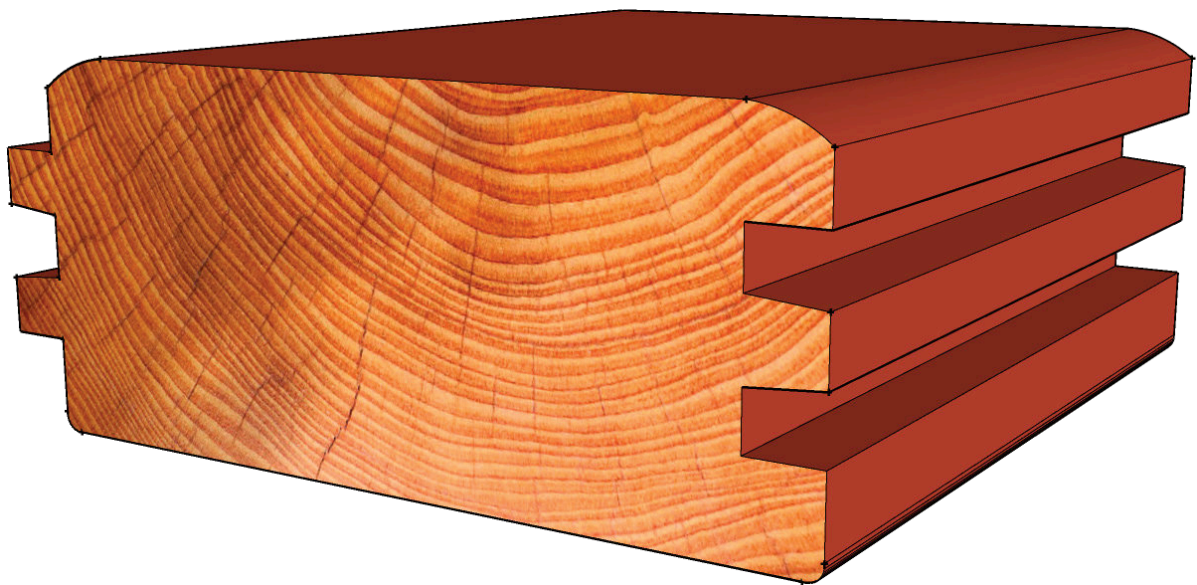

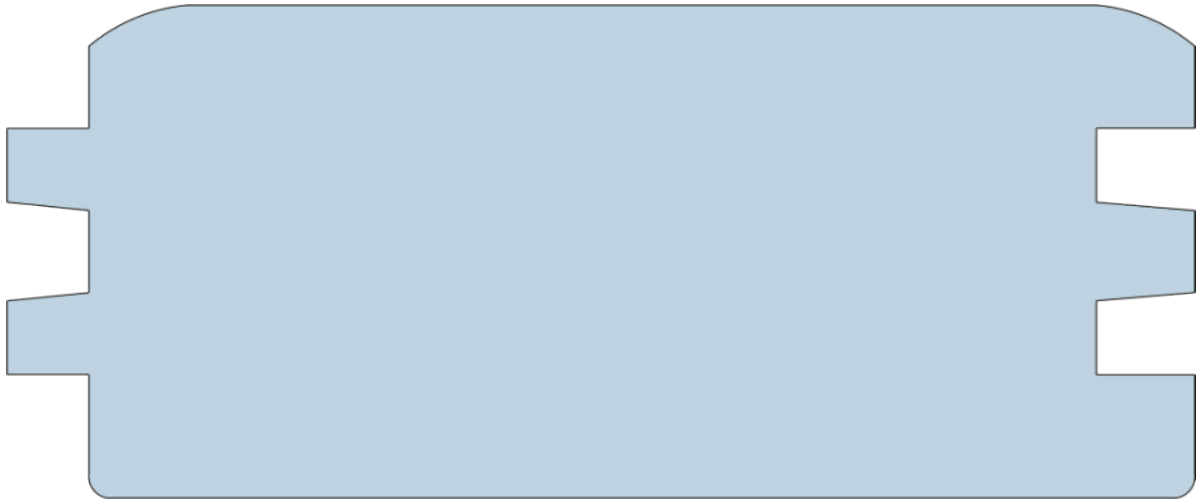

NK04: Bjælkeprofil med skrå kanter

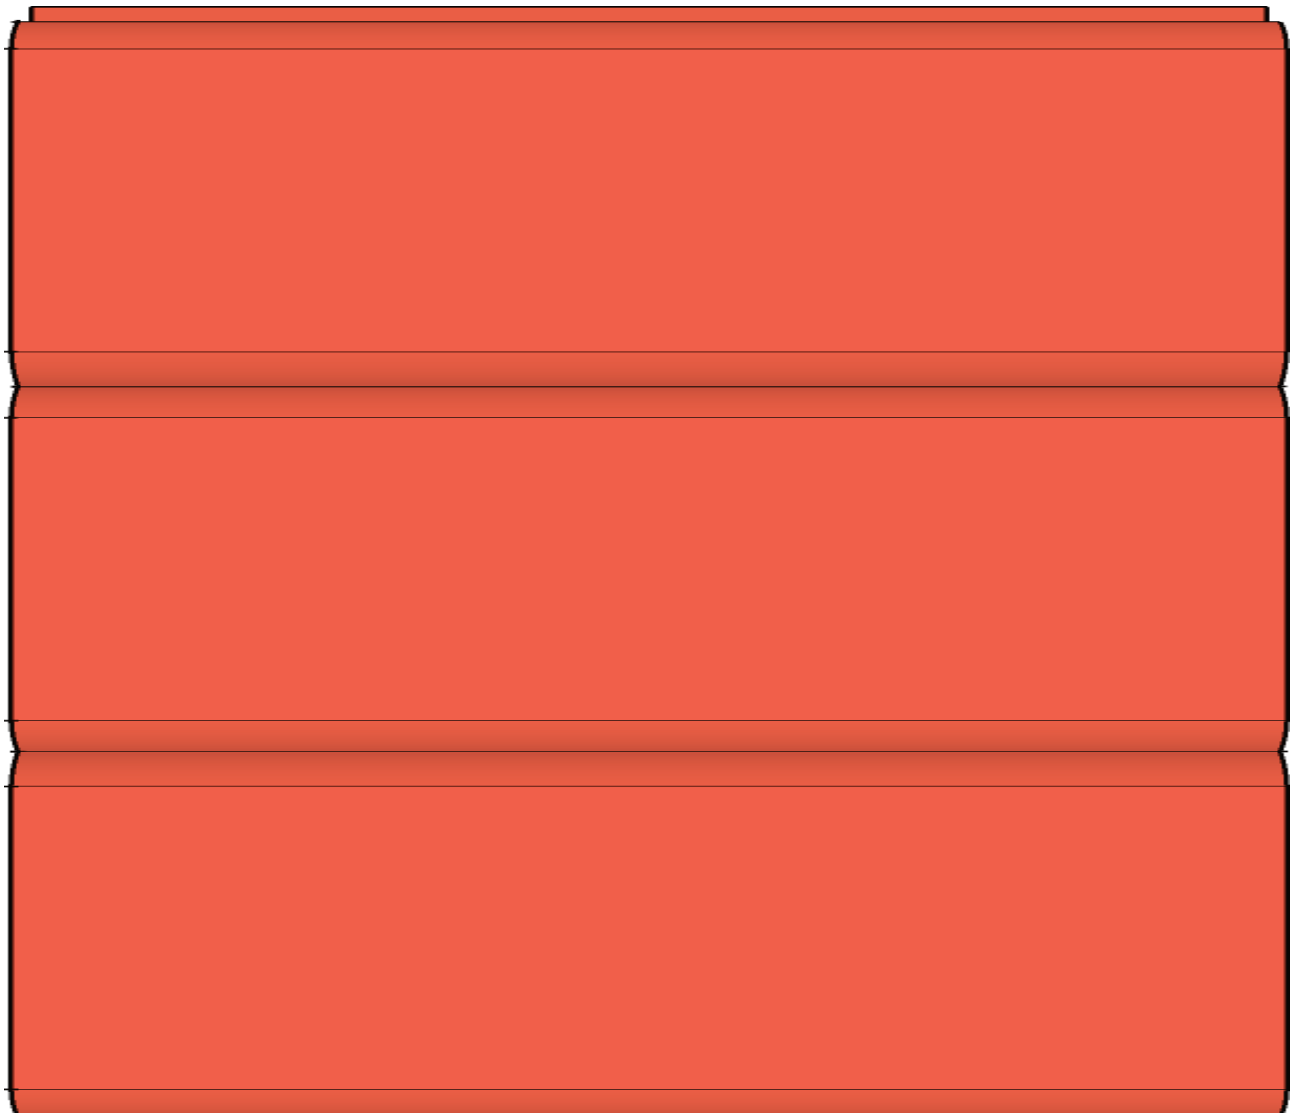

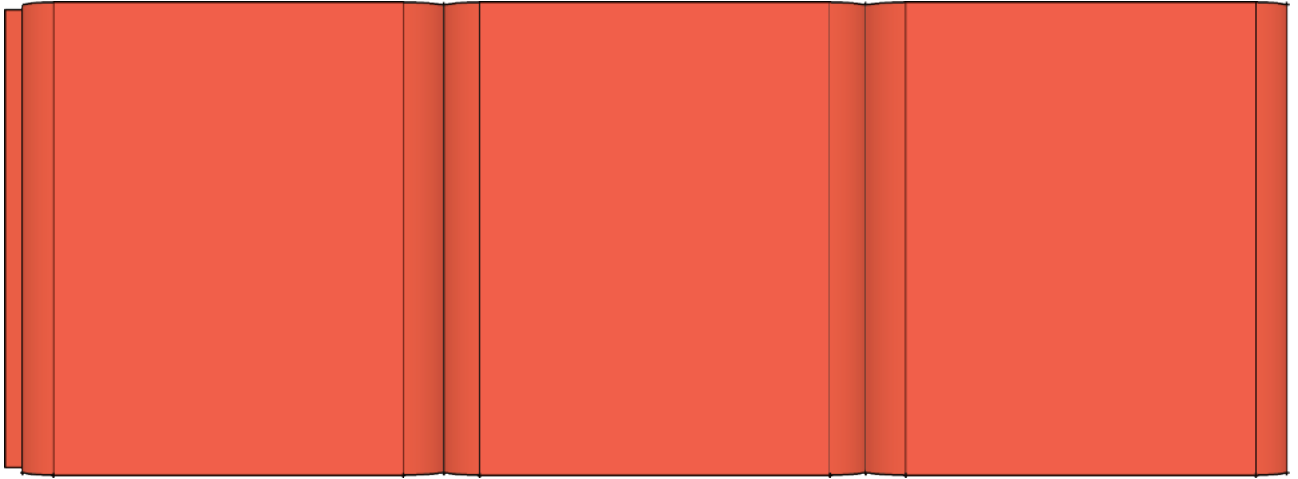

NK05: Bjælkeprofil med rundet forkant

65x140 mm bjælkeprofil med rundet forkant, der sikrer en drypnæse og lang holdbarhed.

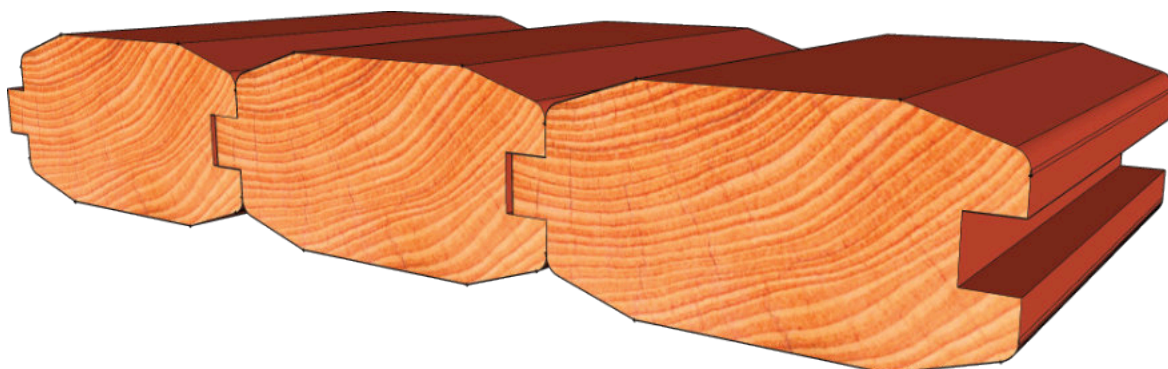

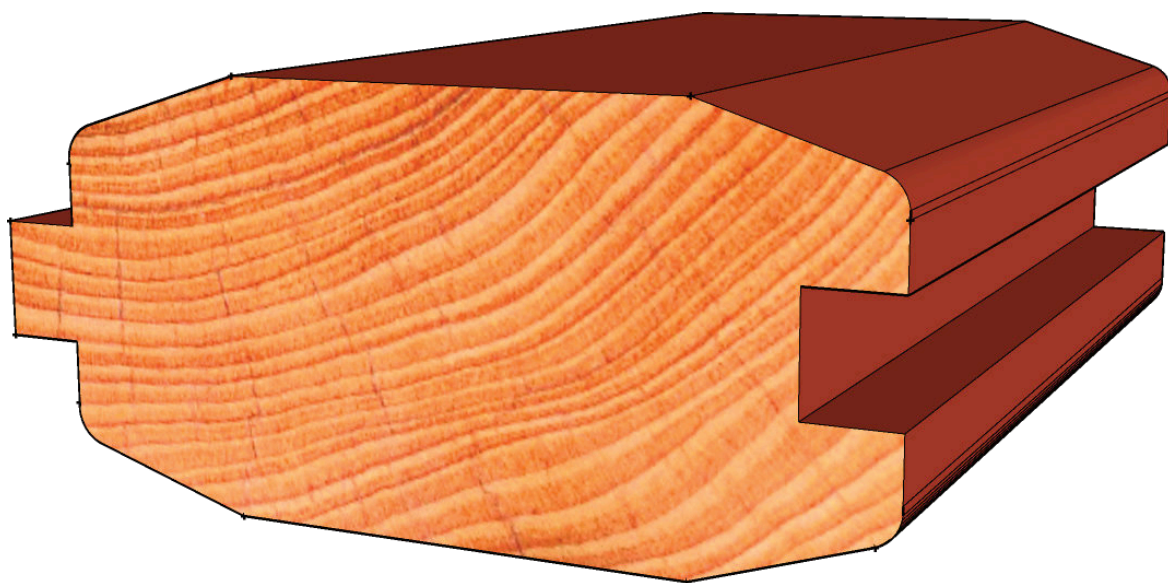

NK05: Bjælkeprofil med rundet forkant

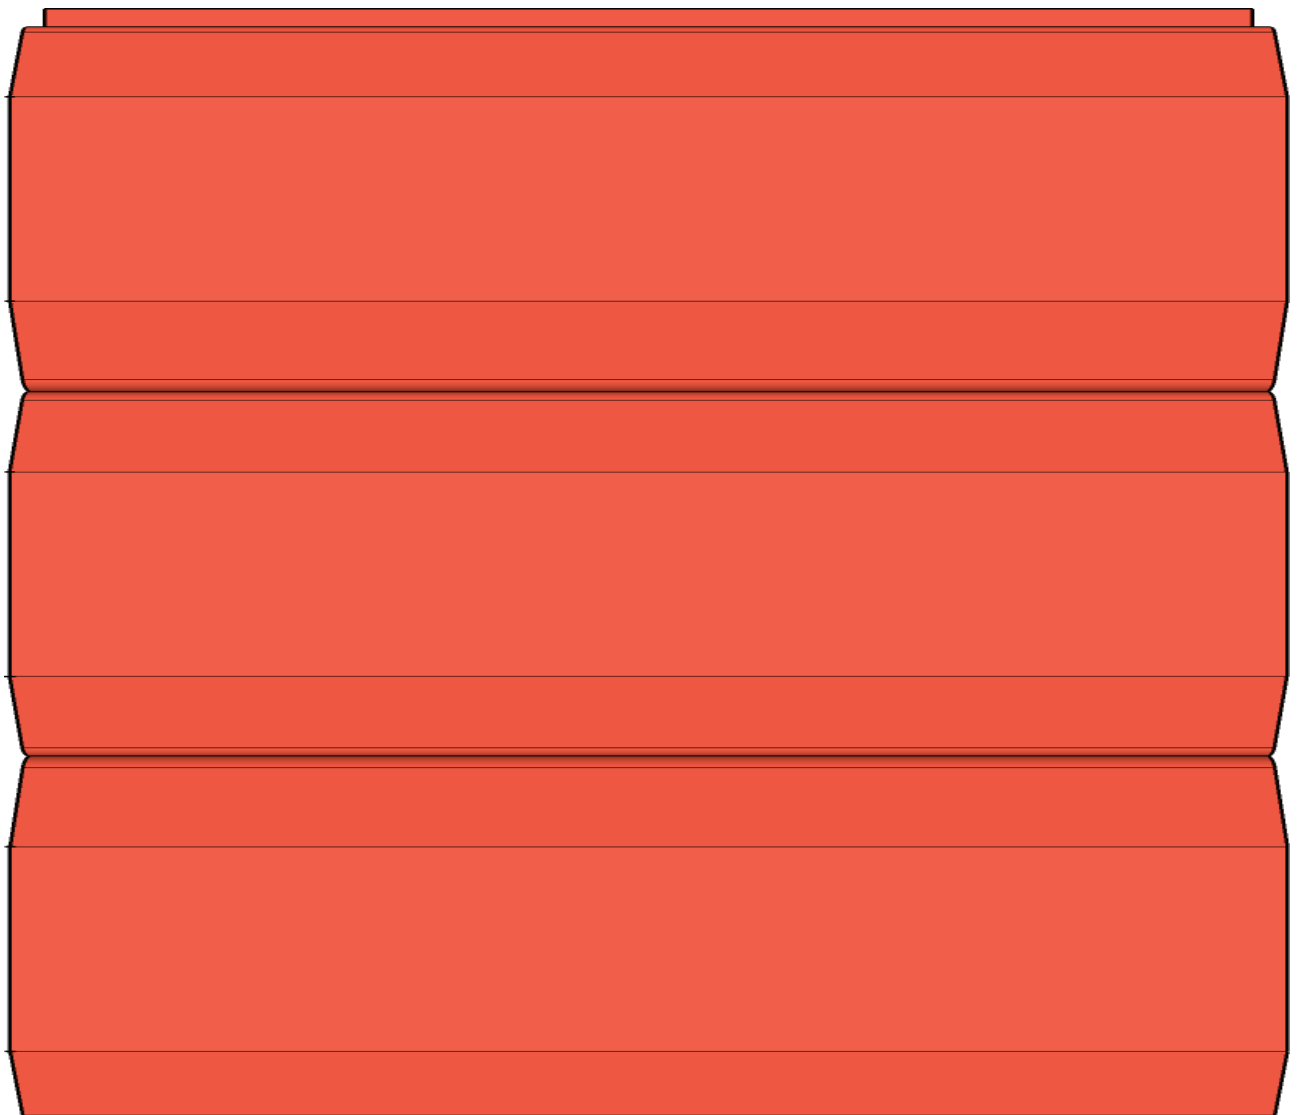

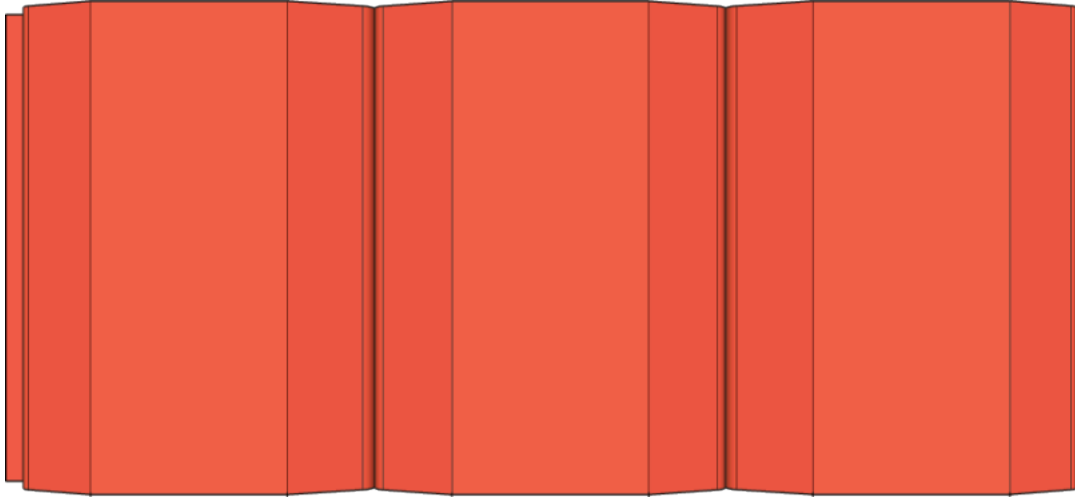

NK06: Simple beam with groove and notch

70x145 mm beam profile with single groove and notch.
Simple beam with a rustic effect. Available in several
sizes.

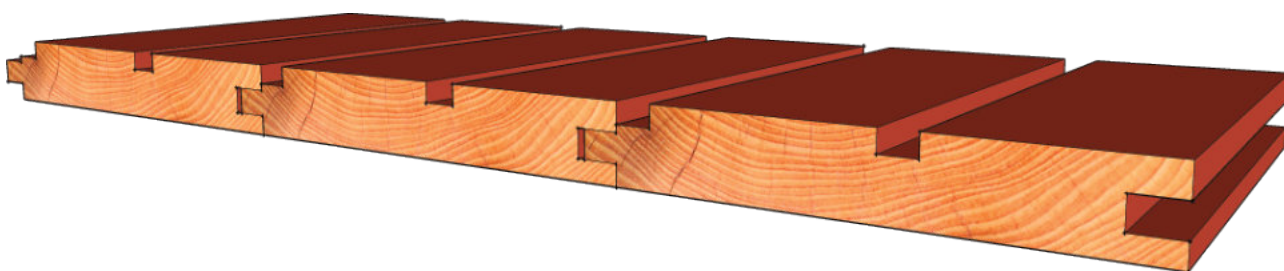

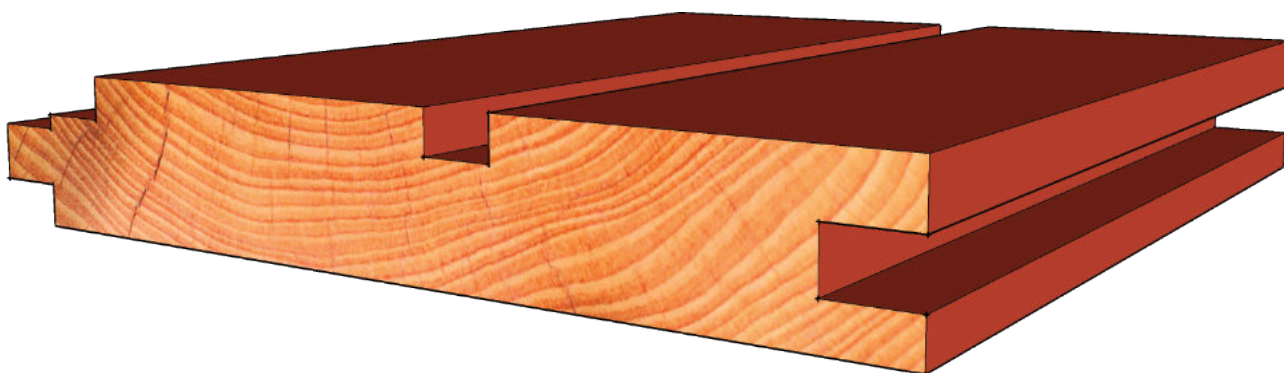

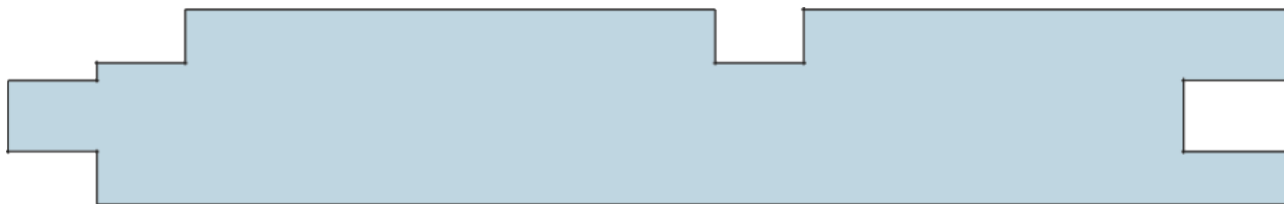

NK06: Simple beam with ridge and notch

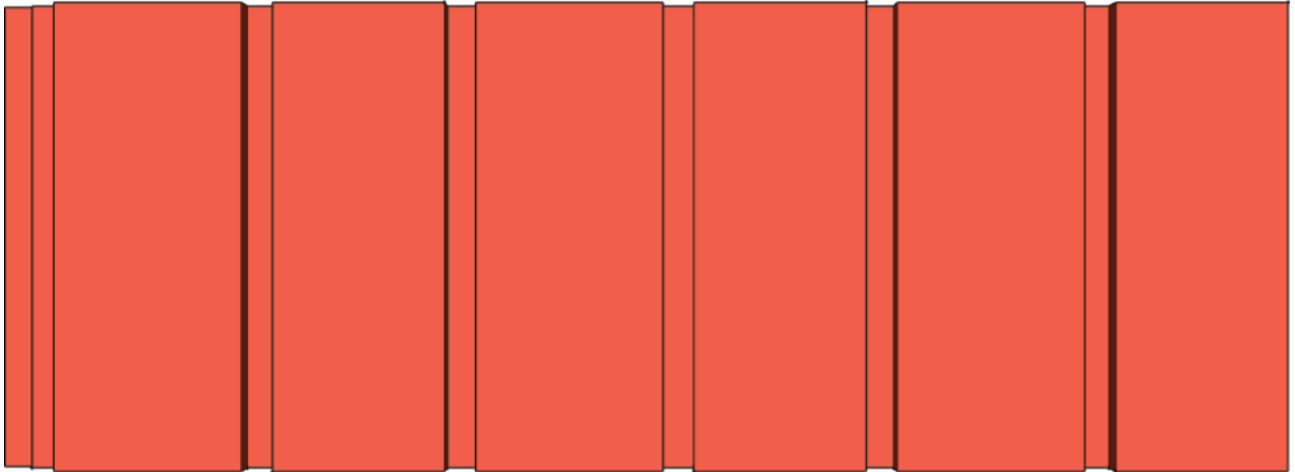

NK07: Listeprofil til facadebeklædning

Facadebeklædning, listeprofil 22x145 mm med synlige lister på 57 mm og 10 mm fer og not.

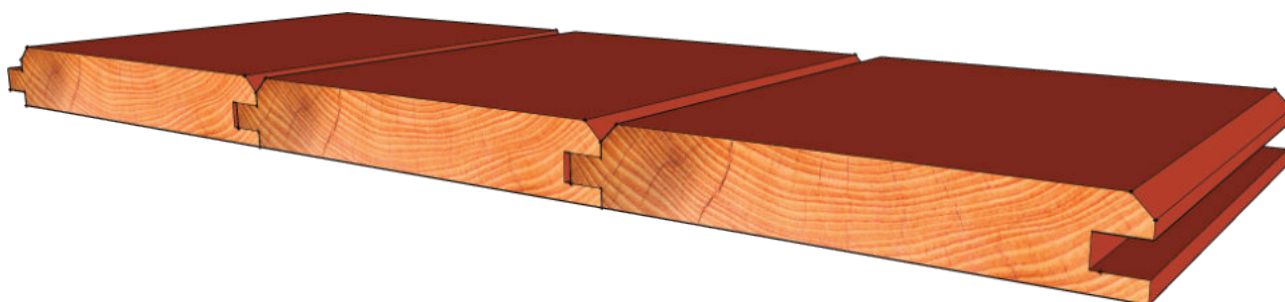

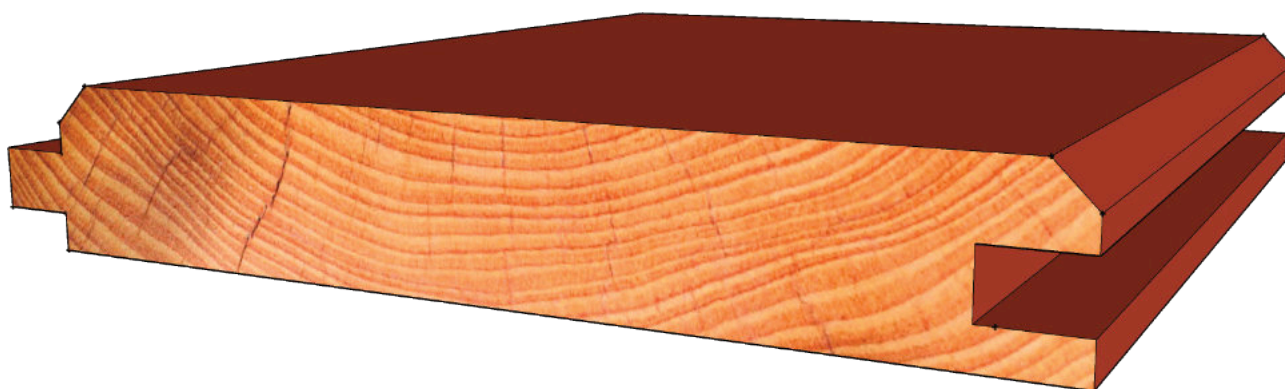

NK07: Listeprofil til facadebeklædning

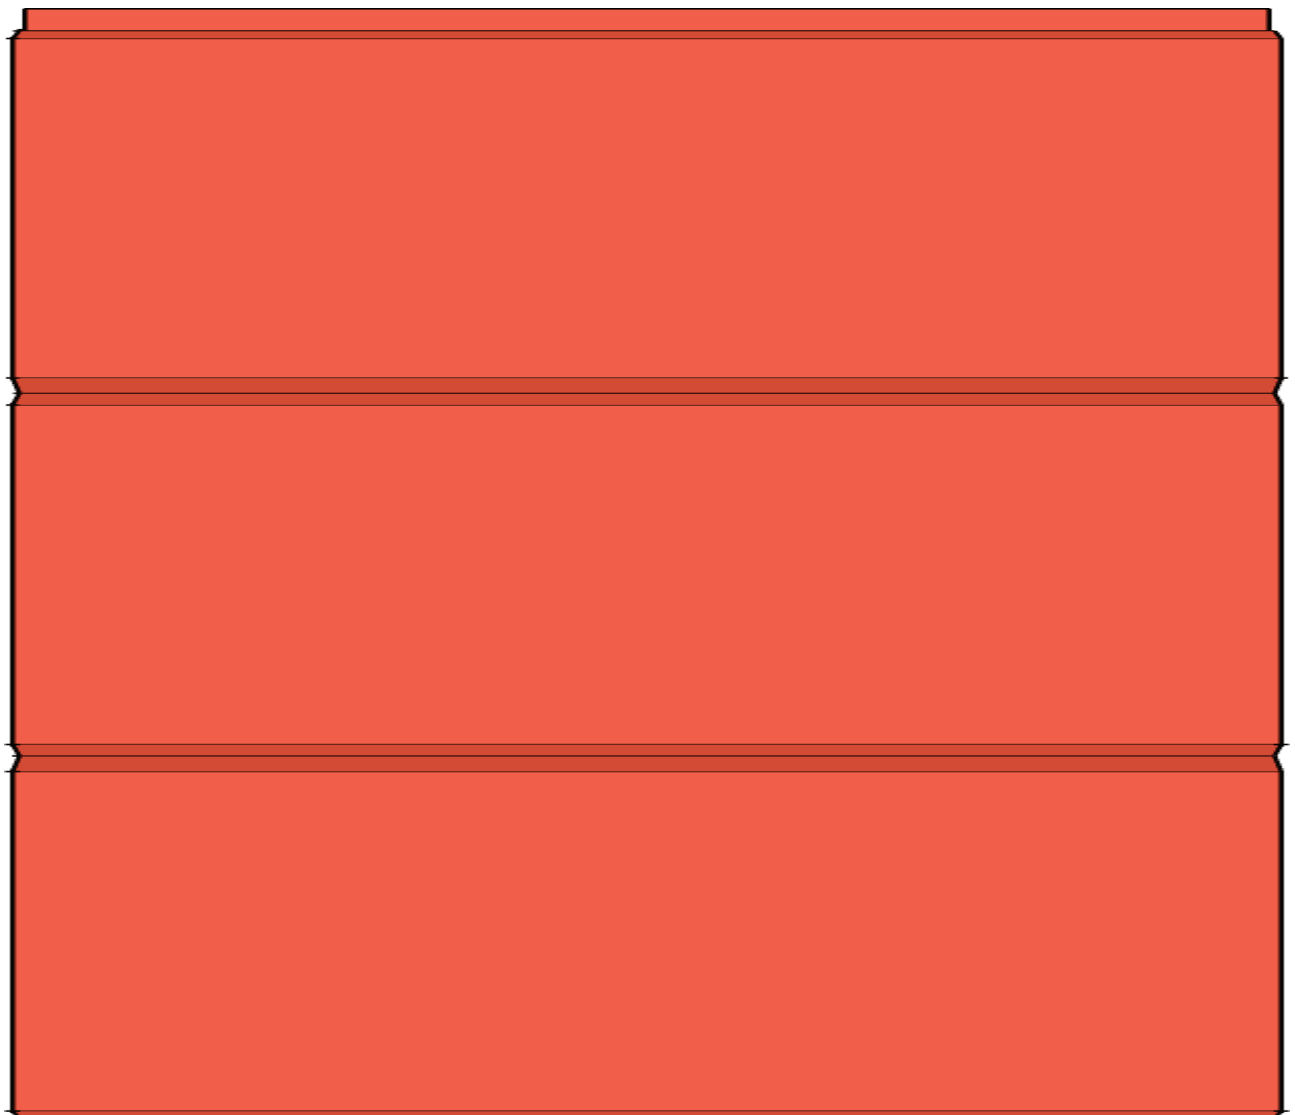

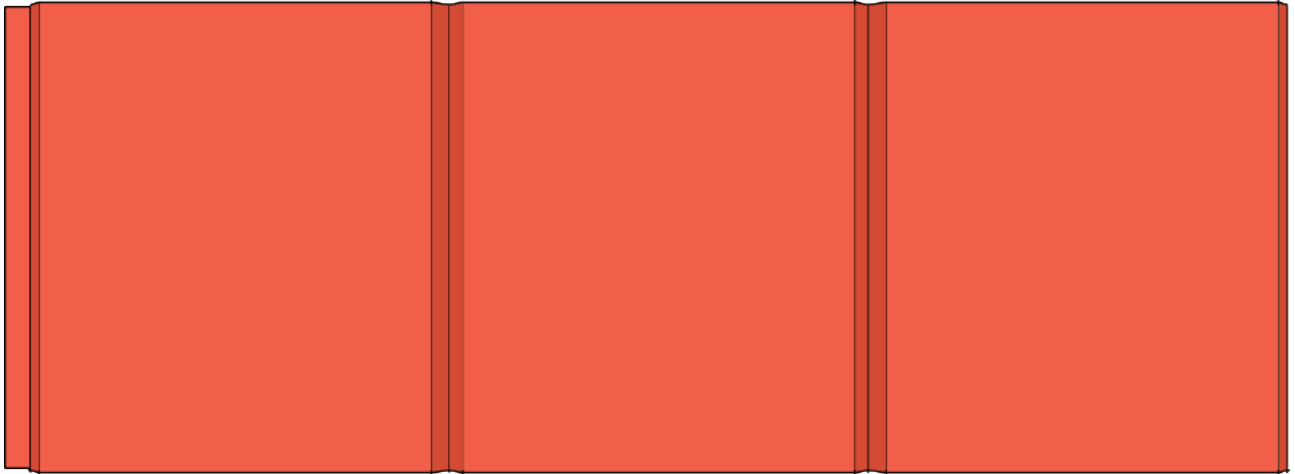

NK08: Stilren facadebeklædning

Stilren facadebeklædning med 10 mm fer og not samt 45 grader skrå fas. Fås i flere tykkelser og bredder. Kan bruges både lodret og vandret som facade.

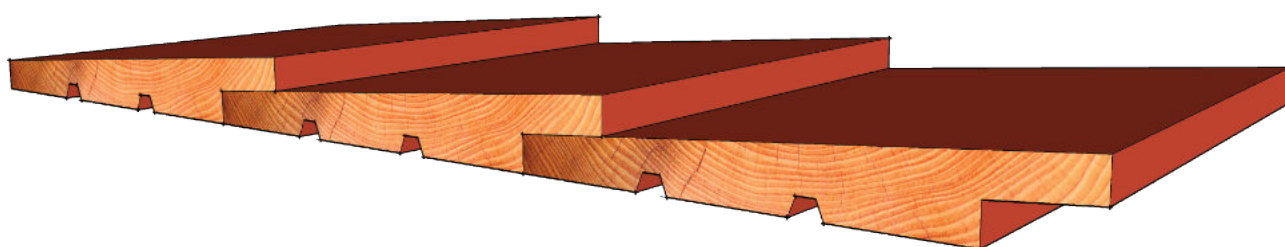

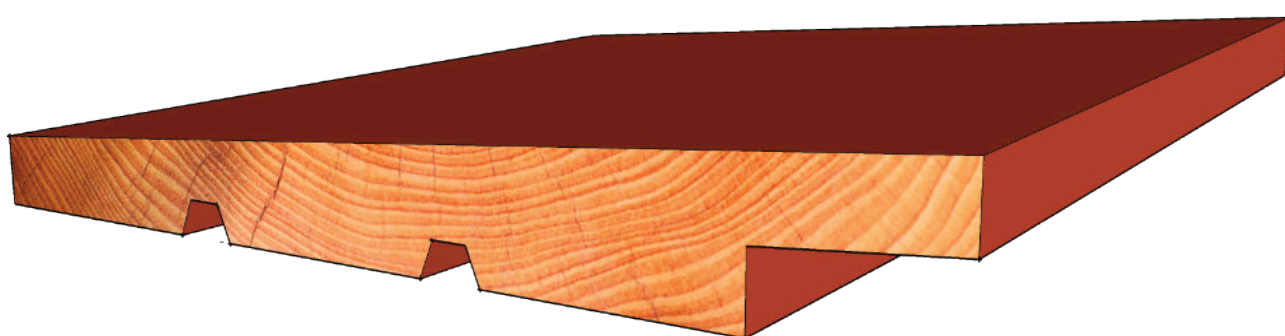

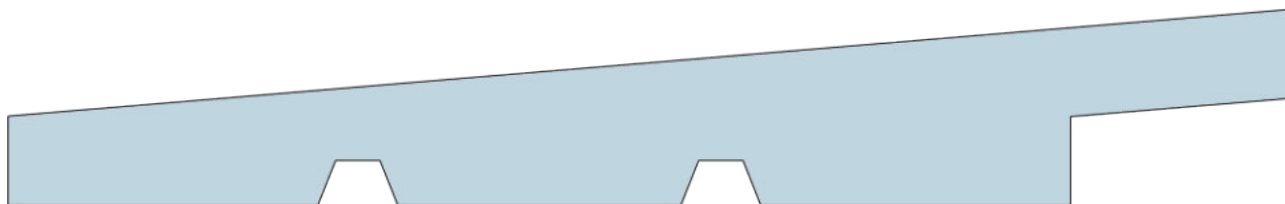

NK08: Stilren facadebeklædning

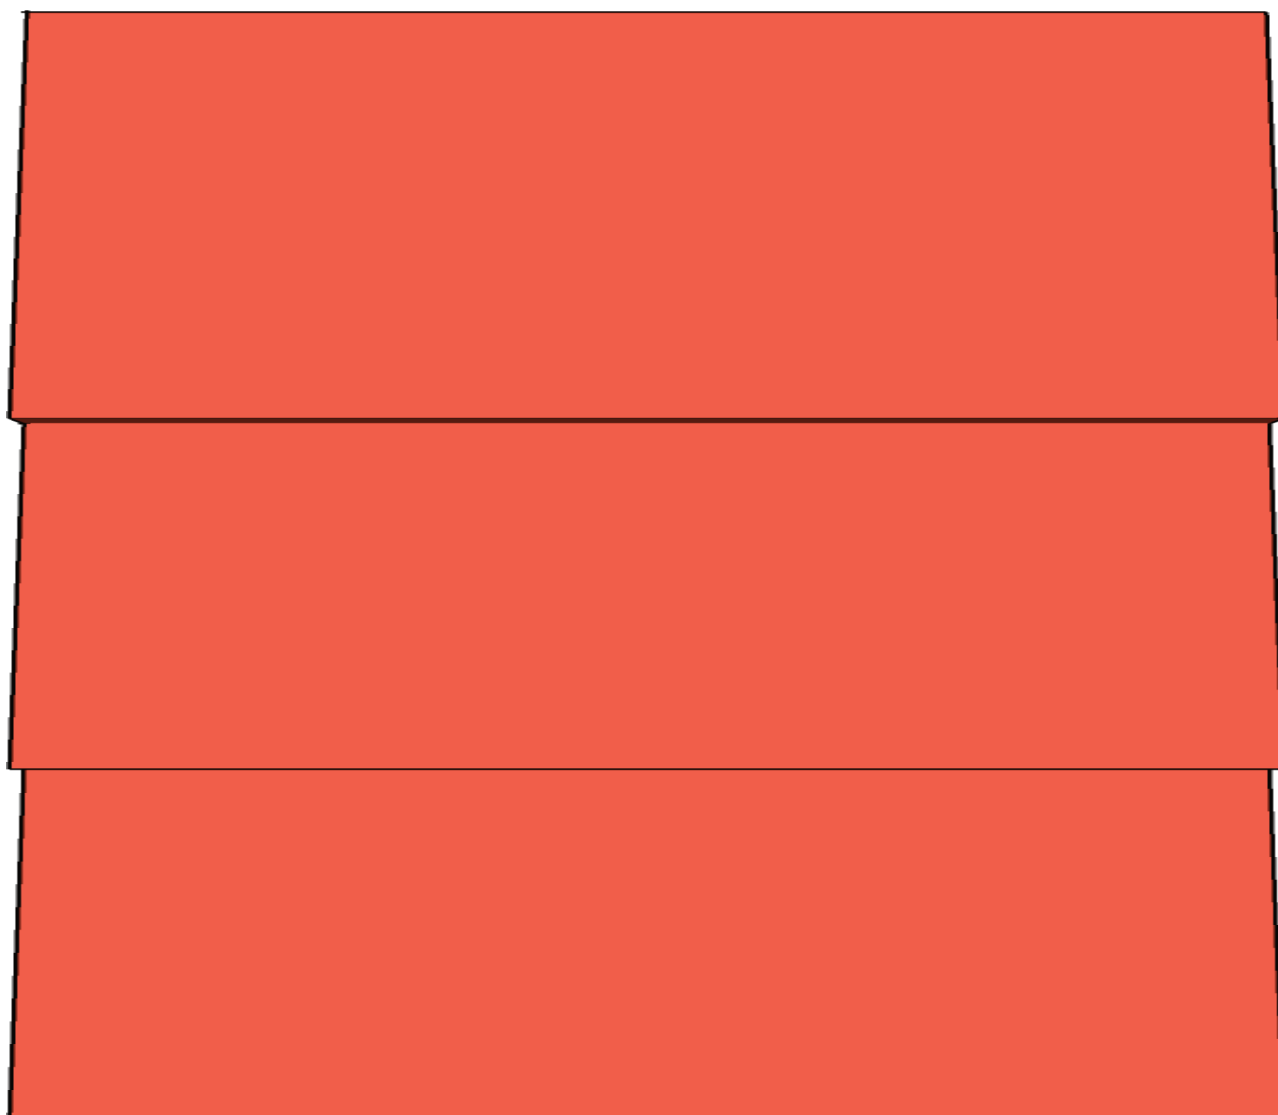

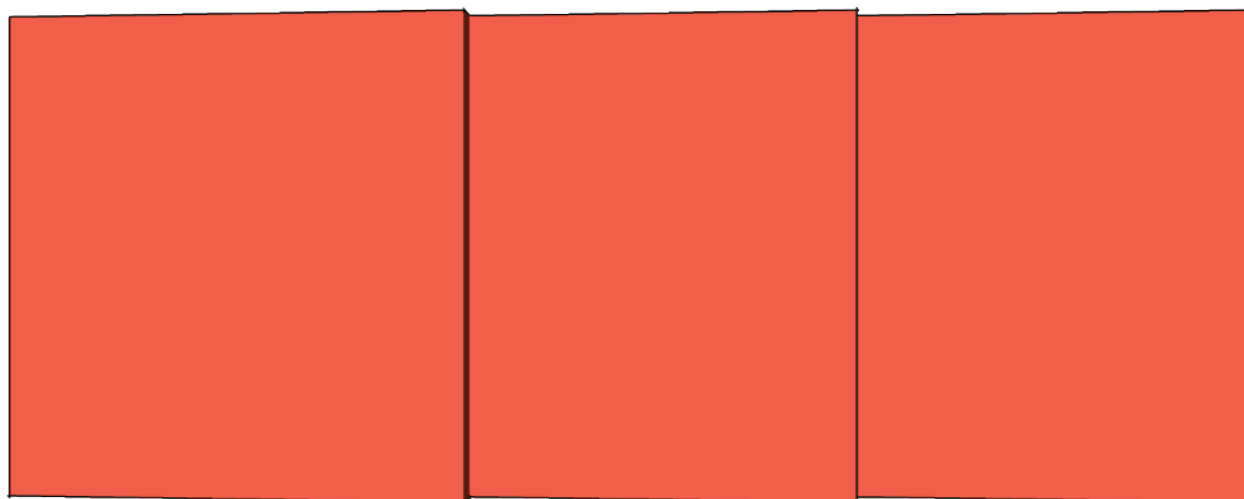

NK09: Klinkbeklædning med drypnæse

Klinkbeklædning 22x145 mm med 6 grader skrå kant og 4 grader skrå forkant som drypnæse. Beklædningen har en høvlet forside og en 22 mm dyb fals.

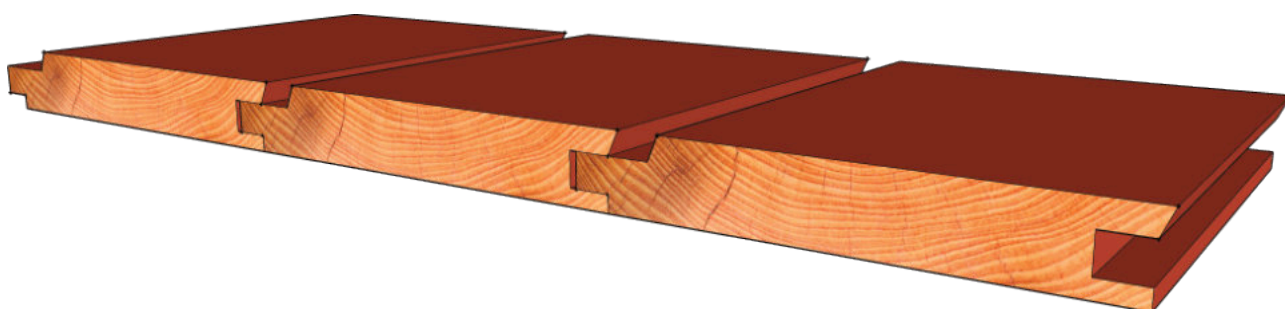

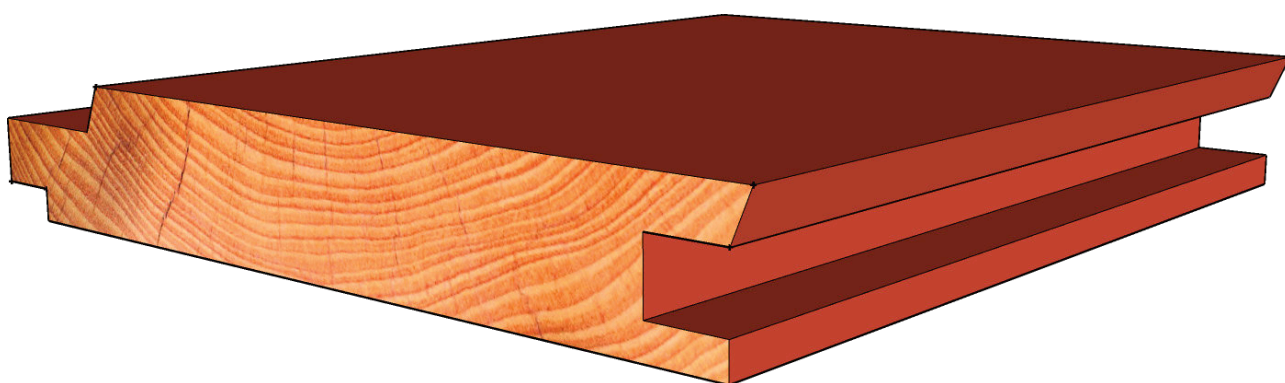

NK09: Klinkbeklædning med drypnæse

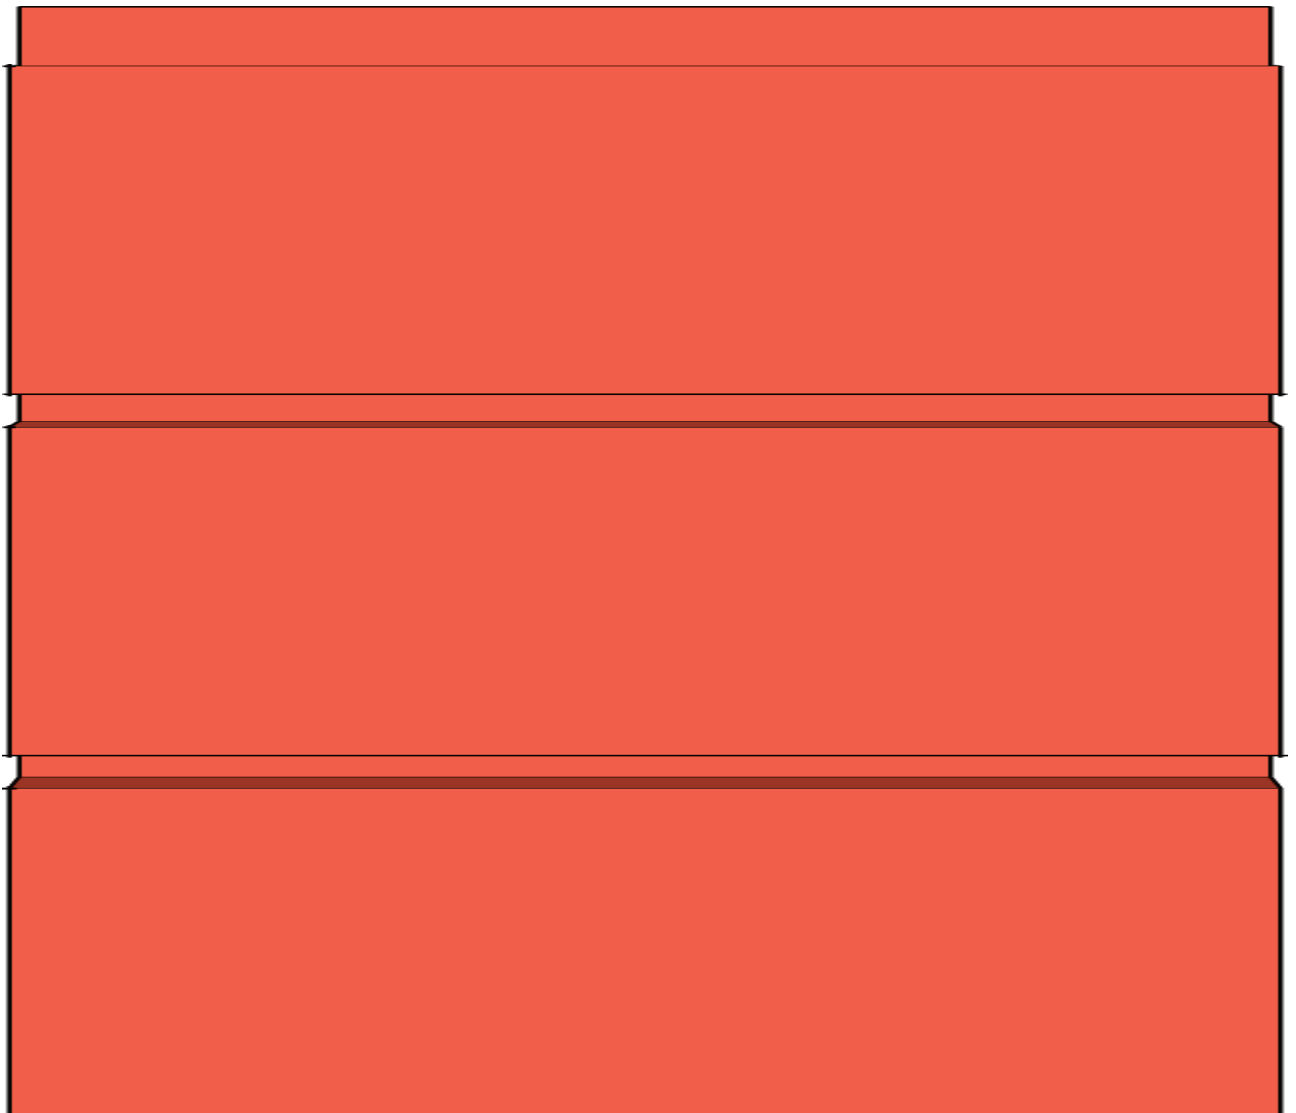

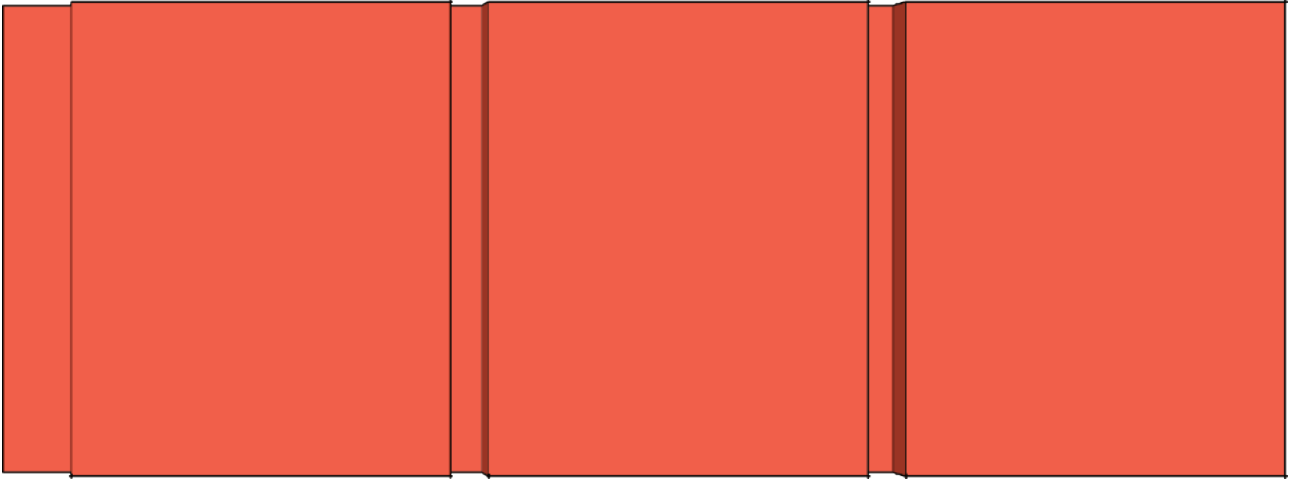

NK10: Skyggeprofil rumbebeklædning

Skyggeprofil rumbebeklædning 22x145 mm med 15 grader skrå kant og 10 mm fer og not. Skaber en smuk dybdeeffekt som facade. De 15 grader sikrer en perfekt drypnæse og lang holdbarhed. Fås i flere tykkelser og bredder.

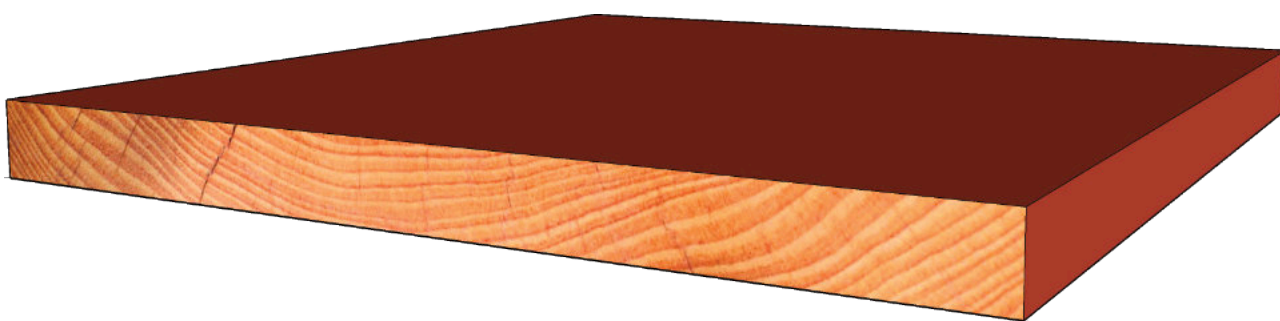

NK10: Skyggeprofil rumbebeklædning

NK11a: Inderbræt til 1på2 facadebeklædning

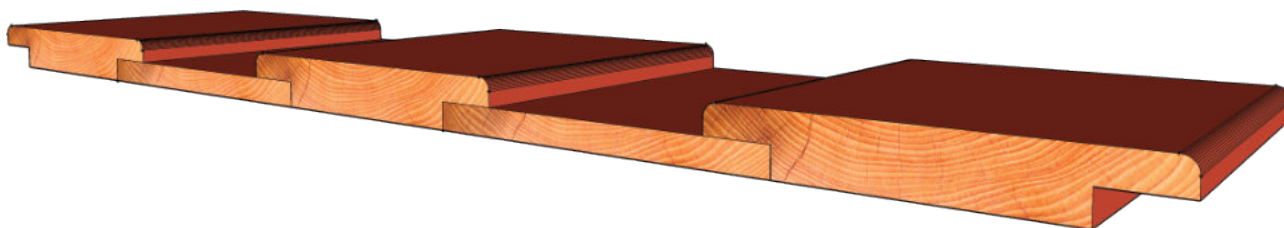

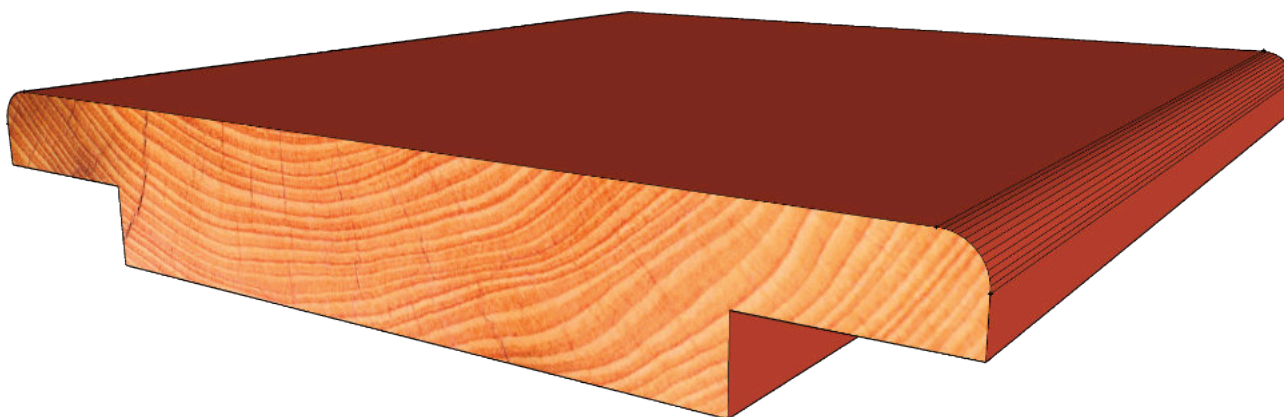

Inderbræt til vores 1på2 facadebeklædning
12x145 mm. Fås i flere bredder med enten ru eller
høvlet overflade.

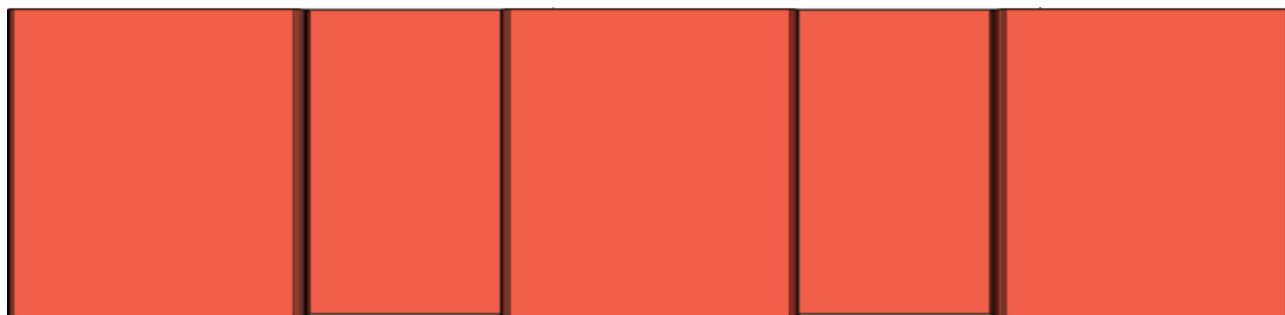

NK01: Panbo-bjælke

NK11: Yderbræt til 1på2 facadebeklædning

Yderbræt til vores 1på2 facadebeklædning med radius 6 runde kanter, 22x145 mm og en 12 mm dyb fals, der er 22 mm bred. Fås i flere bredder.

NK11: Yderbræt til 1på2 facadebeklædning

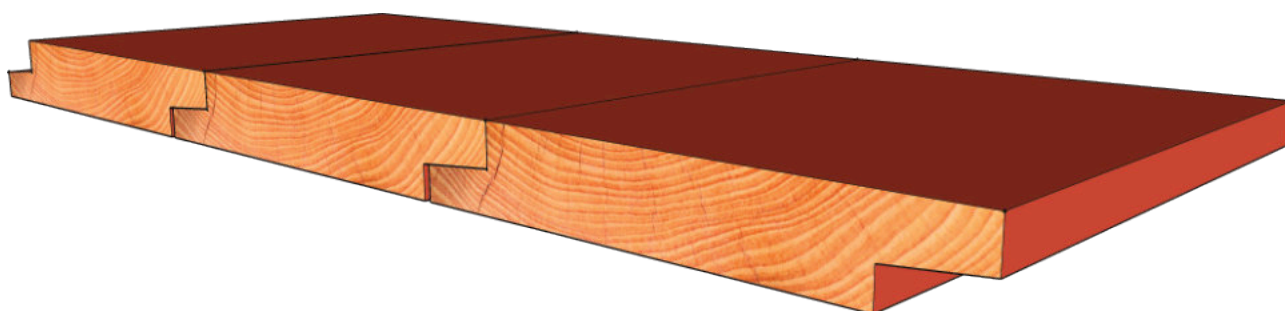

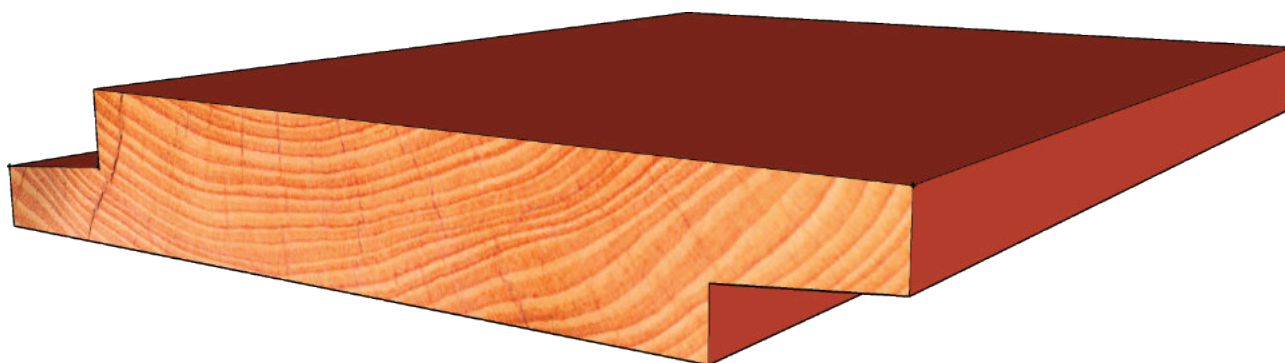

NK12: Z-beklædning

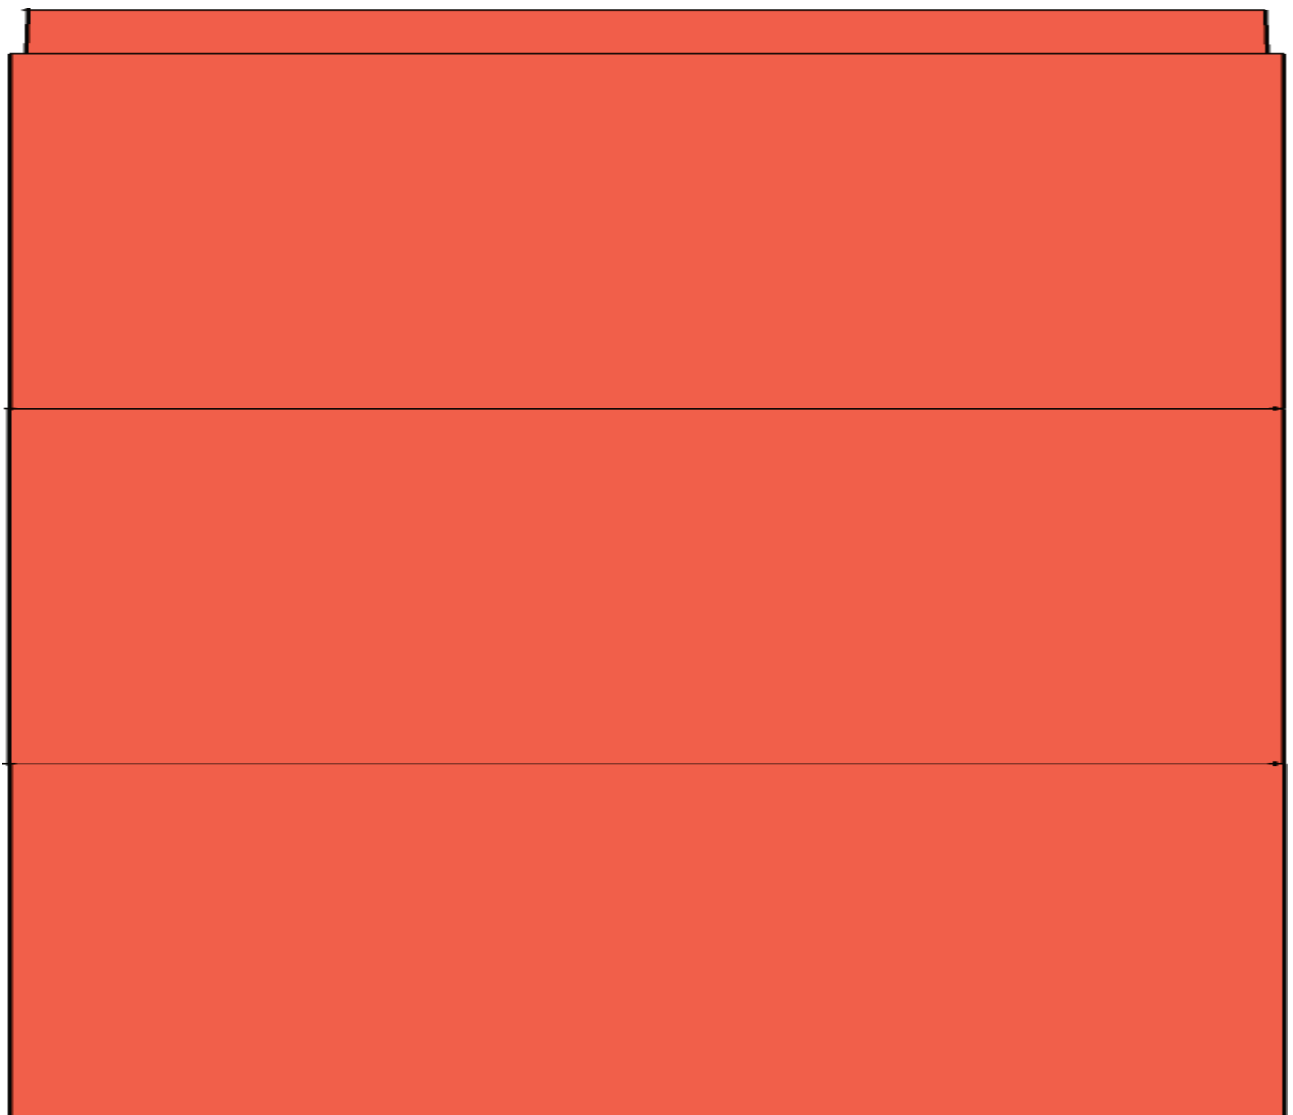

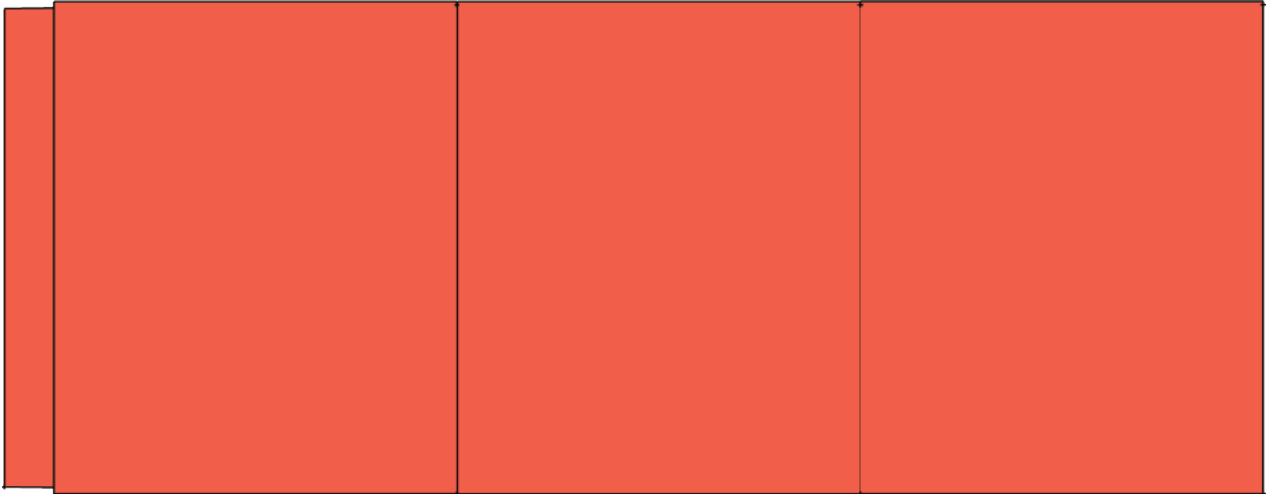

Facadebræt med 7 graders skrå fals (22 mm dyb),
som sikrer, at vandet altid løber af facaden.

Kendes også som en Z-beklædning.

Dimensioner: 22x145 mm. Fås i et hav af tykkelser
og bredder.

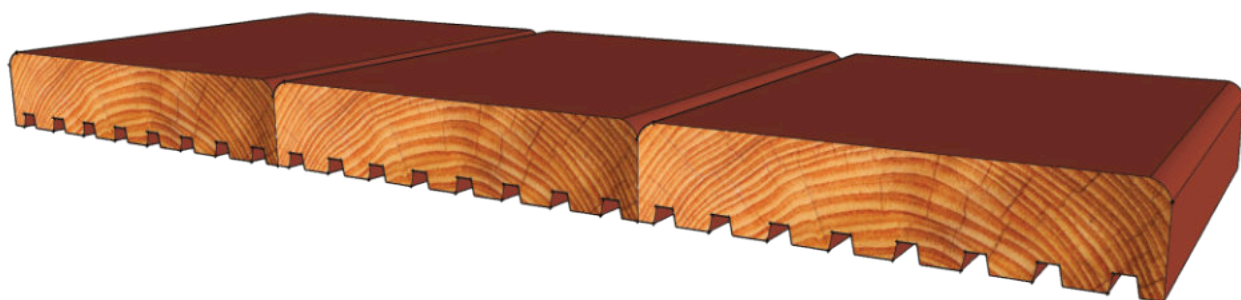

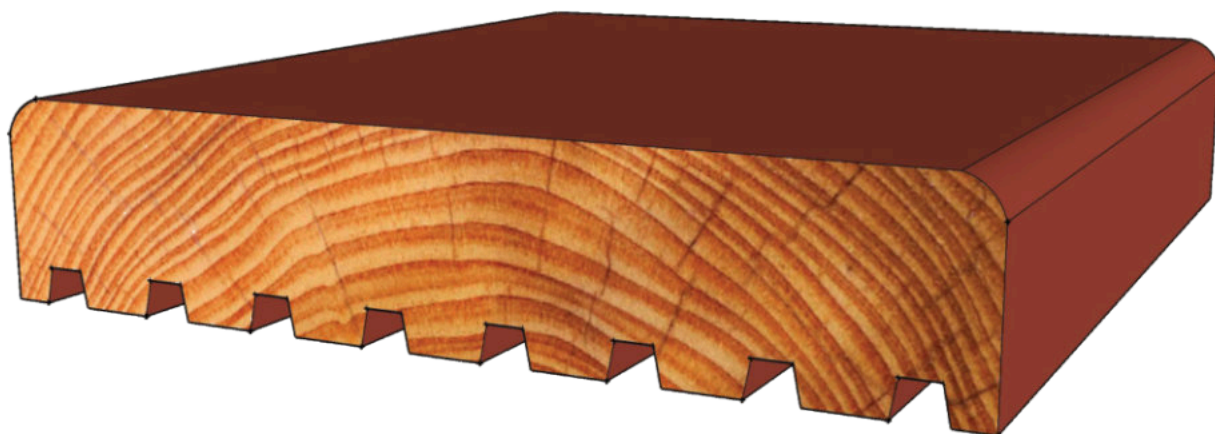

NK12: Z-beklædning

NK13: Terrassebræt med riller

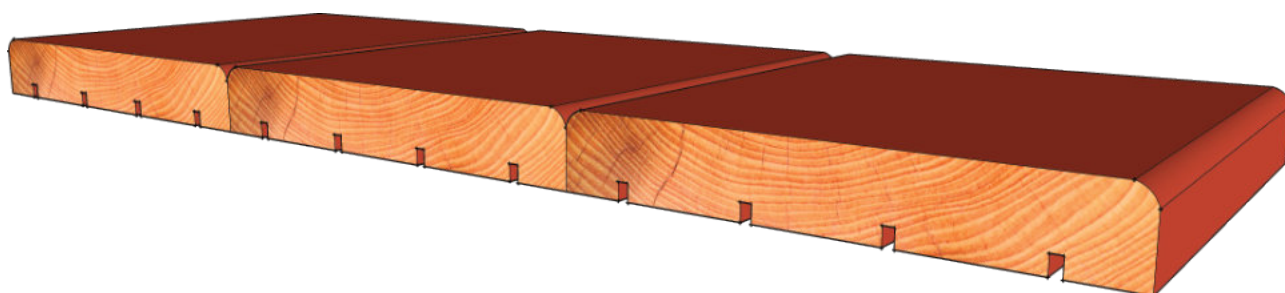

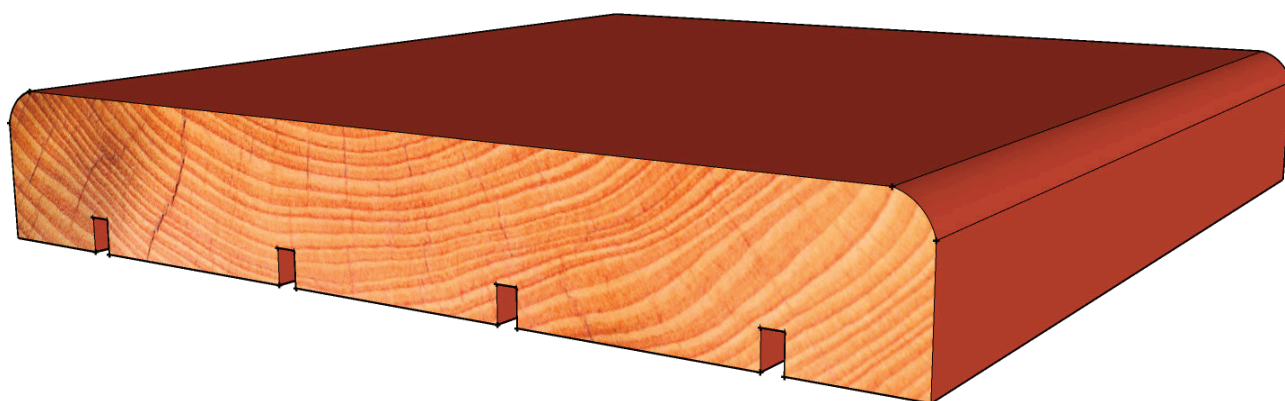

Terrassebræt med riller for skridsikkerhed. Det er en dobbeltprofil, der kan vendes om for en glat profil. Velegnet til gangstier, badebroer og badebroer. Dimensioner: 28x145 mm.

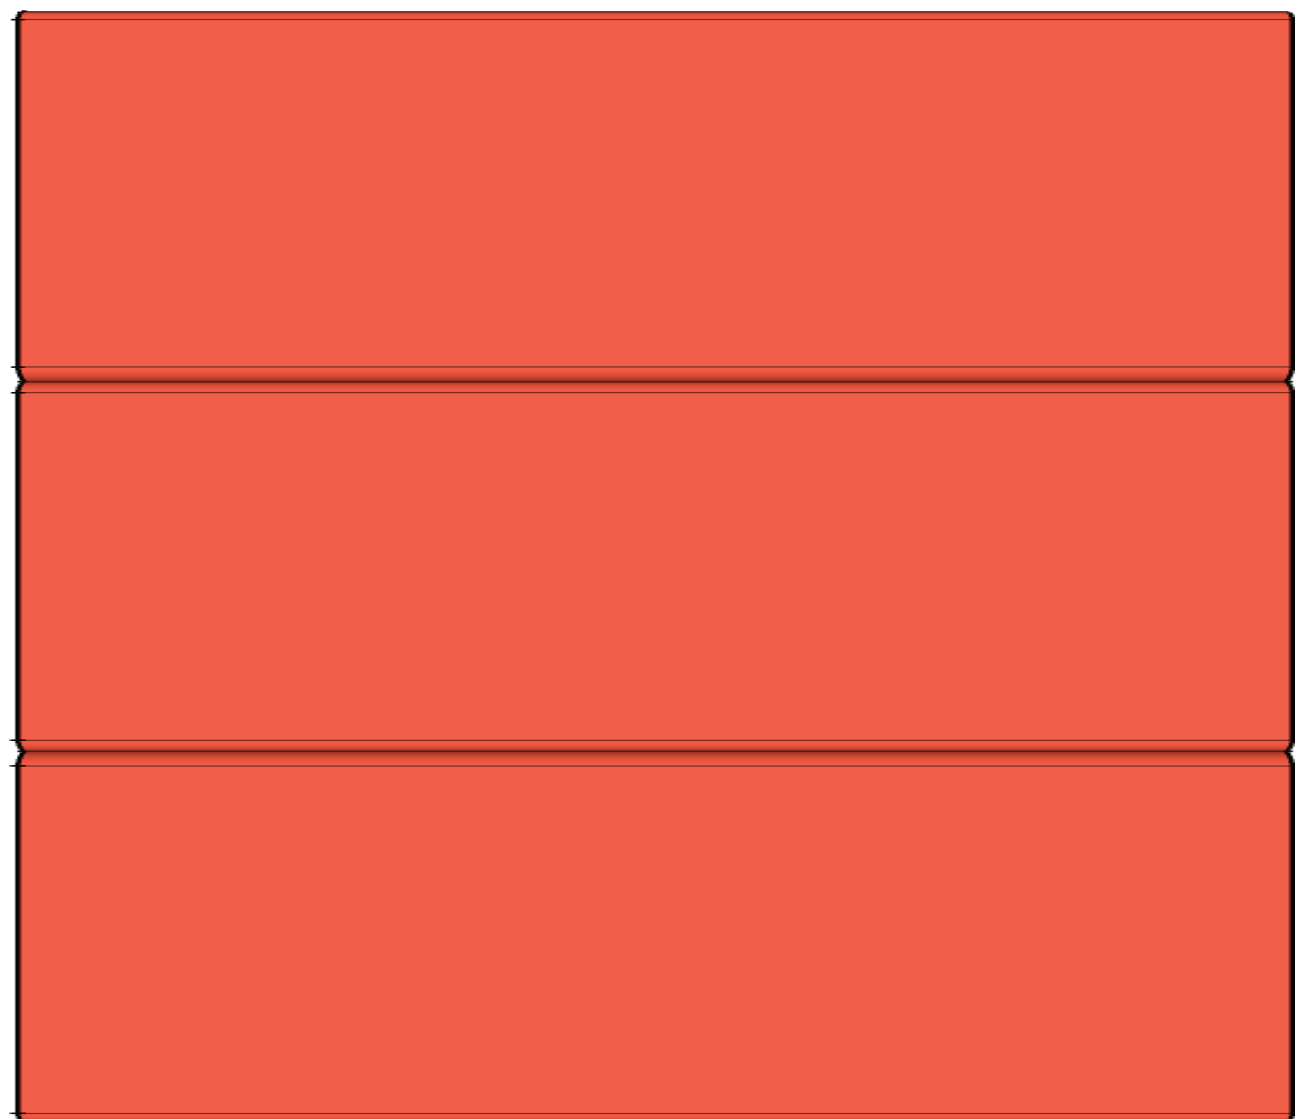

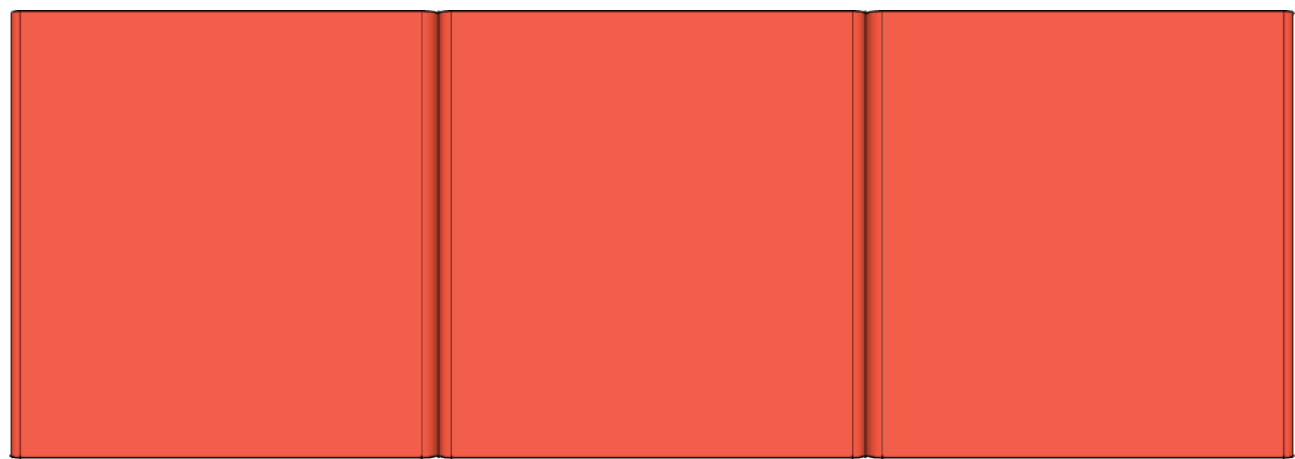

NK01: Panbo-bjælke

NK14: Terrassebræt med afspændingsspor

Terrassebræt 28x145 mm eller 28x190 mm med 6 graders runding på hjørner og fire afspændingsspor på bagsiden. Denne er høvlet på alle fire sider.

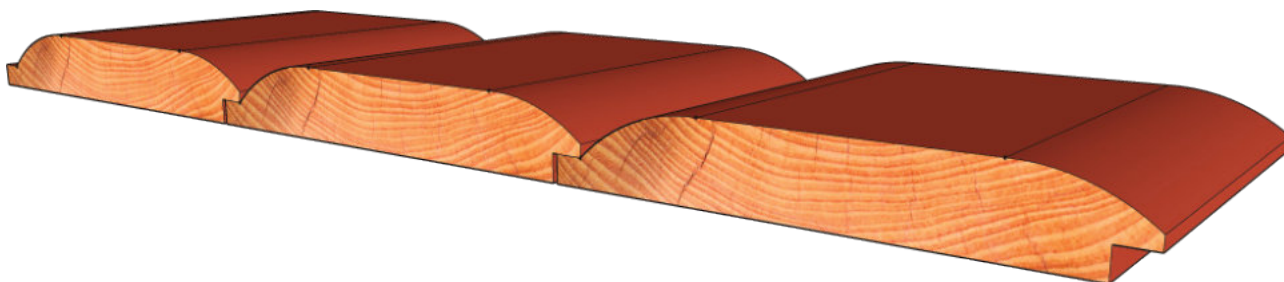

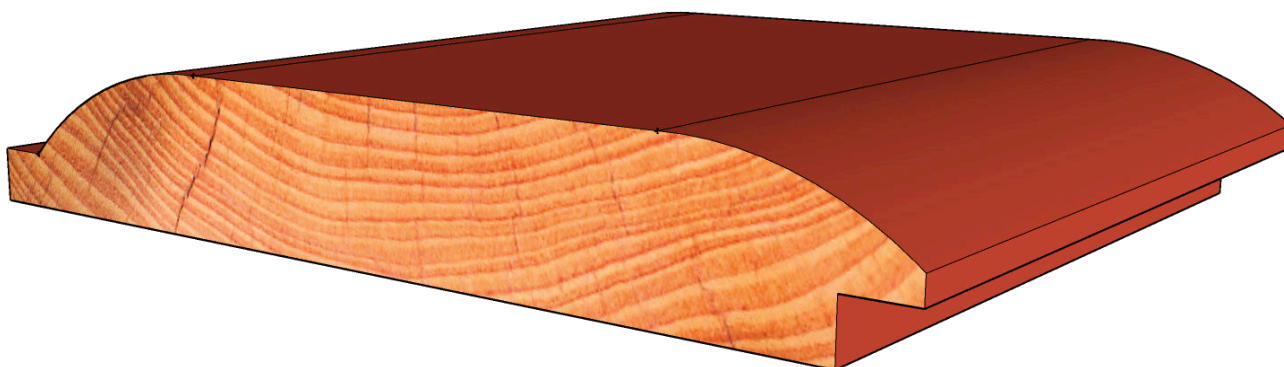

NK14: Terrassebræt med afspændingsspor

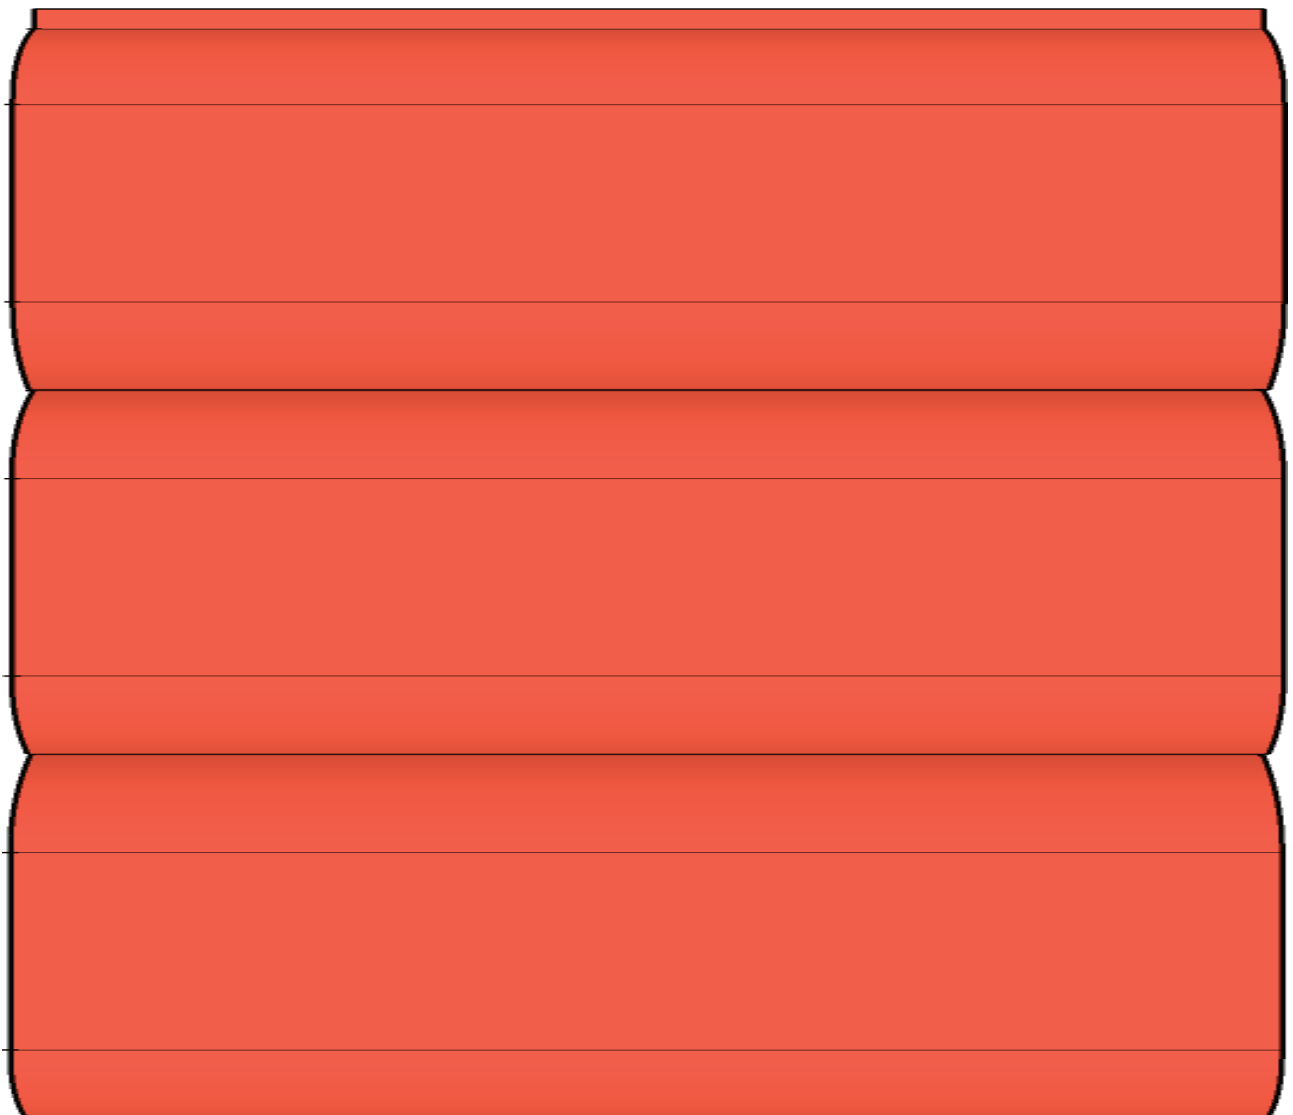

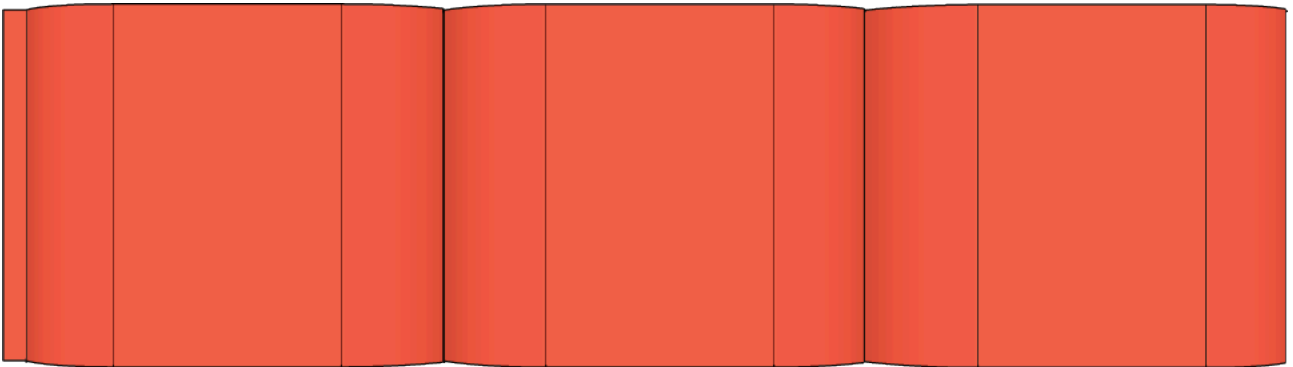

NK15: Blokhusskal

Blokhusskal, en kategori for sig selv.
Dimensioner: 28x190 mm med 10 mm fals.
Passer til Amerlog og Douglas bjælkehuse.

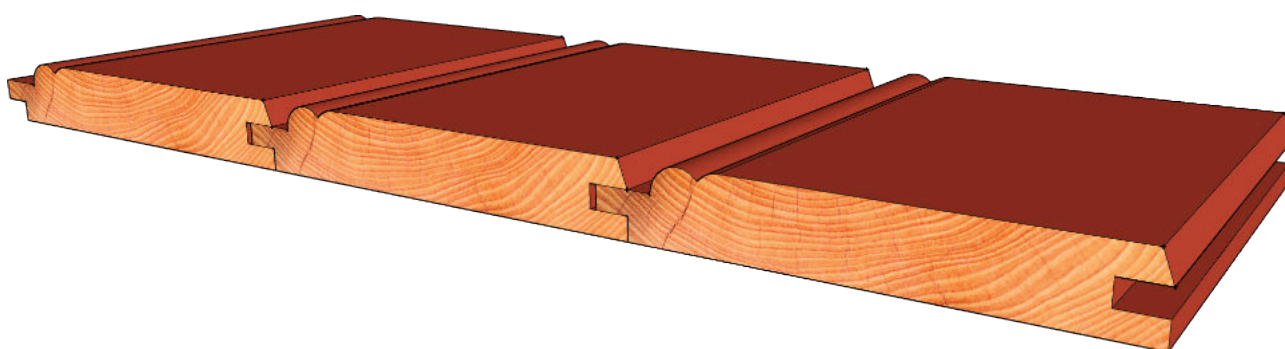

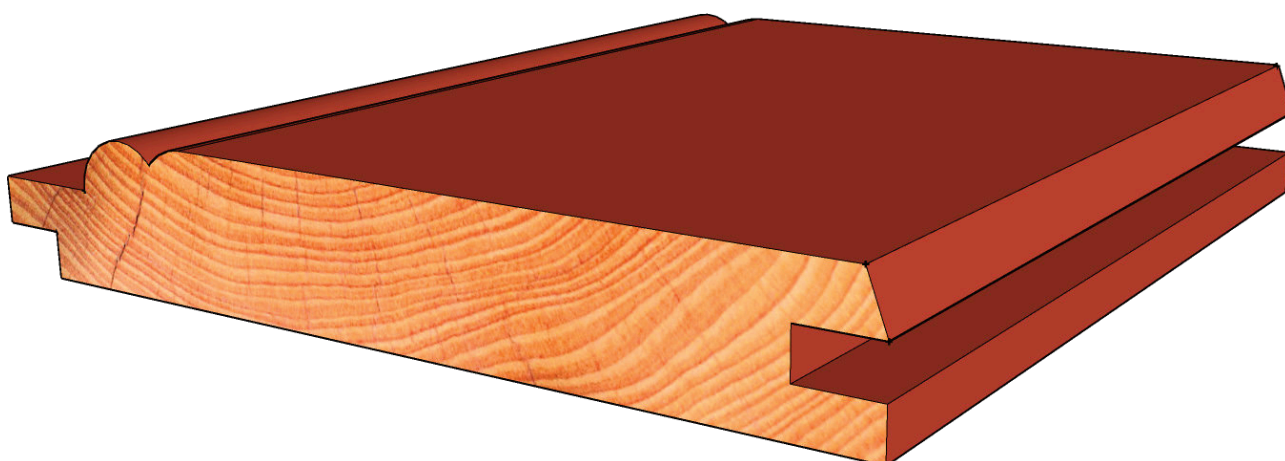

NK15: Blokhusskal

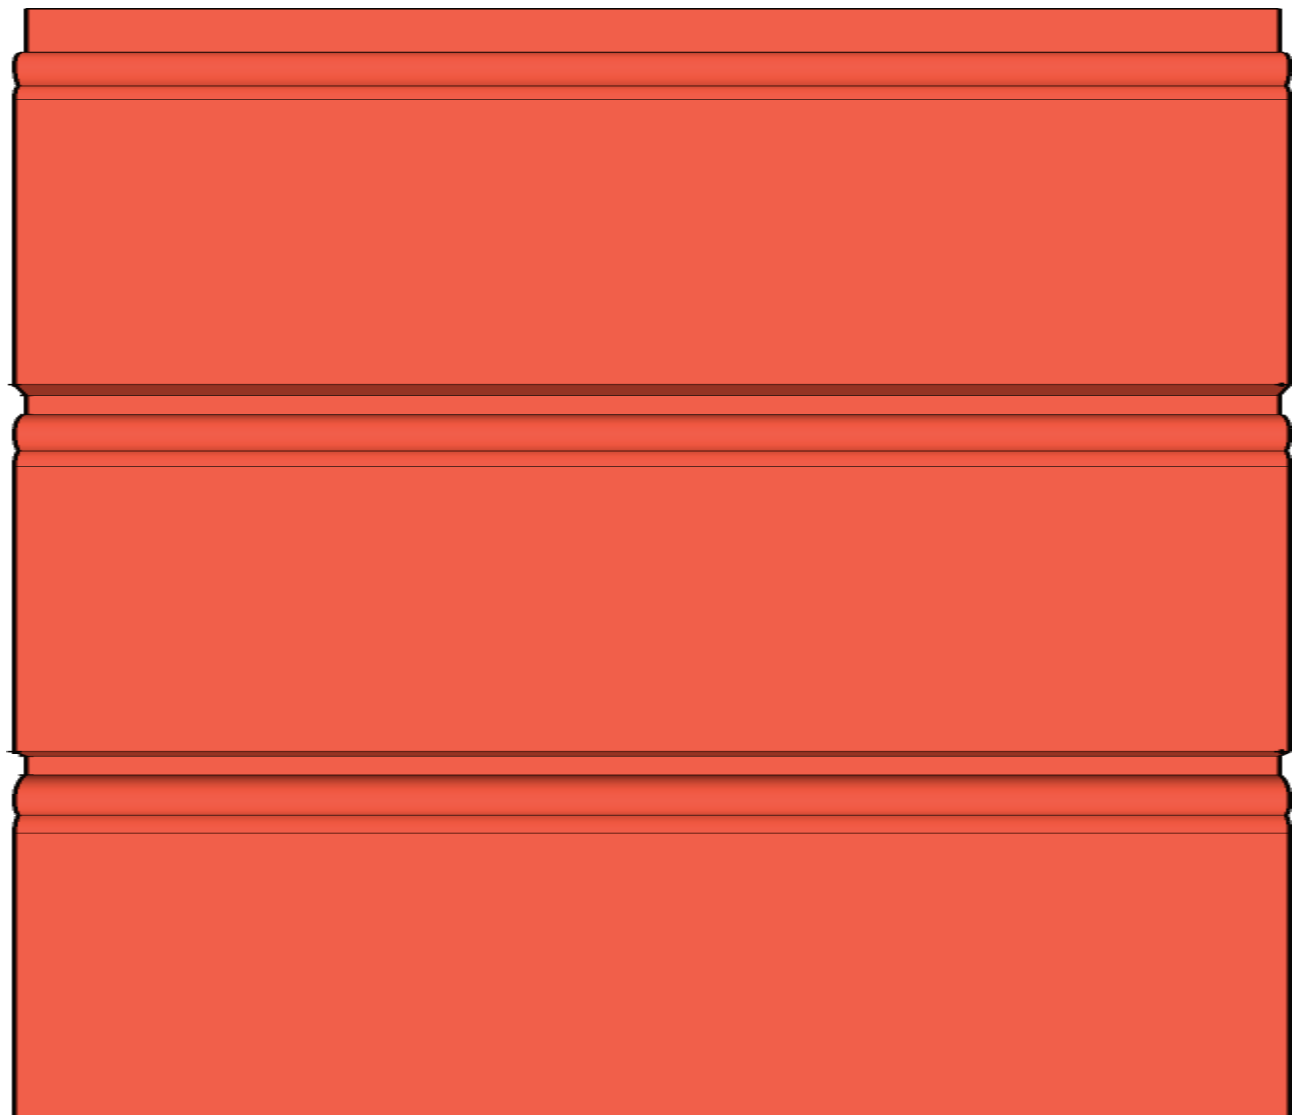

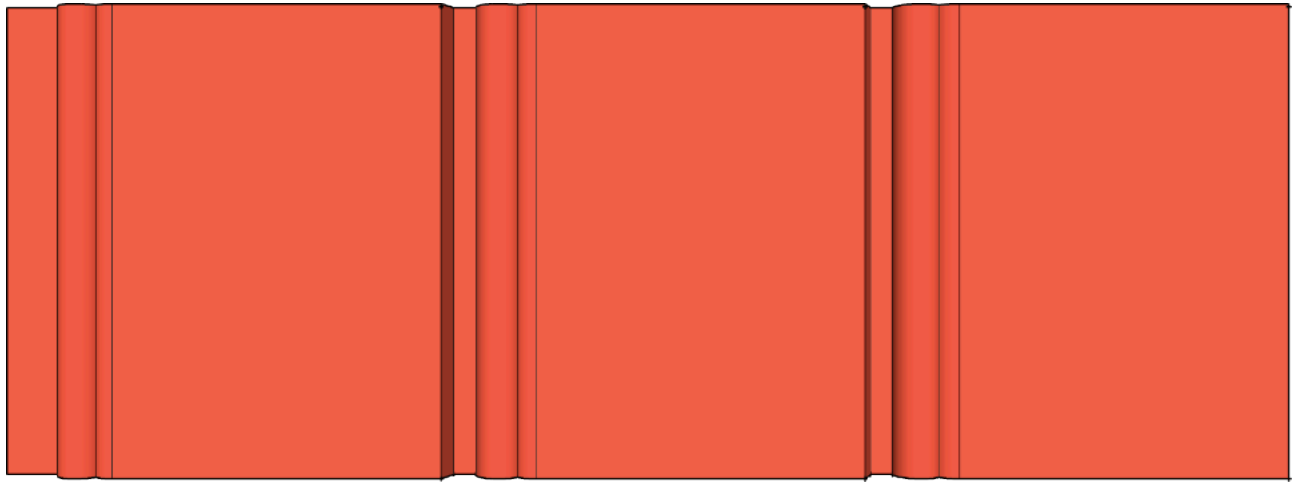

NK16: Facadebeklædning med perlestaf

Facadebeklædning med perlestaf. Svensk profil, der bruges på porte og paneler. Perlestaf på fersiden og 15 grader skrå kant på not-siden.
Dimensioner: 22x145 mm med 10 mm fer og not.

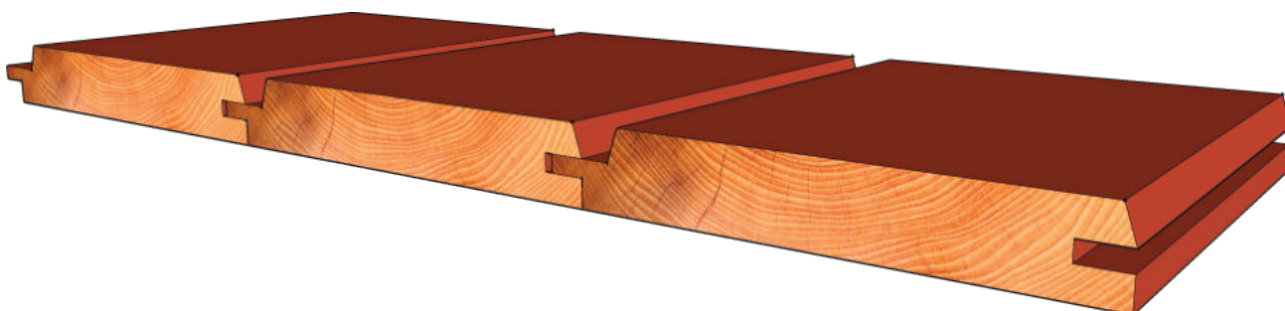

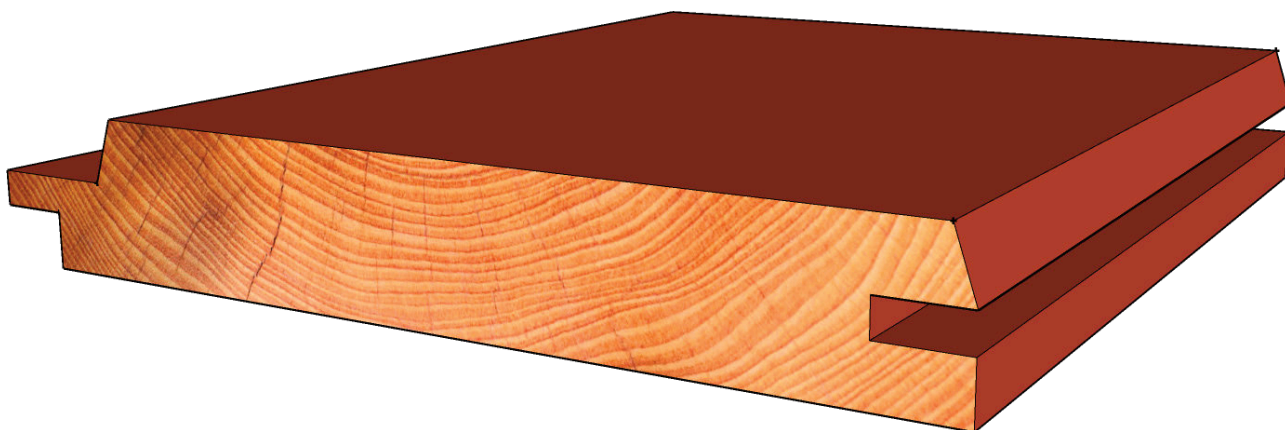

NK16: Facadebeklædning med perlestaf

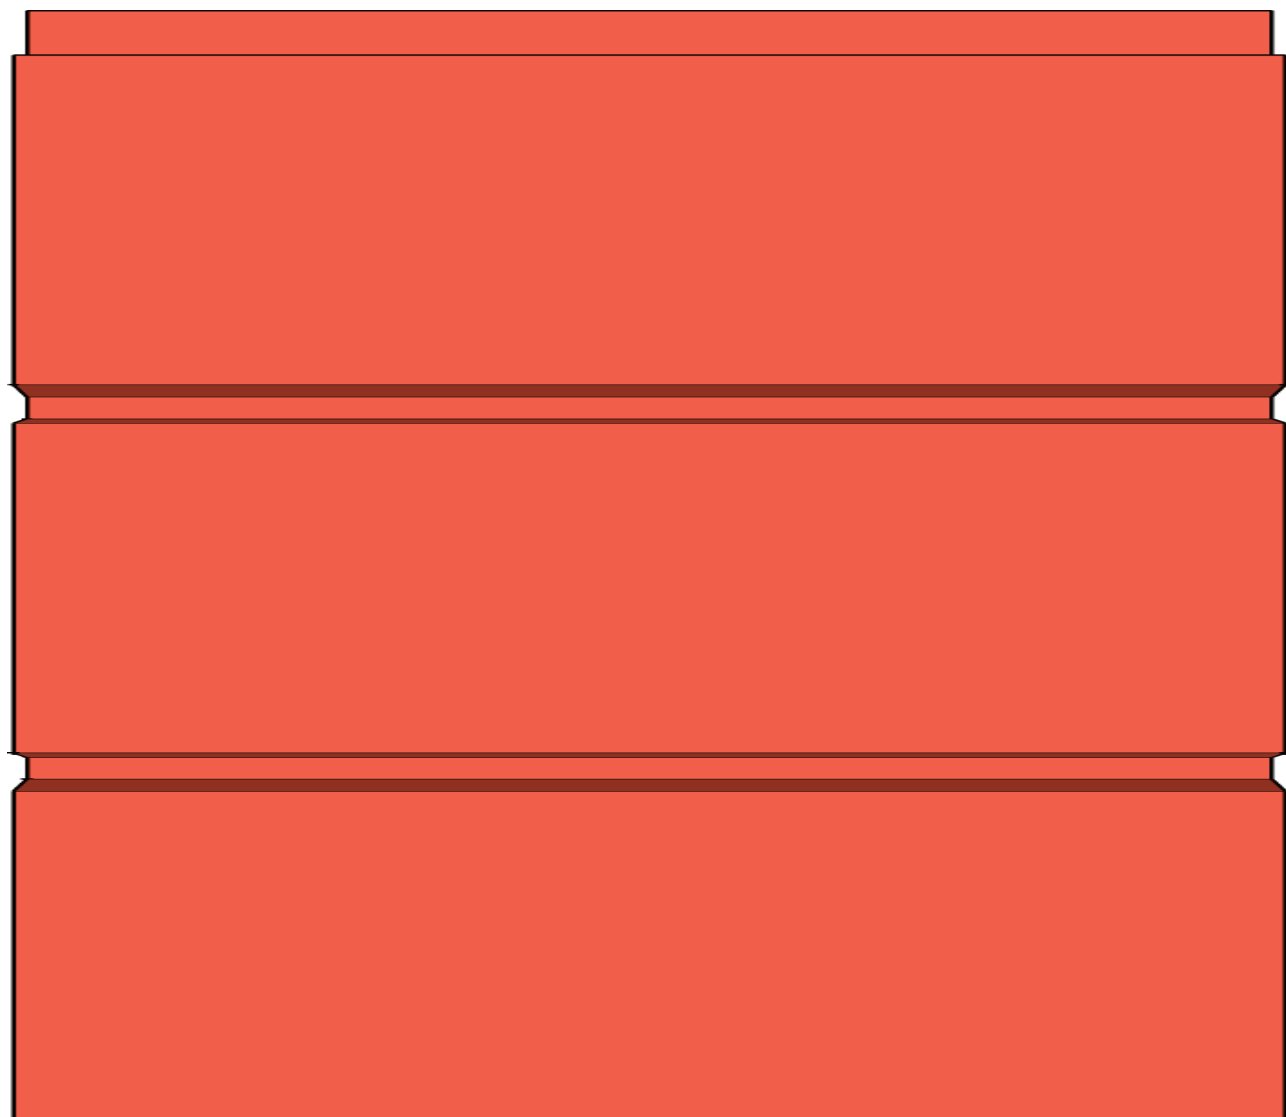

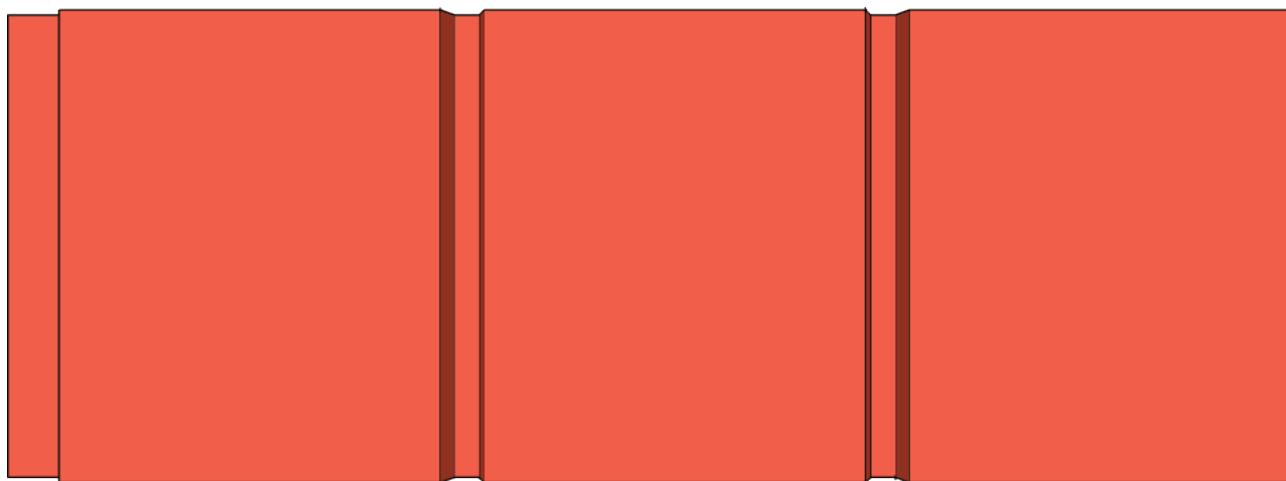

NK17: Klassisk loftprofil

Klassisk loftprofil med fer og not. 15 grader skrå kant og 10 mm fer og not. Når samlet, vil der være et synligt mellemrum på 15 mm.

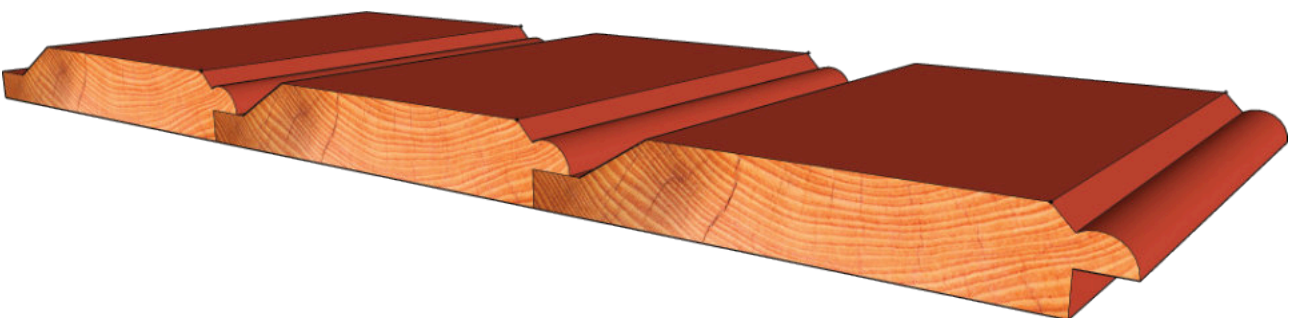

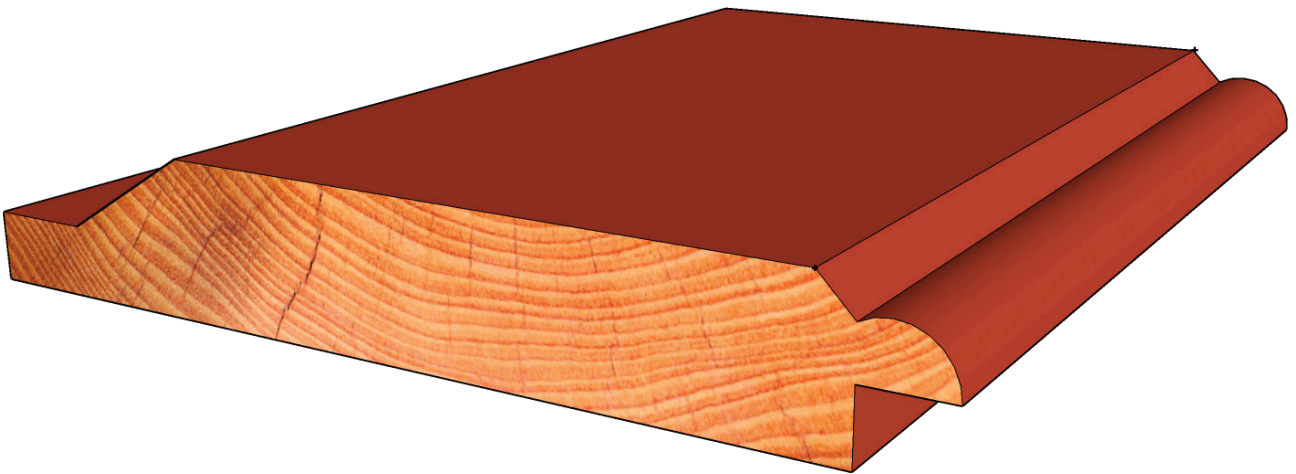

NK17: Klassisk loftprofil

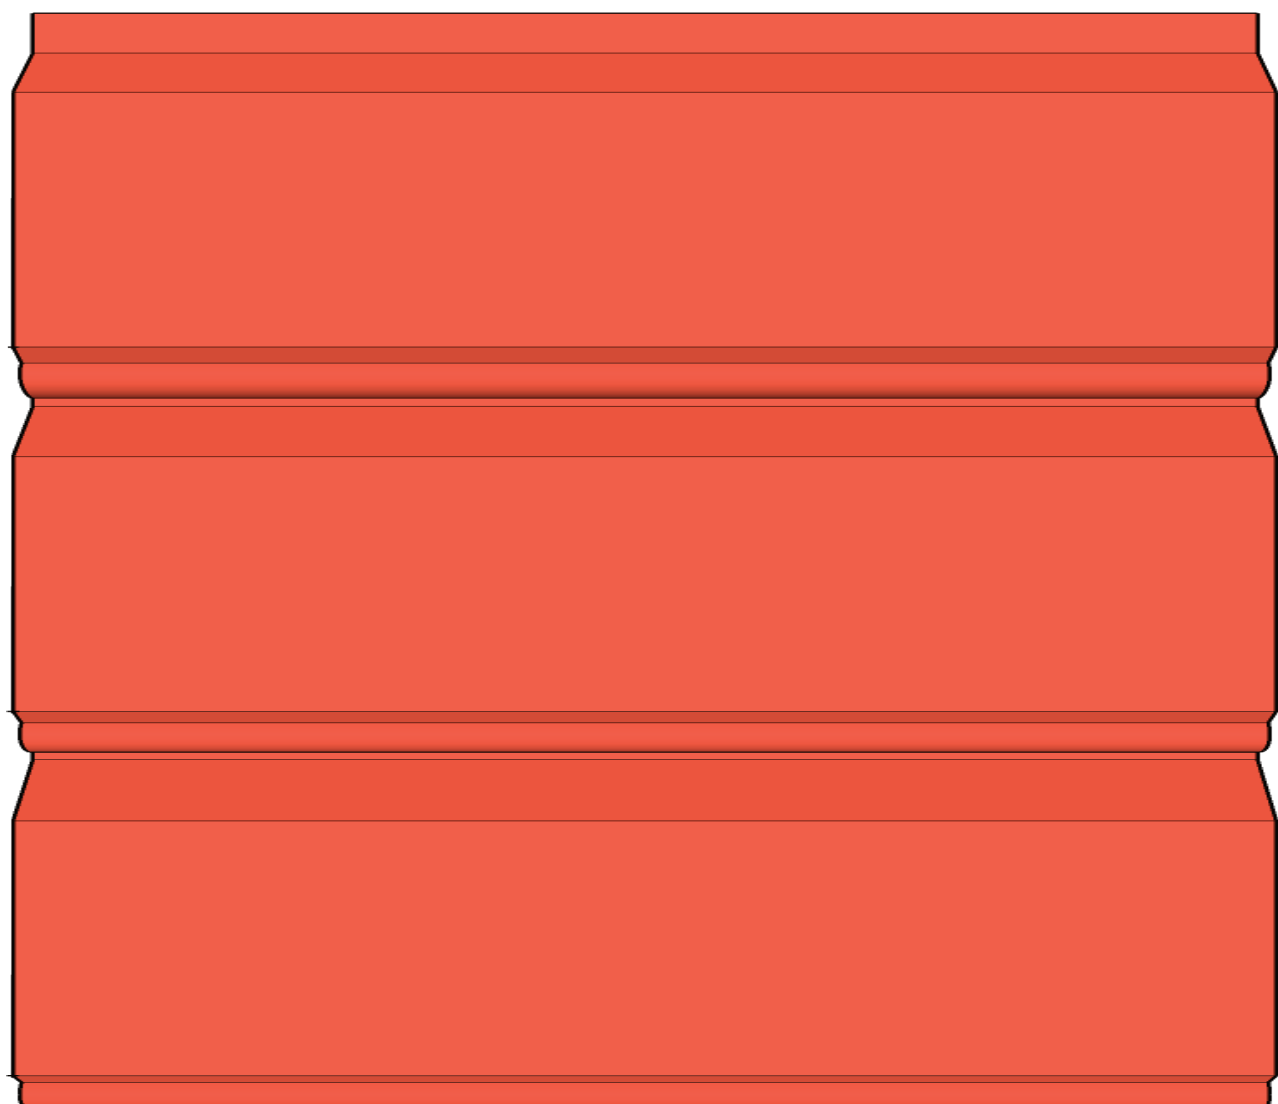

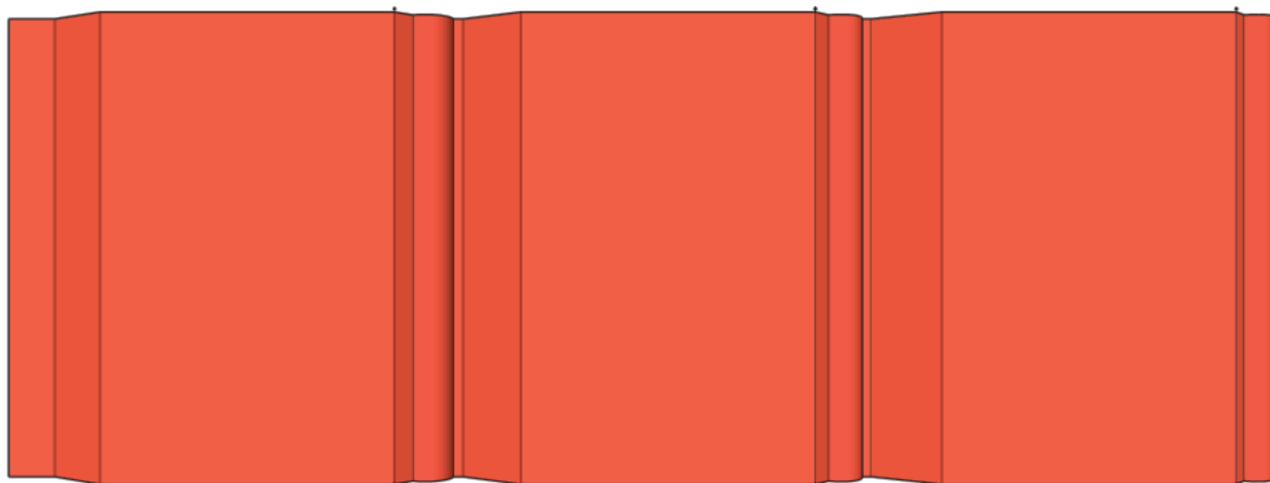

NK18: Hellvik-profil

Hellvik-profil fra Hellvik huse med perlestaf.
Dette er et falsbræt med en 15 mm fals.

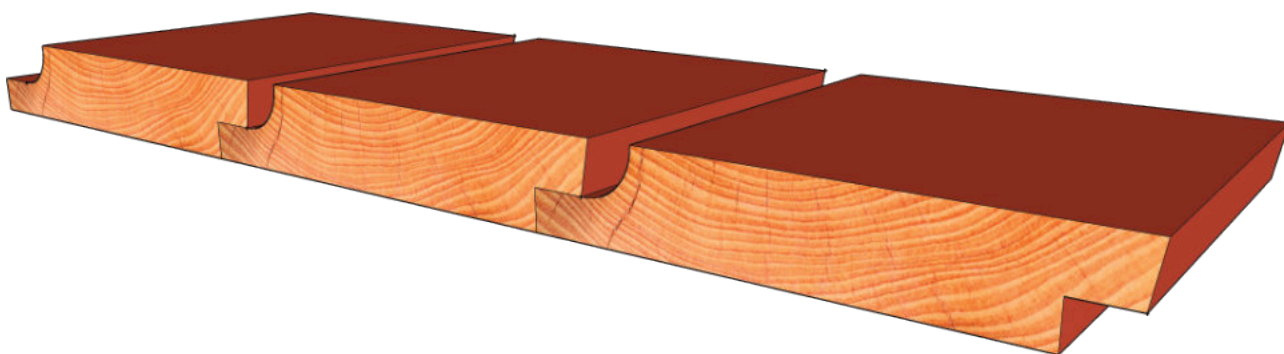

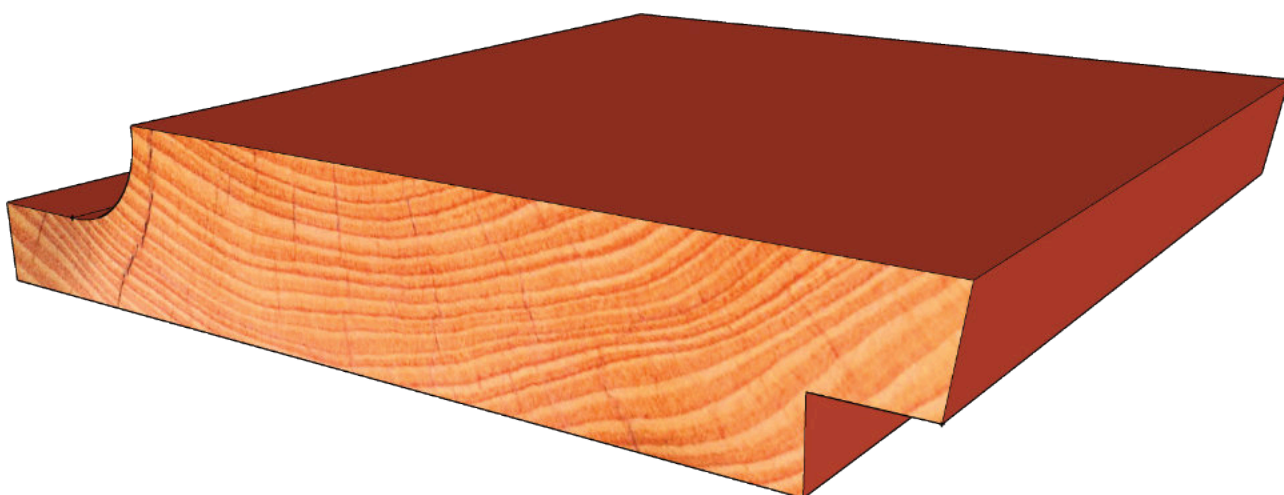

NK18: Hellvik-profil

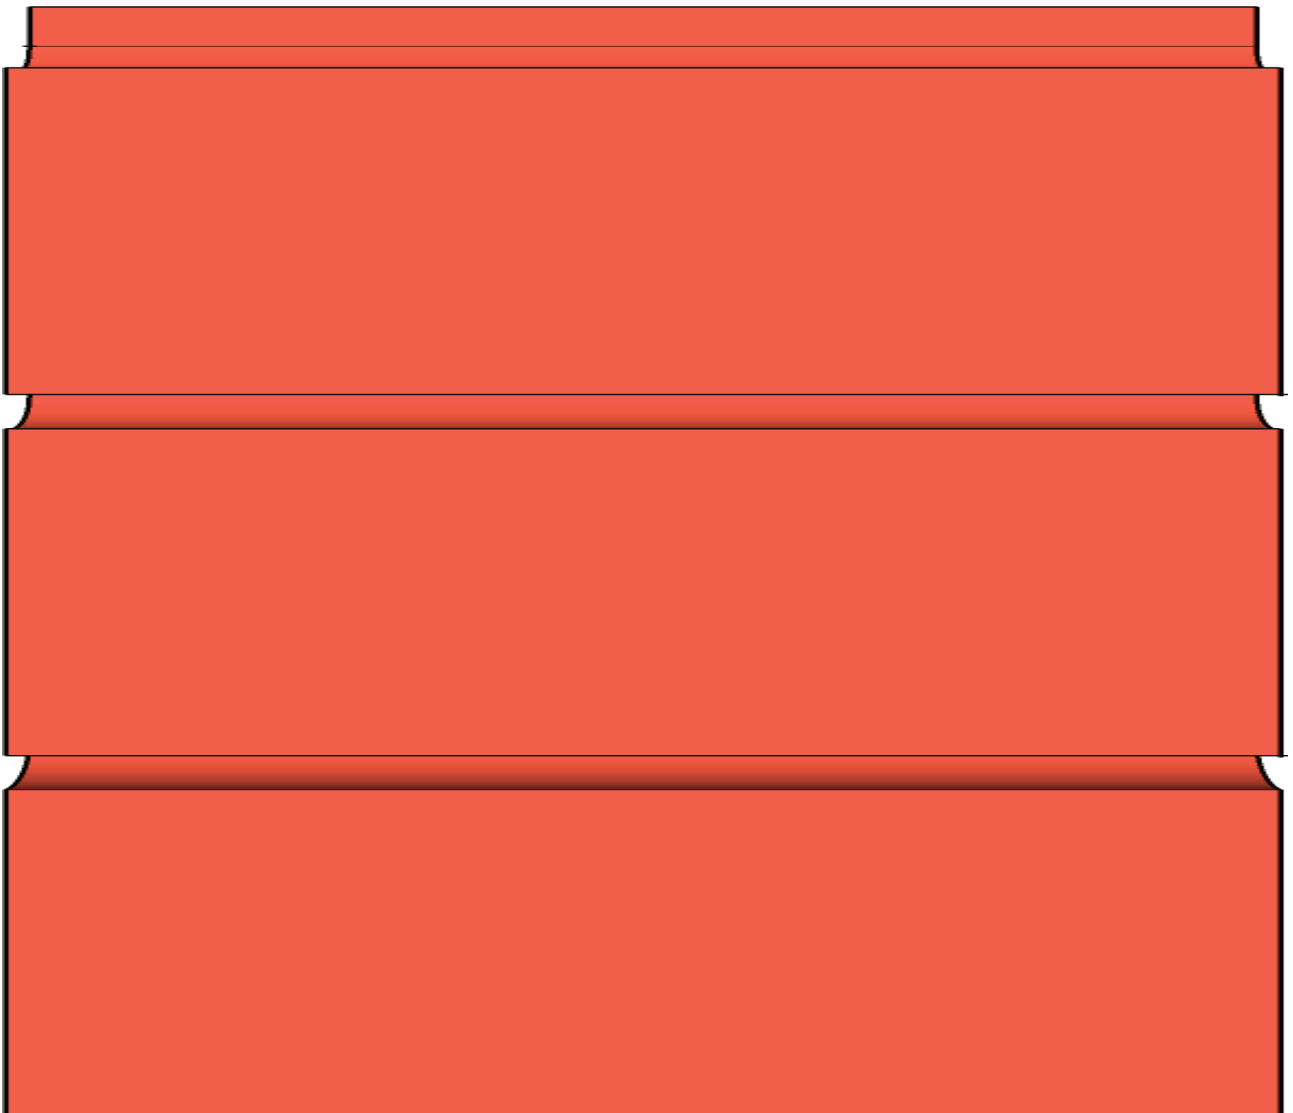

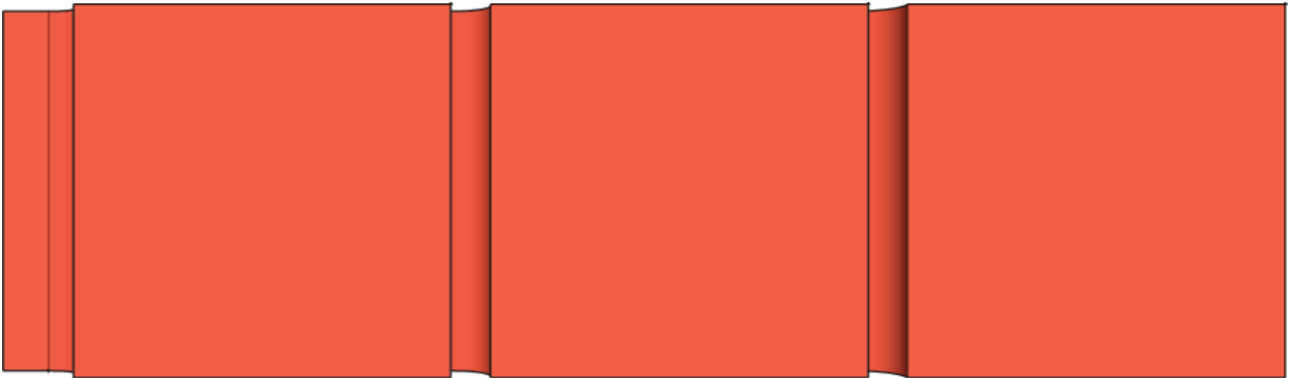

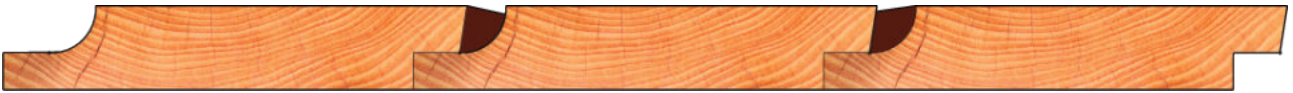

NK19: Falsbræt med stor bue

Falsbræt med stor bue, der skaber en bombastisk effekt på facaden. Tykkelse: 32 mm, bredde op til 190 mm. Har 15 graders skrå bagkant som drypnæse.

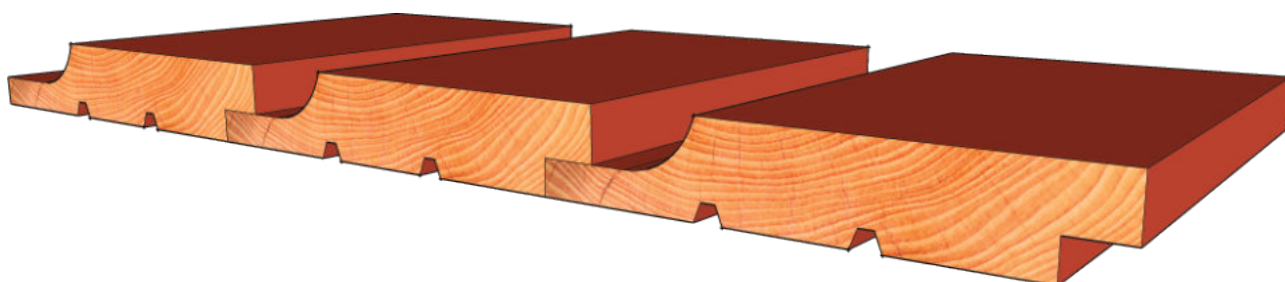

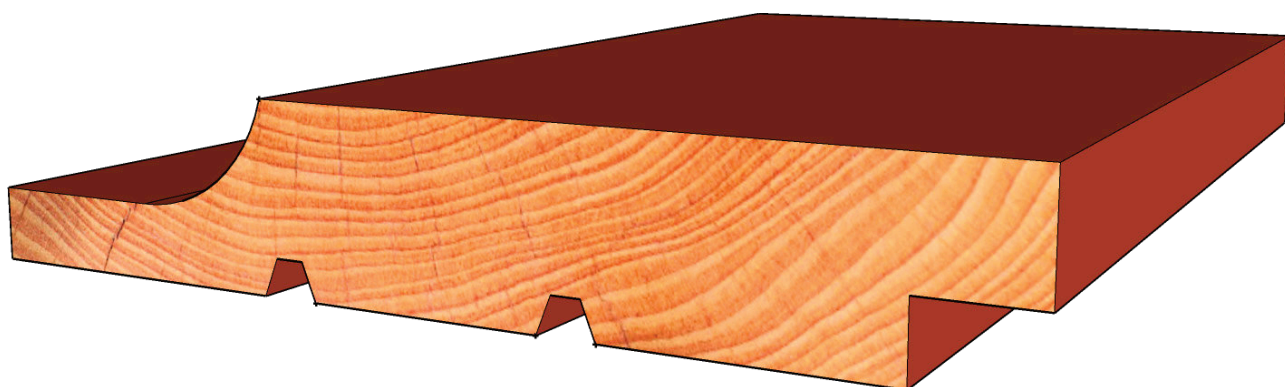

NK19: Falsbræt med stor bue

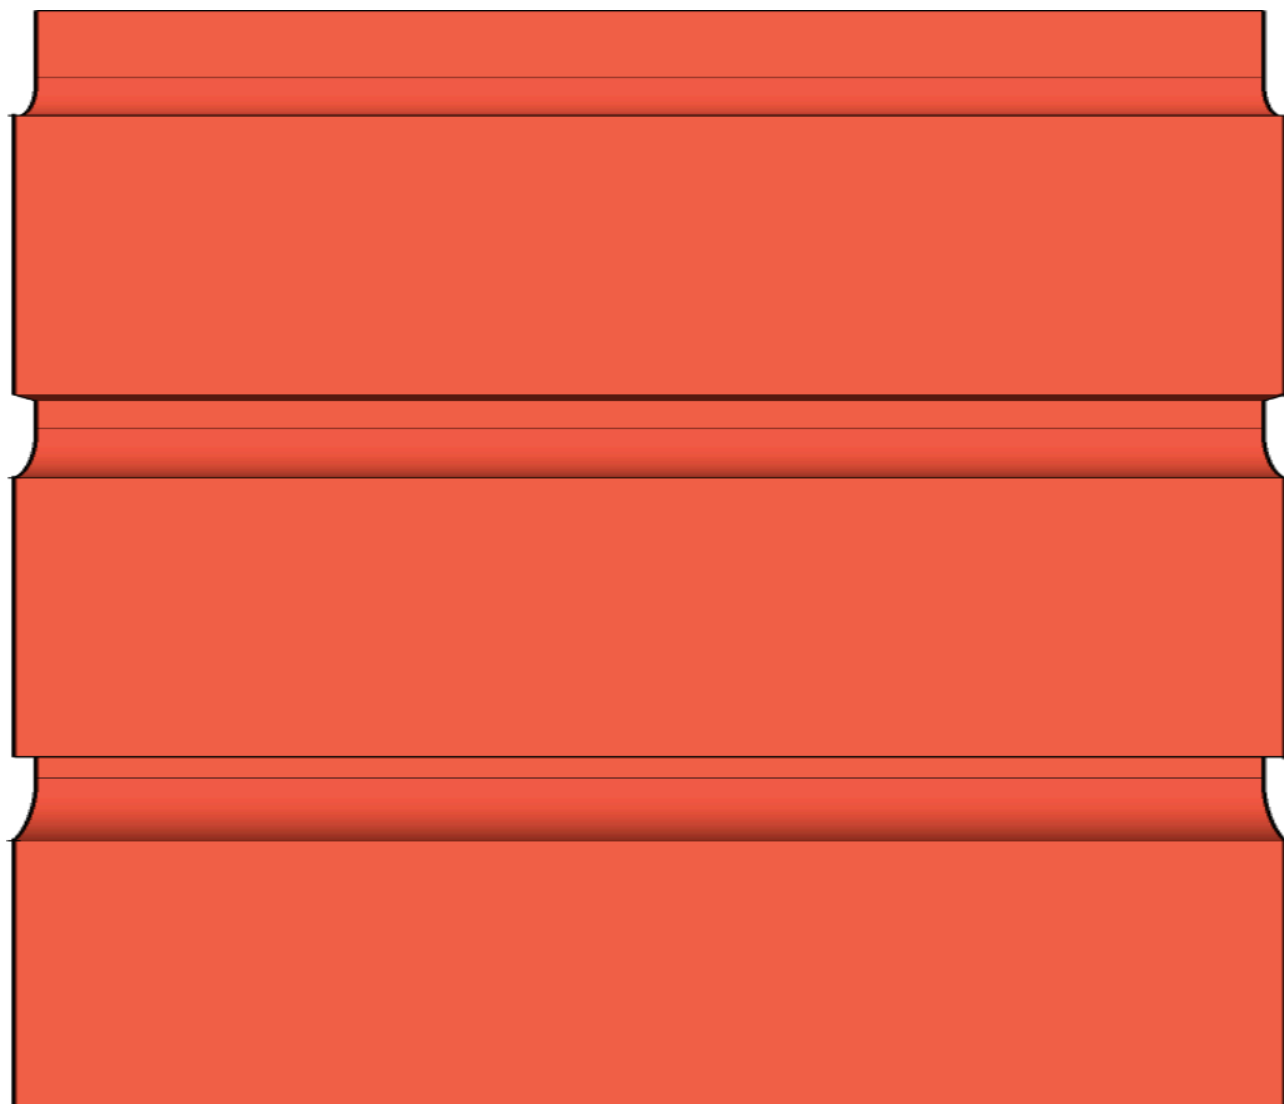

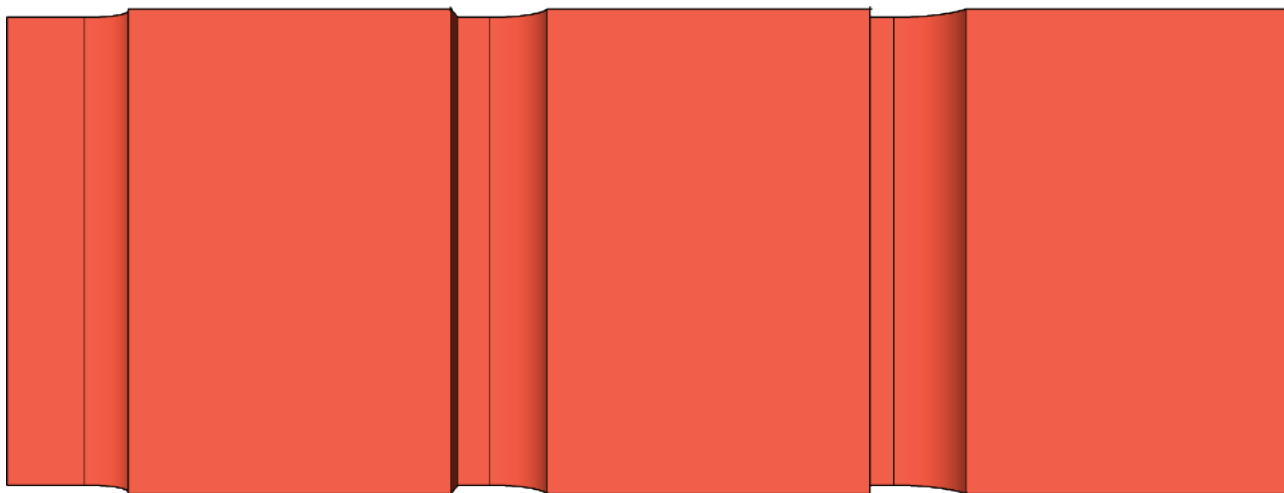

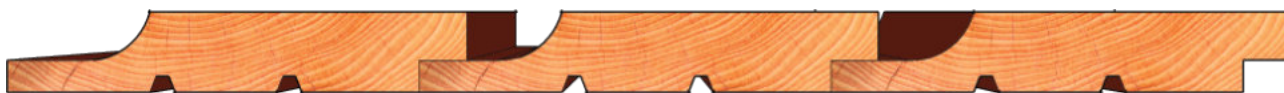

NK20: Falsbræt uden drypnæse

Samme som NK19, men uden drypnæse og med længere fer. Kan bruges både lodret og vandret.
Dimensioner: 22x145 mm.

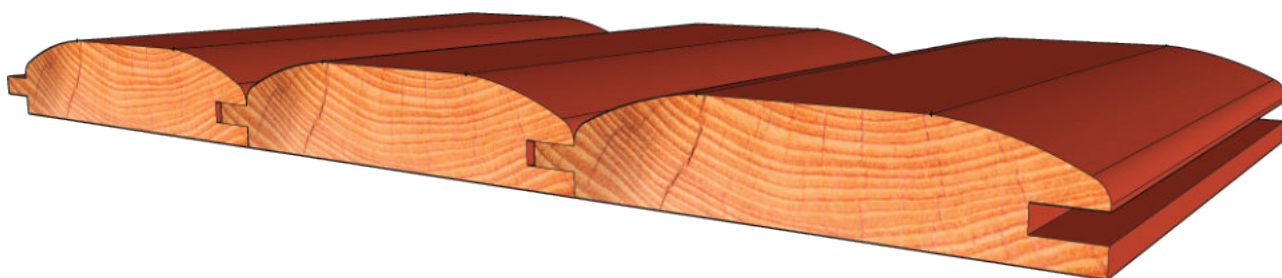

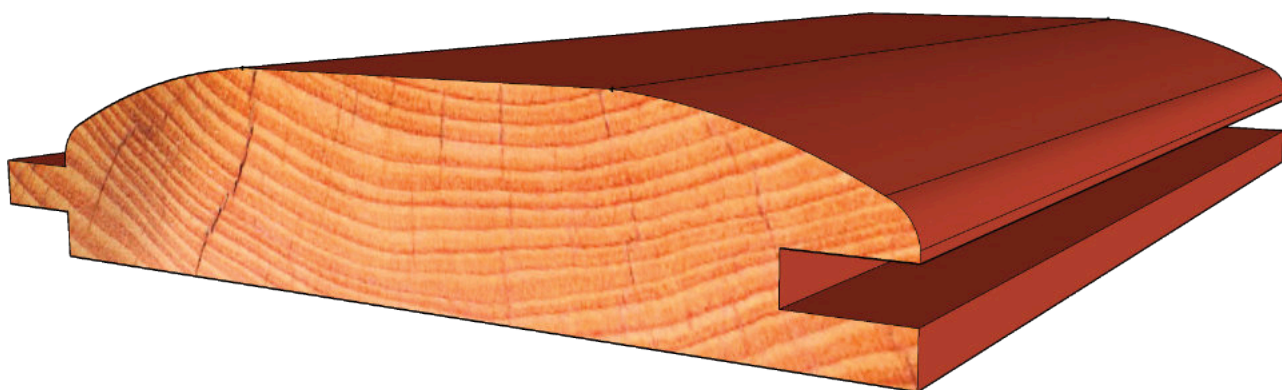

NK20: Falsbræt uden drypnæse

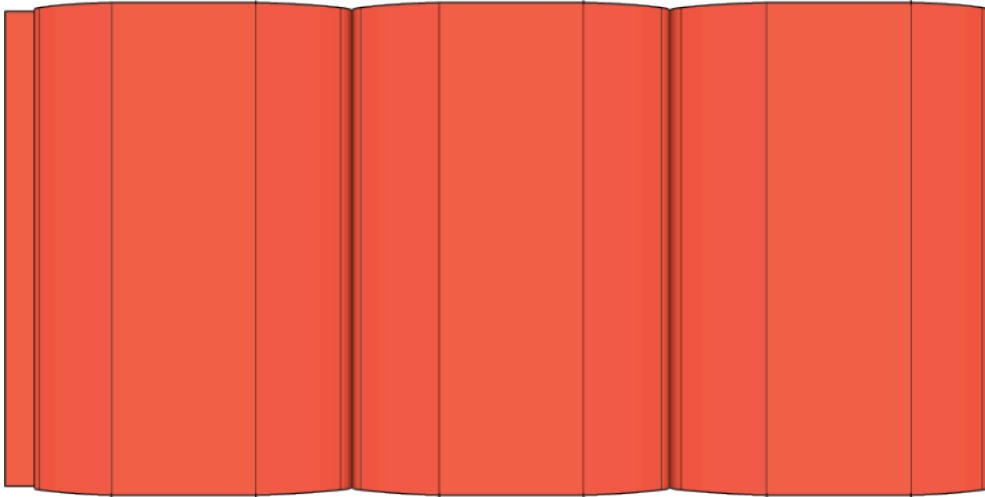

NK21: Blokhusskal til renovering

Blokhusskal 22x120 mm, perfekt til renovering af gamle sommerhuse for et hyggeligt look.

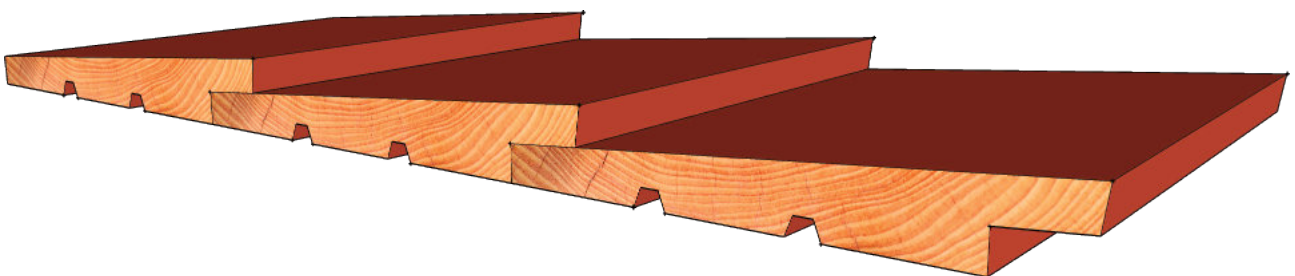

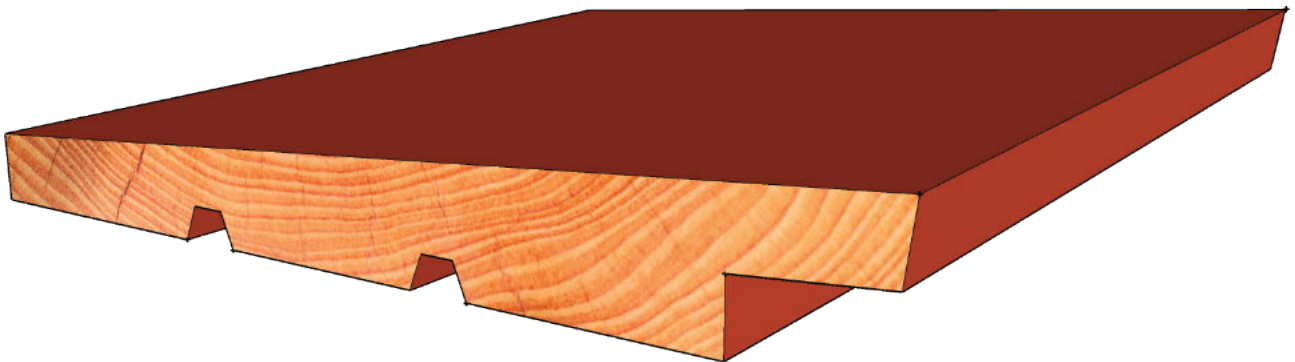

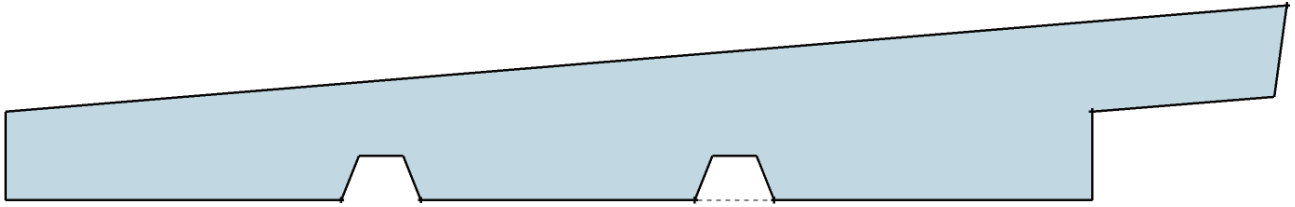

NK21: Blokhusskal til renovering

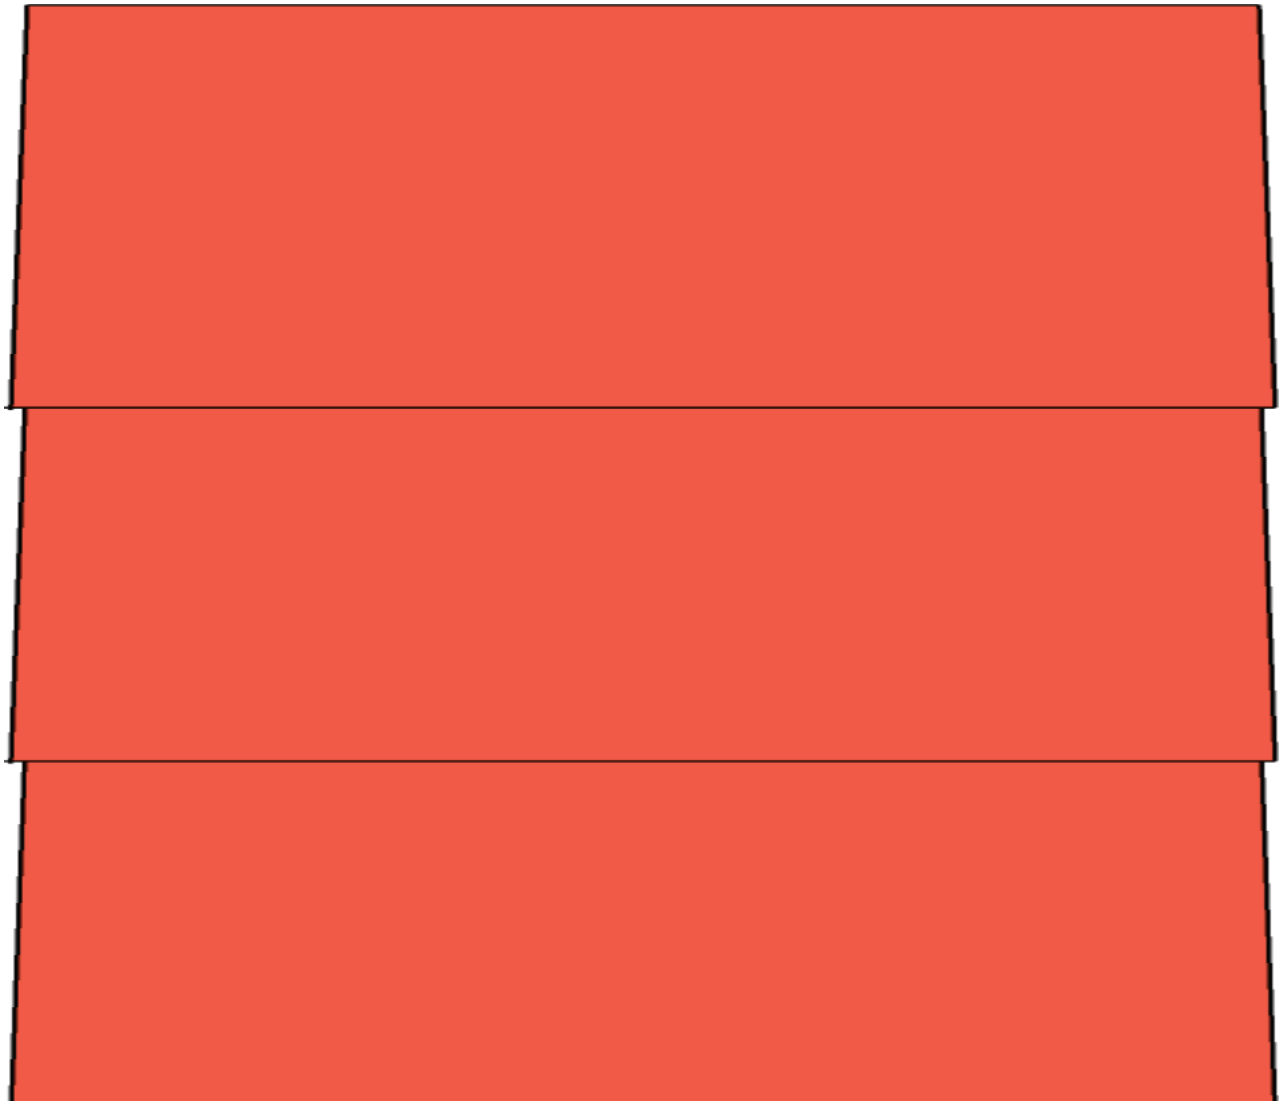

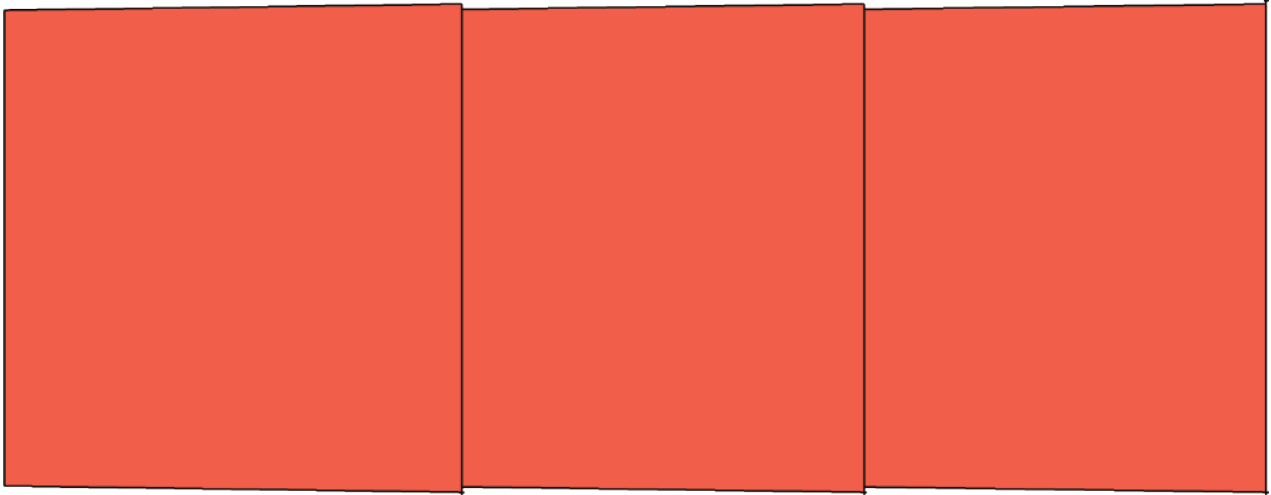

NK22: Klinkbeklædning med ru overflade

Klinkbeklædning 22x145 mm med ru overside.
Facaden er savskåret for et mere rå look. Falsen
er 22 mm dyb med en 4 graders drypnæse.

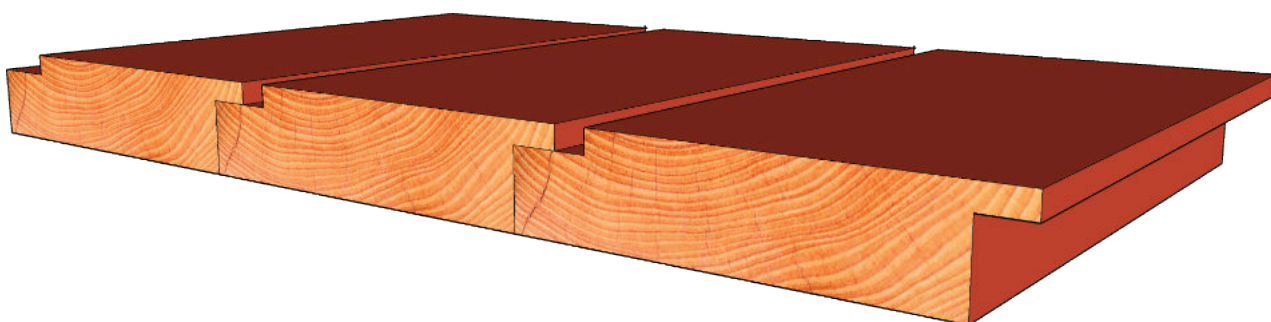

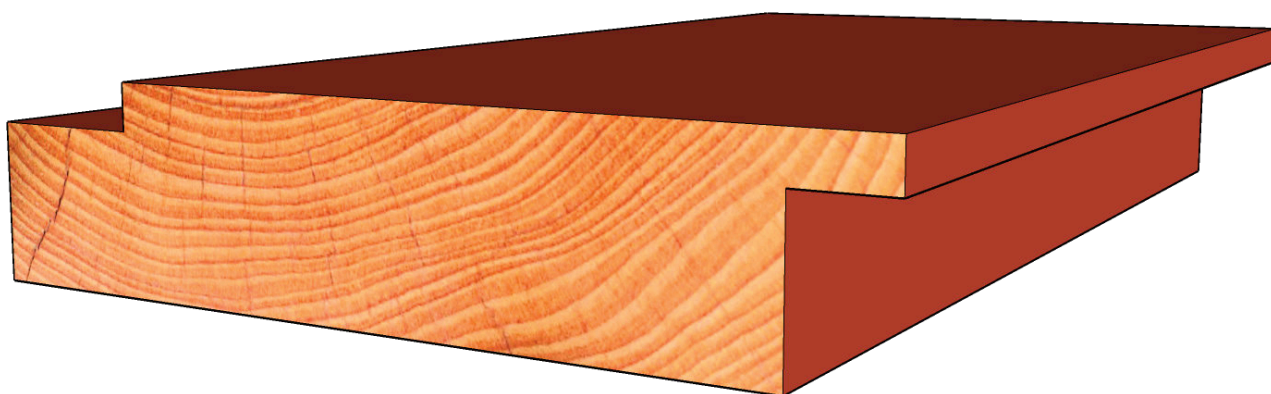

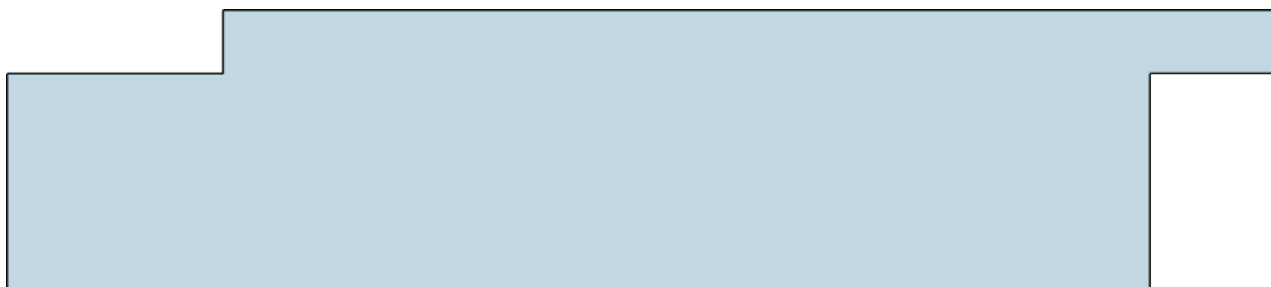

NK22: Klinkbeklædning med ru overflade

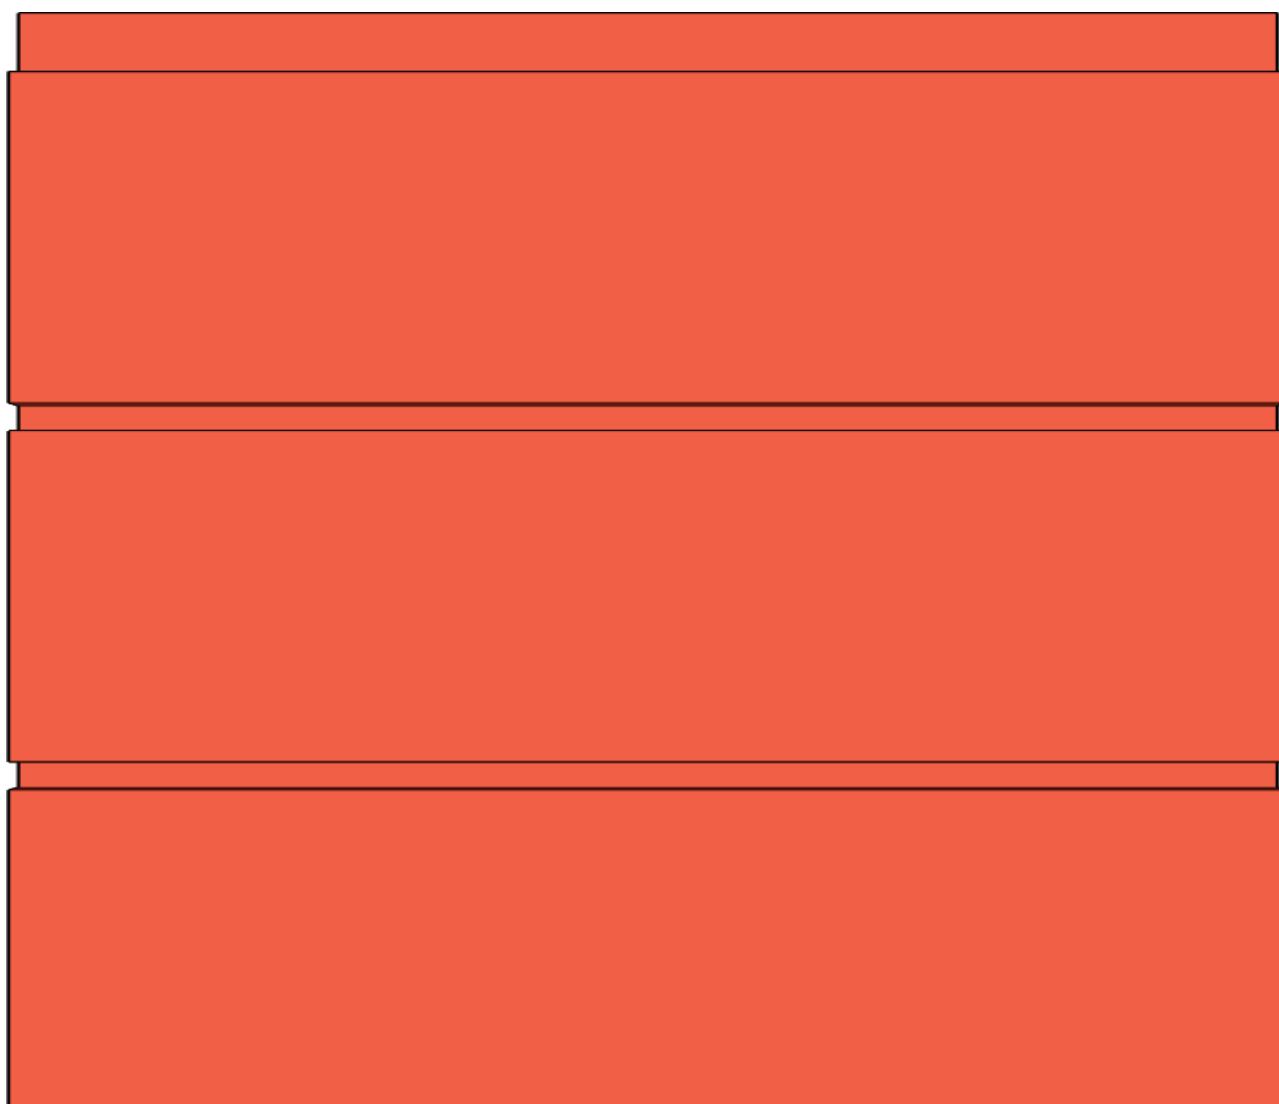

NK23: Falsprofil med lille overlap

Falsprofil med lille overlap, der giver facaden et lettere udseende. Dimensioner: 22x145 mm.

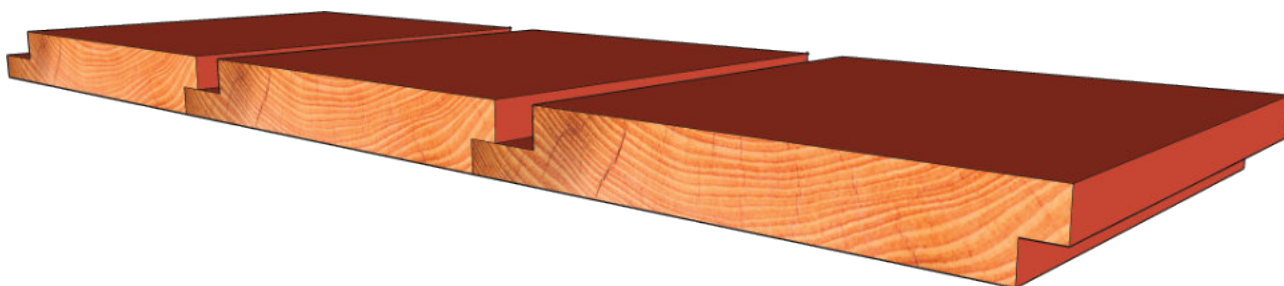

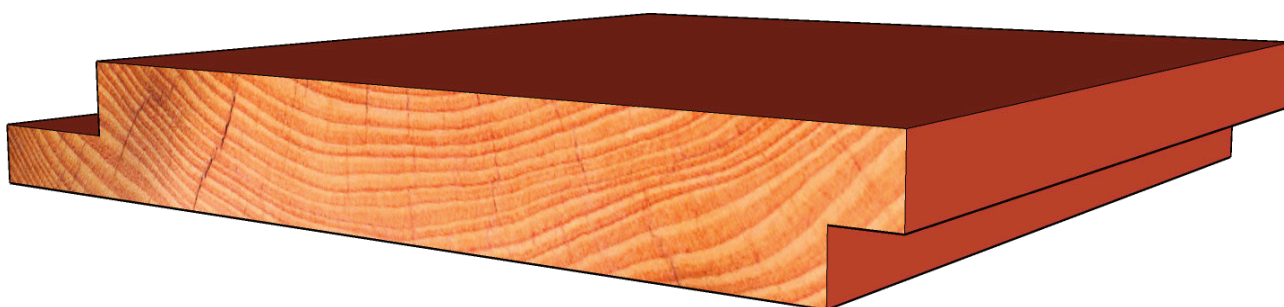

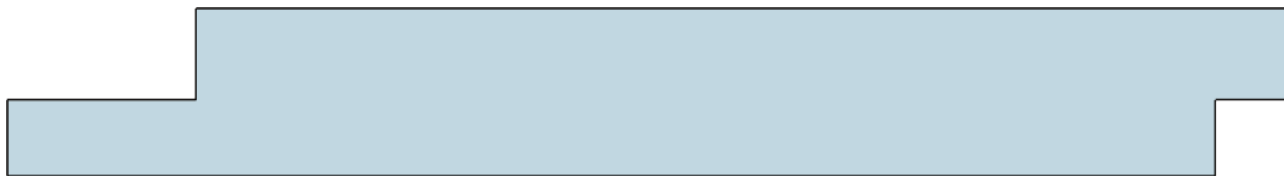

NK23: Falsprofil med lille overlap

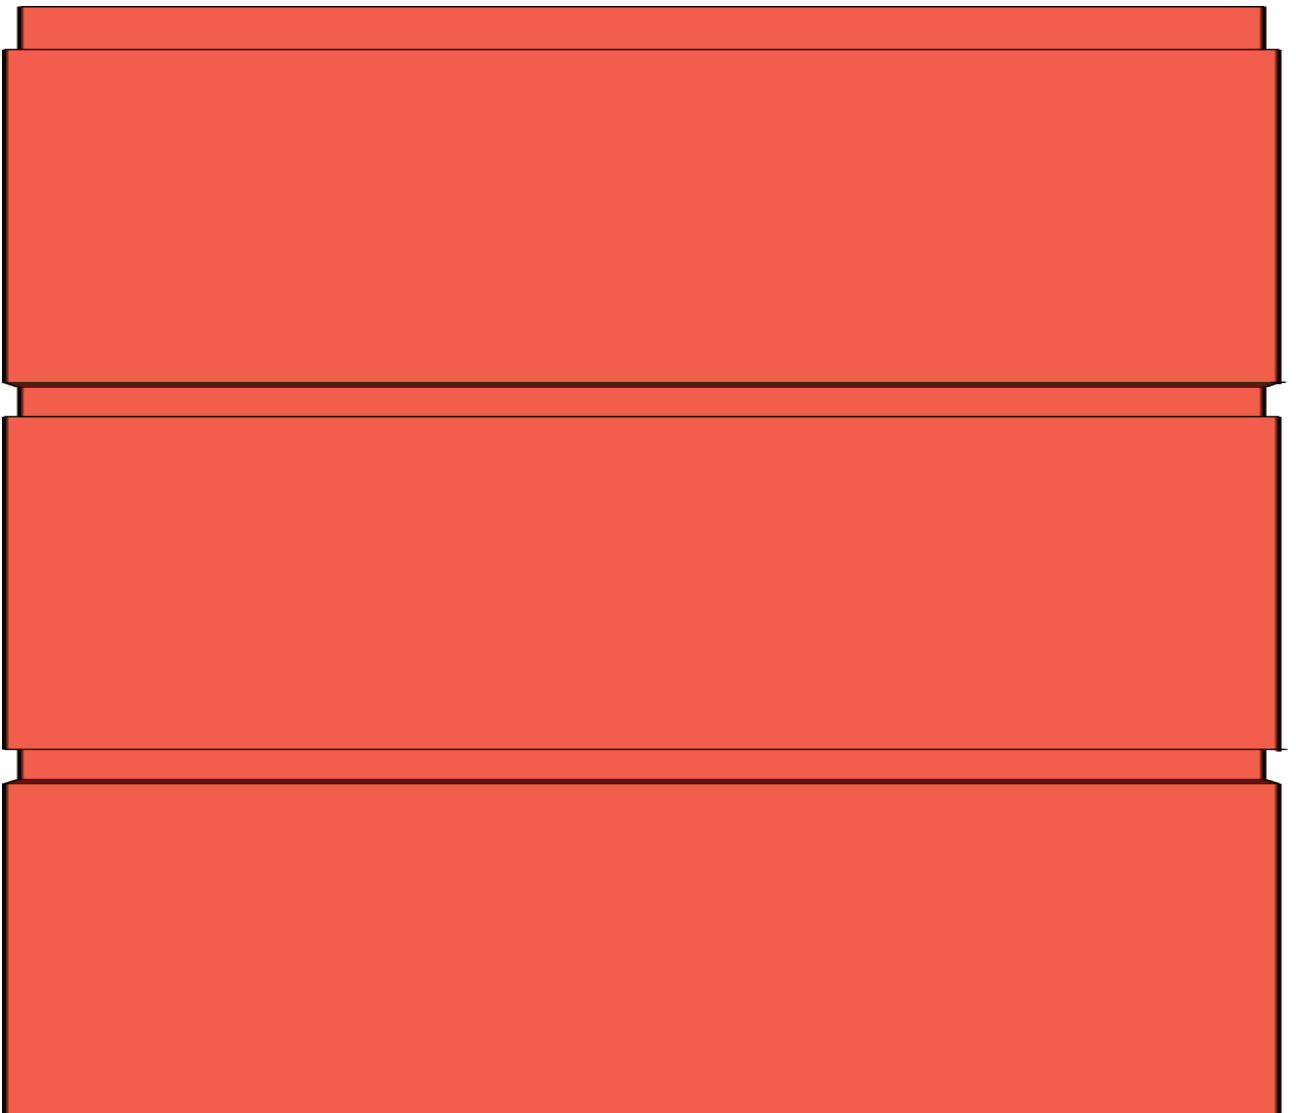

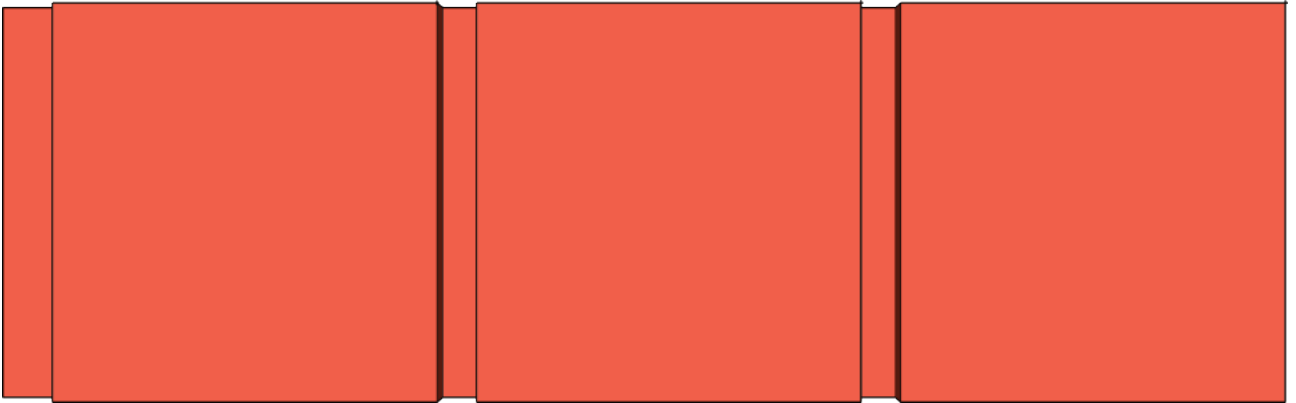

NK24: Falsbræt med 90 graders vinkel

Falsbræt med en 90 graders vinkel, der giver et 10 mm åbent spor. Denne profil bruges til lodrette facader. Dimensioner: 22x145 mm.

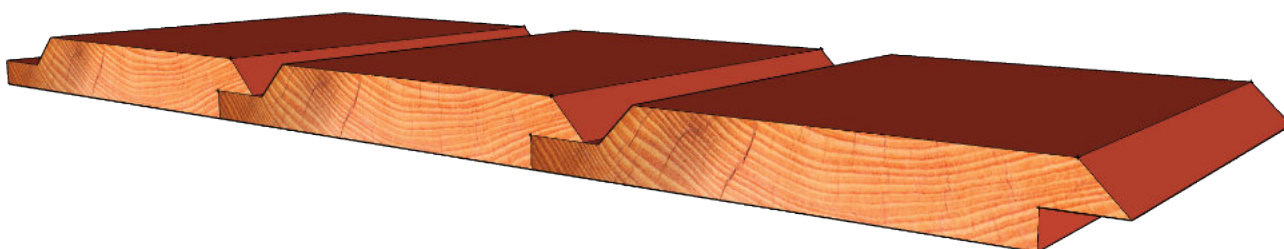

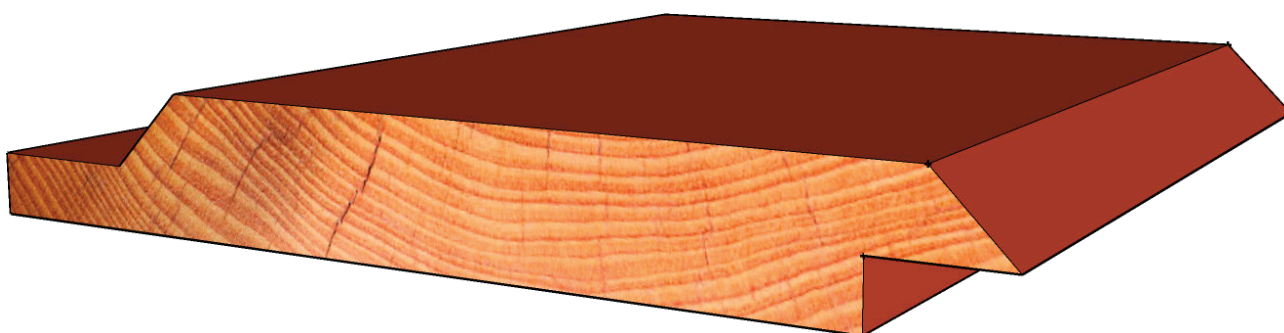

NK24: Falsbræt med 90 graders vinkel

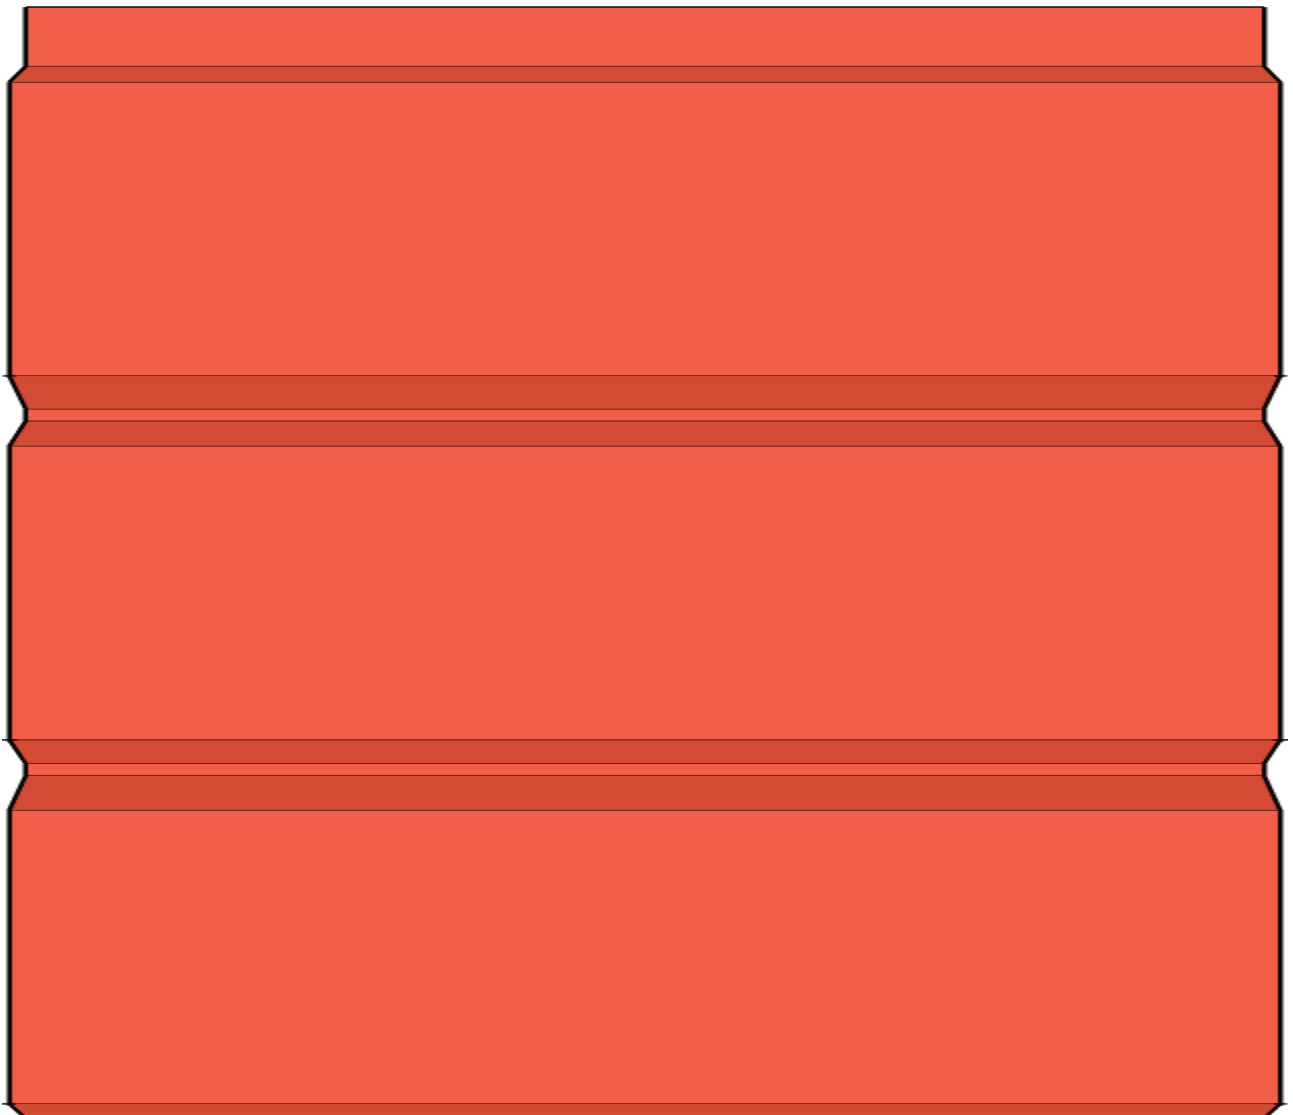

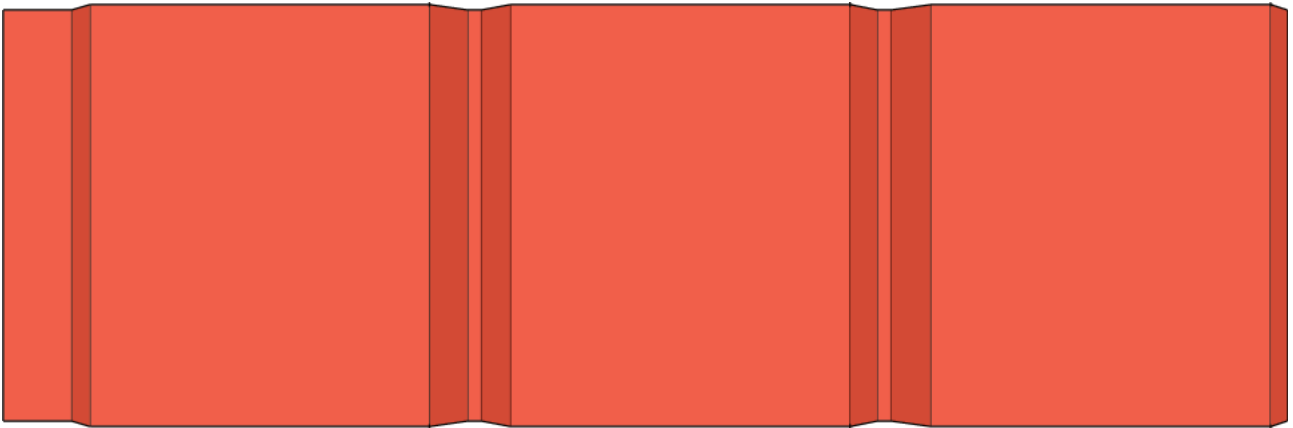

NK25: Falsbræt med kineserhat

Falsbræt med "kineserhat" på 45 grader, der skaber et synligt spor på 10 mm. Dimensioner: 22x145 mm. Bruges som lodret facade.

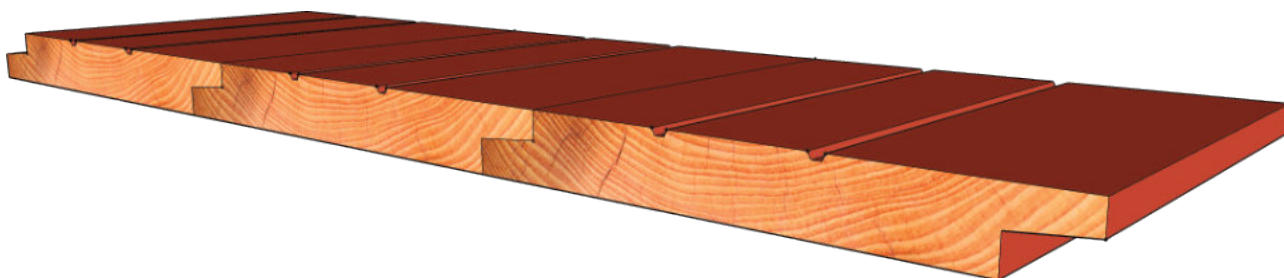

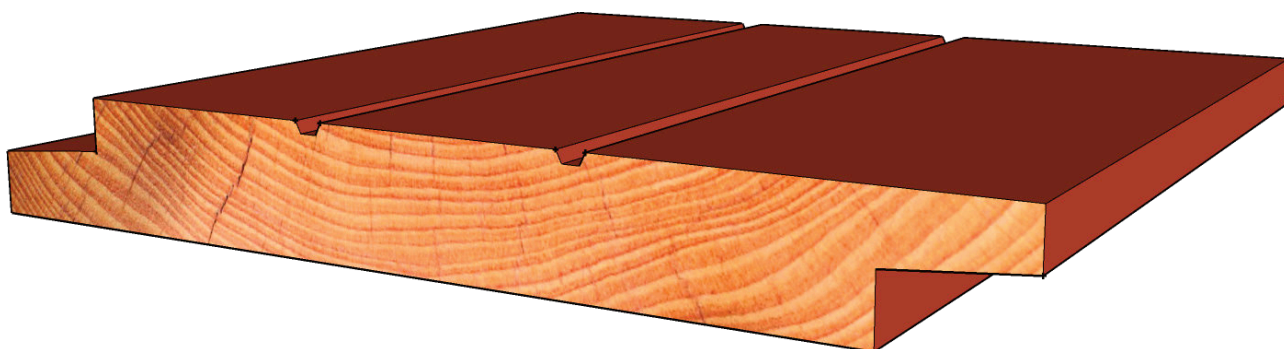

NK25: Falsbræt med kineserhat

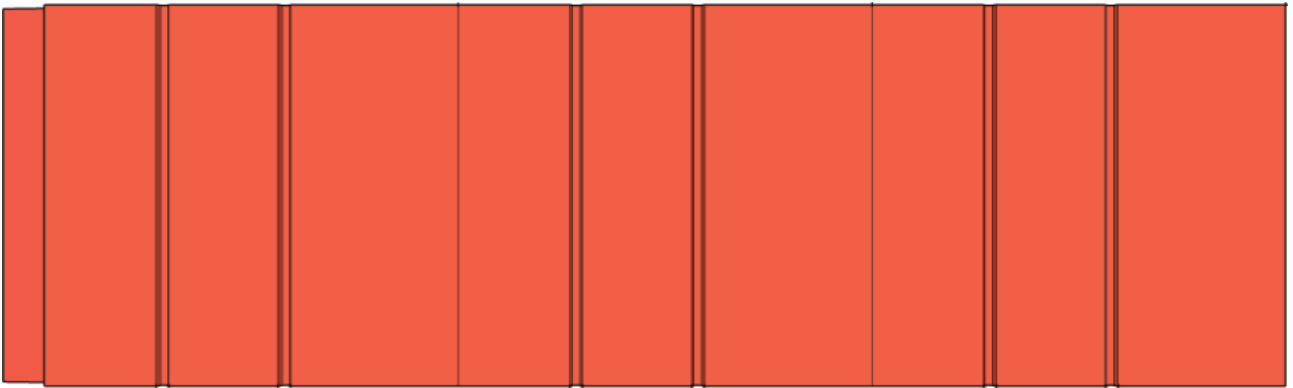

NK26: Z-profil med V-spor

Z-profil med to V-spor i facaden, hvilket giver indtryk af en listeprofil. Dimensioner: 22x145 mm.

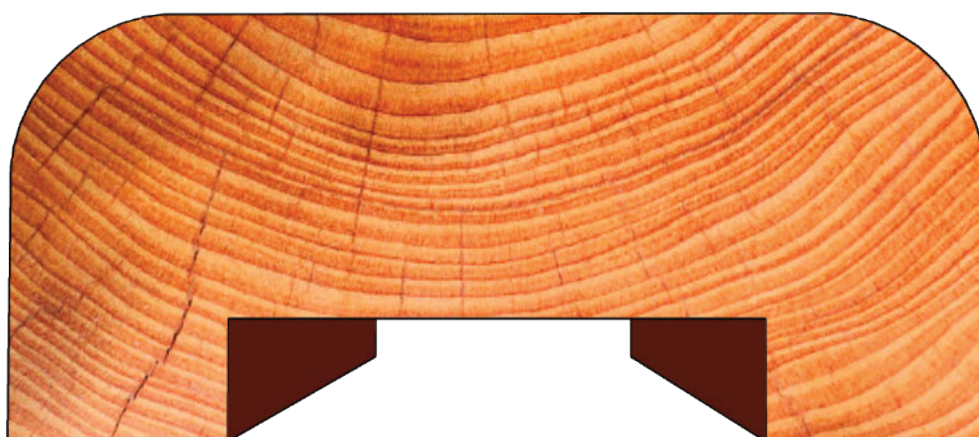

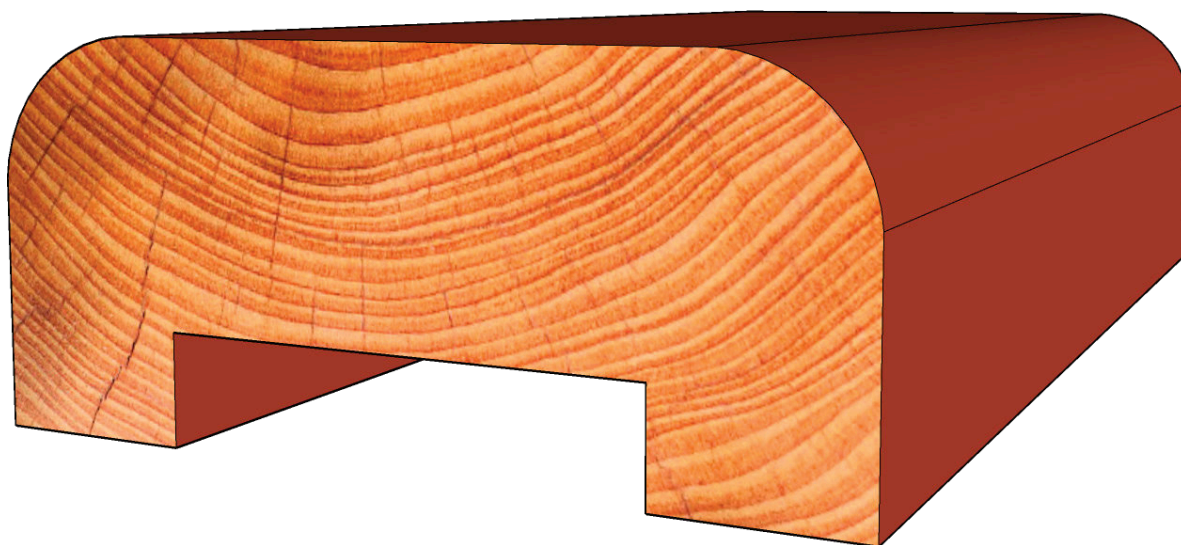

NK26: Z-profil med V-spor

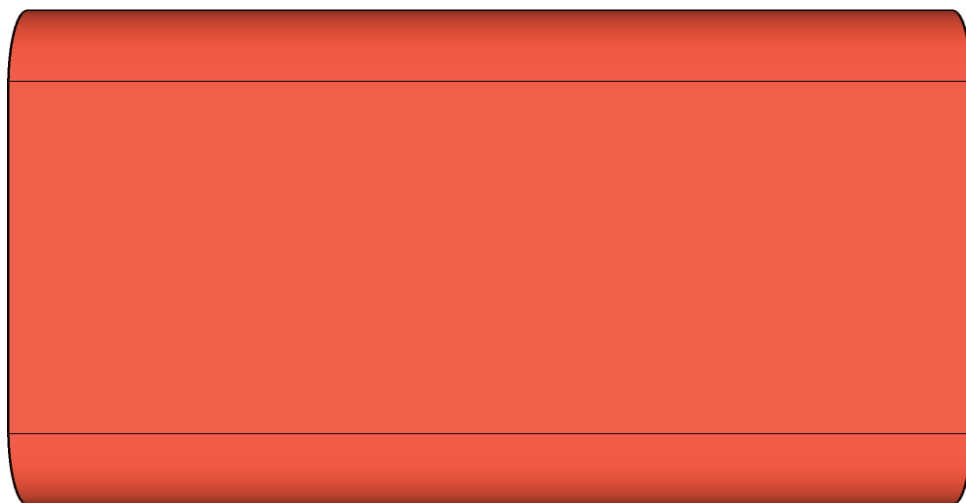

NK27: Håndliste med stålspor

Håndliste med radius 16 hjørner og spor til stål.
Fås i flere bredder og tykkelser.

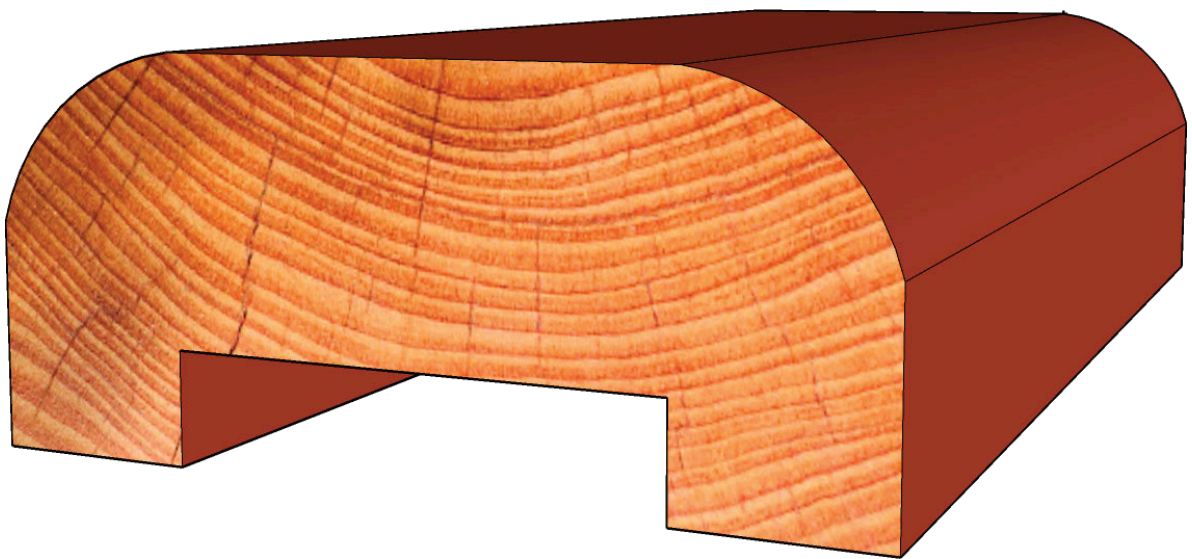

NK27: Håndliste med stålspor

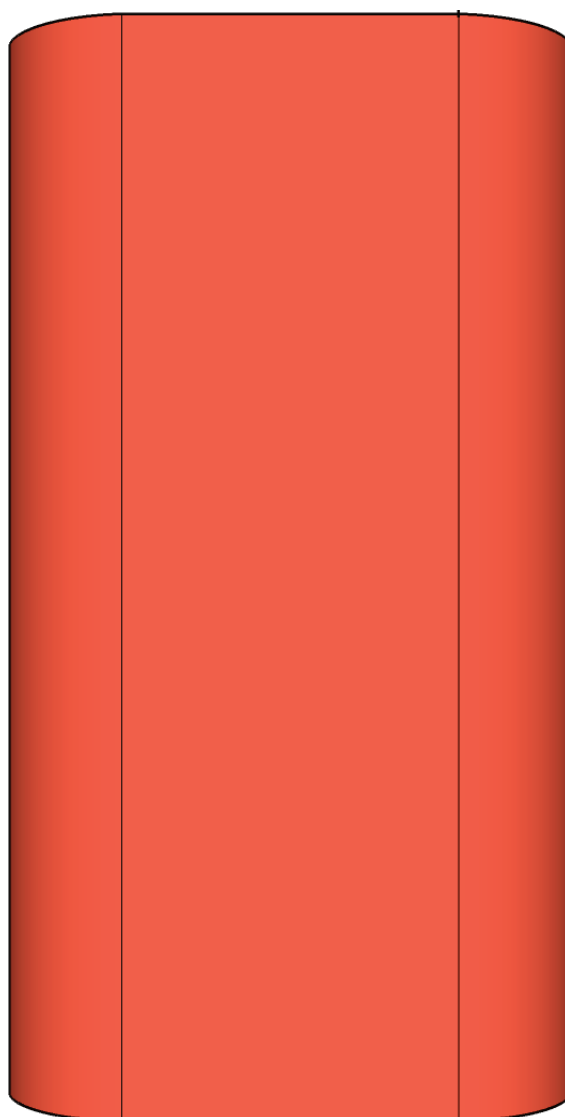

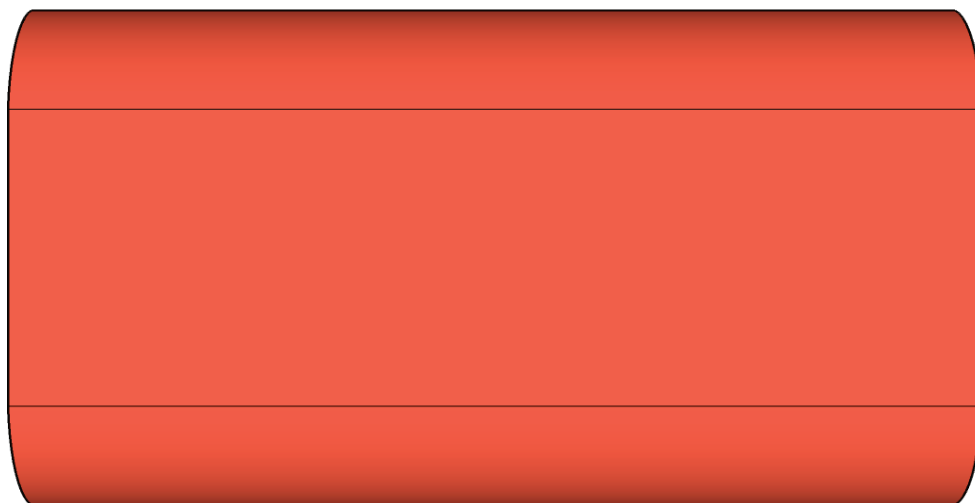

NK28: Håndliste med større radius

Som NK27, men med større radius på hjørnerne.

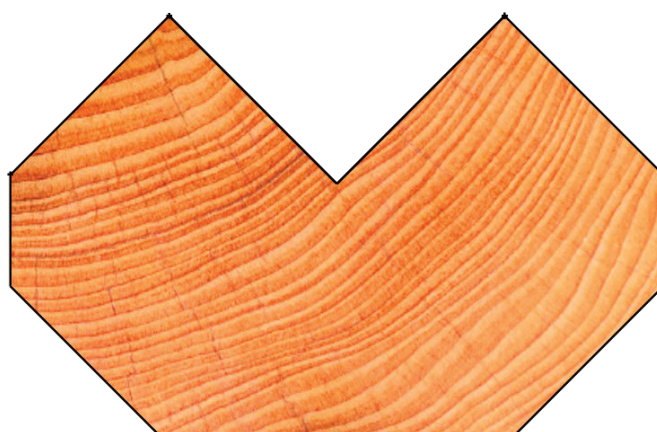

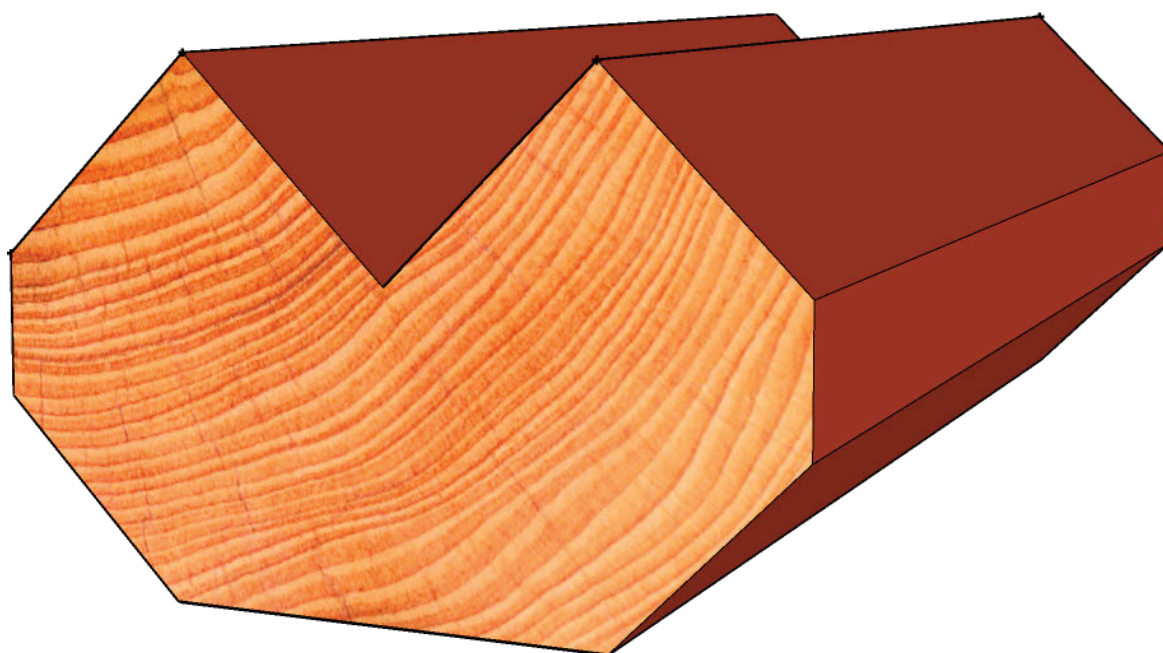

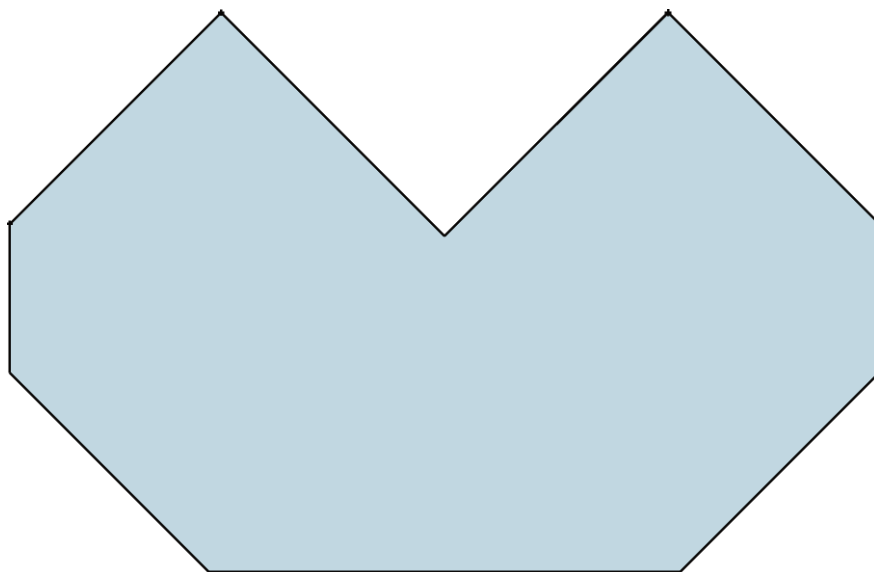

NK28: Håndliste med større radius

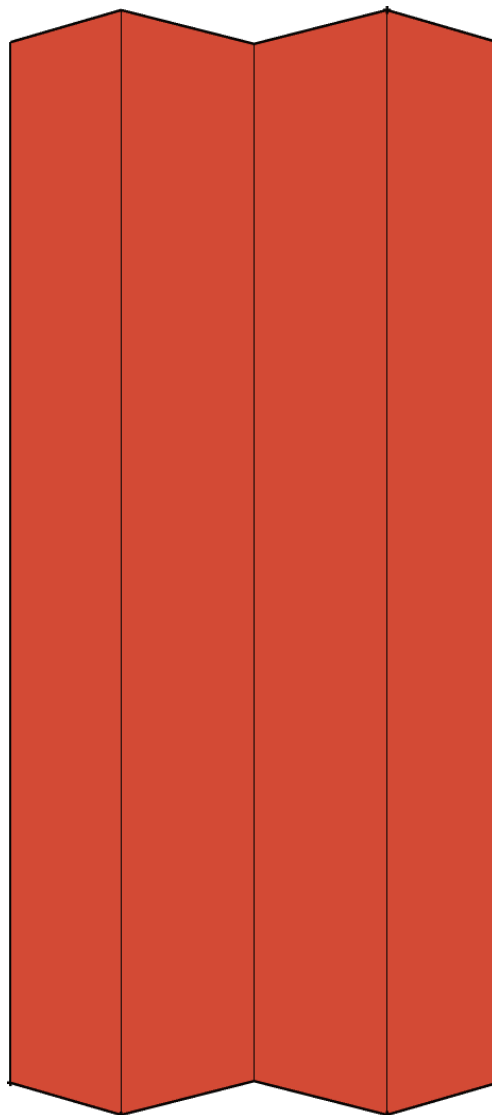

NK29: Trapez hjørneliste

Trapez hjørneliste, der passer både til indvendige og udvendige hjørner. "Skærer hjørner" med 45 grader.

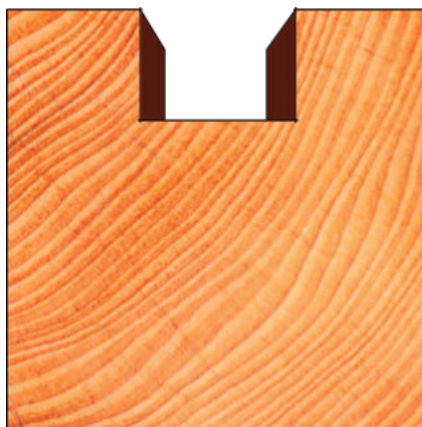

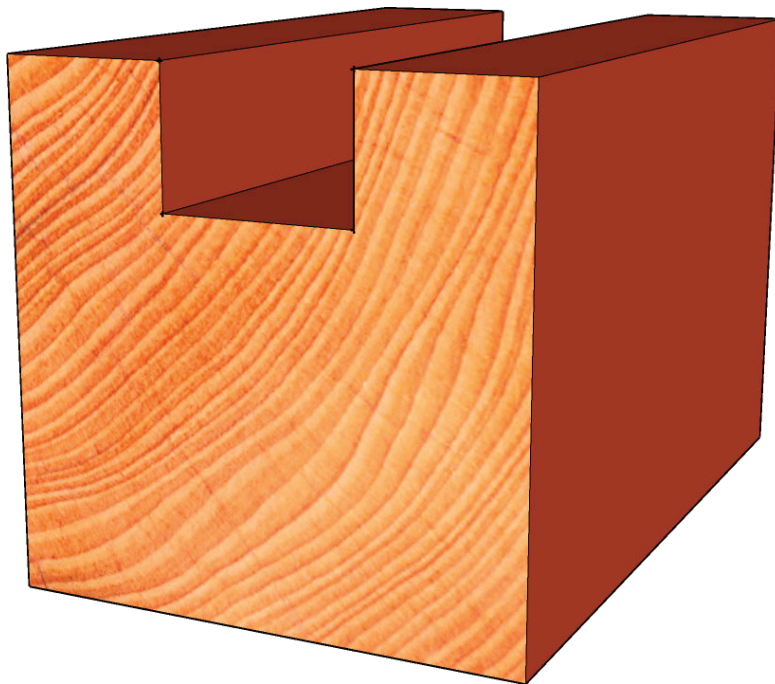

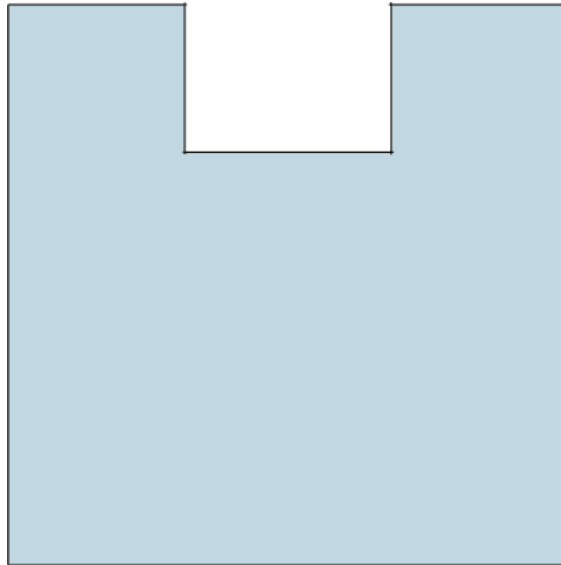

NK29: Trapez hjørneliste

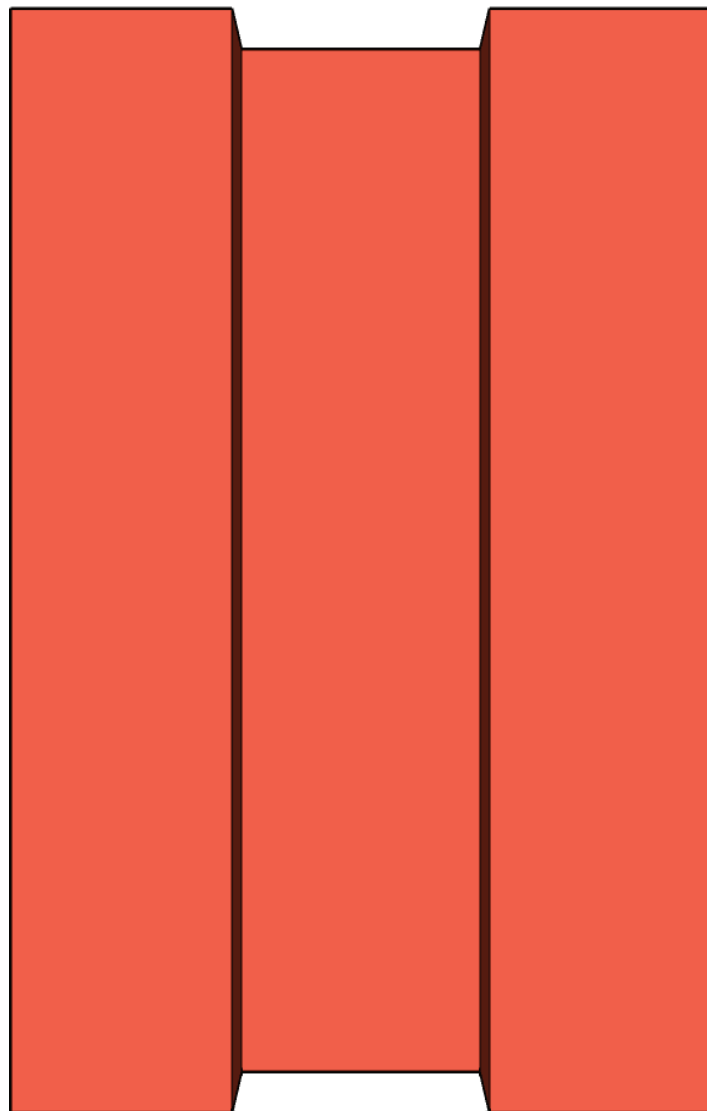

NK30: Firkantet liste med not

Firkantet liste med not, bruges til montage mellem stål og træ.

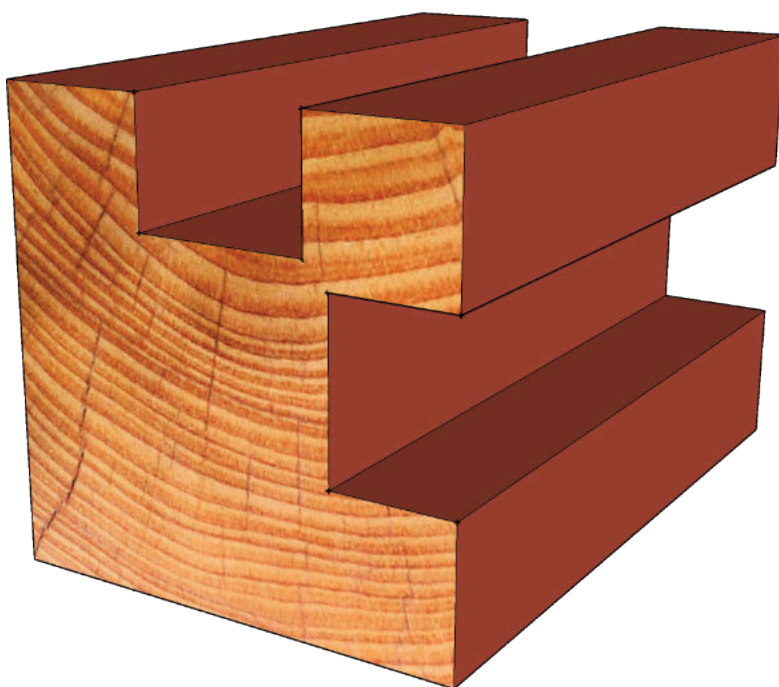

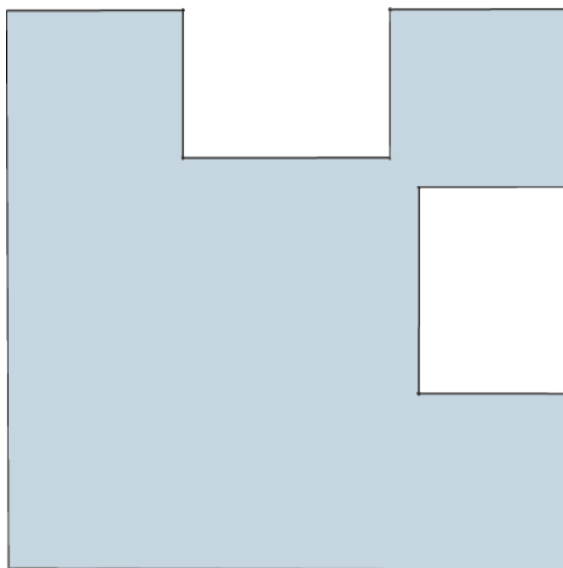

NK30: Firkantet liste med not

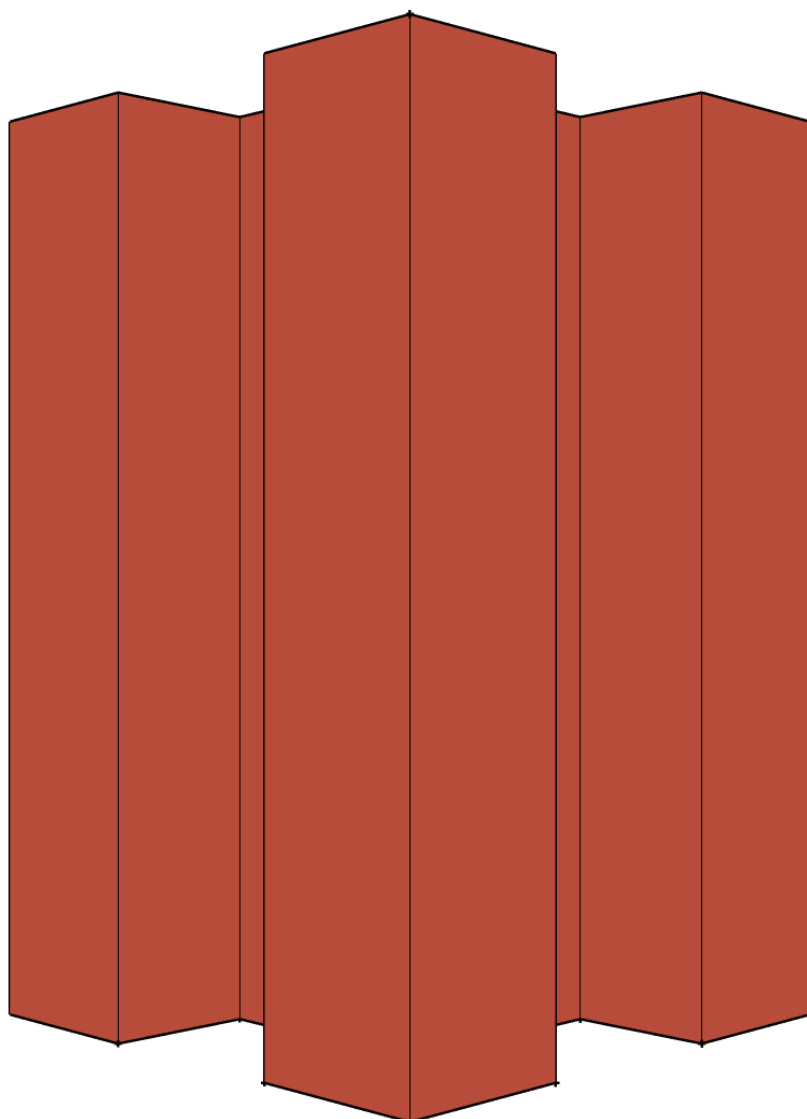

NK31: Hegnsstolpe vinkelprofil

Hegnsstolpe vinkelprofil til vores Nabohegn-system. Dimensioner: 90x90 mm.

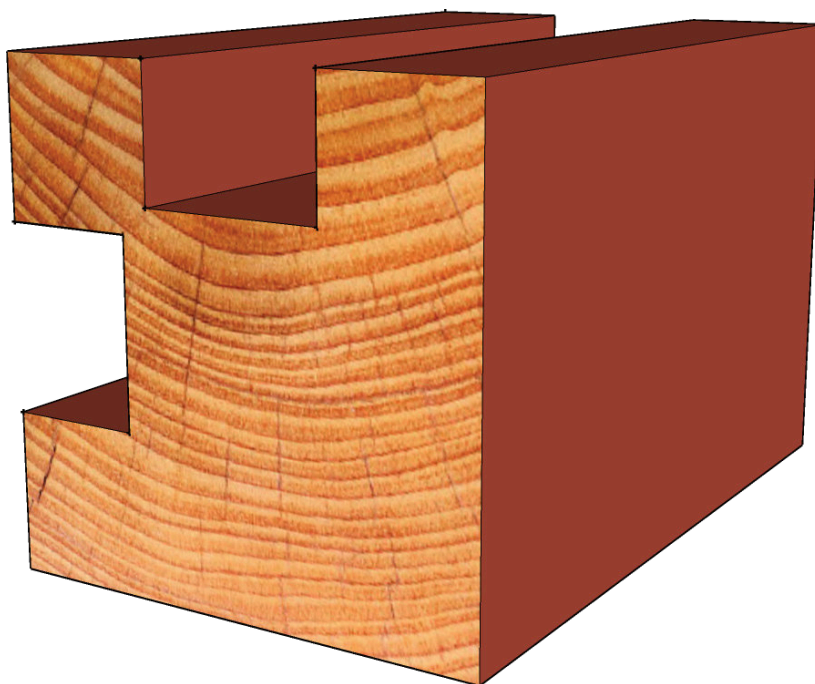

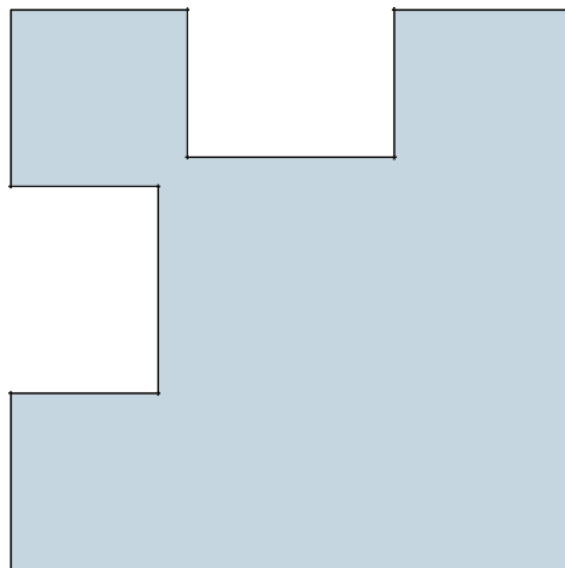

NK31: Hegnsstolpe vinkelprofil

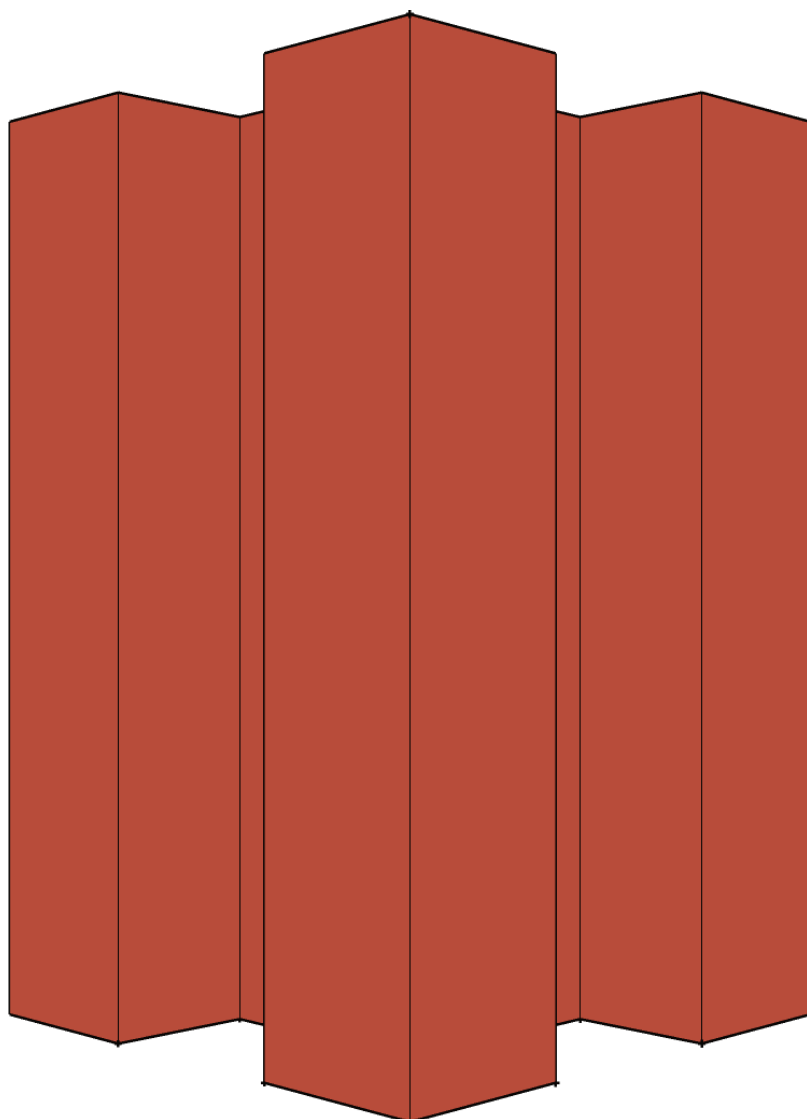

NK32: Vinkelstolpe til Nabohegn

Vinkelstolpe til Nabohegn.

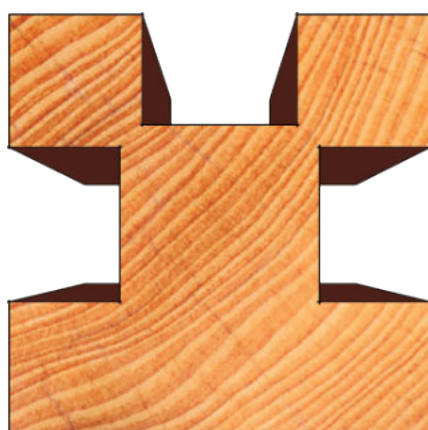

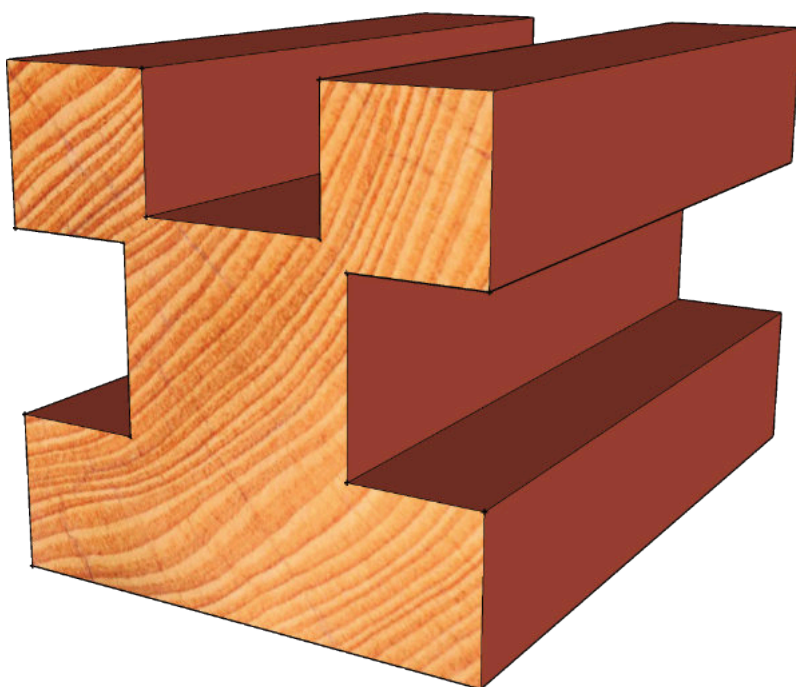

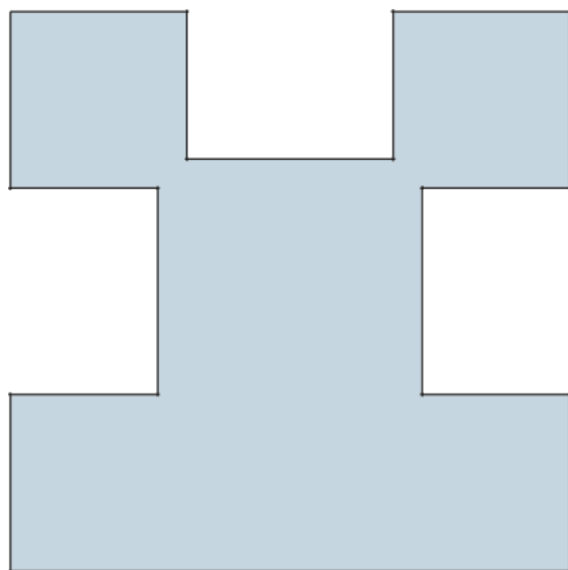

NK32: Vinkelstolpe til Nabohegn

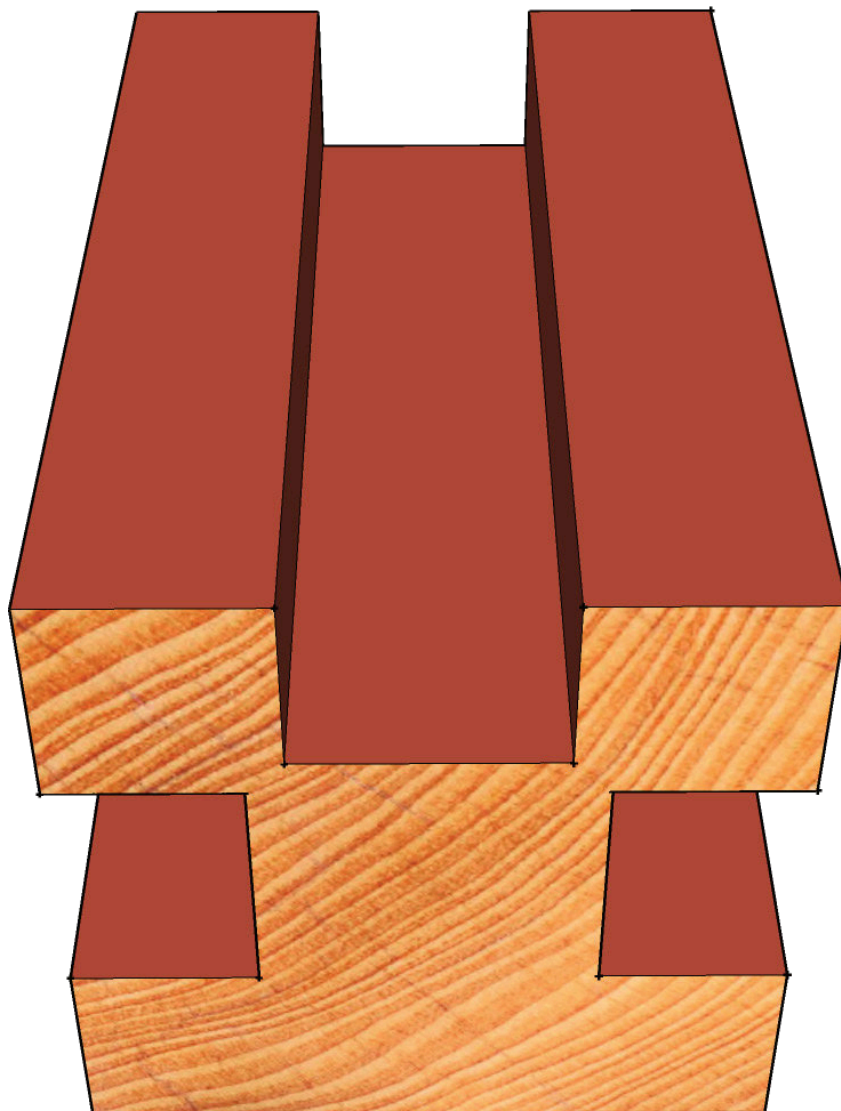

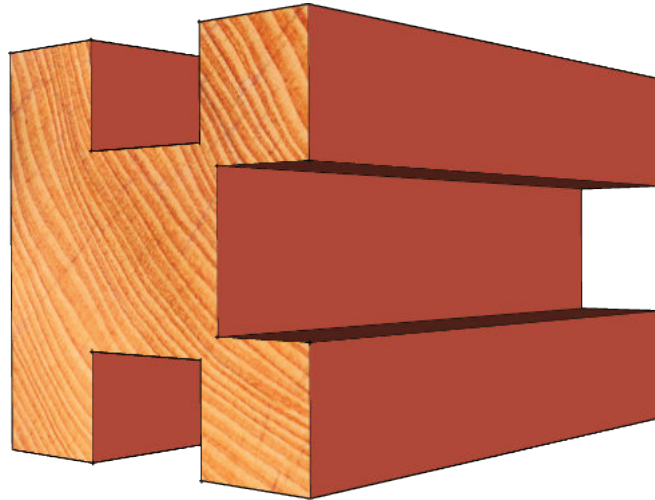

NK33: T-stolpe til Nabohegn

T-stolpe til Nabohegn 90x90 mm, som også kan bruges som skjuler til skraldespande.

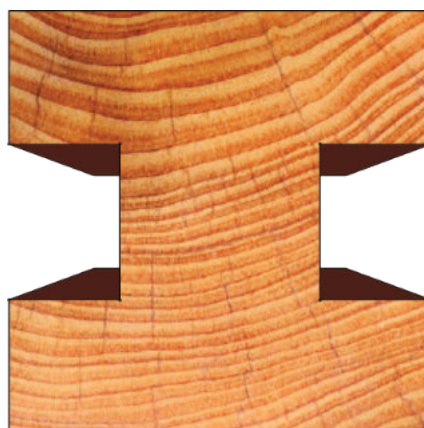

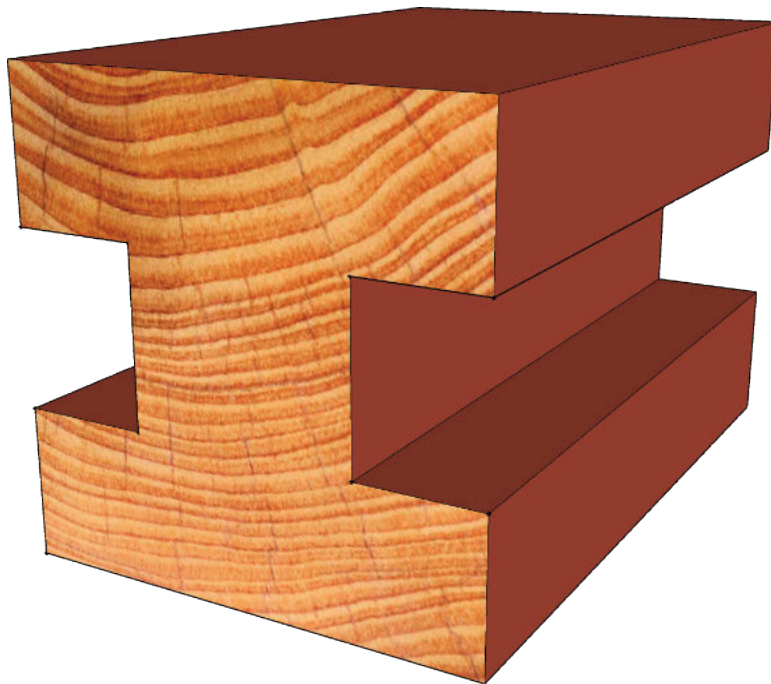

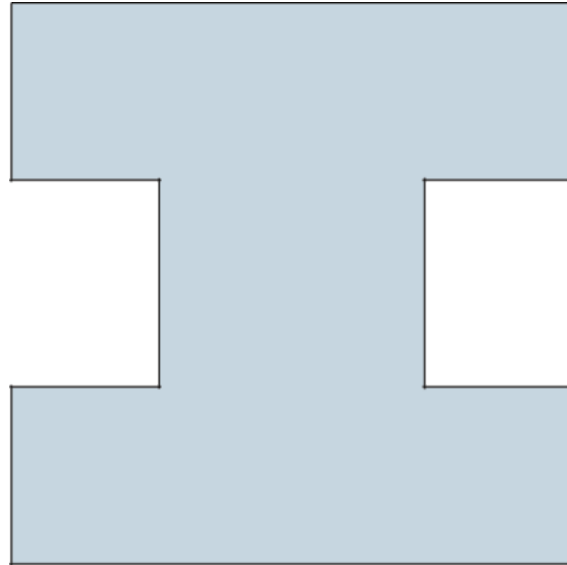

NK33: T-stolpe til Nabohegn

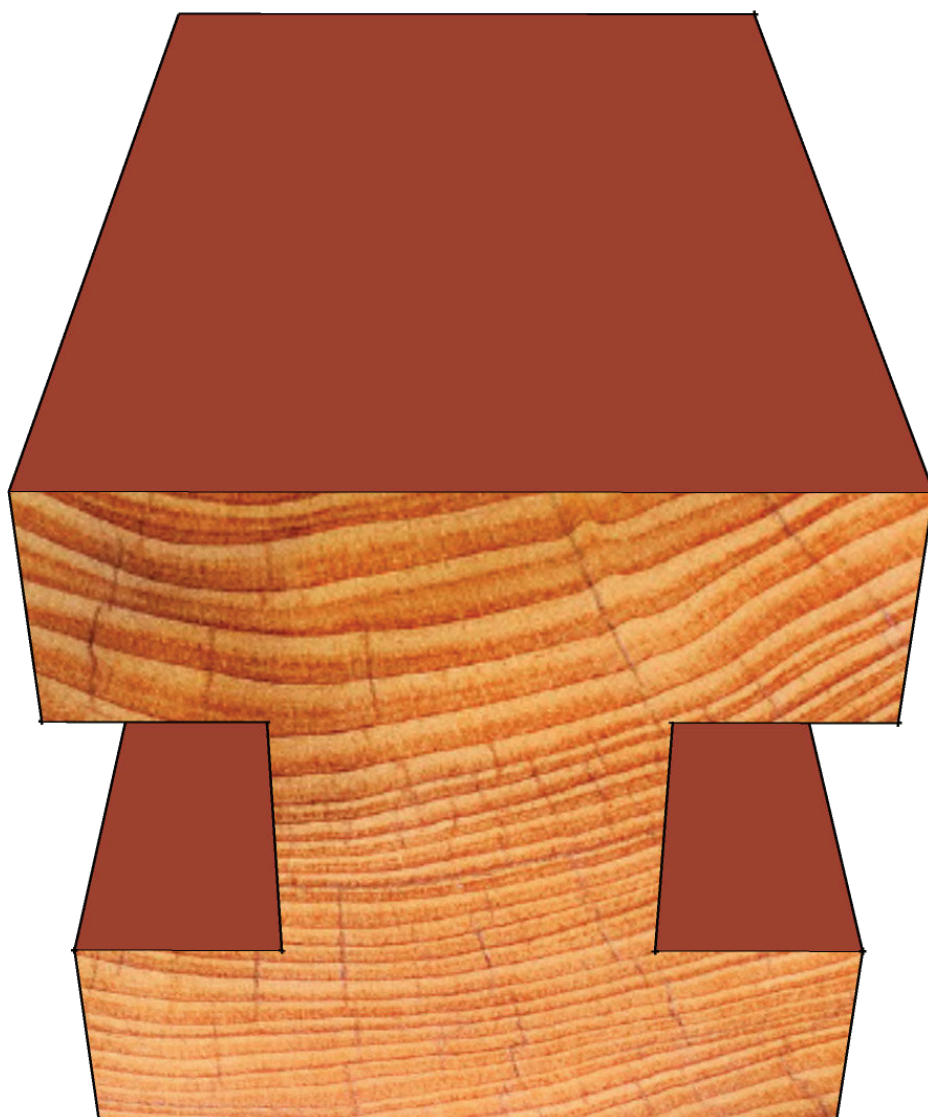

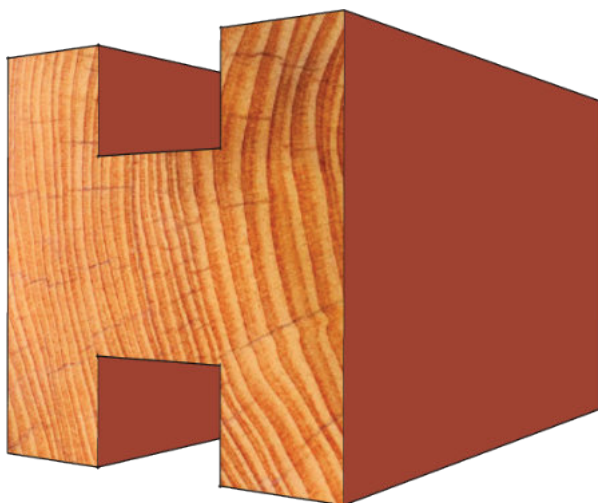

NK34: H-stolpe til Nabohegn

H-stolpe til Nabohegn.

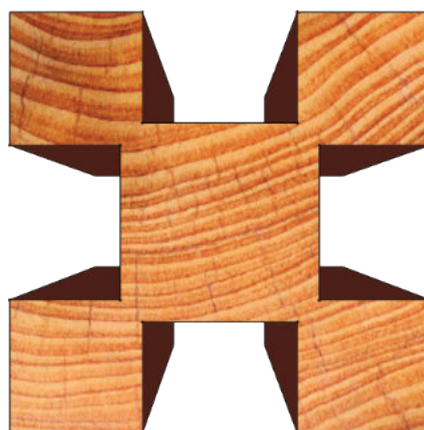

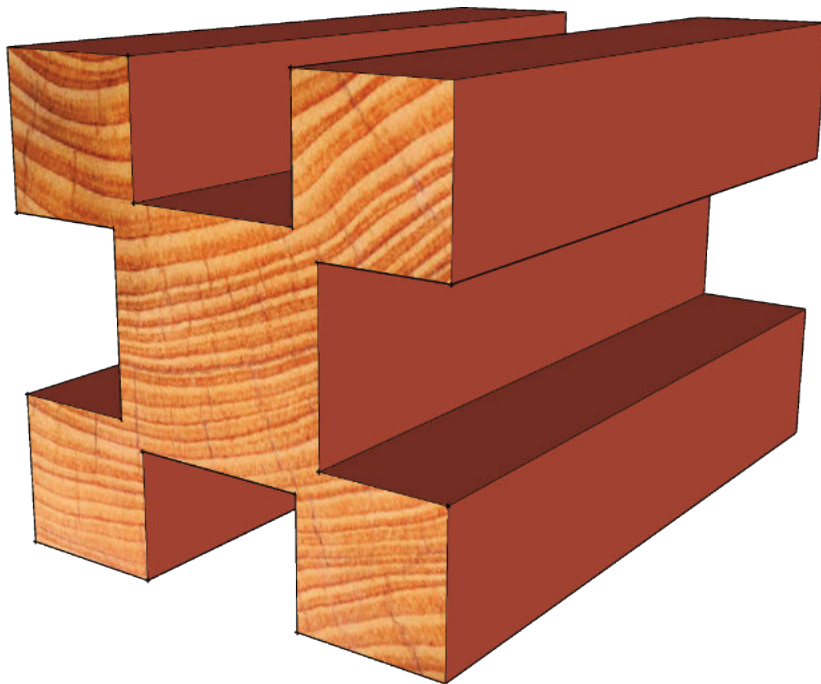

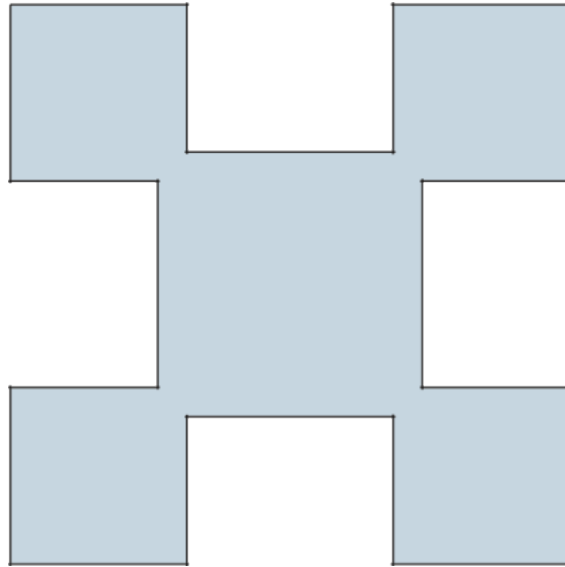

NK34: H-stolpe til Nabohegn

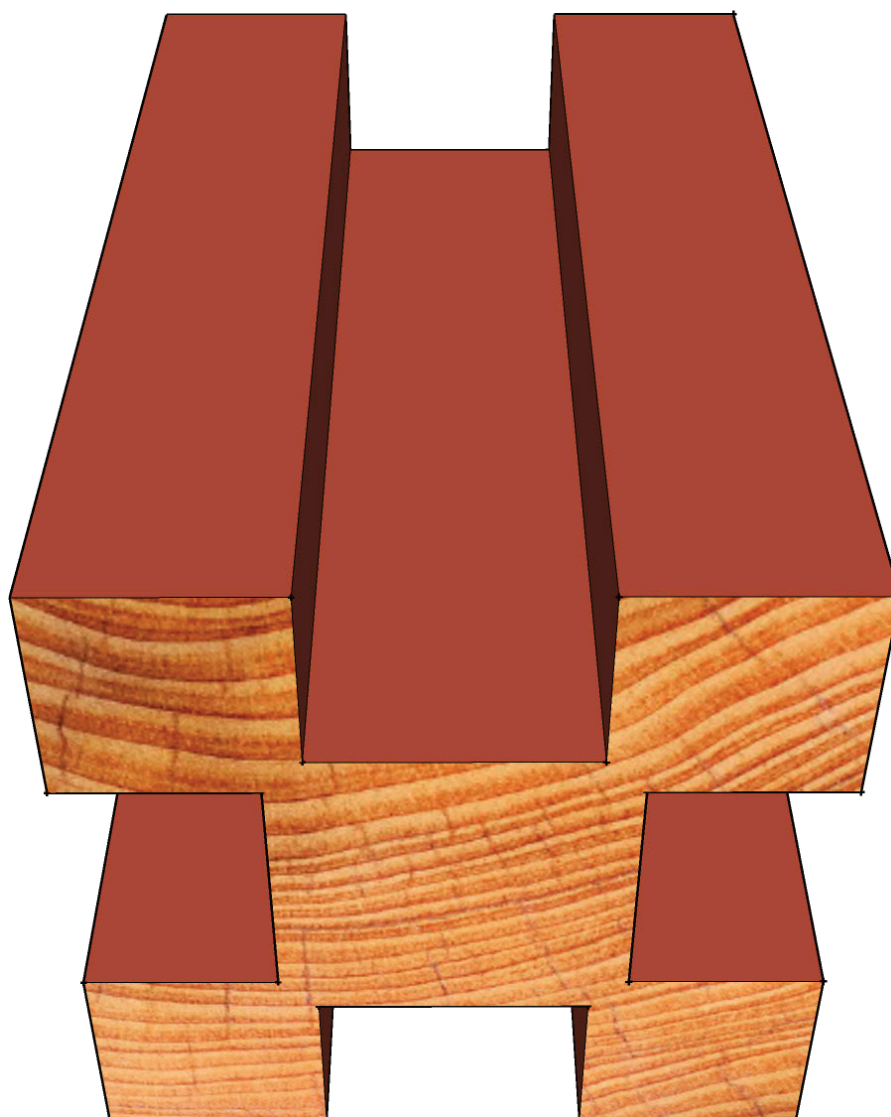

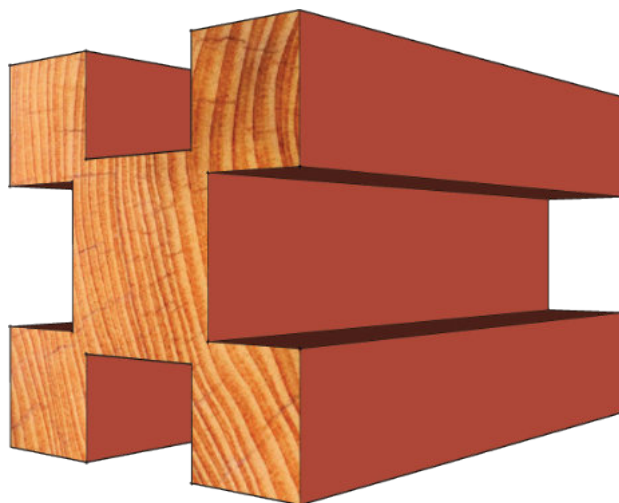

NK35: Krydsstolpe til Nabohegn

Krydsstolpe til Nabohegn. Dimensioner: 90x90 mm.

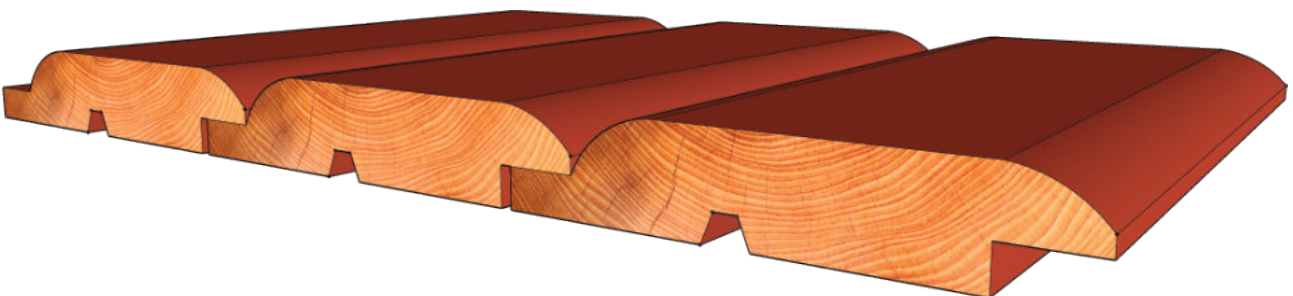

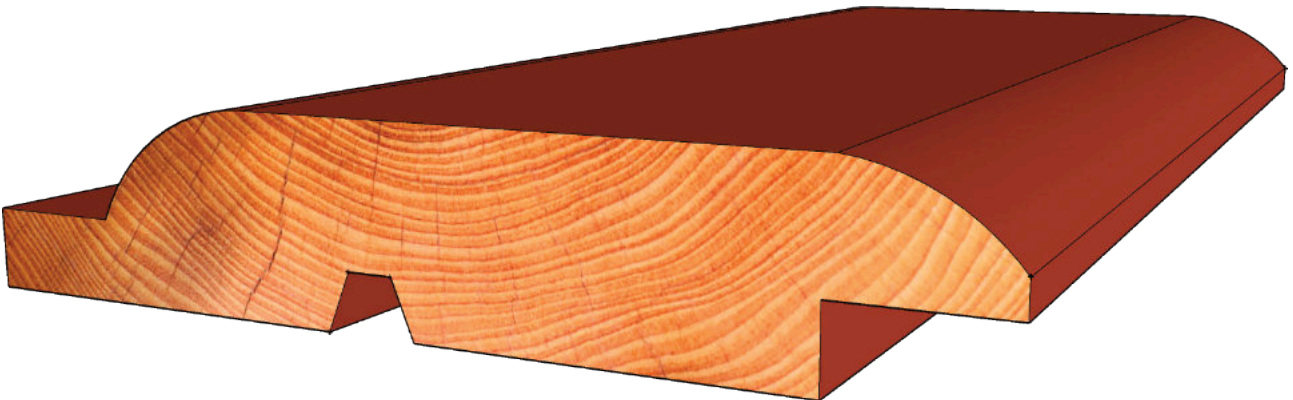

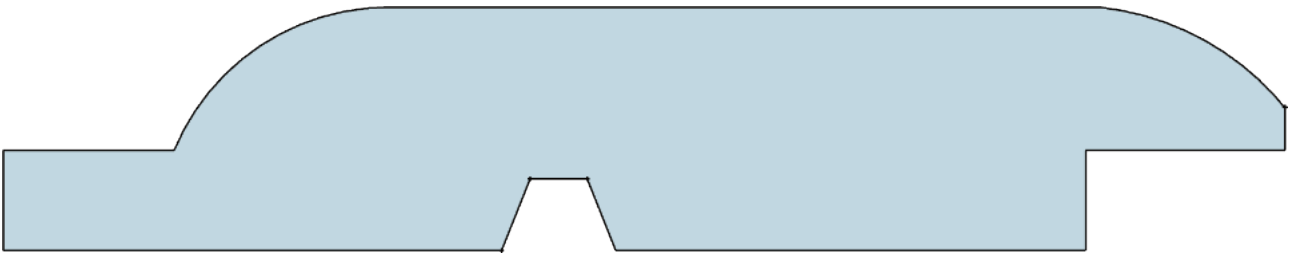

NK35: Krydsstolpe til Nabohegn

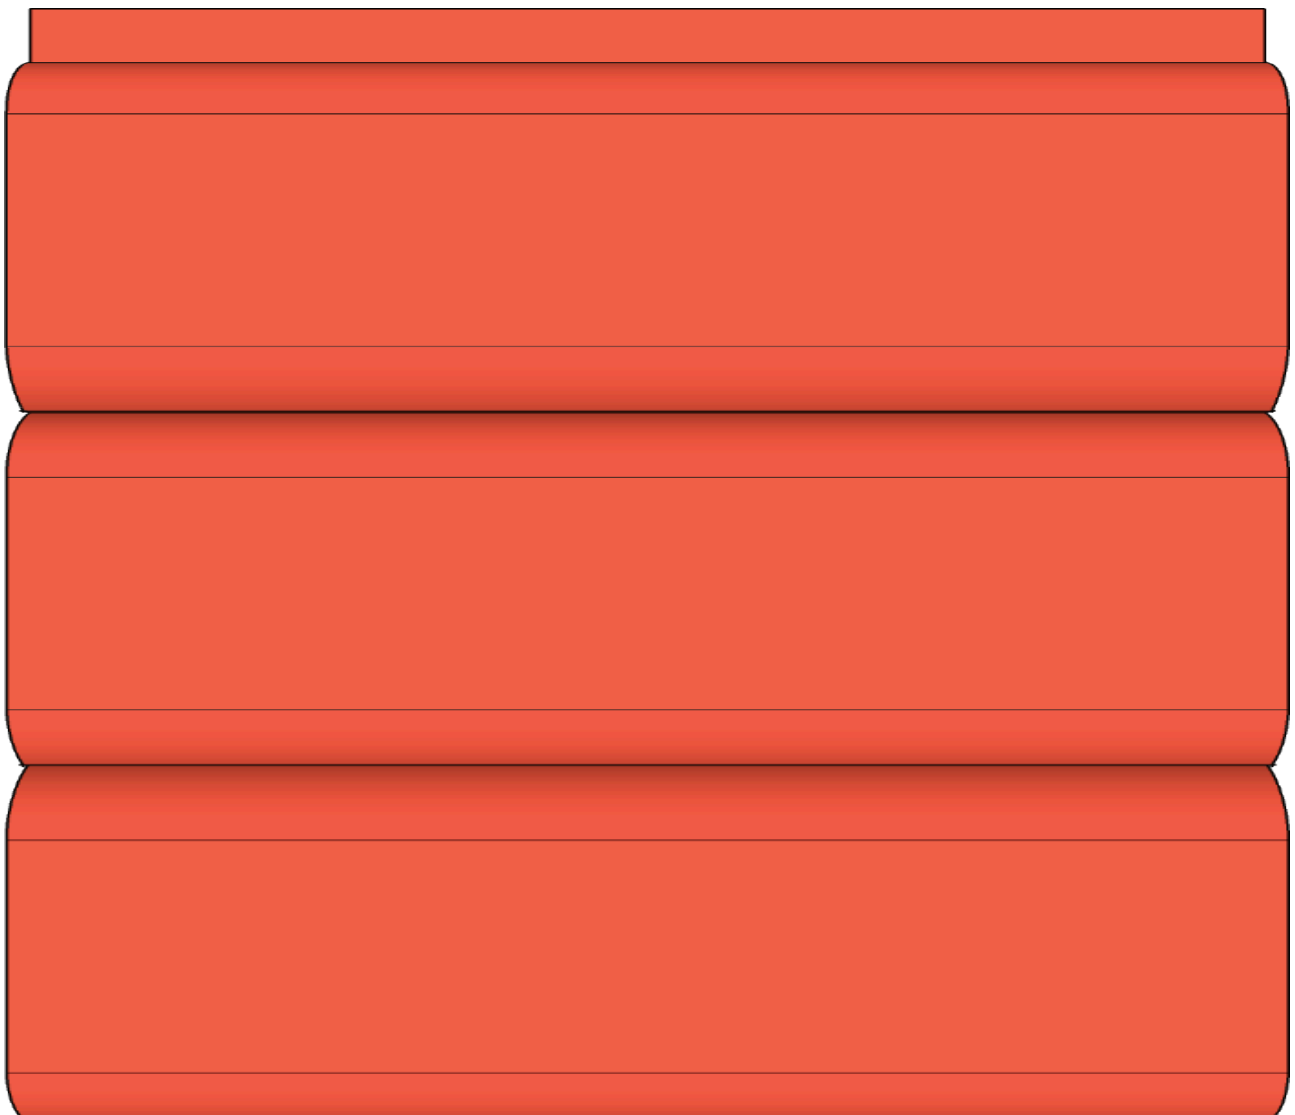

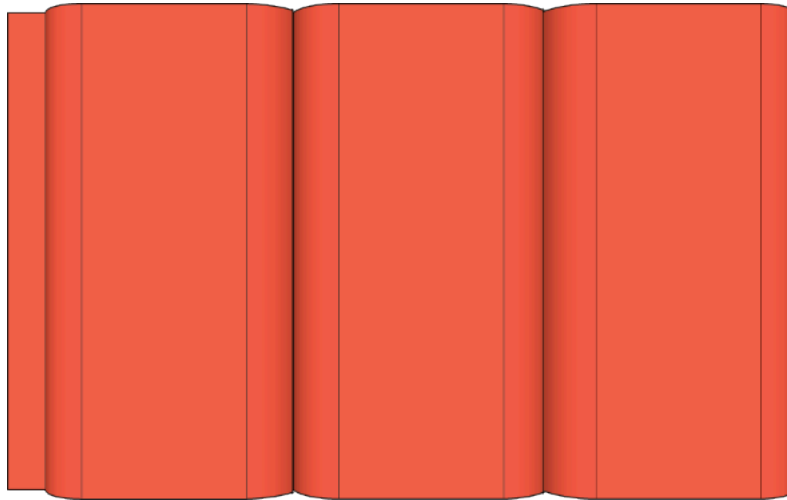

NK36: Blokhusskal fra 60'erne og 70'erne

Blokhusskal 16x80 mm, kendt fra 60'erne og 70'ernes sommerhuse. En nøjagtig kopi.

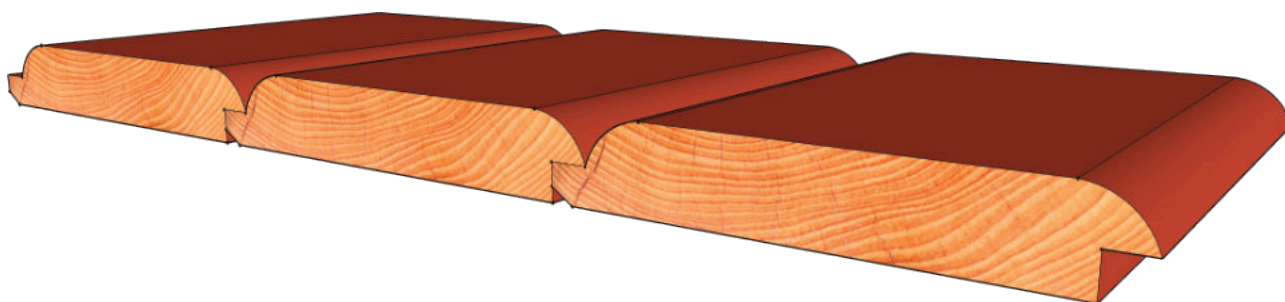

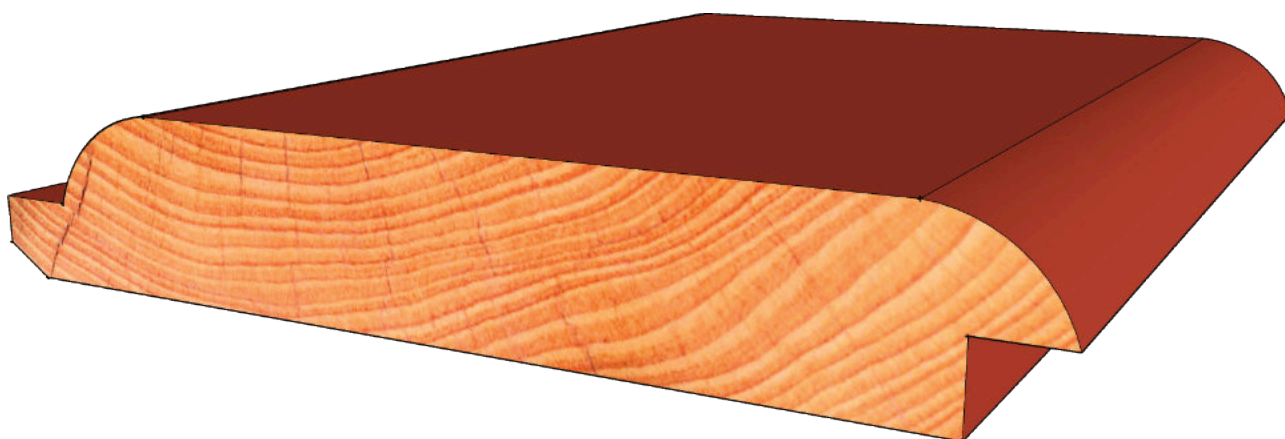

NK36: Blokhusskal fra 60'erne og 70'erne

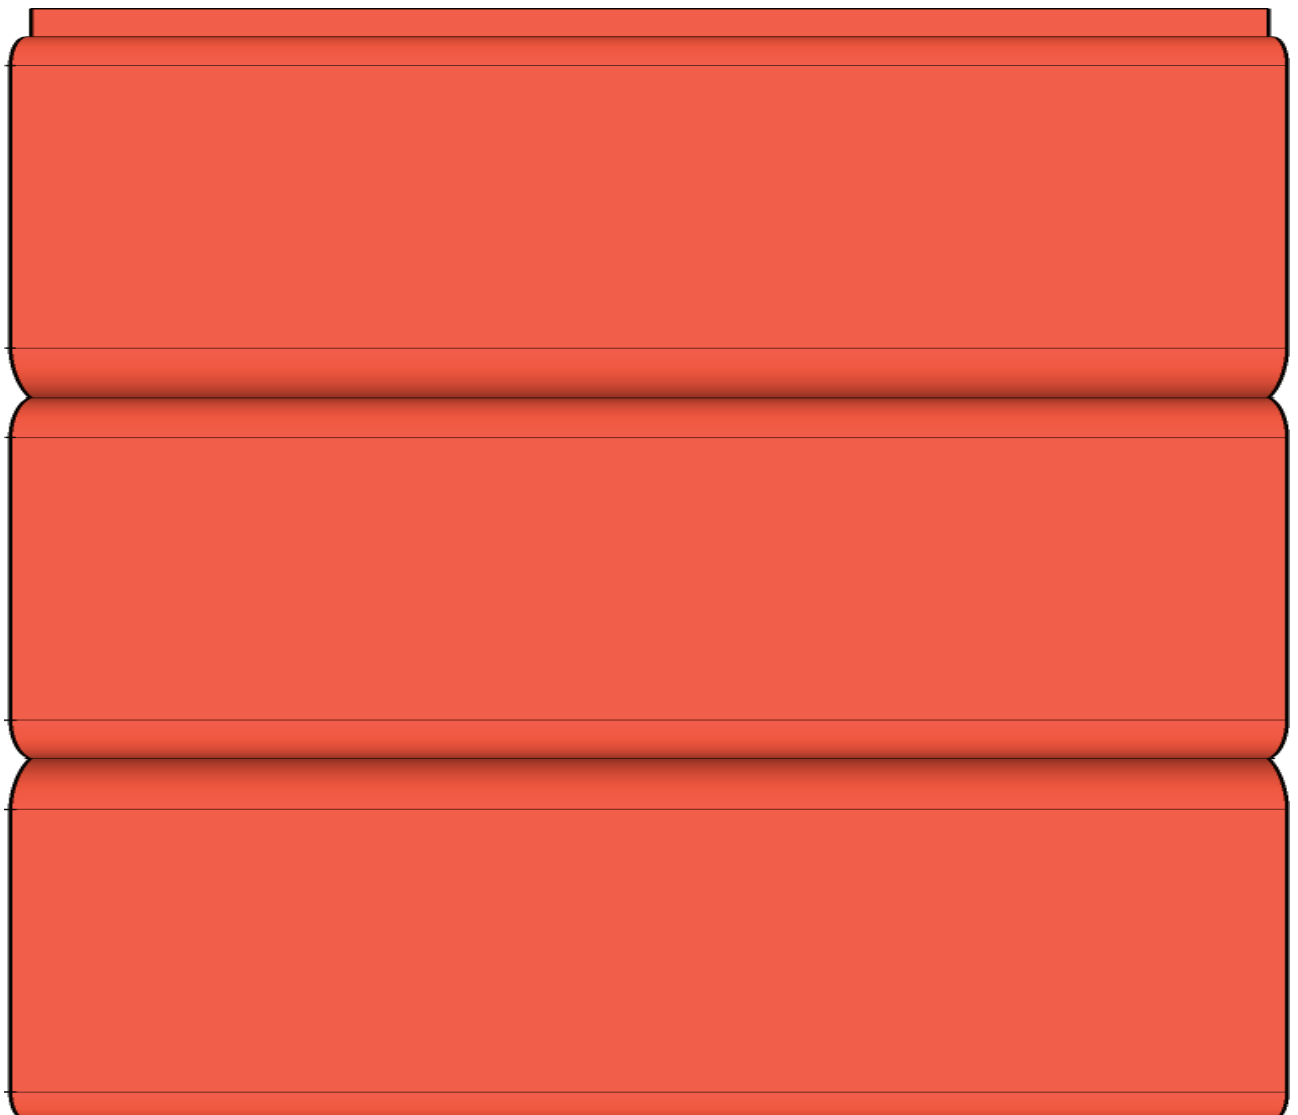

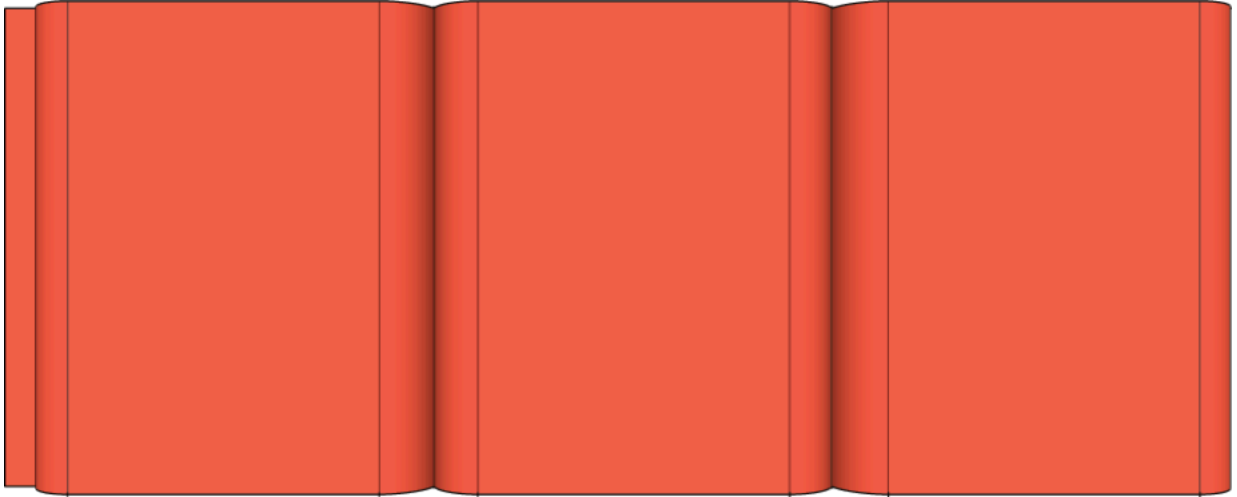

NK37: Blokhusskal med flad bue

Blokhusskal med flad bue og fals. Dimensioner:
22x140 mm.

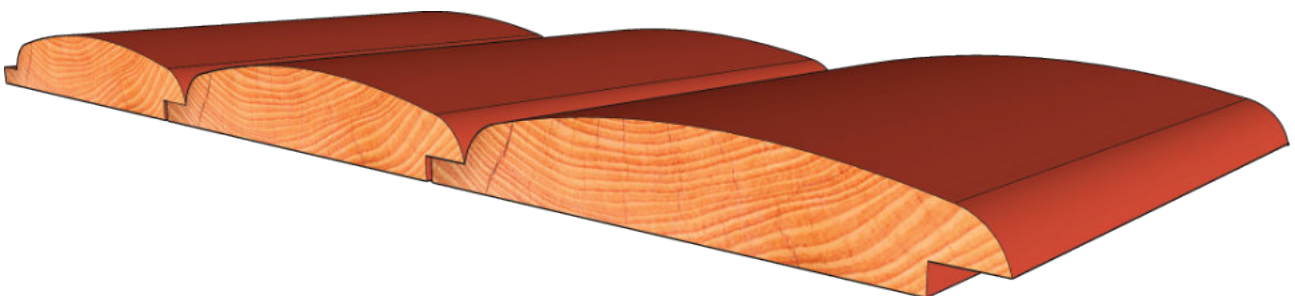

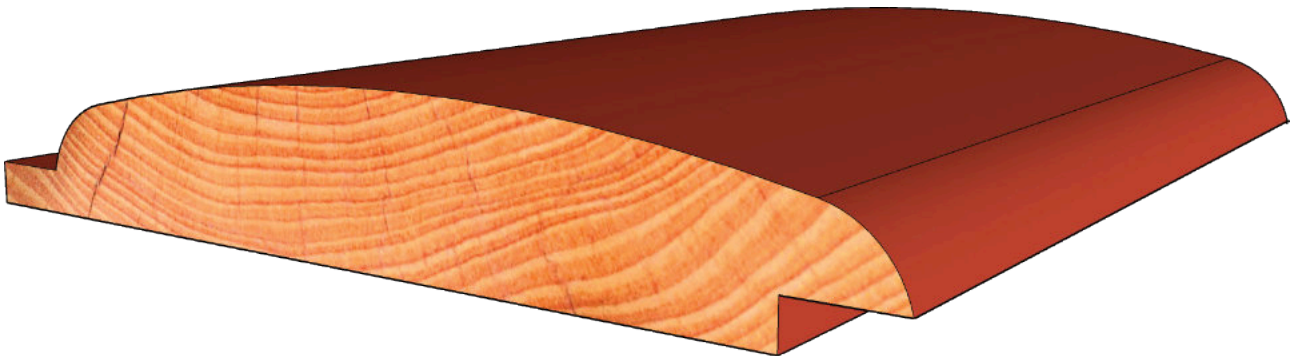

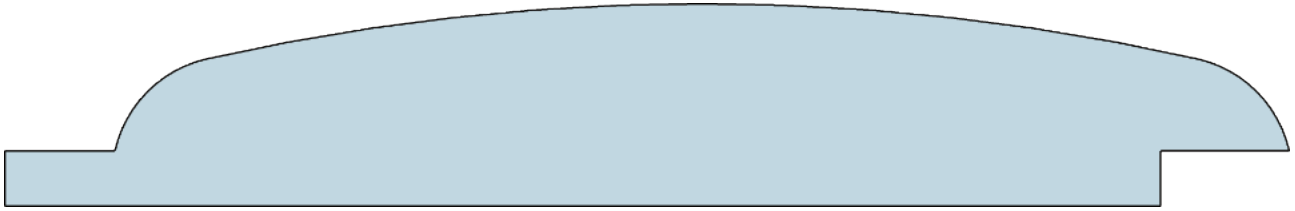

NK37: Blokhusskal med flad bue

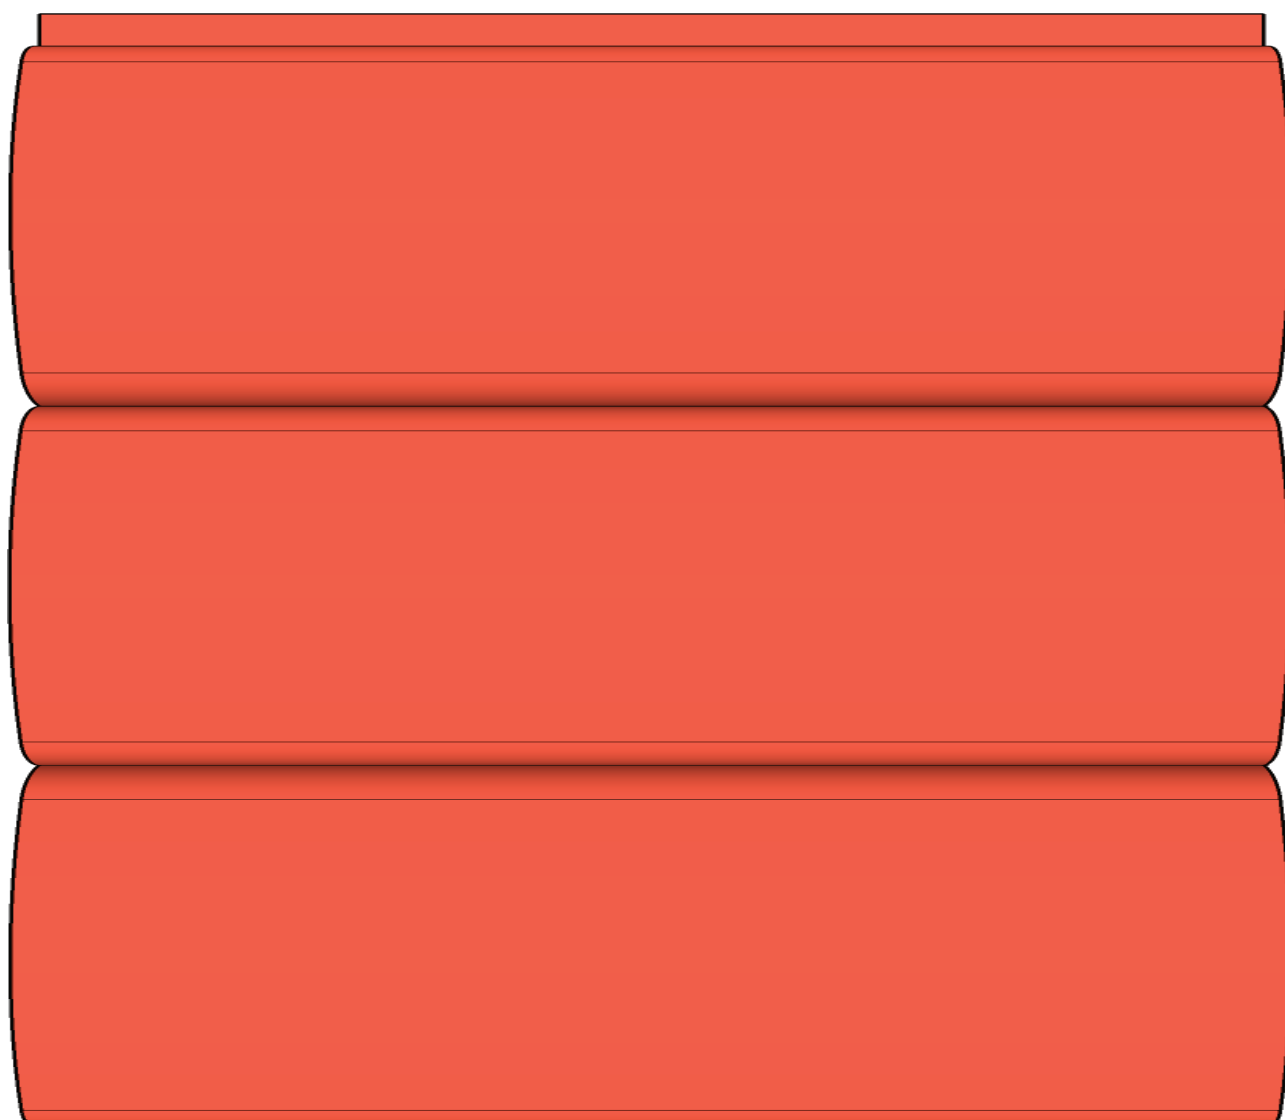

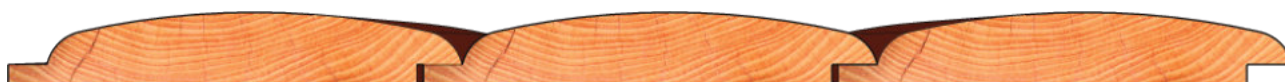

NK38: Blokhusskal med stor bue

Blokhusskal 22x145 mm med stor bue.

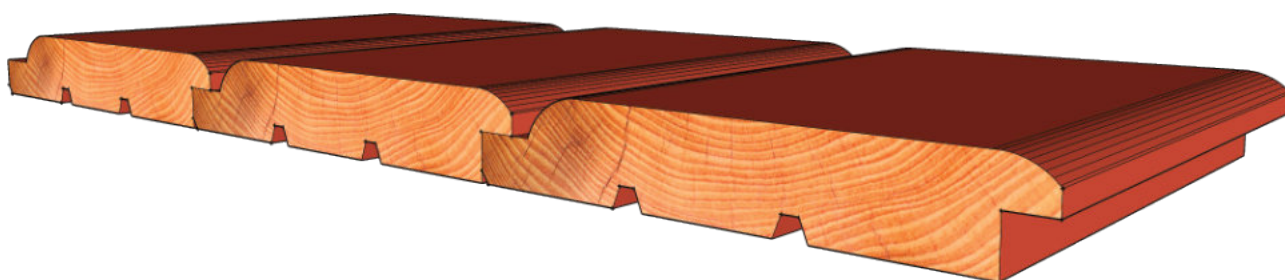

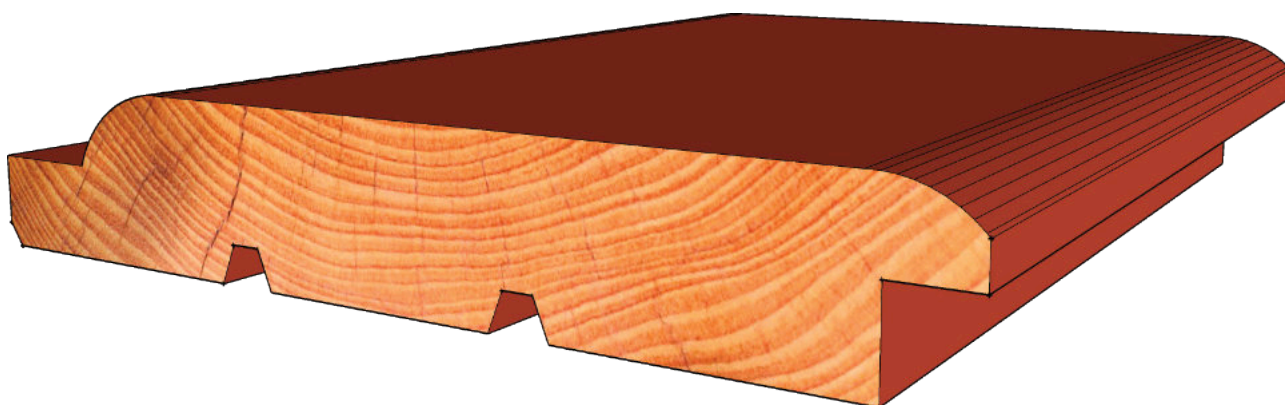

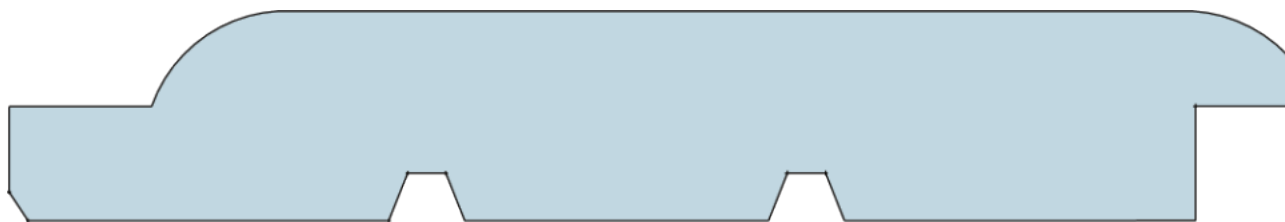

NK38: Blokhusskal med stor bue

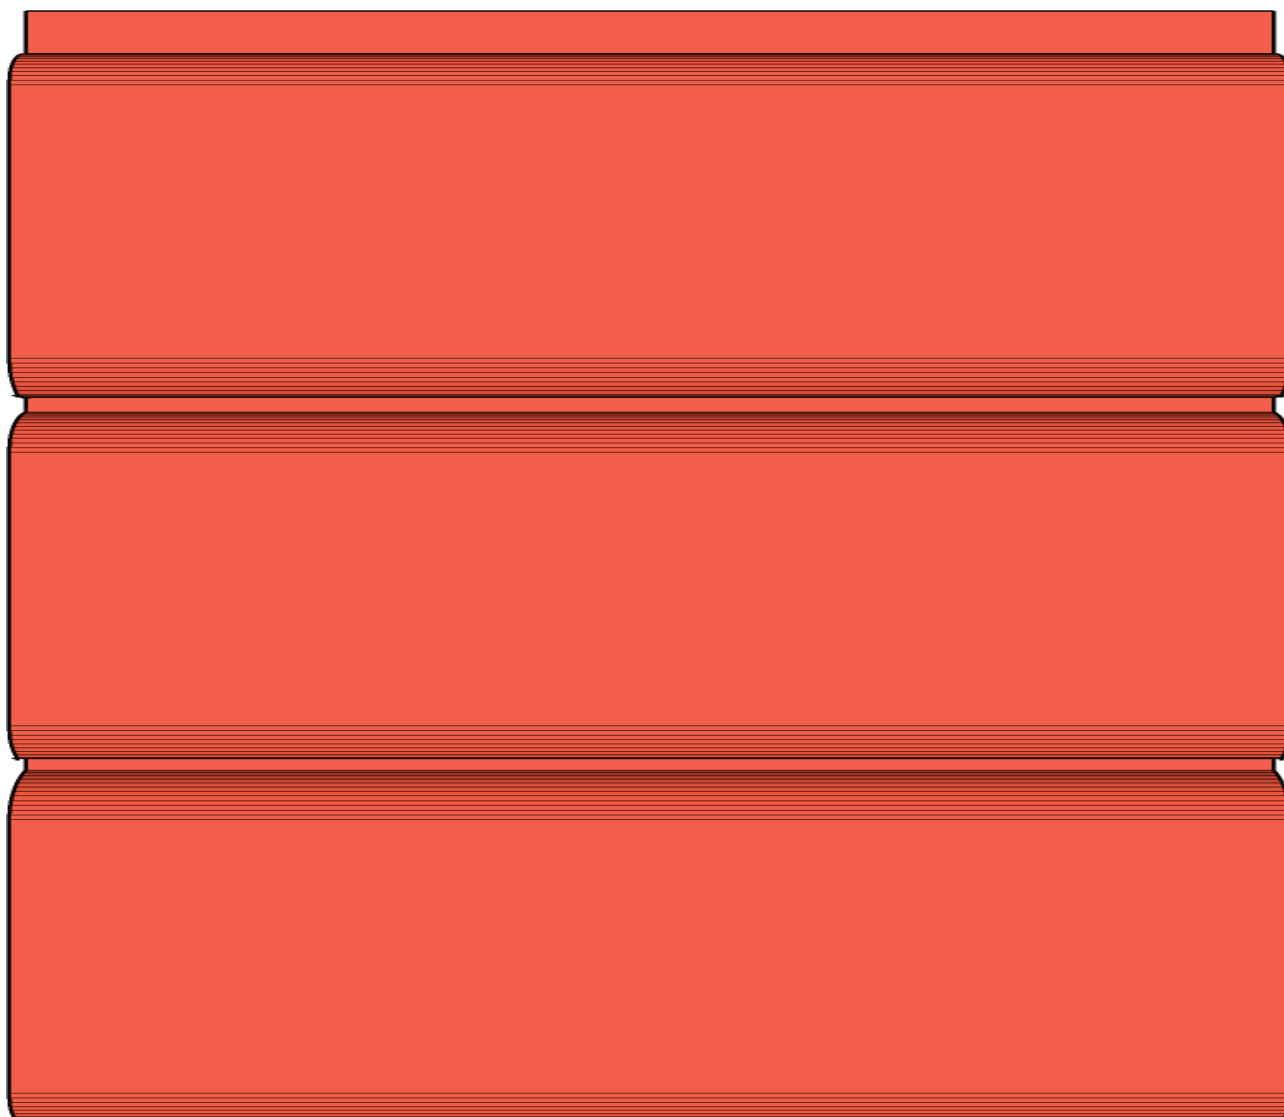

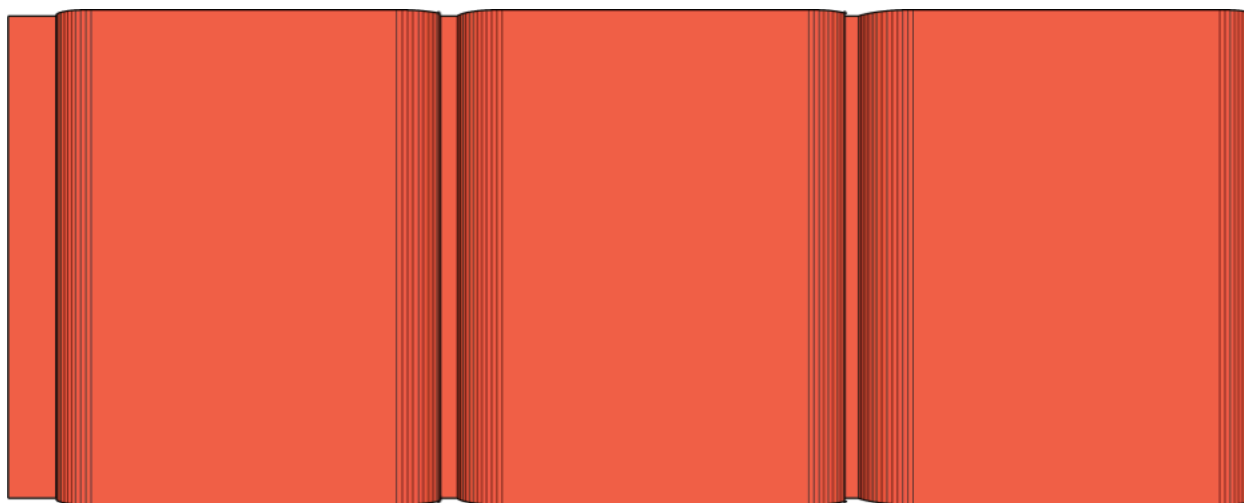

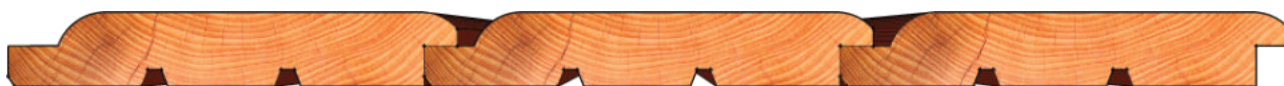

NK39: Blokhusskal med flad facade

Blokhusskal 22x140 mm med flad facade og 10 mm fals.

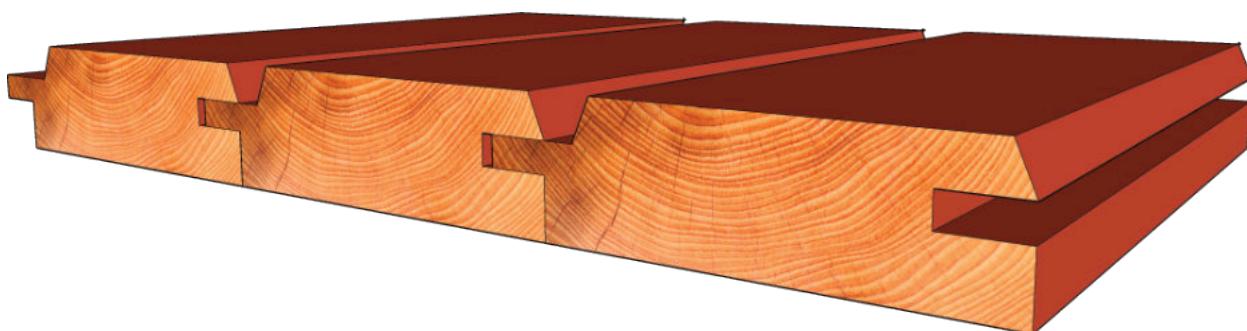

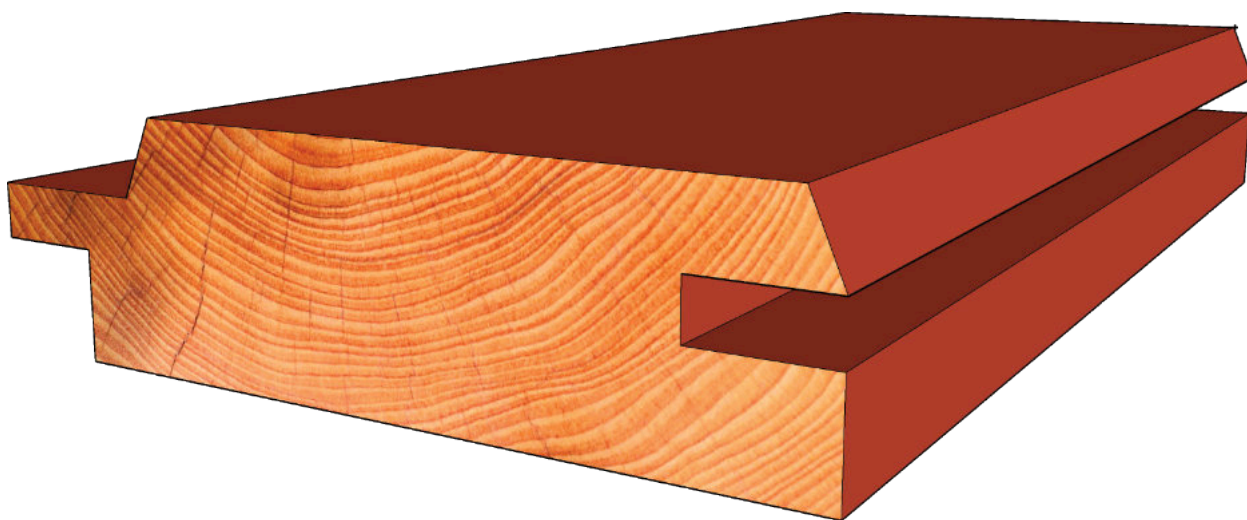

NK39: Blokhusskal med flad facade

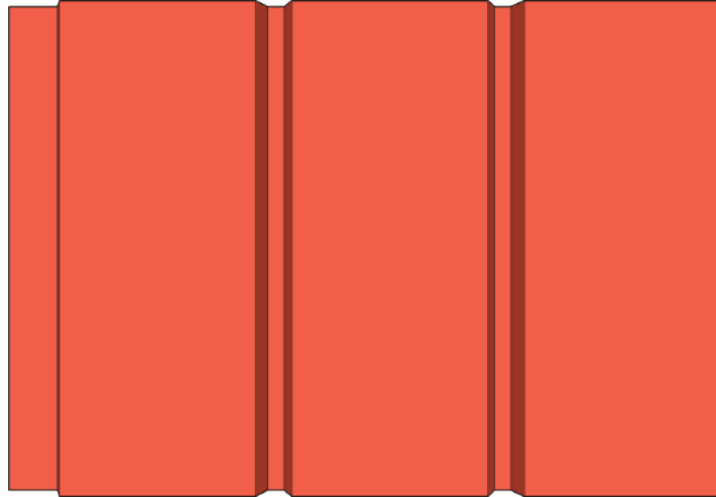

NK40: Loftprofil som trælodsprofil

Loftprofil som kopi af traditionelle trælodsprofiler. 8 mm dyb fer og not med 15 grader skrå kant. Dimensioner: 16x120 mm.

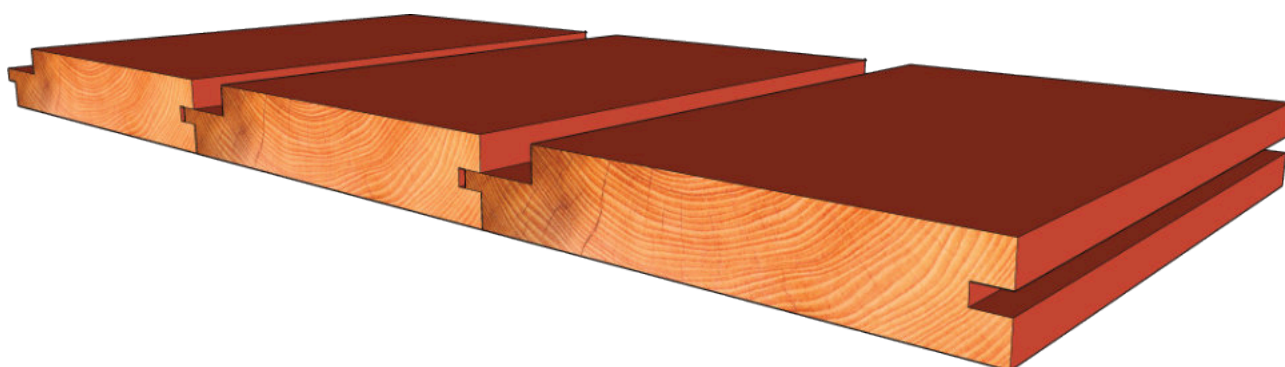

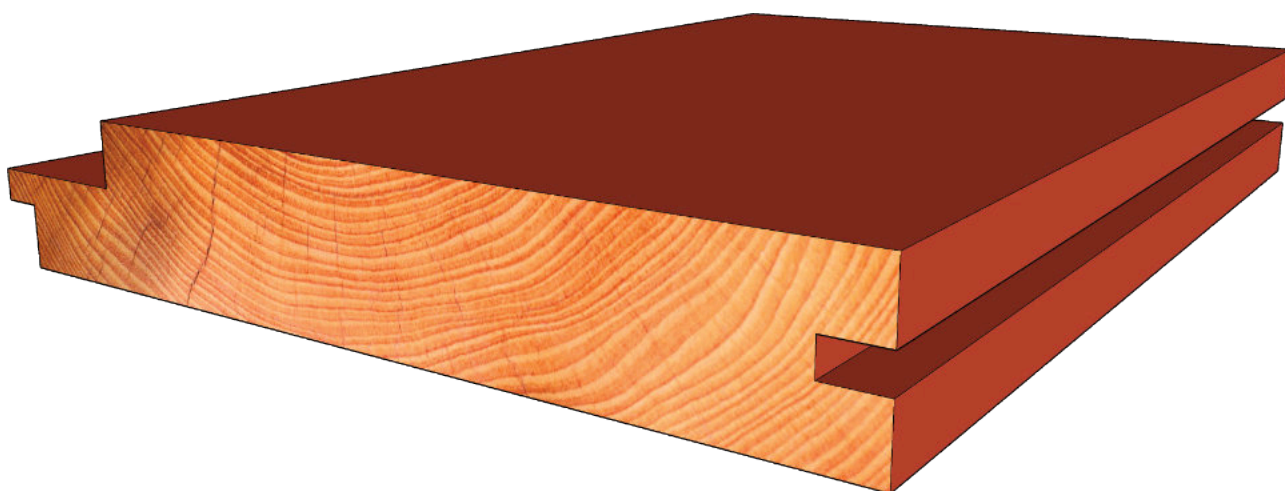

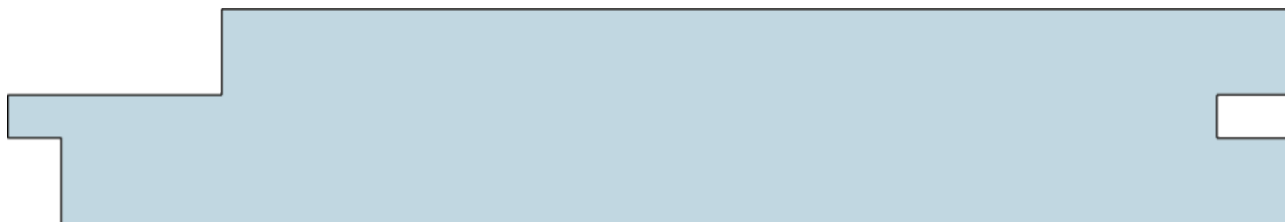

NK40: Loftprofil som trælodsprofil

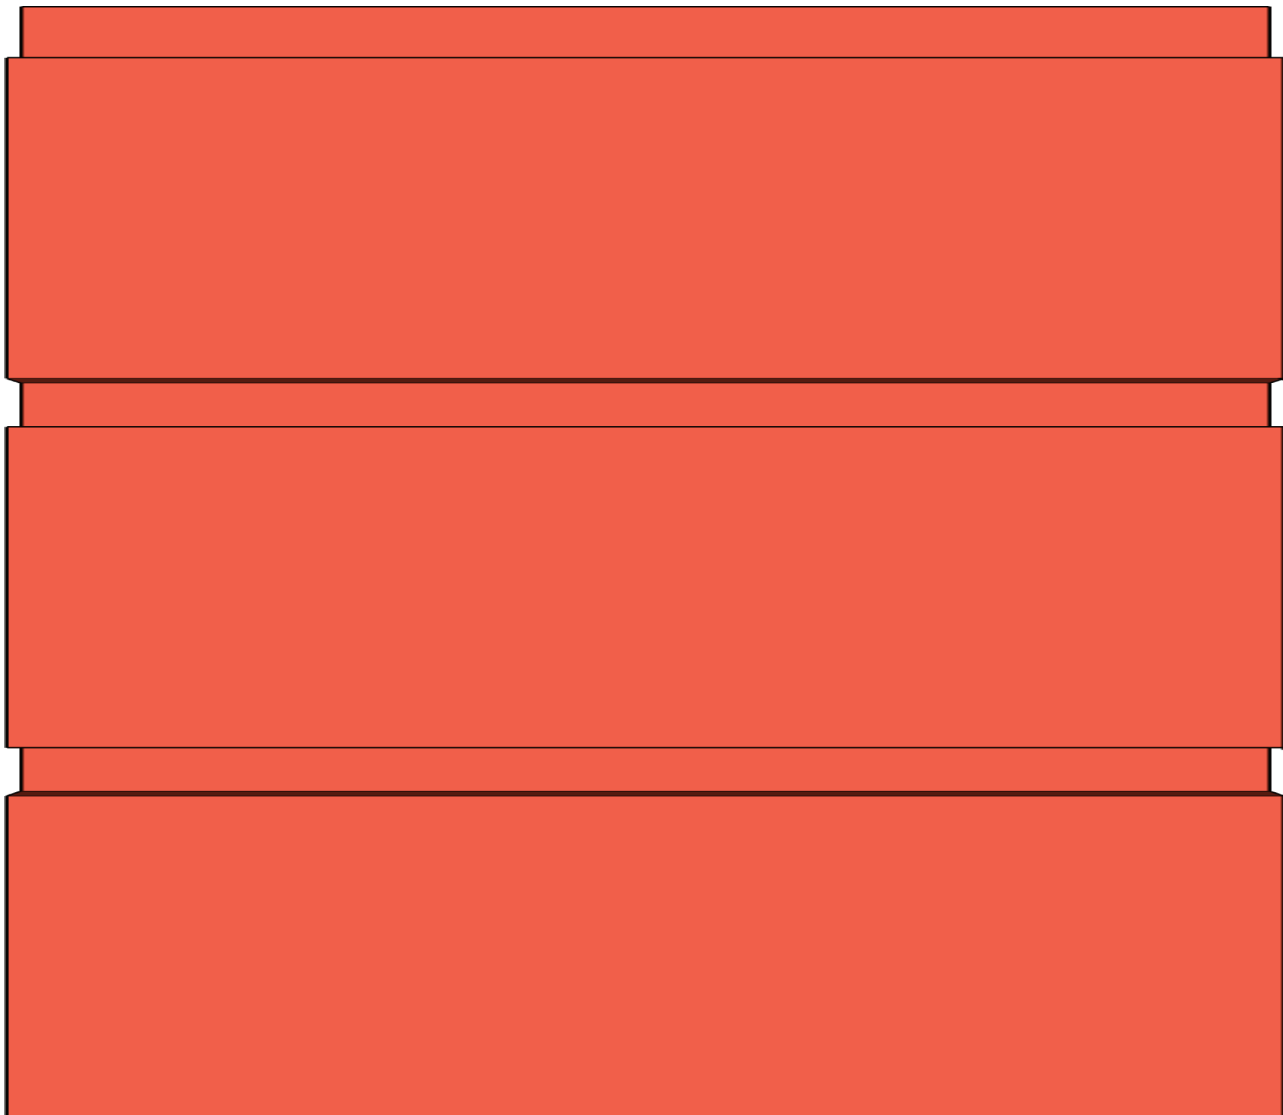

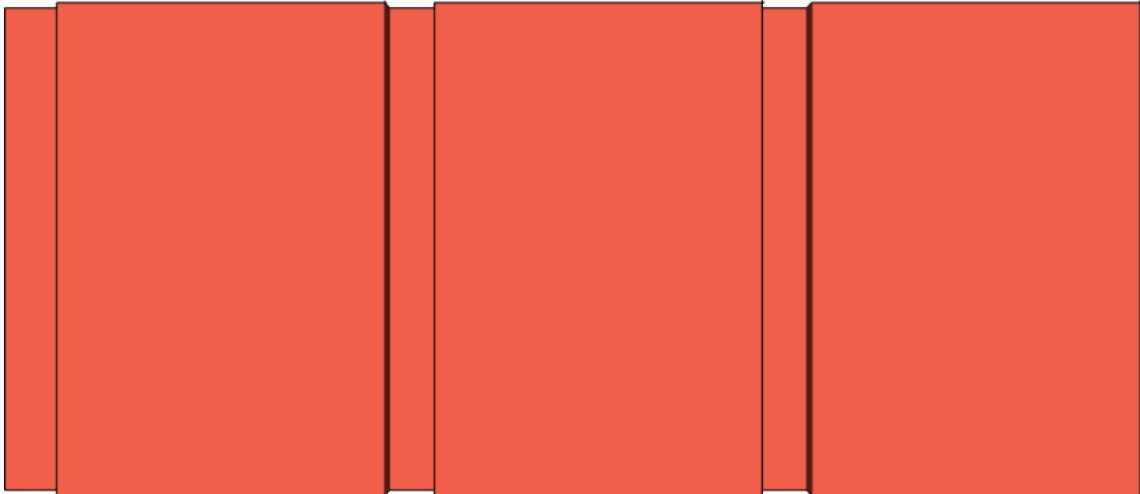

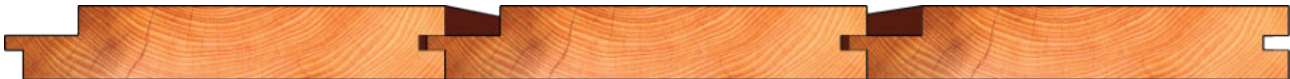

NK41: Fer og not bræt med 90 graders spor

Fer og not bræt med 90 graders spor, der er 25 mm bredt.

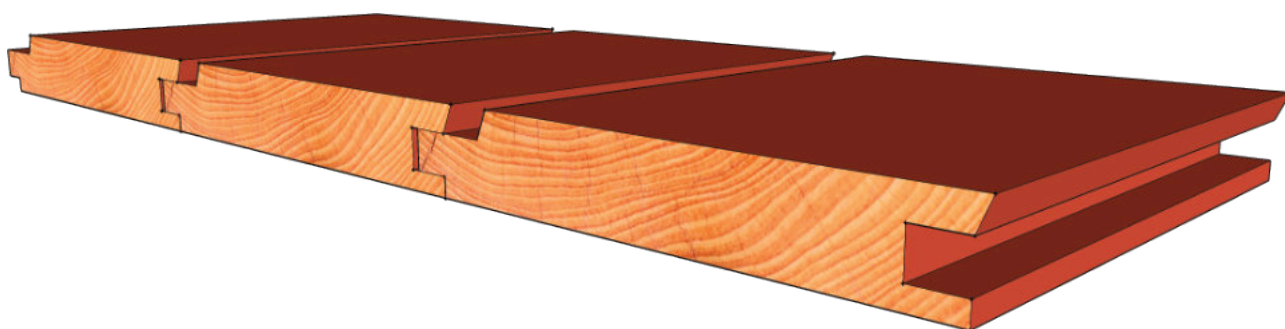

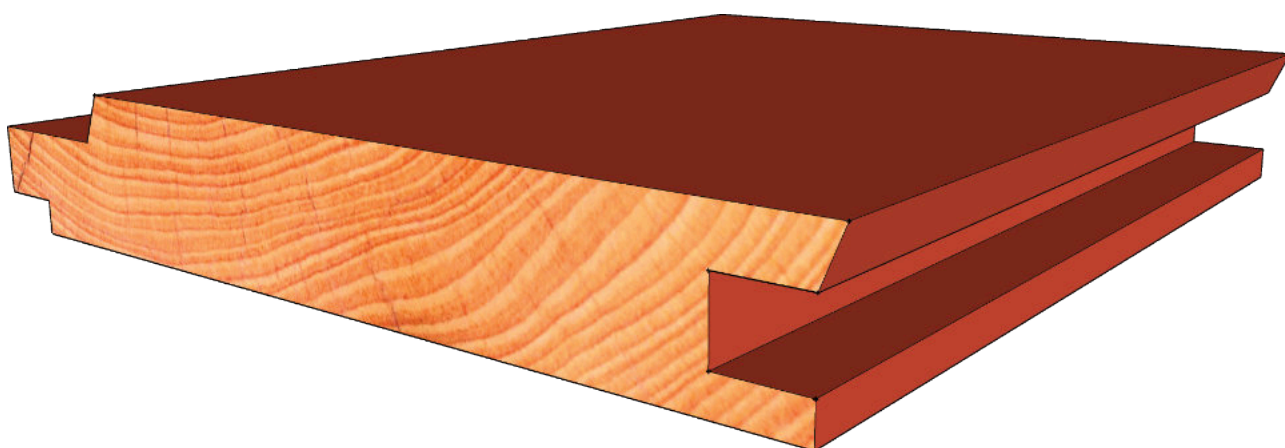

NK41: Fer og not bræt med 90 graders spor

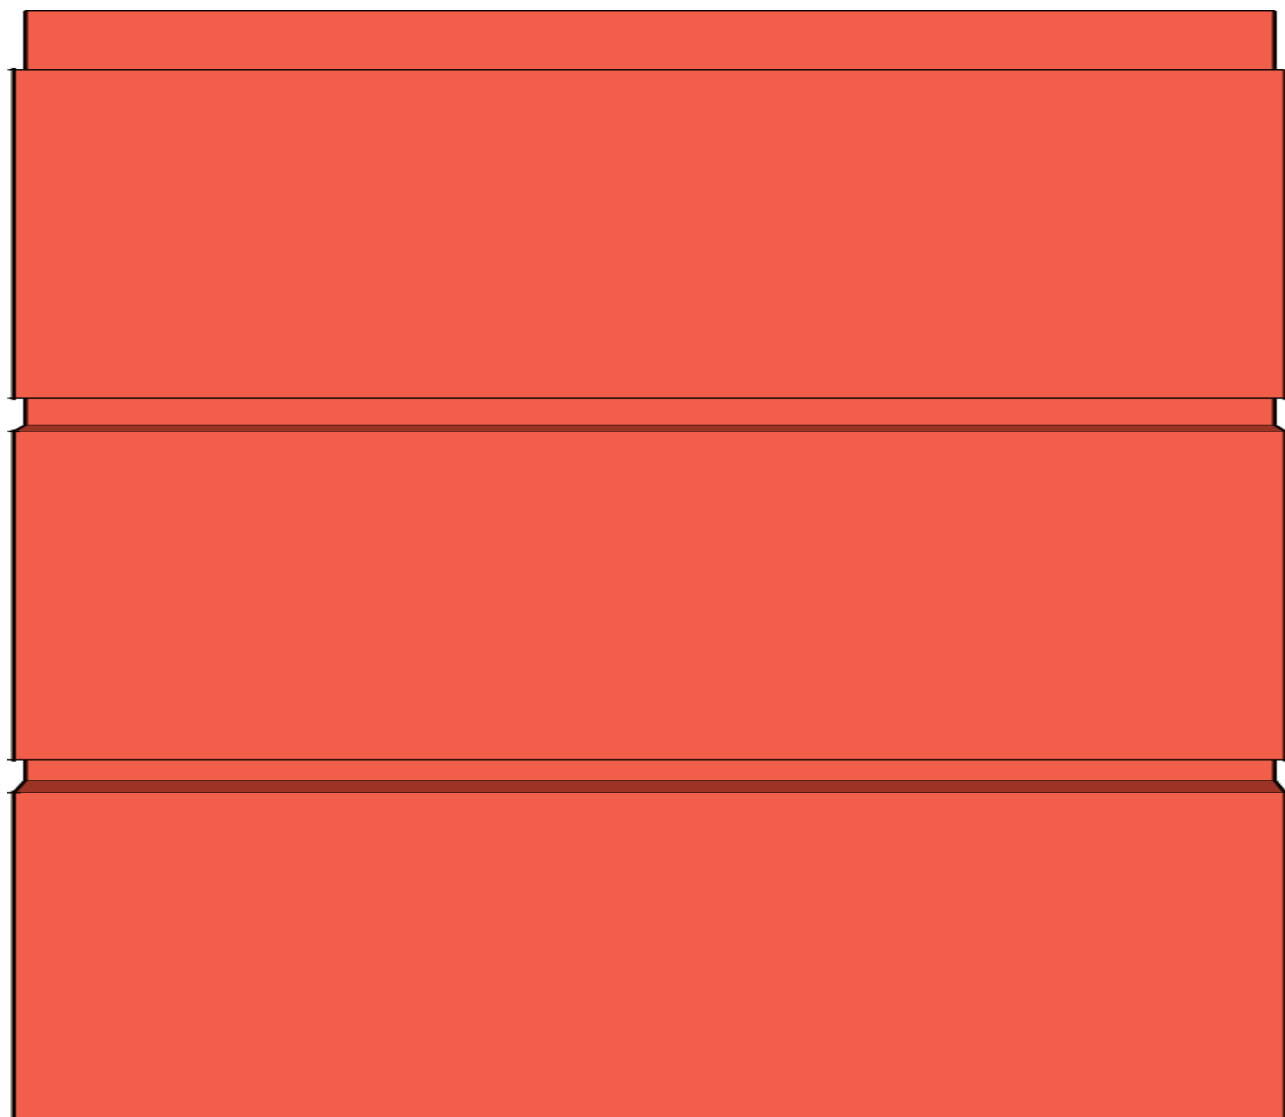

NK42: Moderne facadebeklædning med synligt spor

Moderne facadebeklædning 22x145 mm med 15 mm synligt spor. Begge kanter er 15 grader parallelle.

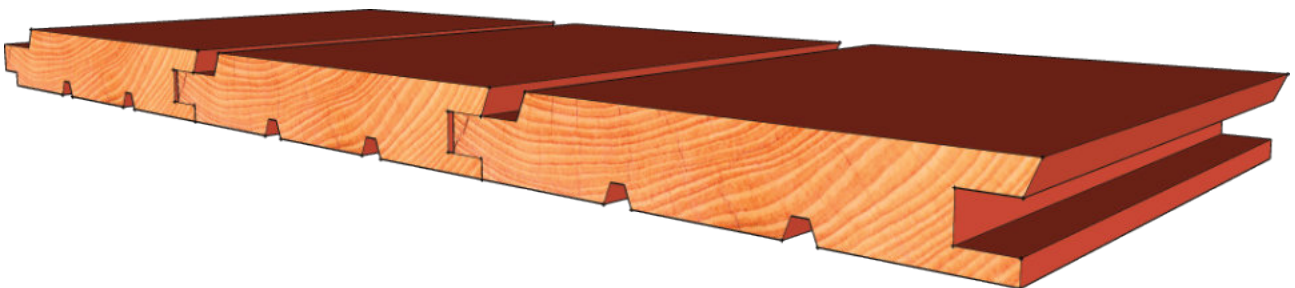

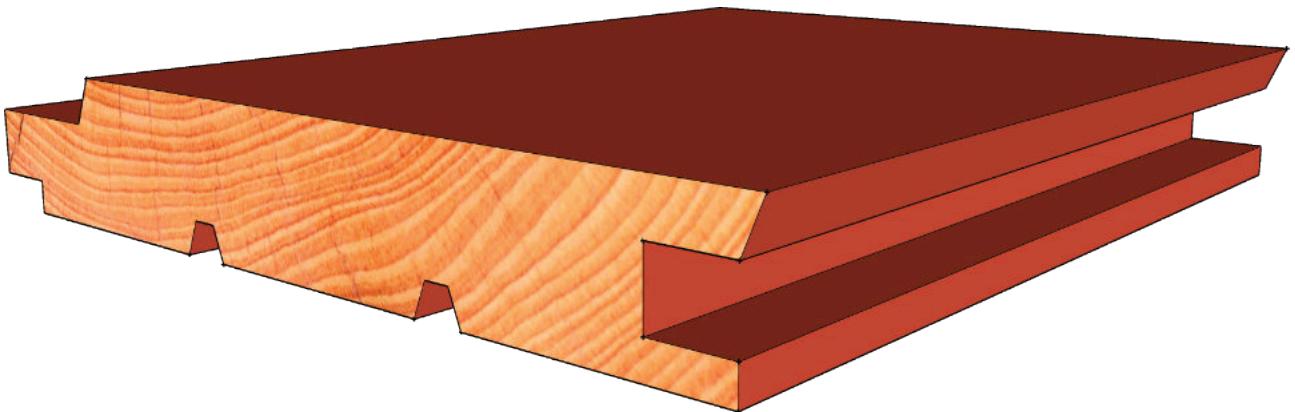

NK42: Moderne facadebeklædning med synligt spor

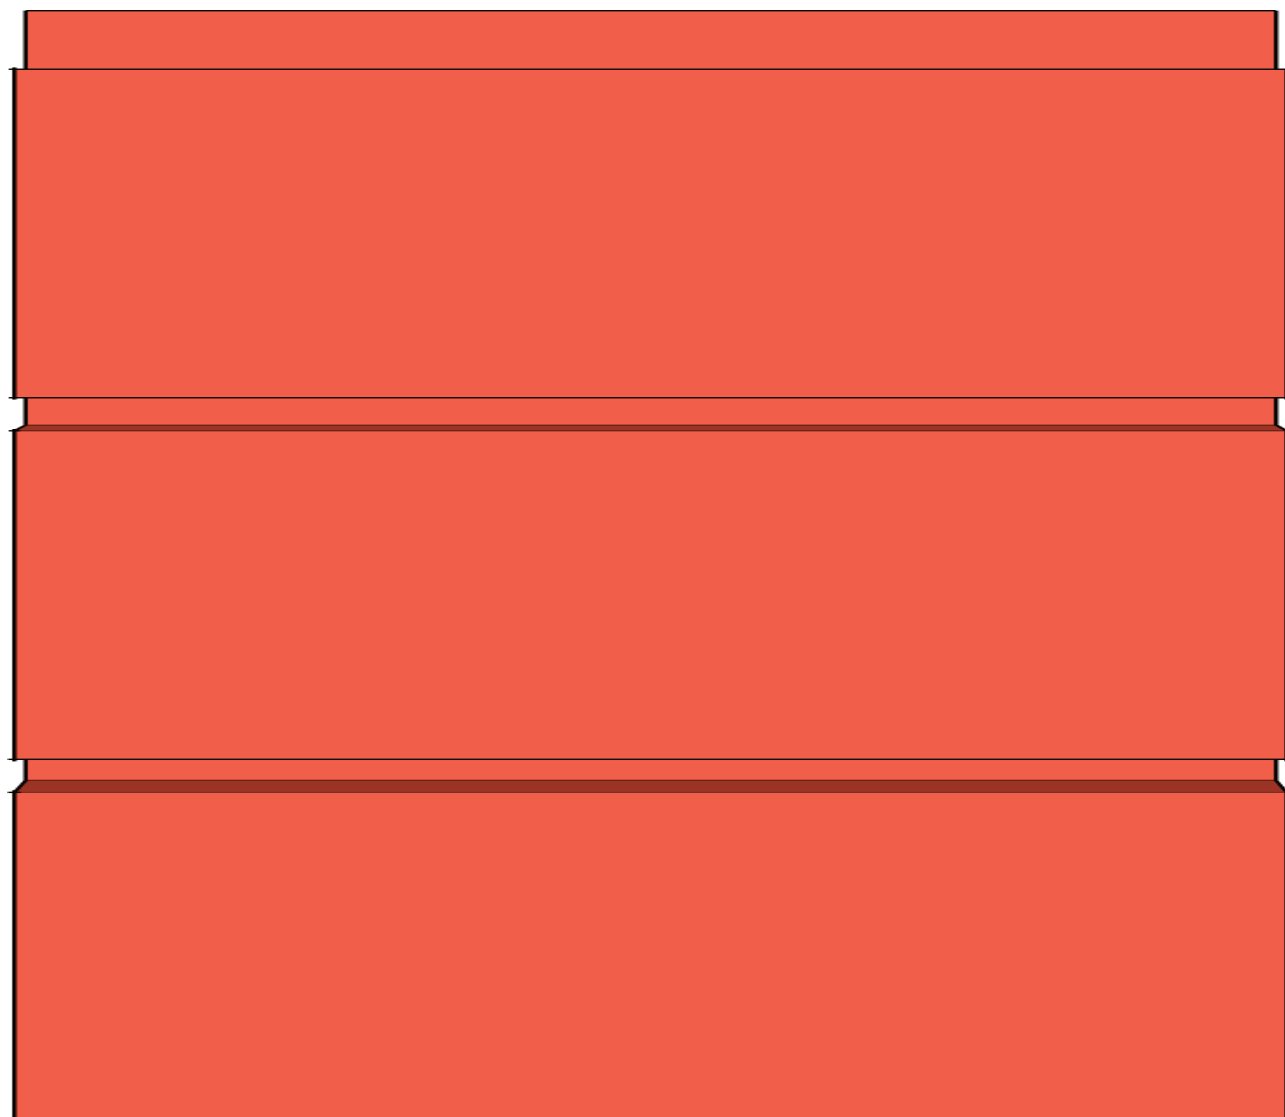

NK43: Facadebeklædning med afspændingsspor

Som NK42, men med afspændingsspor.

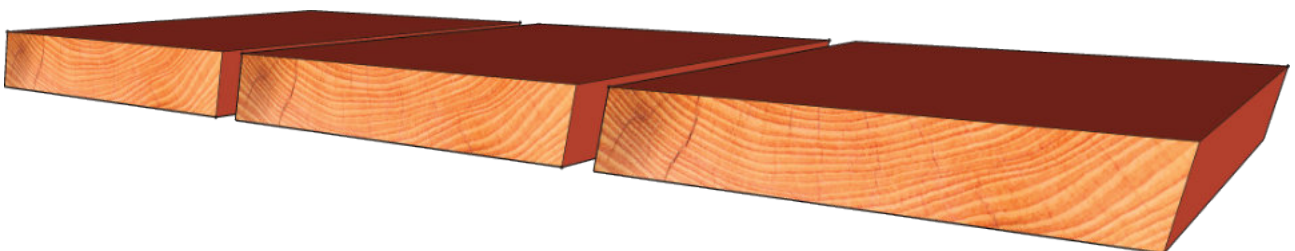

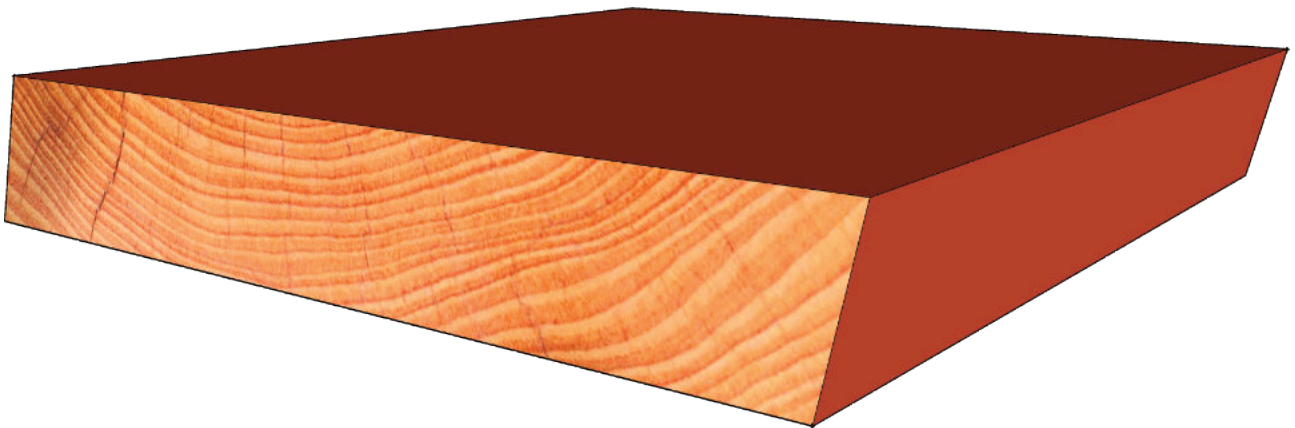

NK43: Facadebeklædning med afspændingsspor

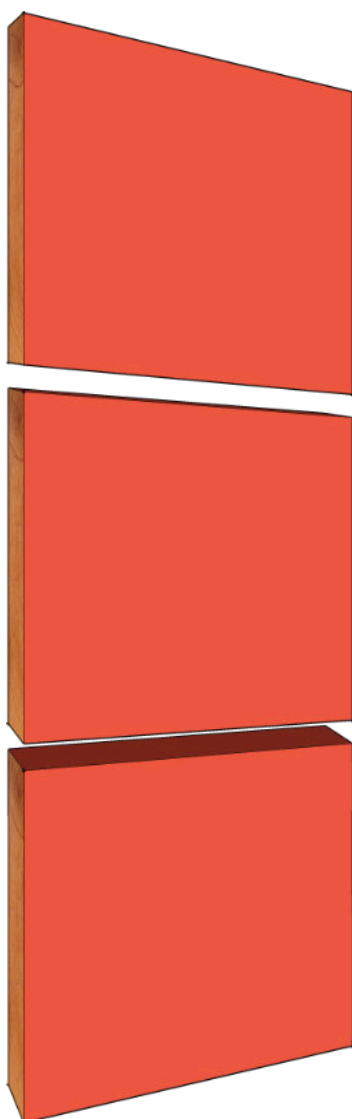

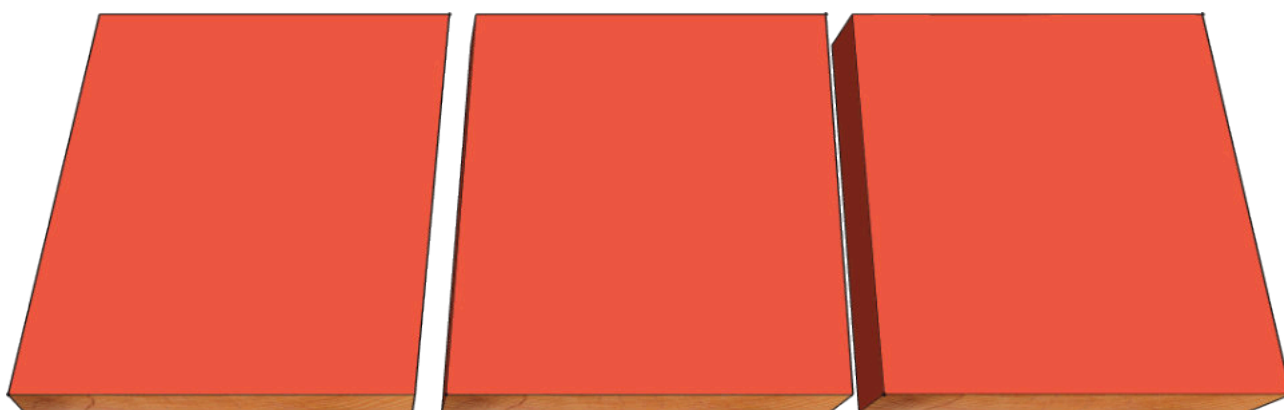

NK44: Skarpkantet rombeprofil

Skarpkantet rombeprofil med parallelle kanter.
Fås i mange bredder og tykkelser. Profilen er
åben.

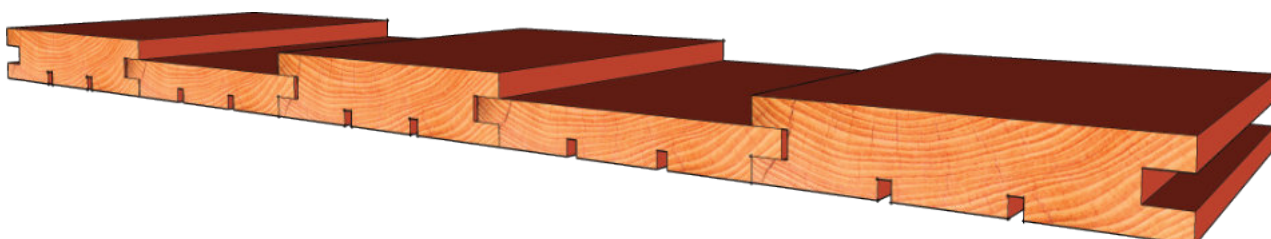

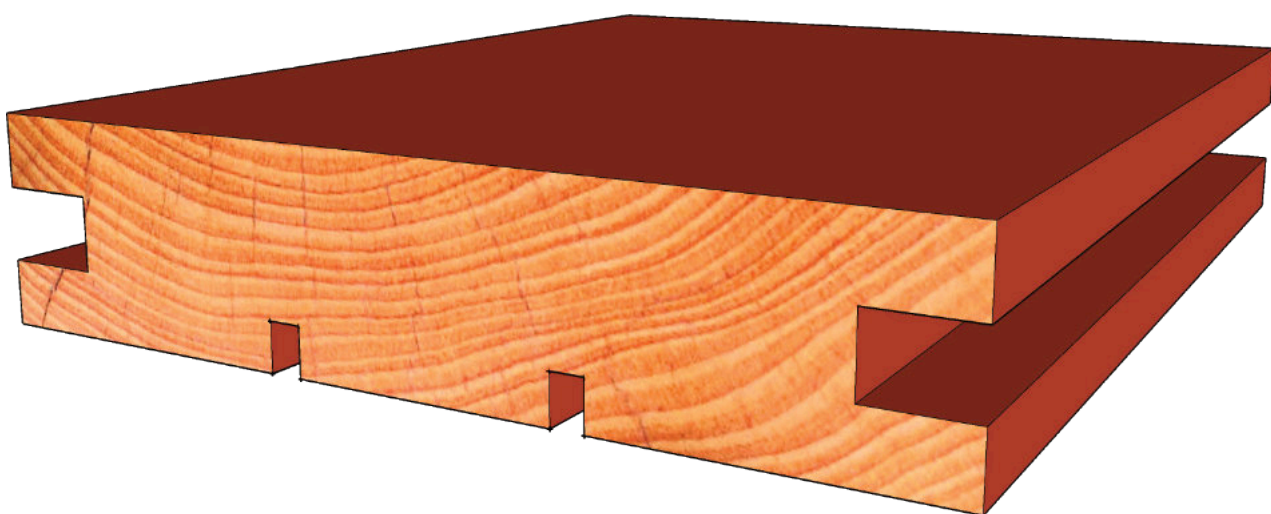

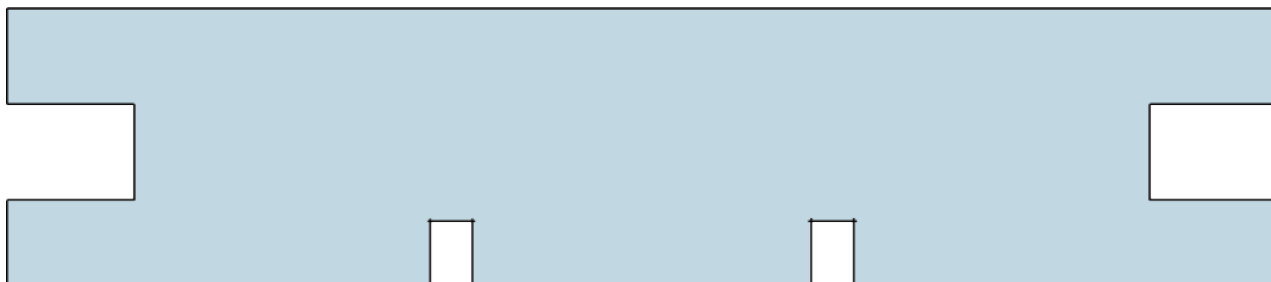

NK44: Skarpkantet rombeprofil

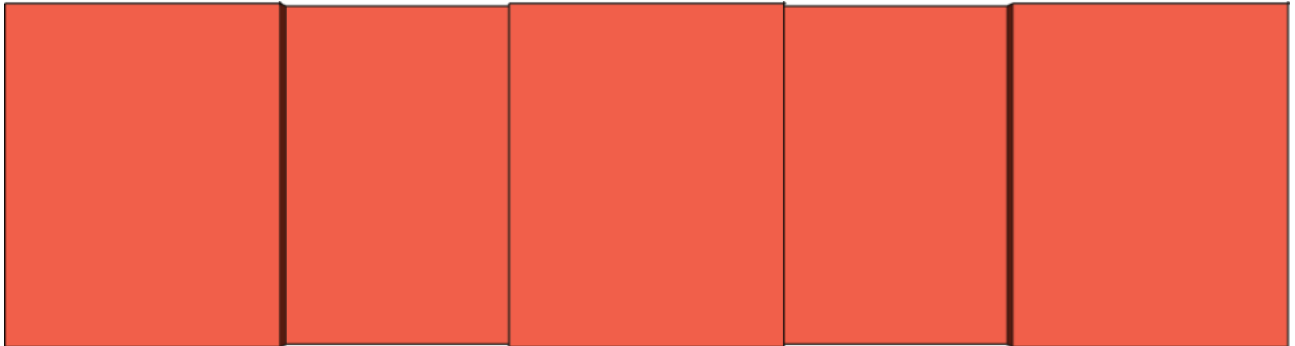

NK45: H-profil til 1på2 beklædning

H-profil med dobbeltnot, bruges som 1på2 beklædning. Dimensioner: 22x145 mm.

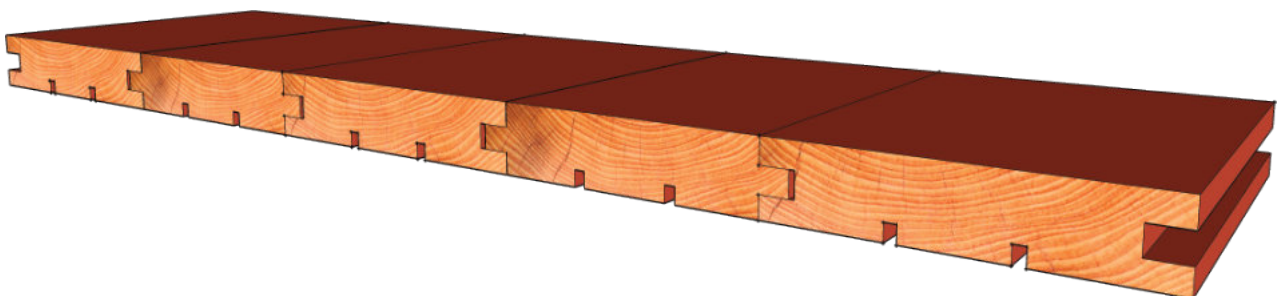

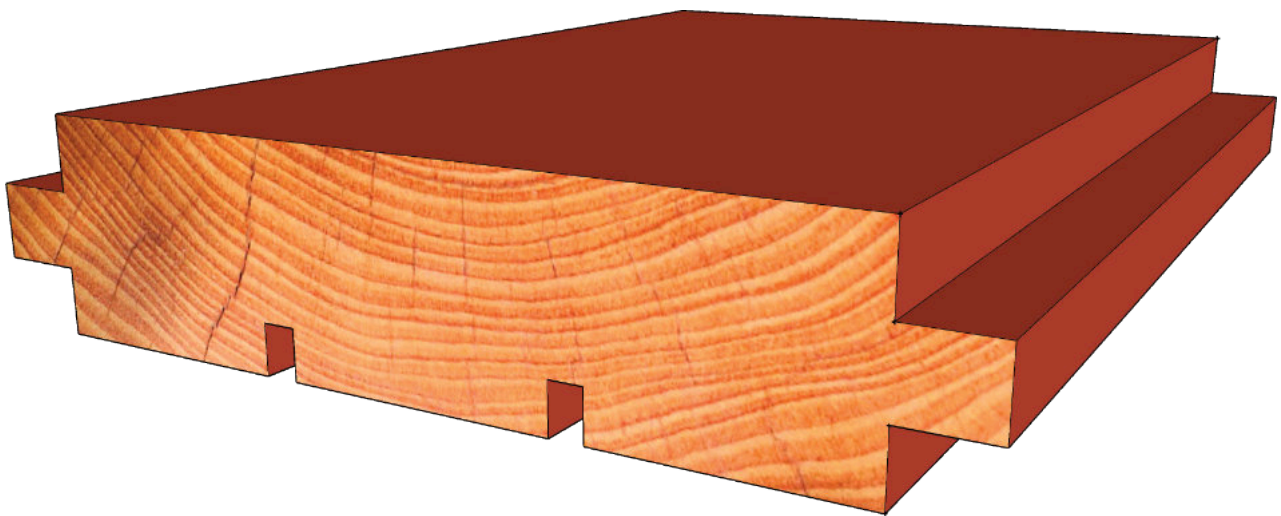

NK45: H-profil til 1på2 beklædning

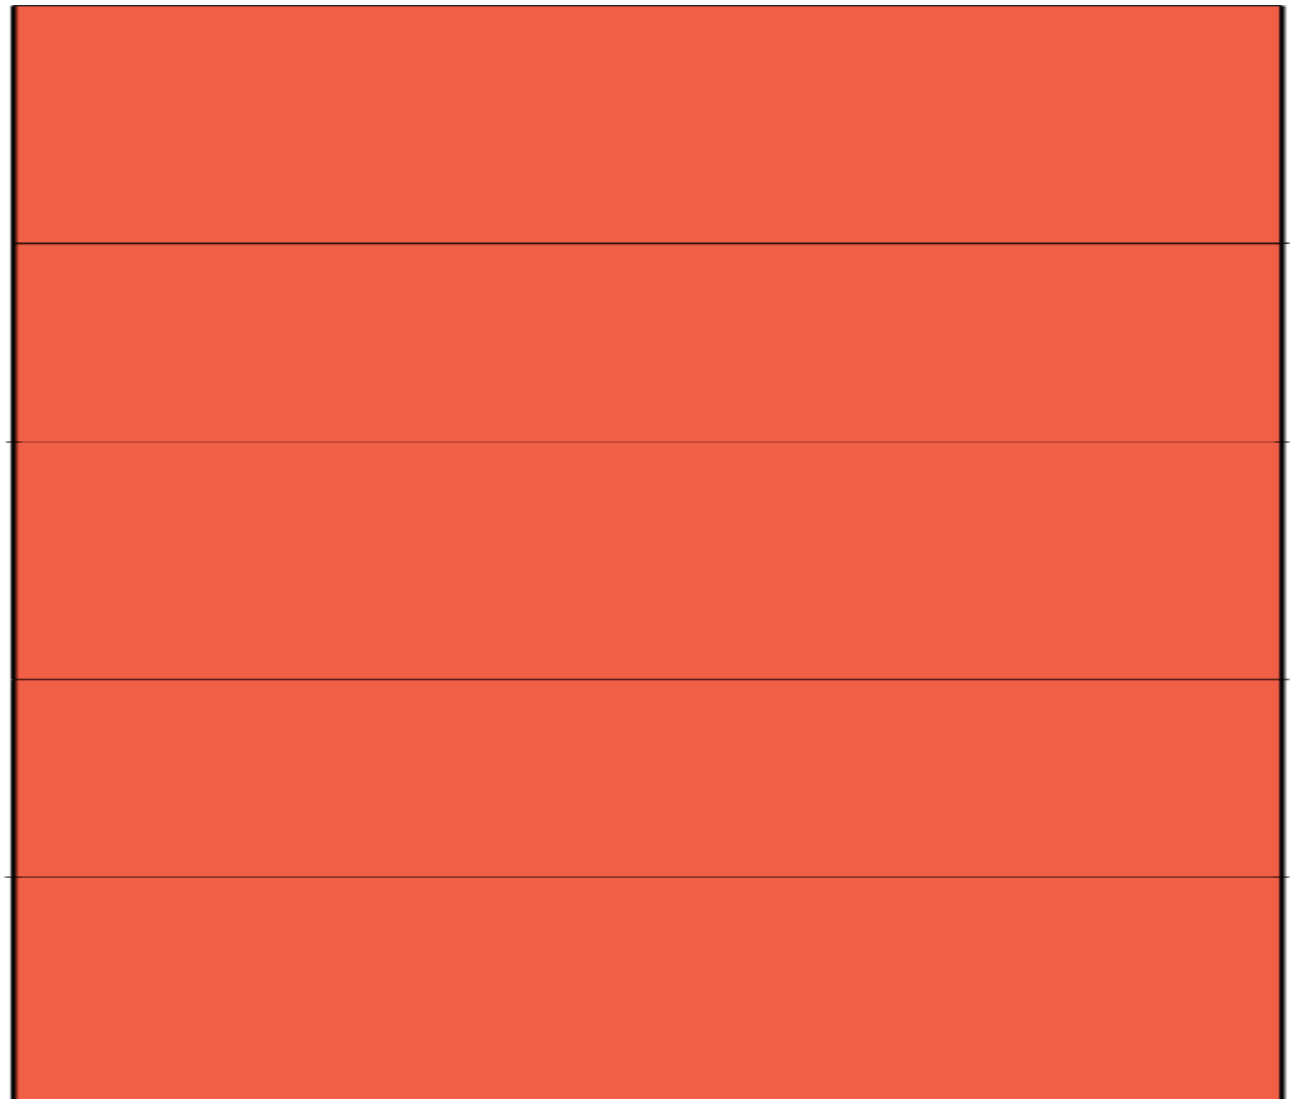

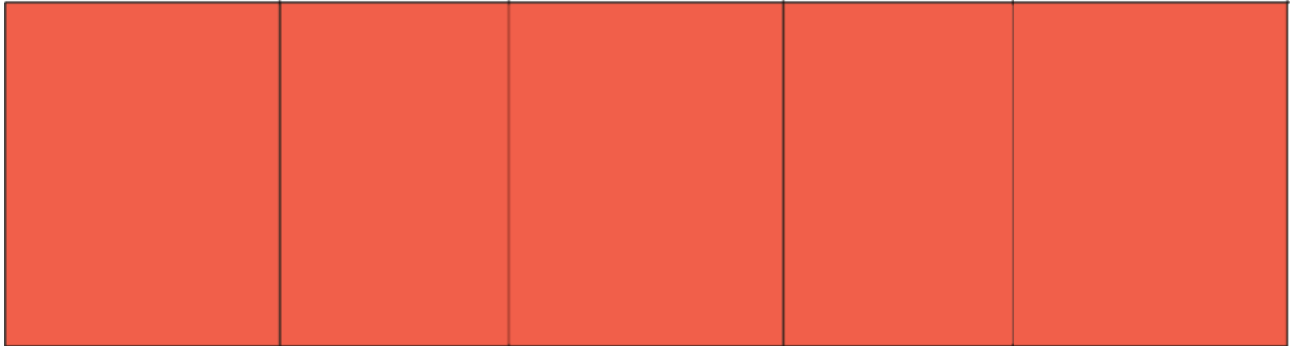

NK45A: Tillægsprofil til NK45

Bruges sammen med NK45. Dimensioner: 22x145 mm.

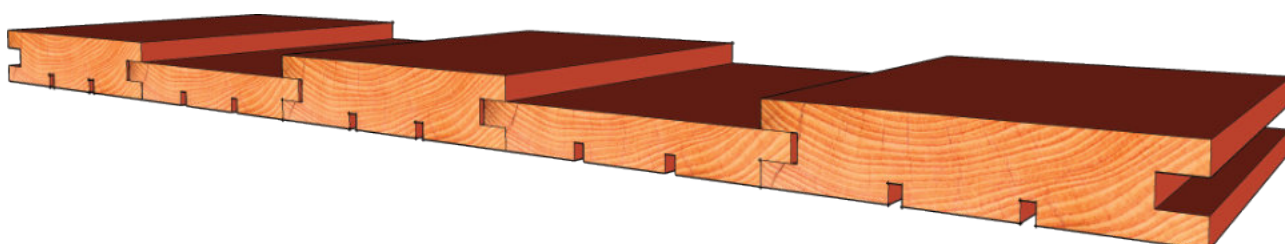

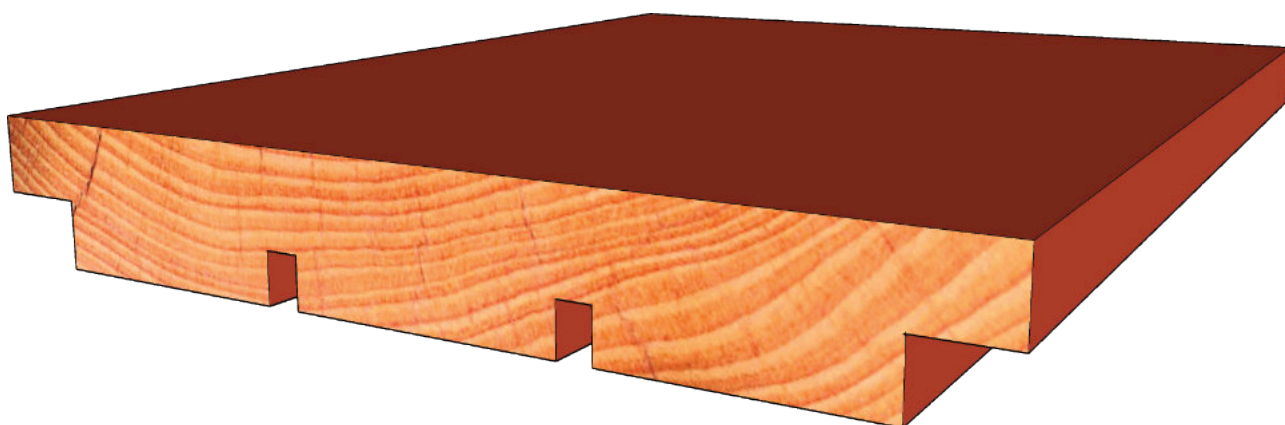

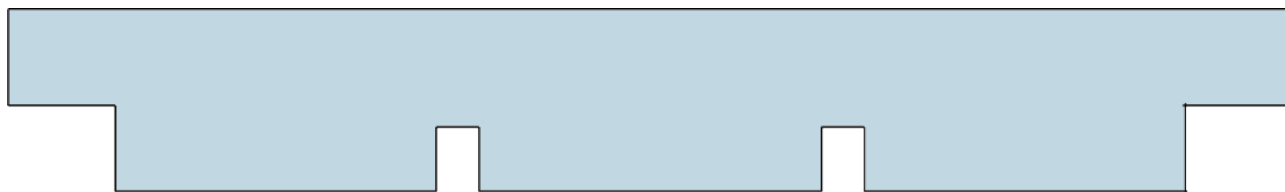

NK45A: Tillægsprofil til NK45

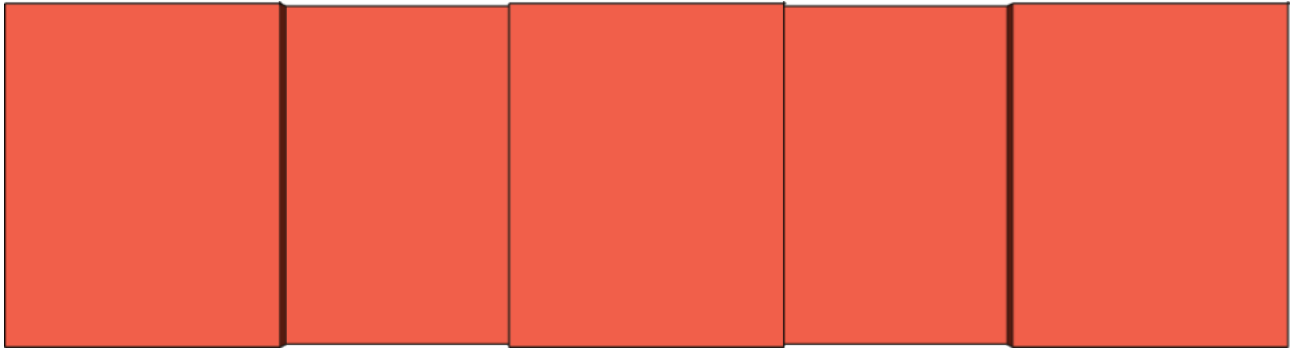

NK45B: Alternativ til NK45 og NK45A

Alternativ til NK45 og NK45A

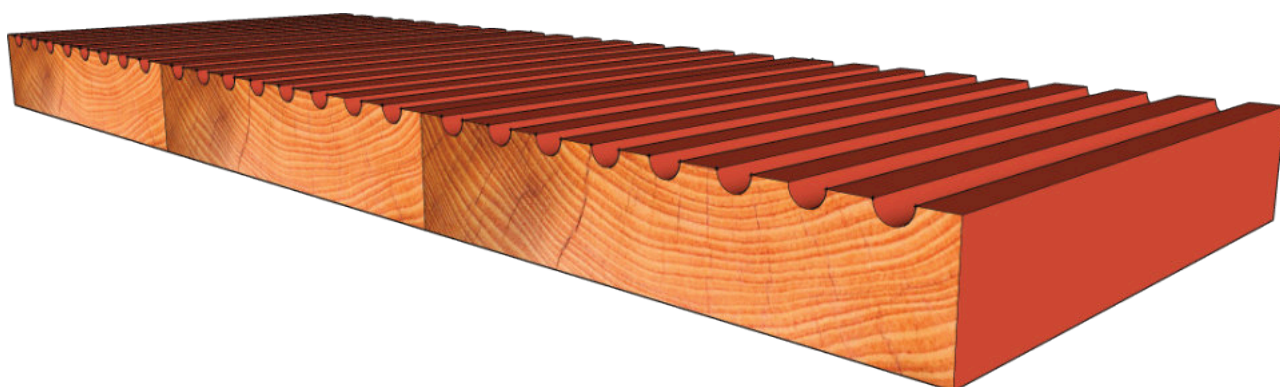

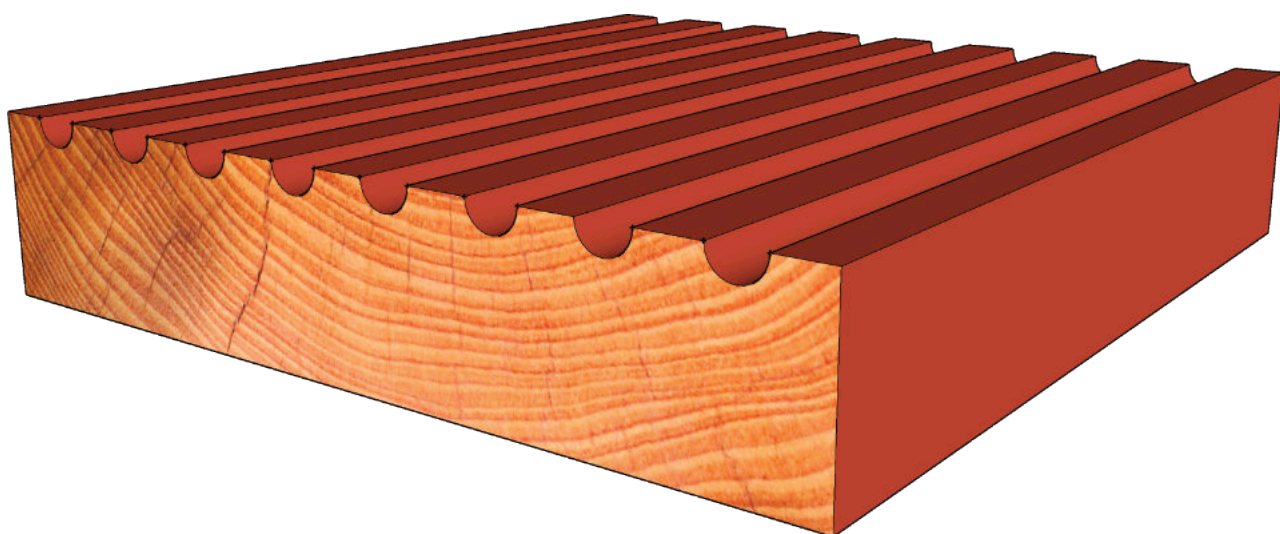

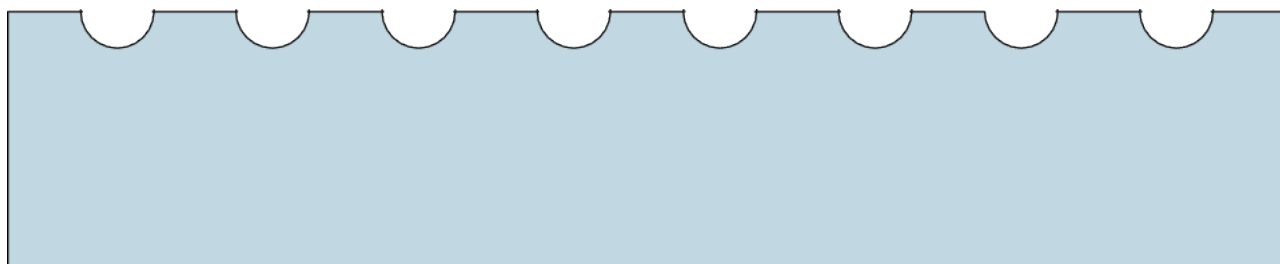

NK45B: Alternativ til NK45 og NK45A

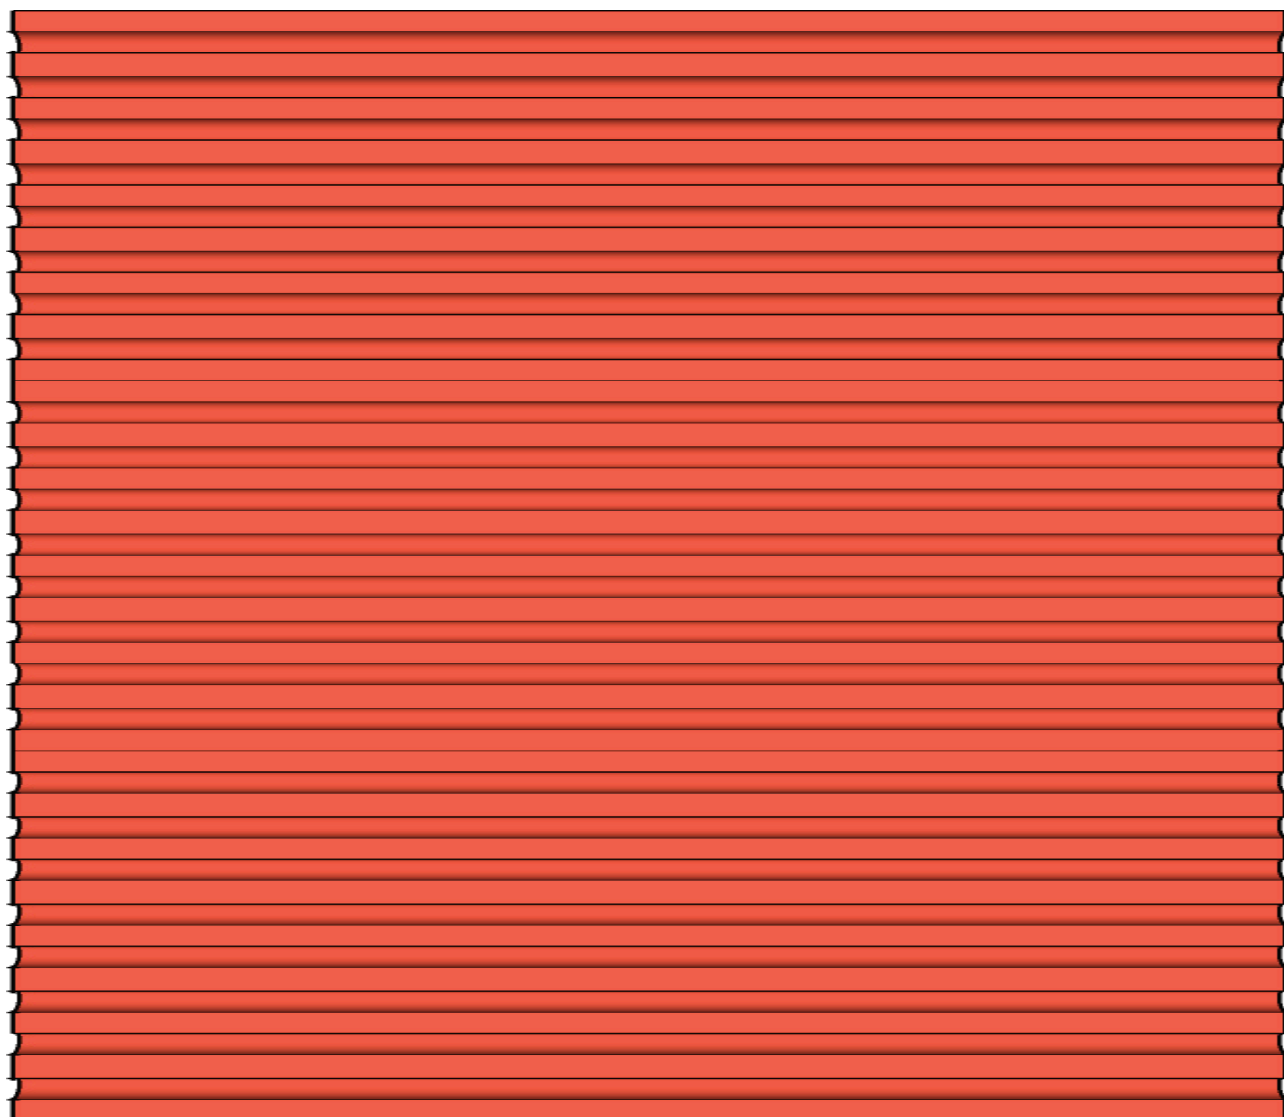

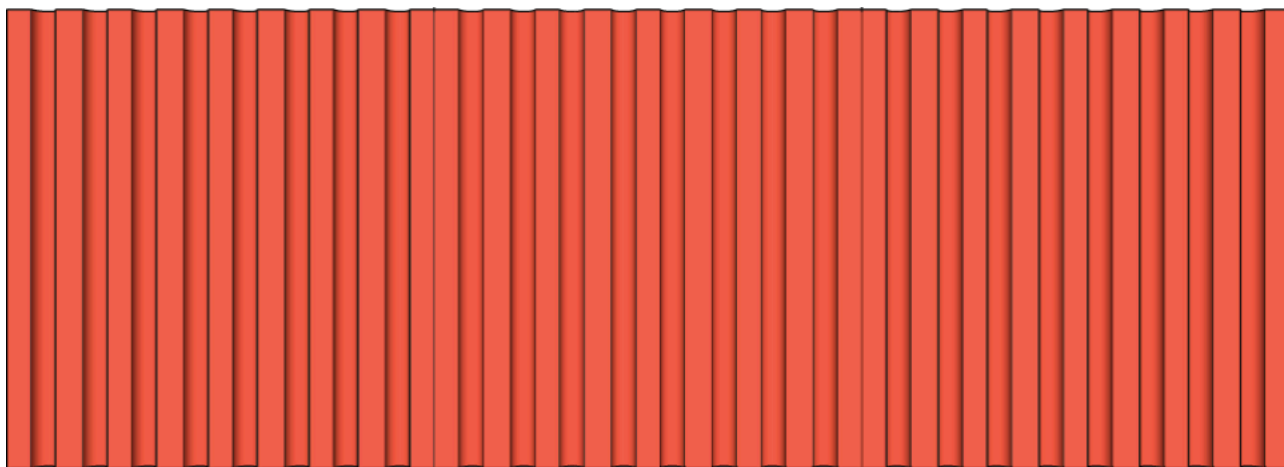

NK46: Terrassebræt til våde miljøer

Terrassebræt til våde miljøer som gangstier, bådebroer og badebroer. Dimensioner: 28x145 mm.

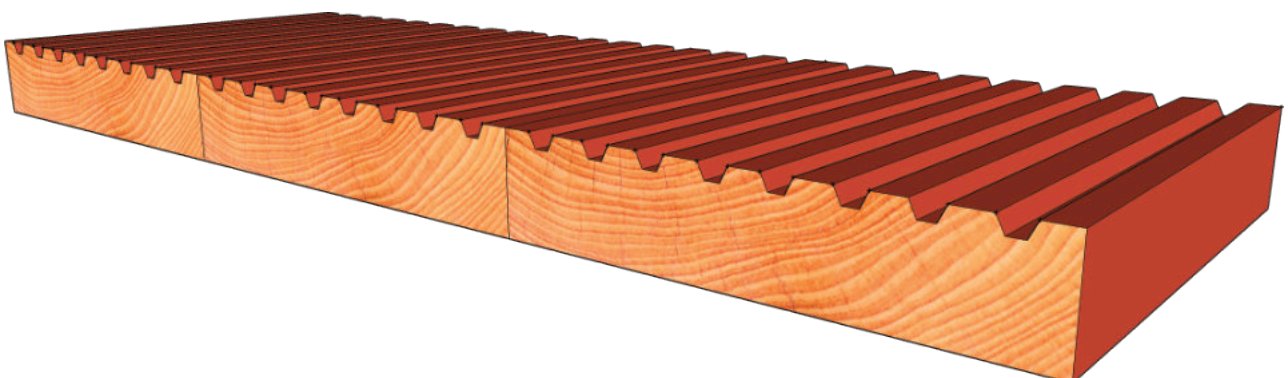

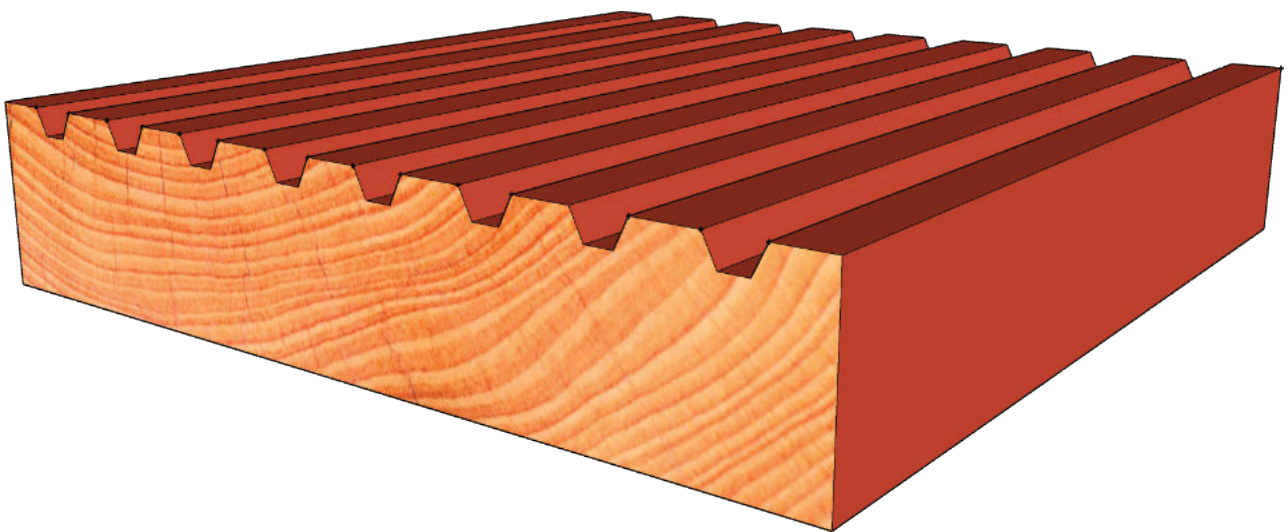

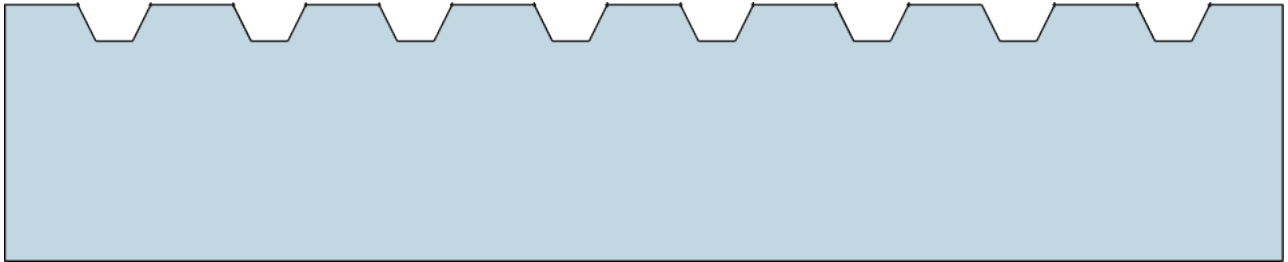

NK46: Terrassebræt til våde miljøer

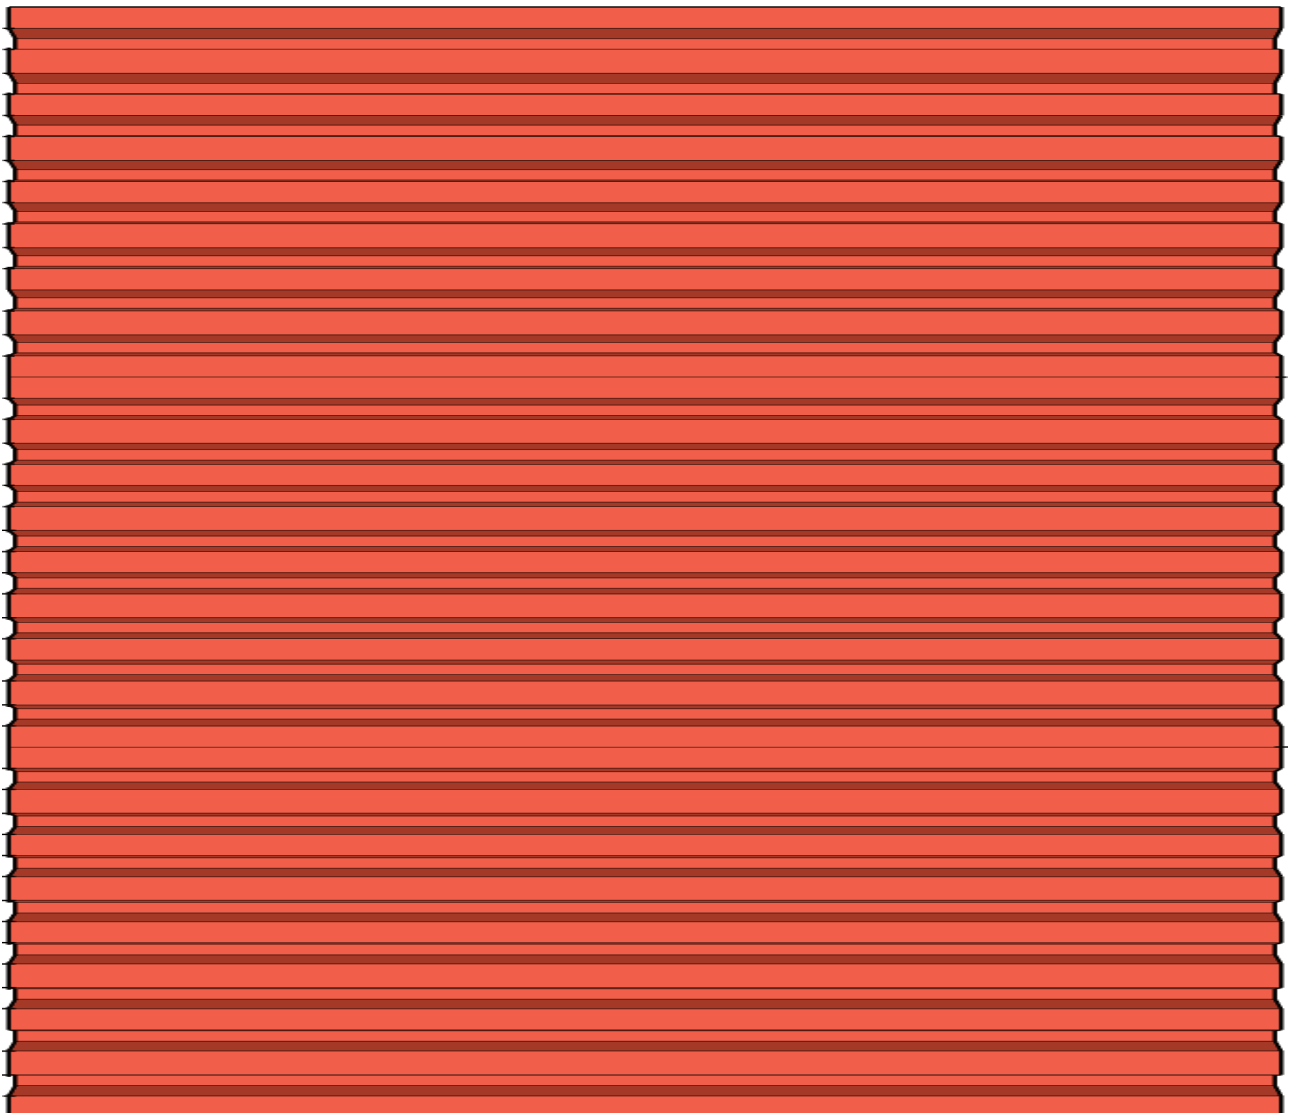

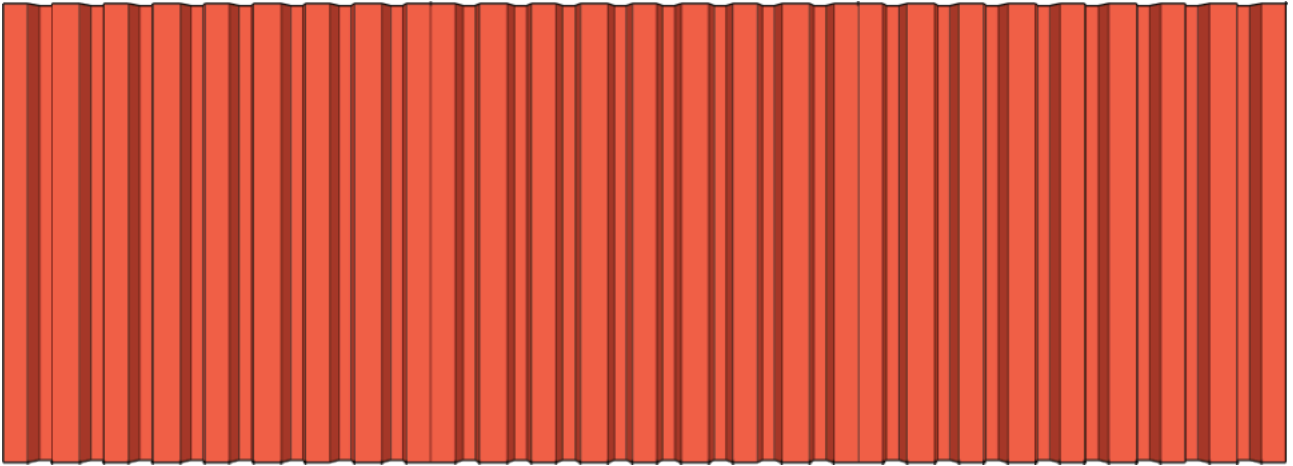

NK47: Terrassebræt med V-spor

Samme som NK46, men med V-spor.
Dimensioner: 28x145 mm.

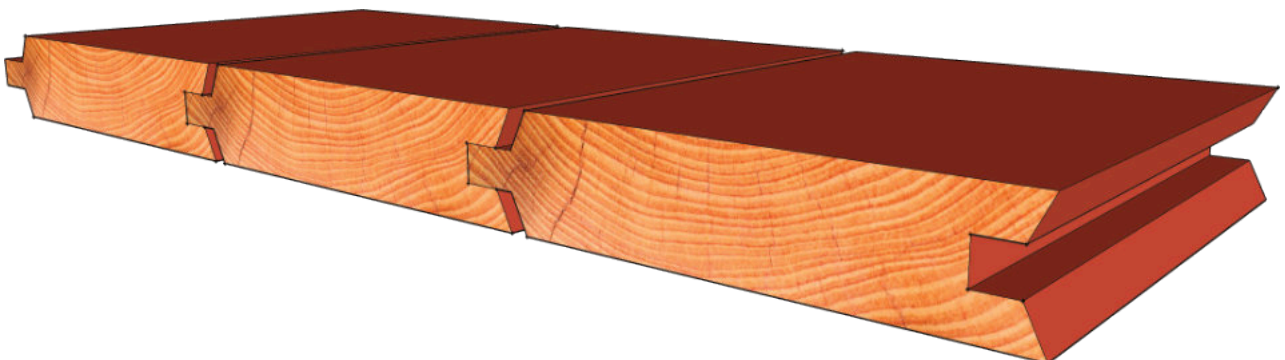

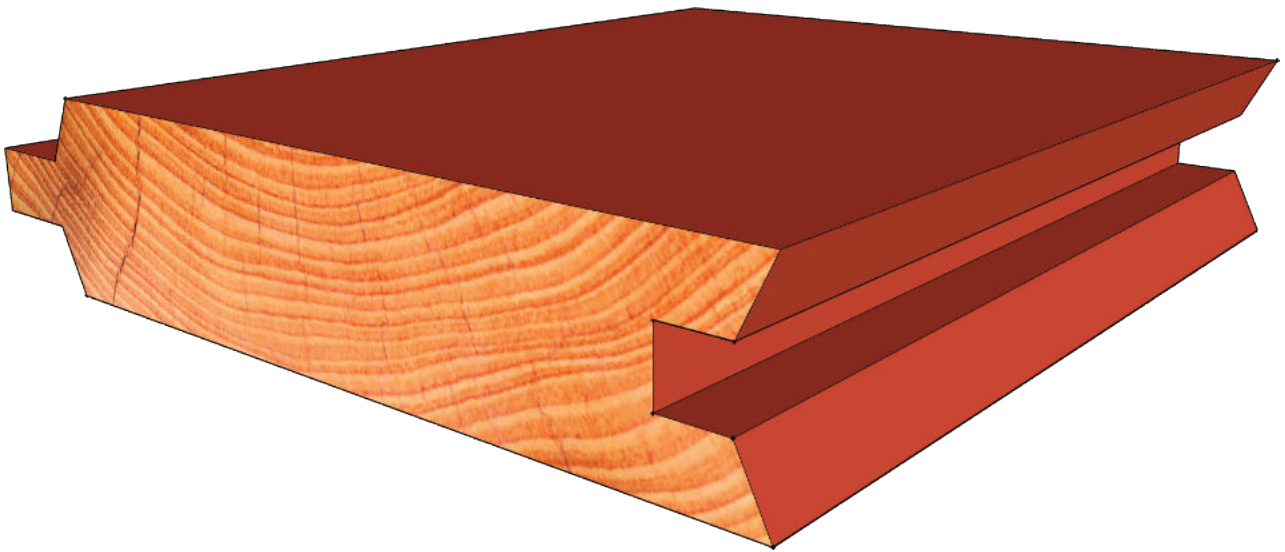

NK47: Terrassebræt med V-spor

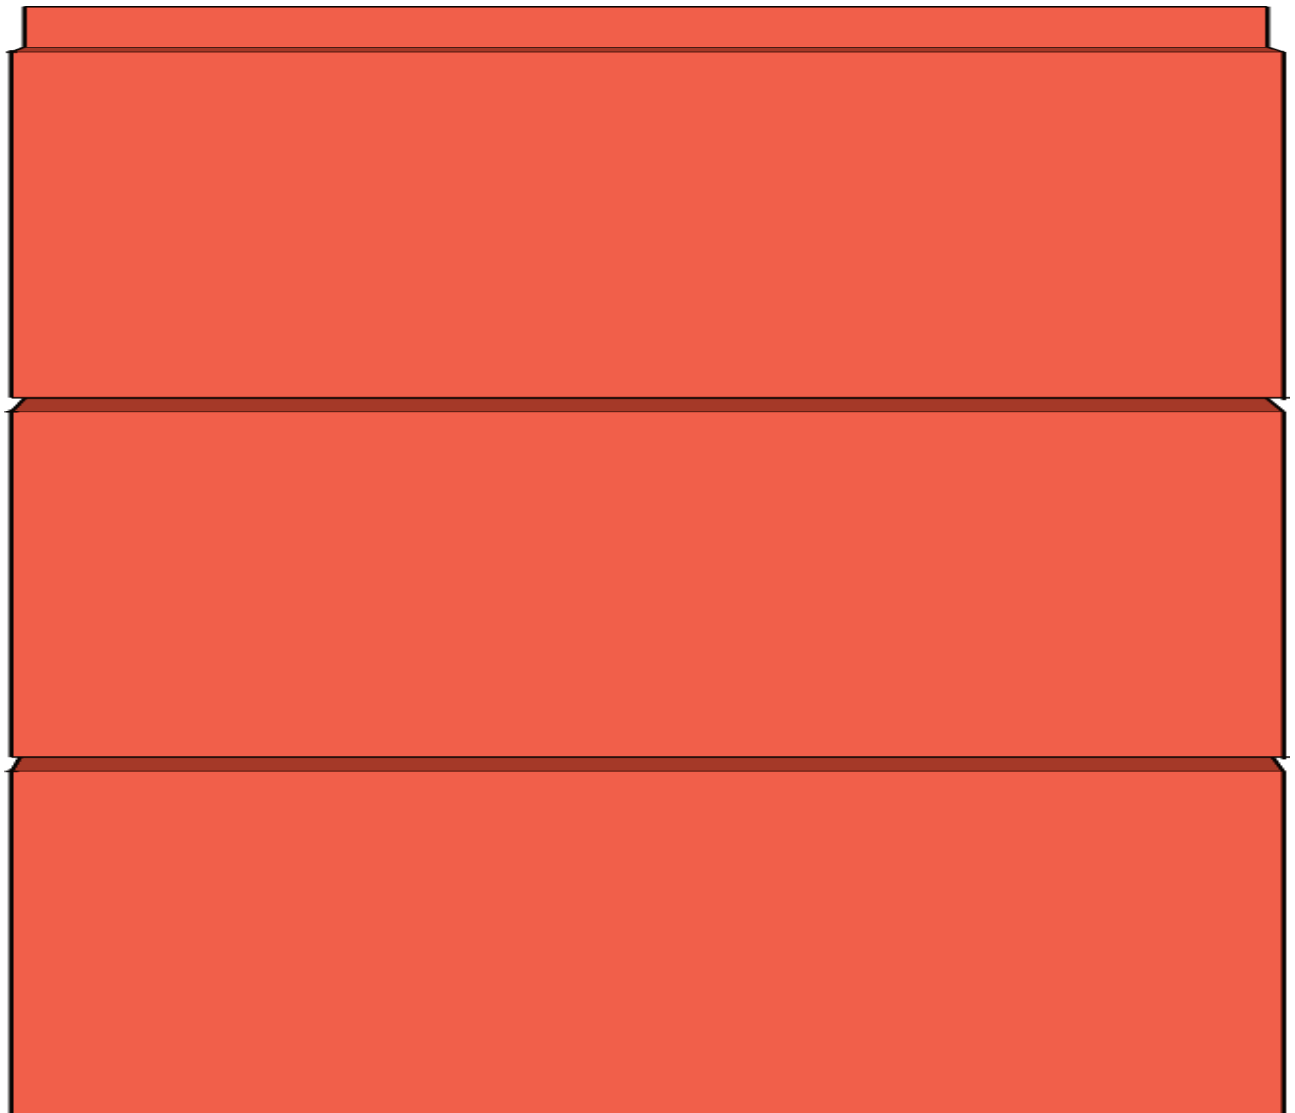

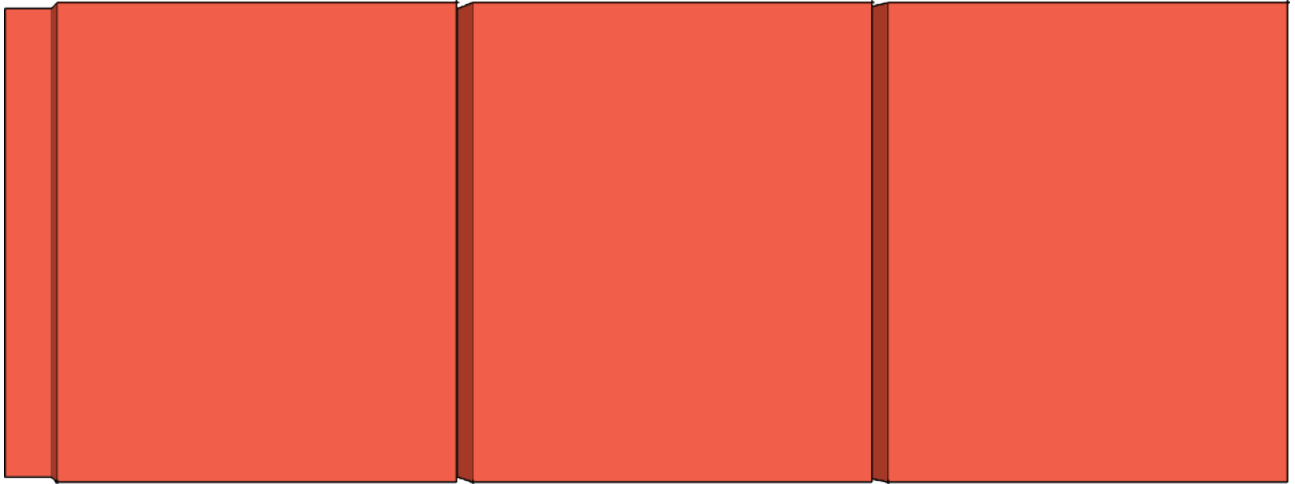

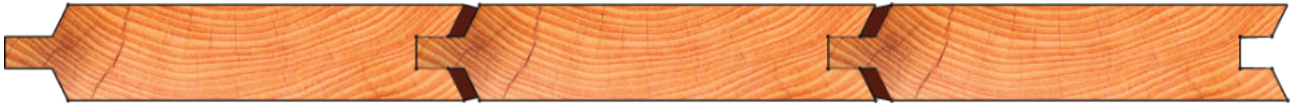

NK48: Hegnsbræt til dobbelthegn

Hegnsbræt til dobbelthegn. Dimensioner: 32x145 mm med ens forsider, 10 mm fer og not samt 15 grader drypnæse.

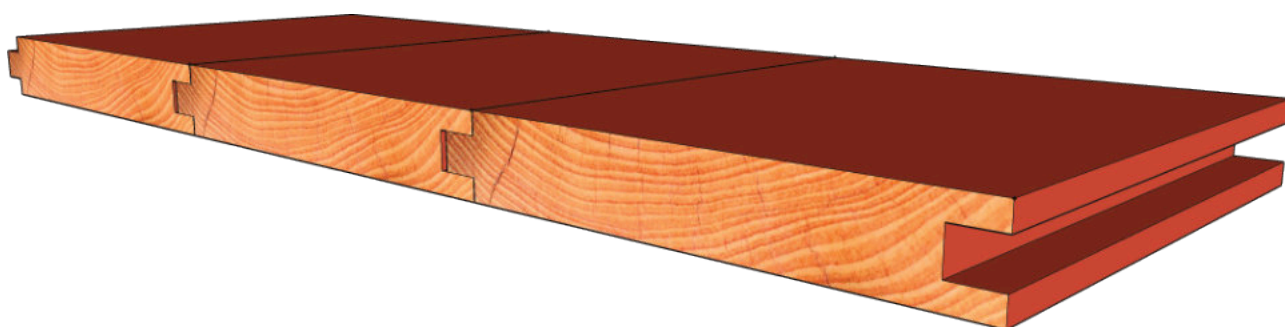

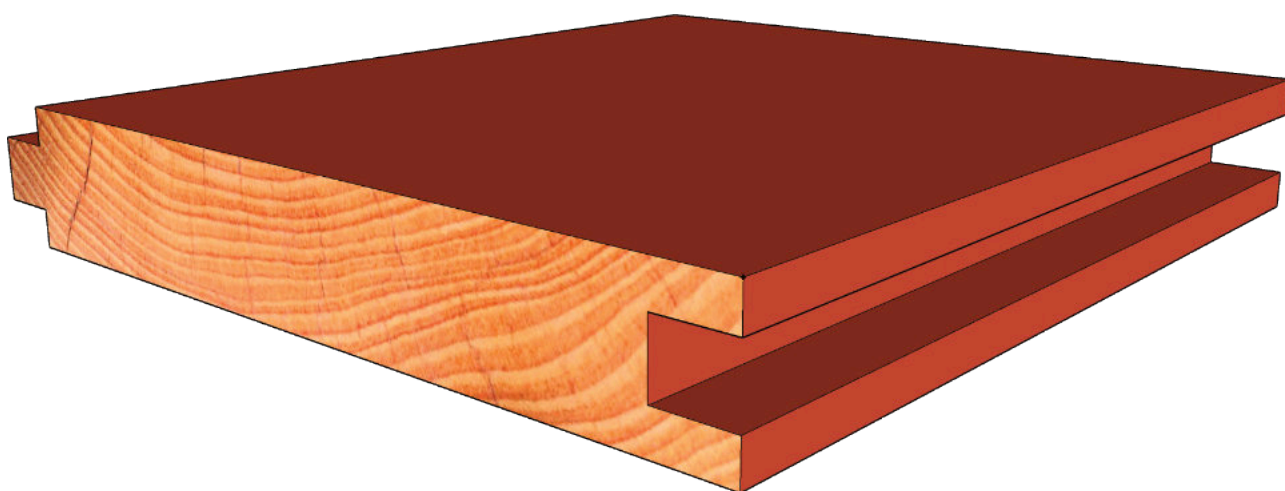

NK48: Hegnsbræt til dobbeltheqn

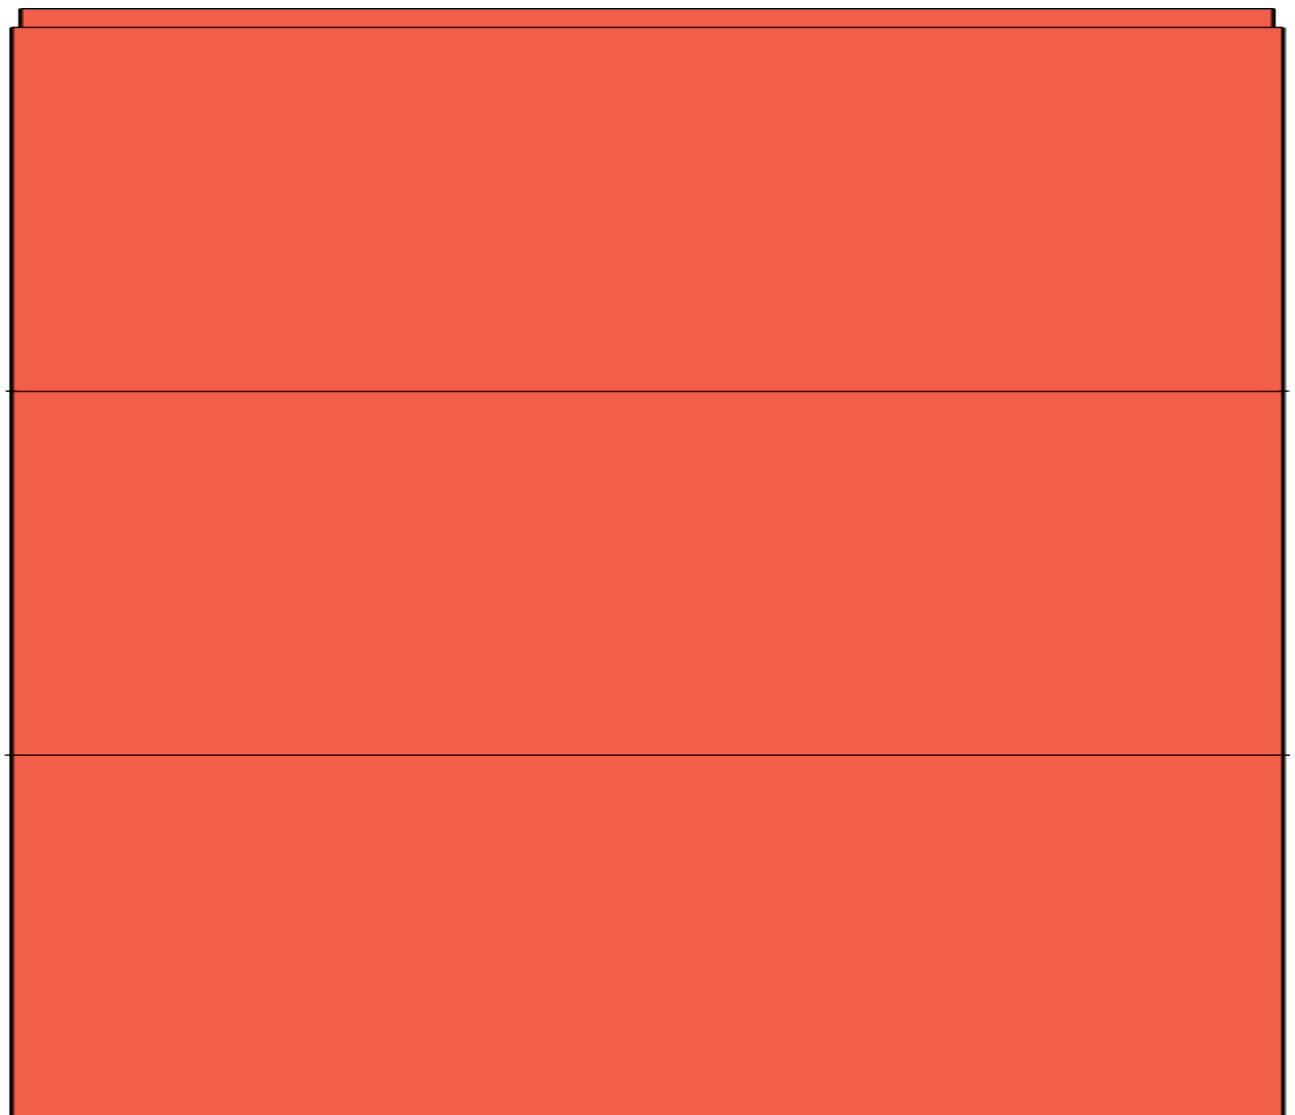

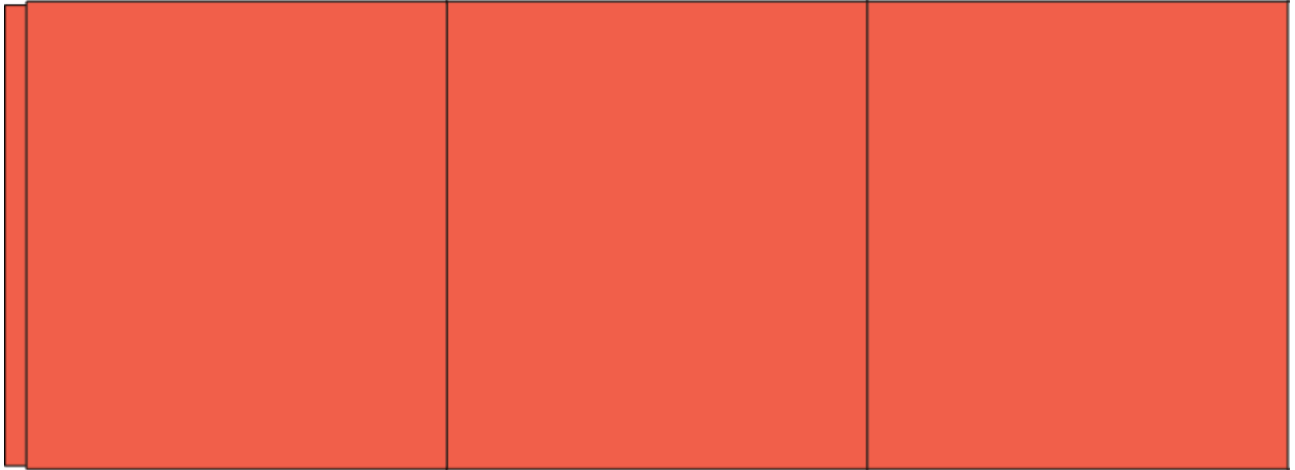

NK49: Skarpkantet fer og not

Skarpkantet fer og not-profil, kendt som fx gulv- eller tagbrædder. Dimensioner: 22x145 mm.

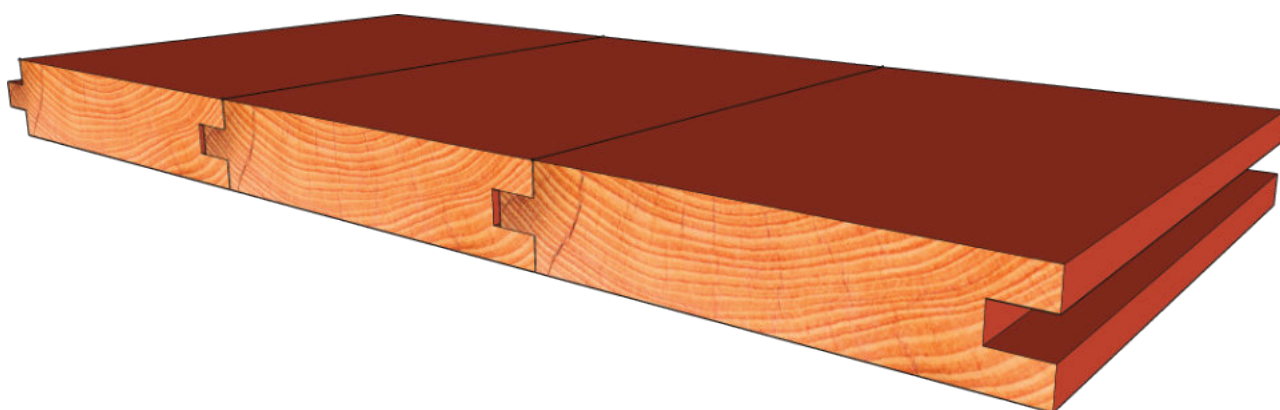

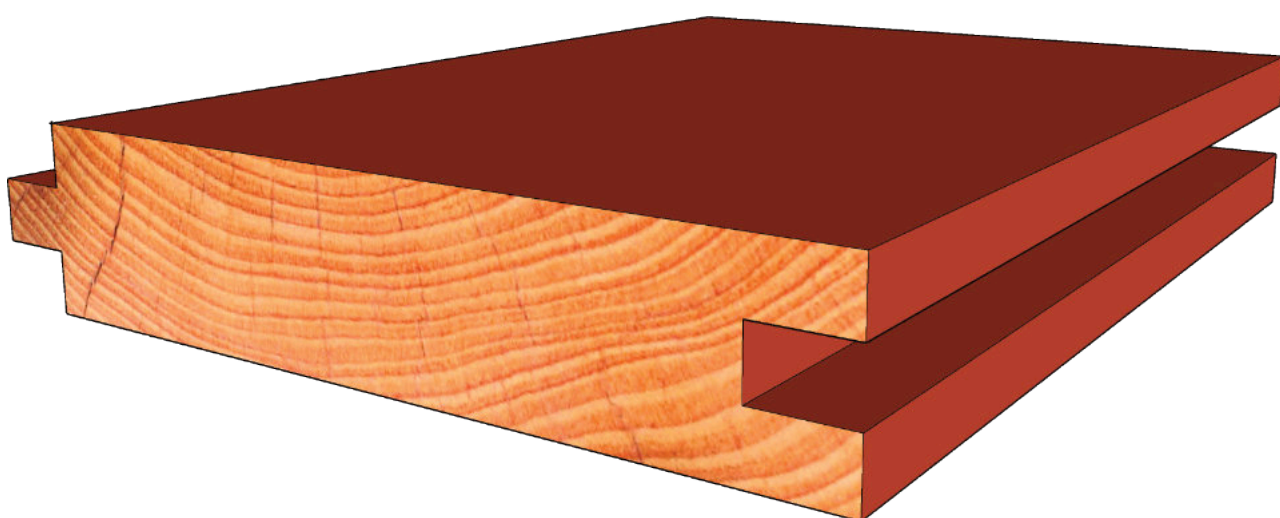

NK49: Skarpkantet fer og not

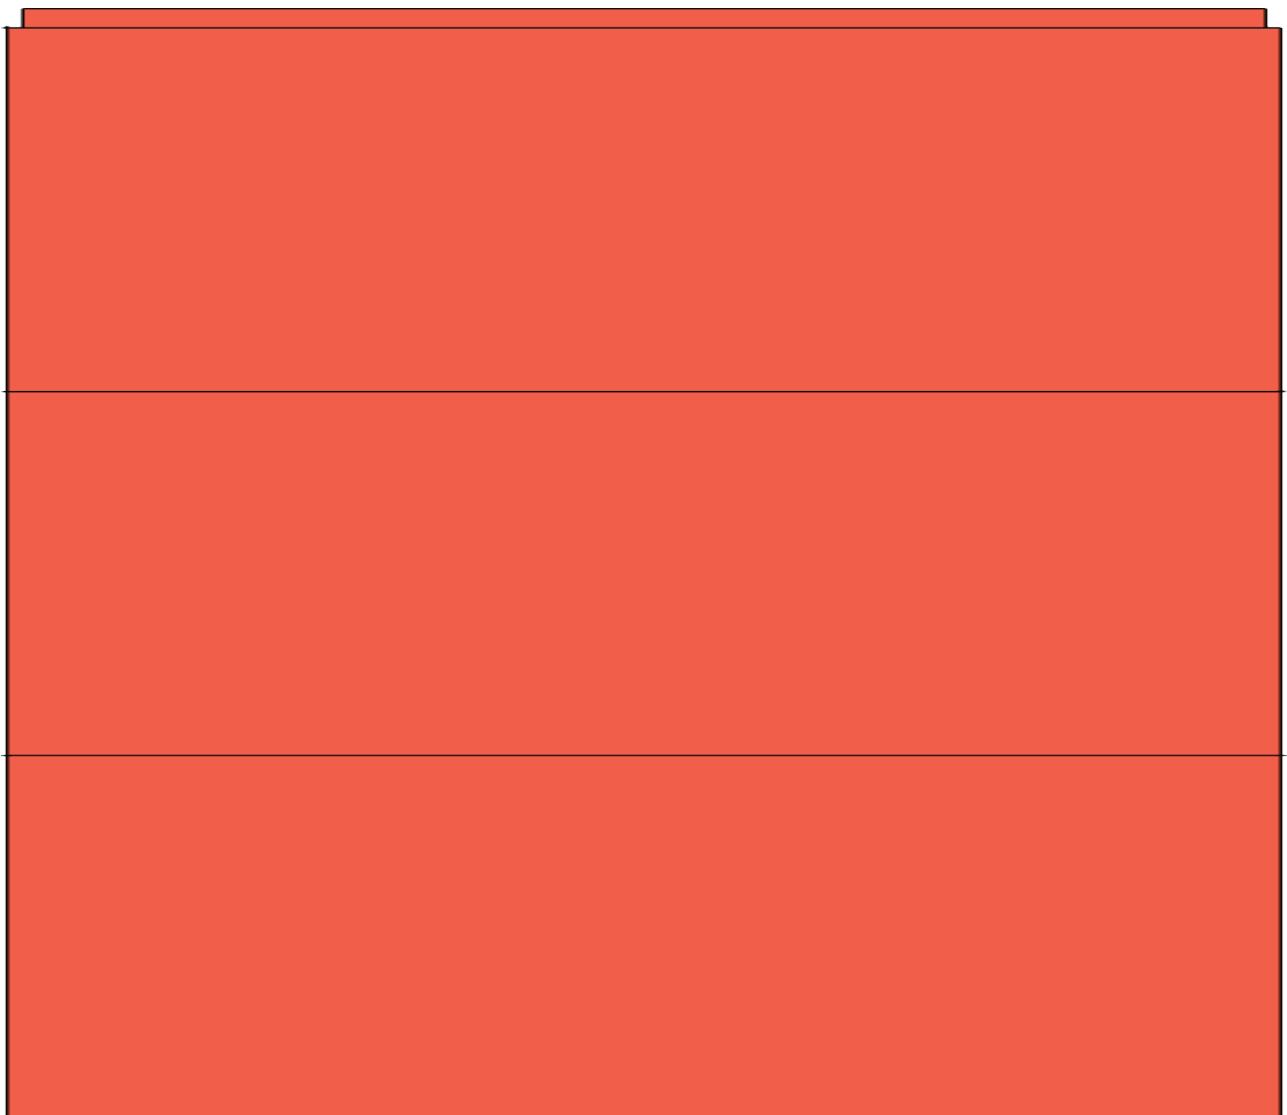

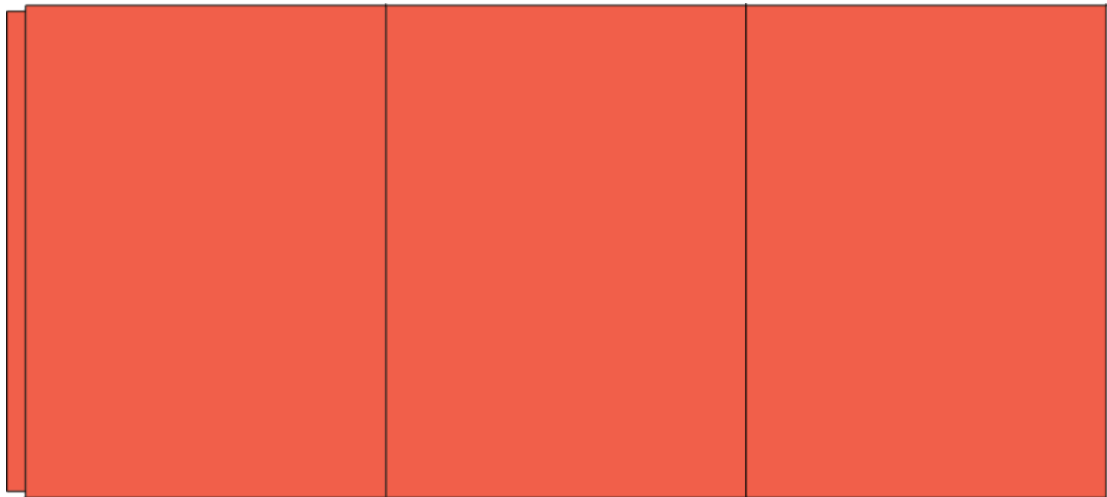

NK50: Fer og not golvplanker

Fer og not golvplanker. Dimensioner: 28x190 mm.

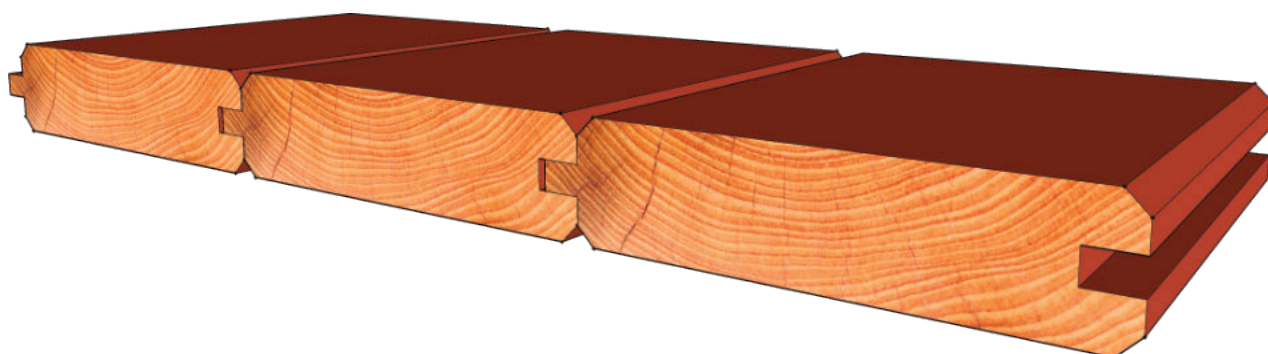

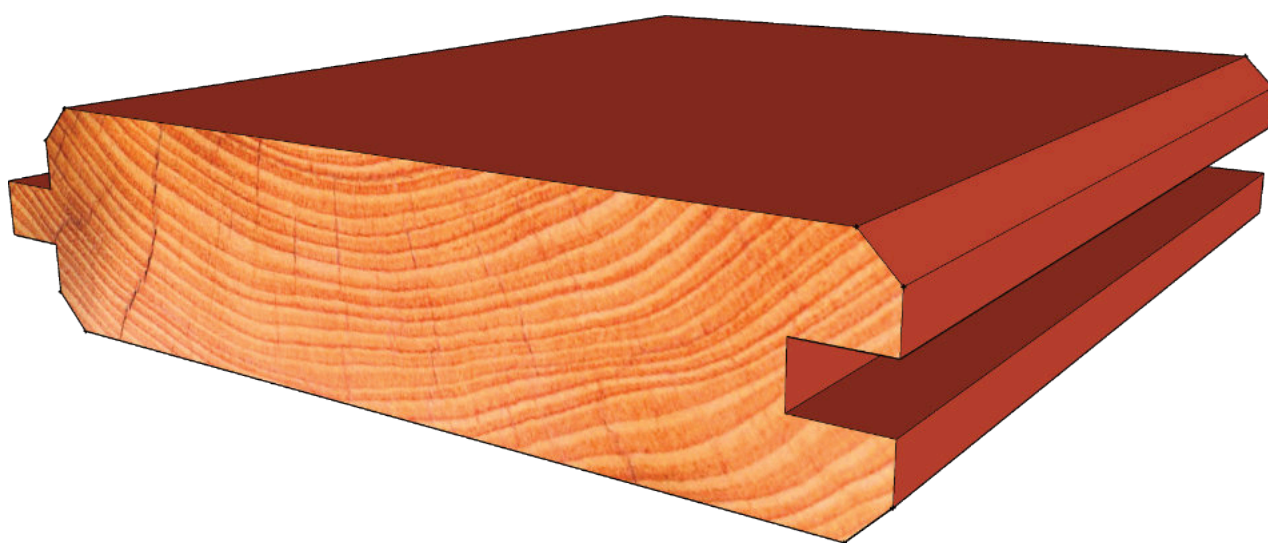

NK50: Fer og not gulvplanker

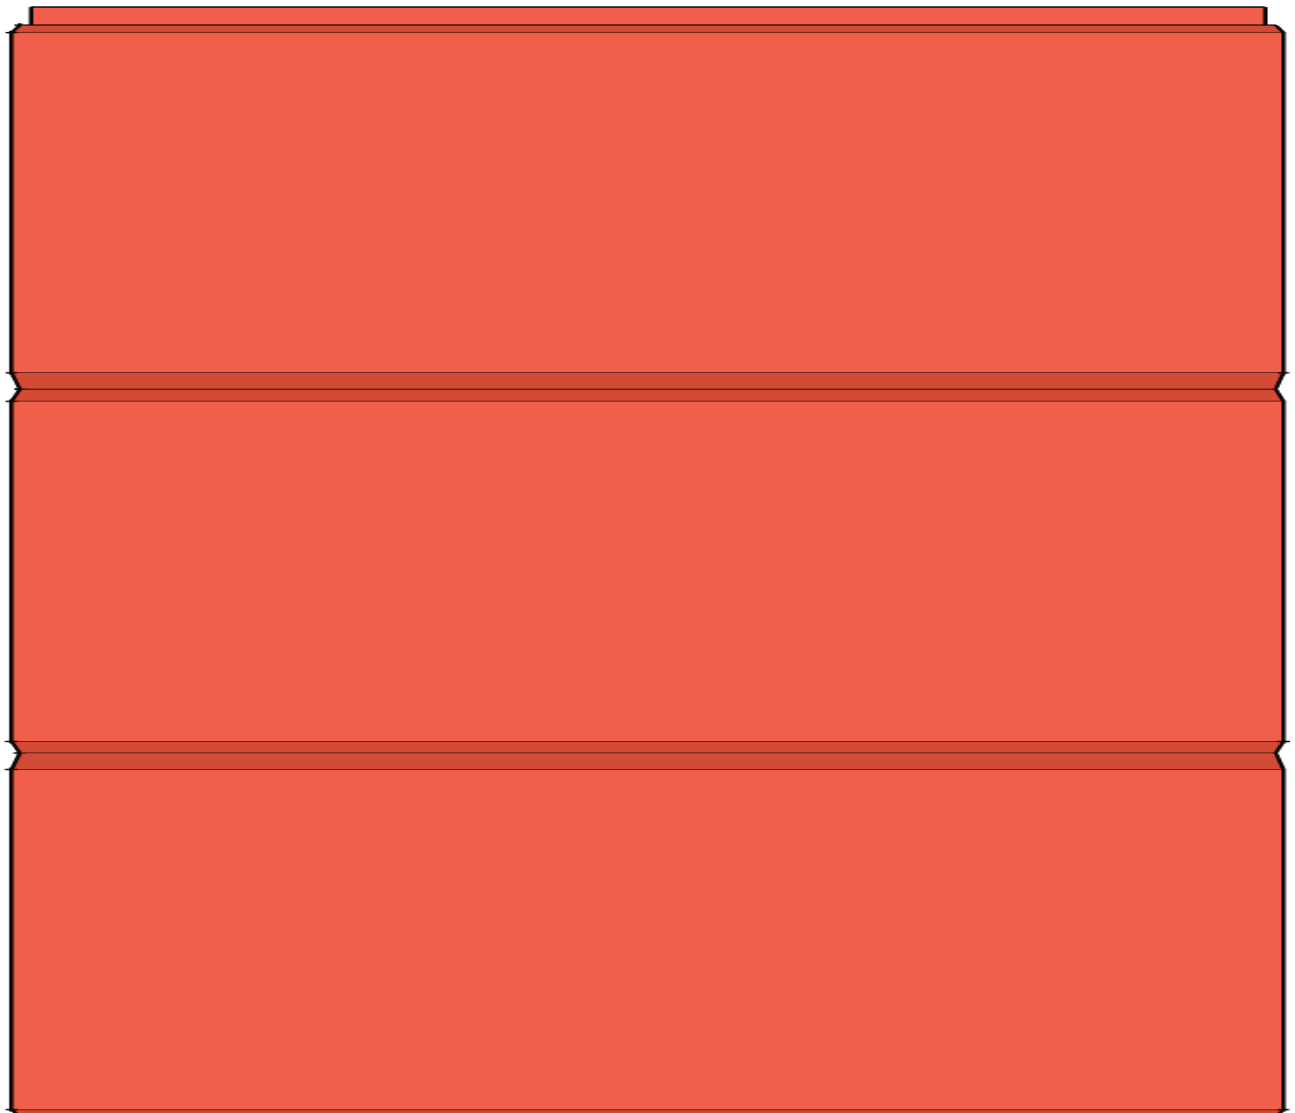

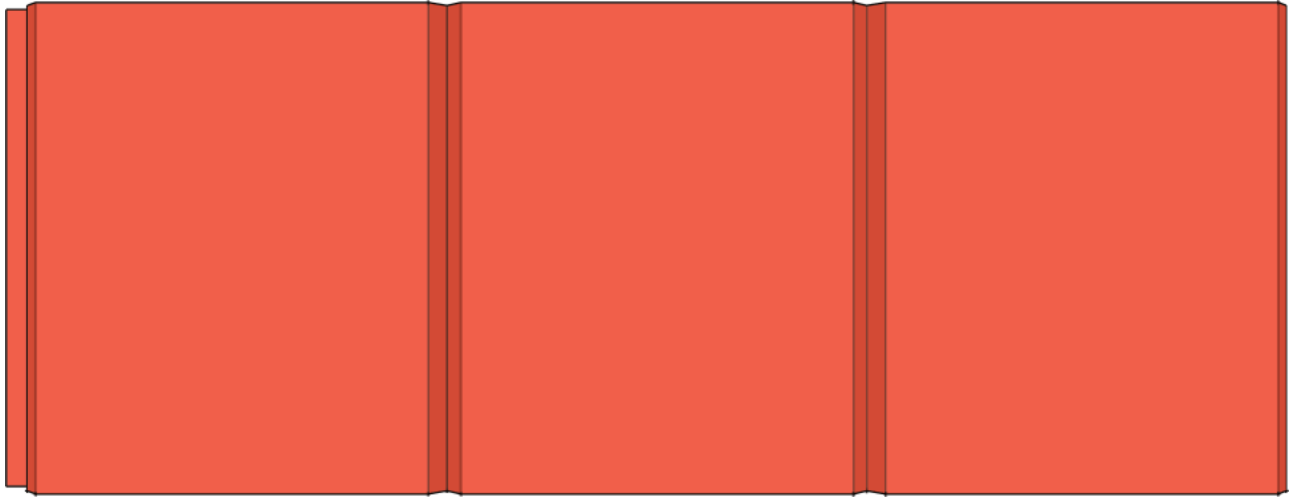

NK51: Nabohegn hegnsplanke

Nabohegn hegnsplanke. Dimensioner: 32x145 mm med 10 mm fer og not og 45 graders fas på fire sider.

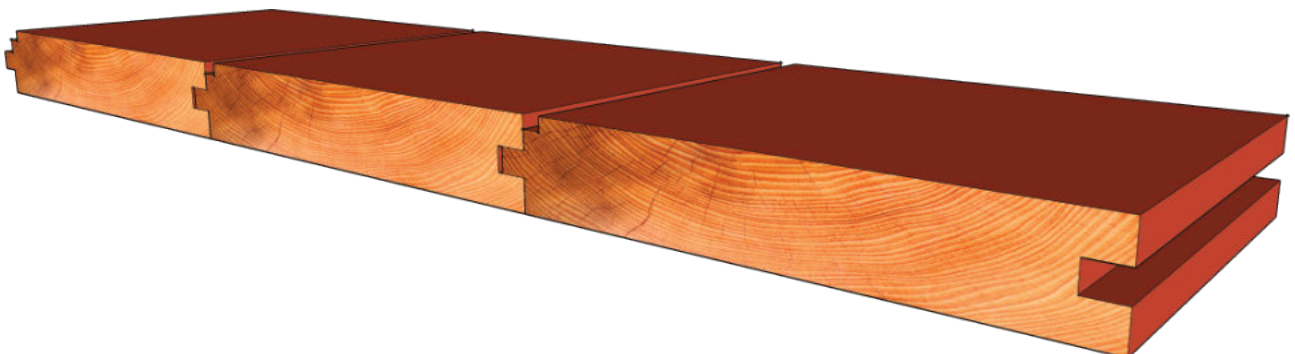

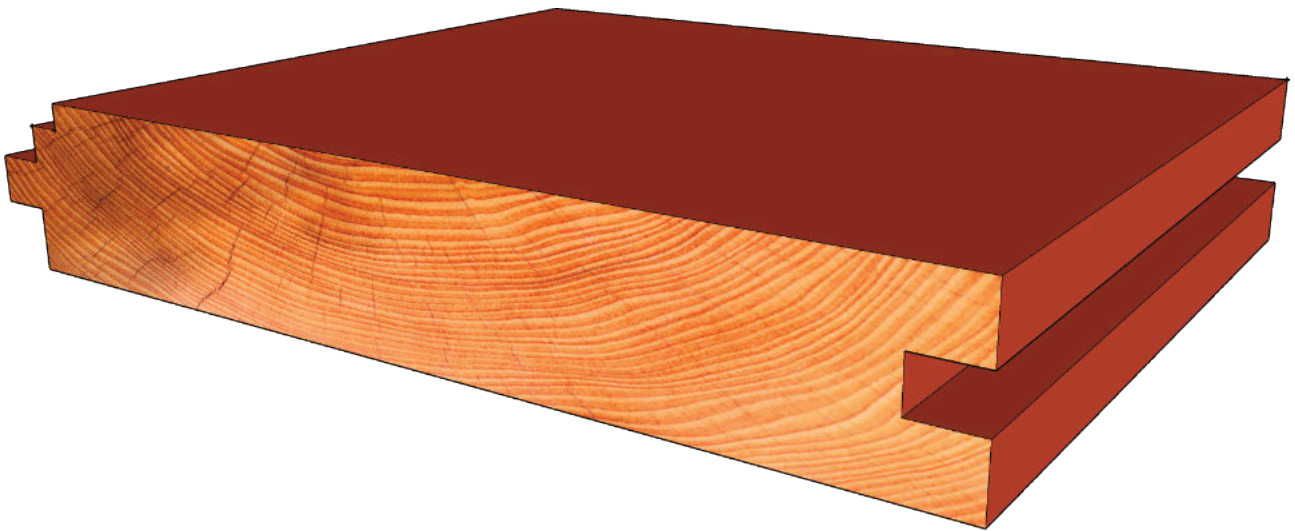

NK51: Nabohegn hegnsplanke

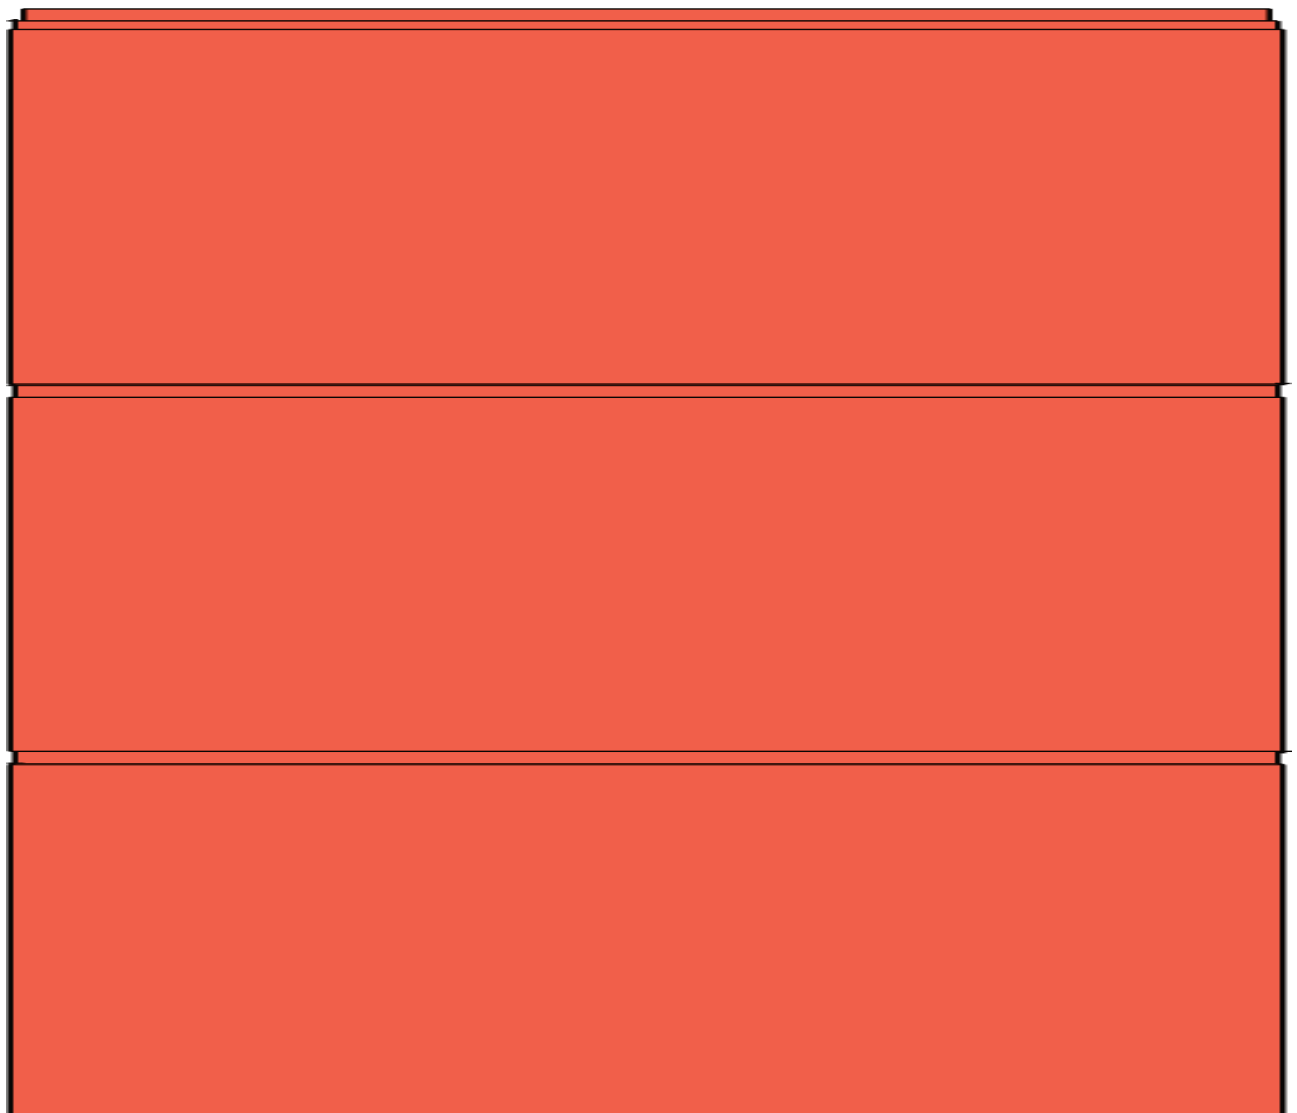

NK52: Gulvplanke med skibsfuge

Gulvplanke 28x190 mm med plads til skibsfuge på 5 mm.

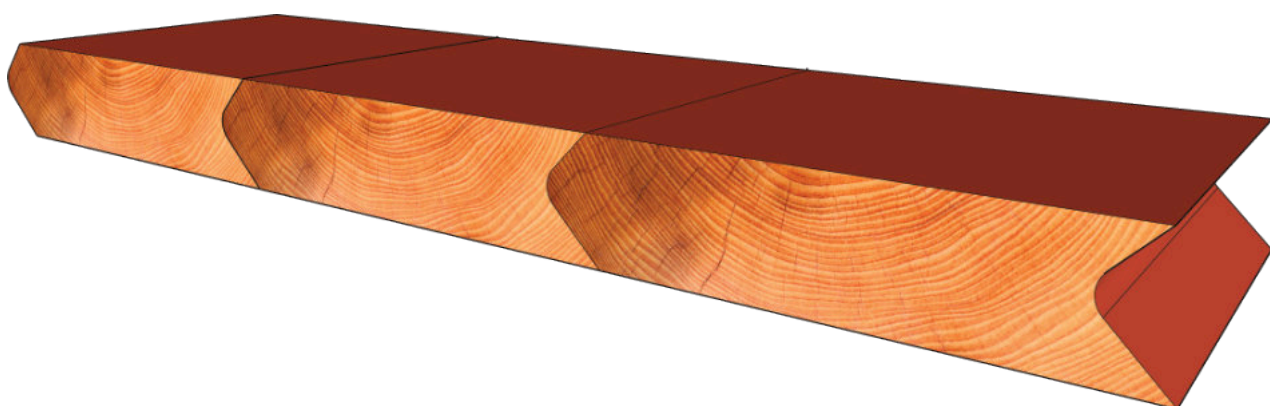

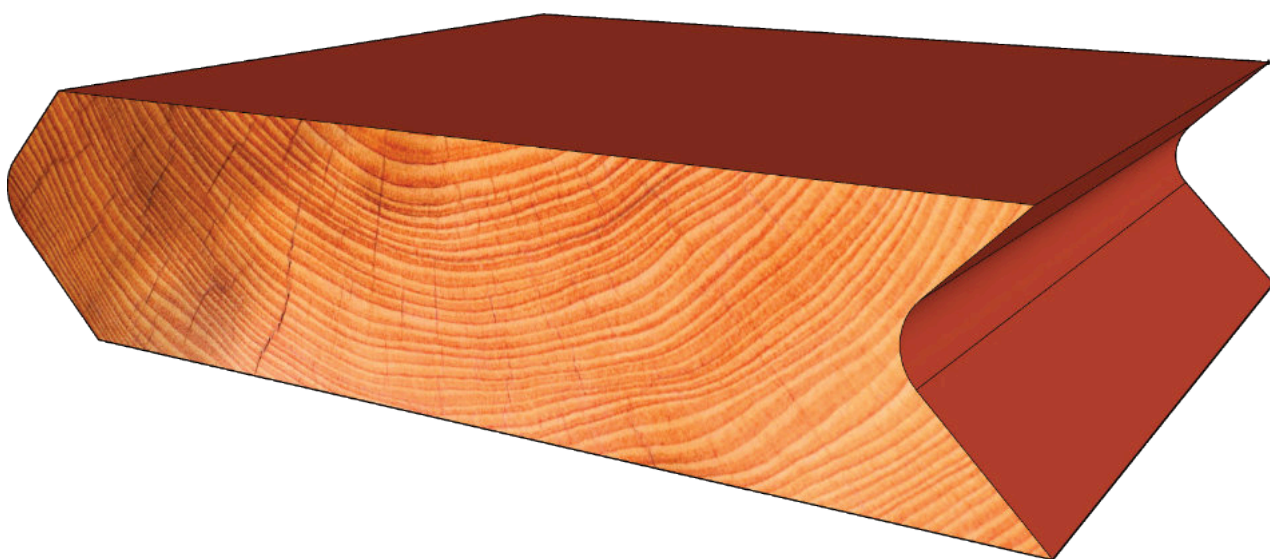

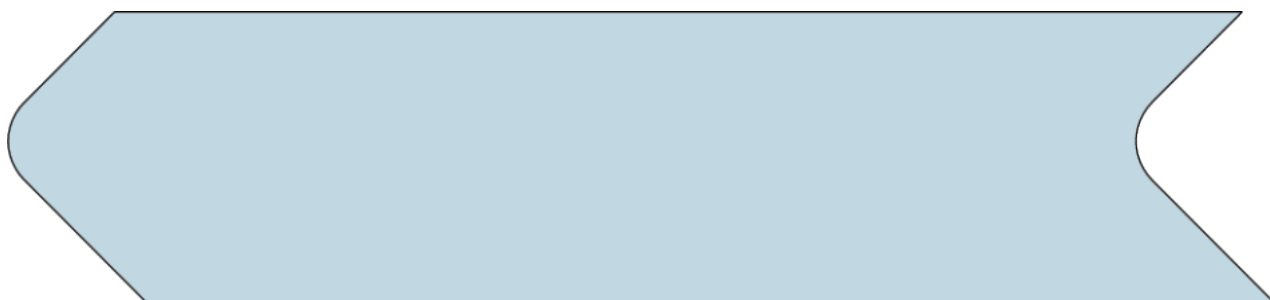

NK52: Gulvplanke med skibsfuge

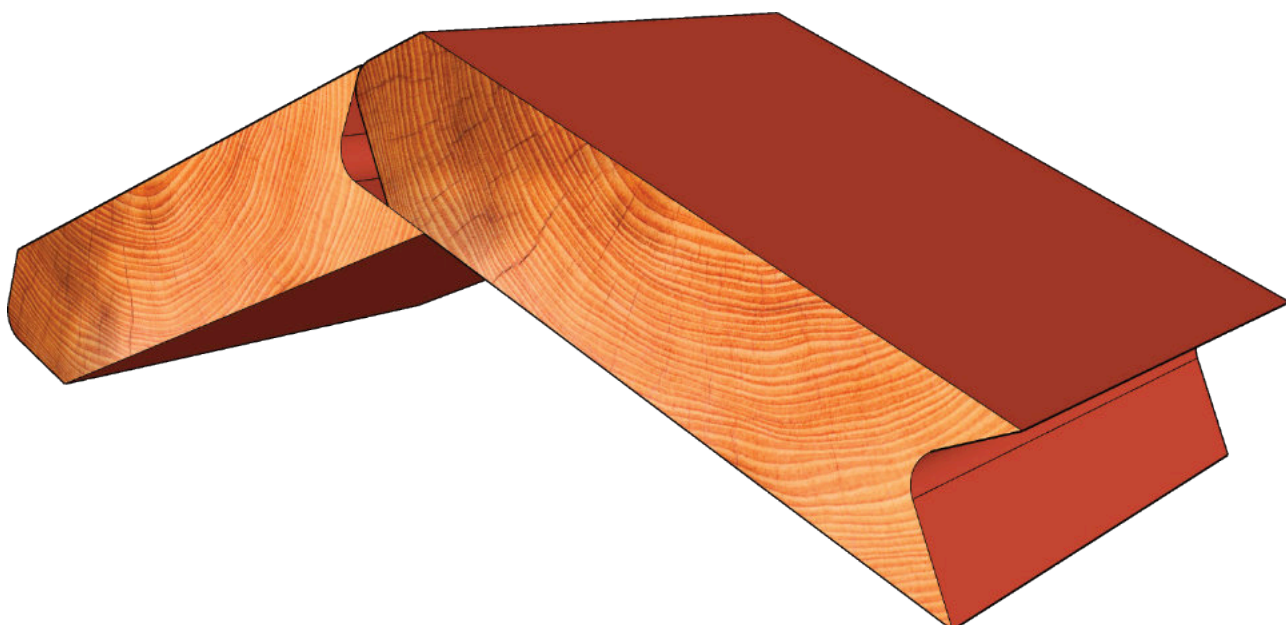

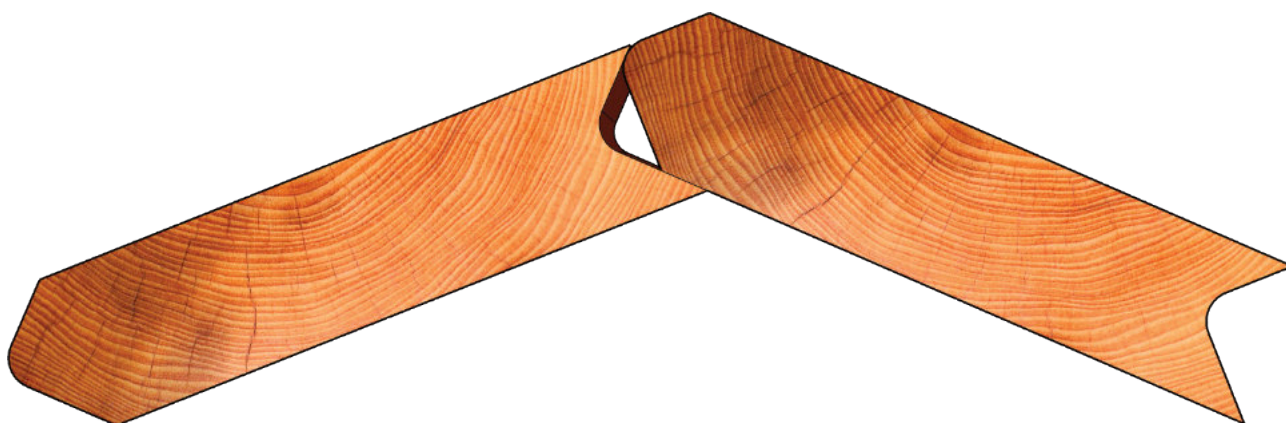

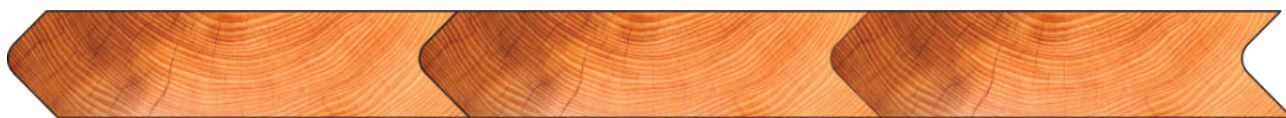

NK53: Svinerygplanke til brink

Svinerygplanke til brink. Bruges til søbredder og
åløb mm. Holder kanten på plads. Tykkelse: 50
mm. Bredde: 95-190 mm.

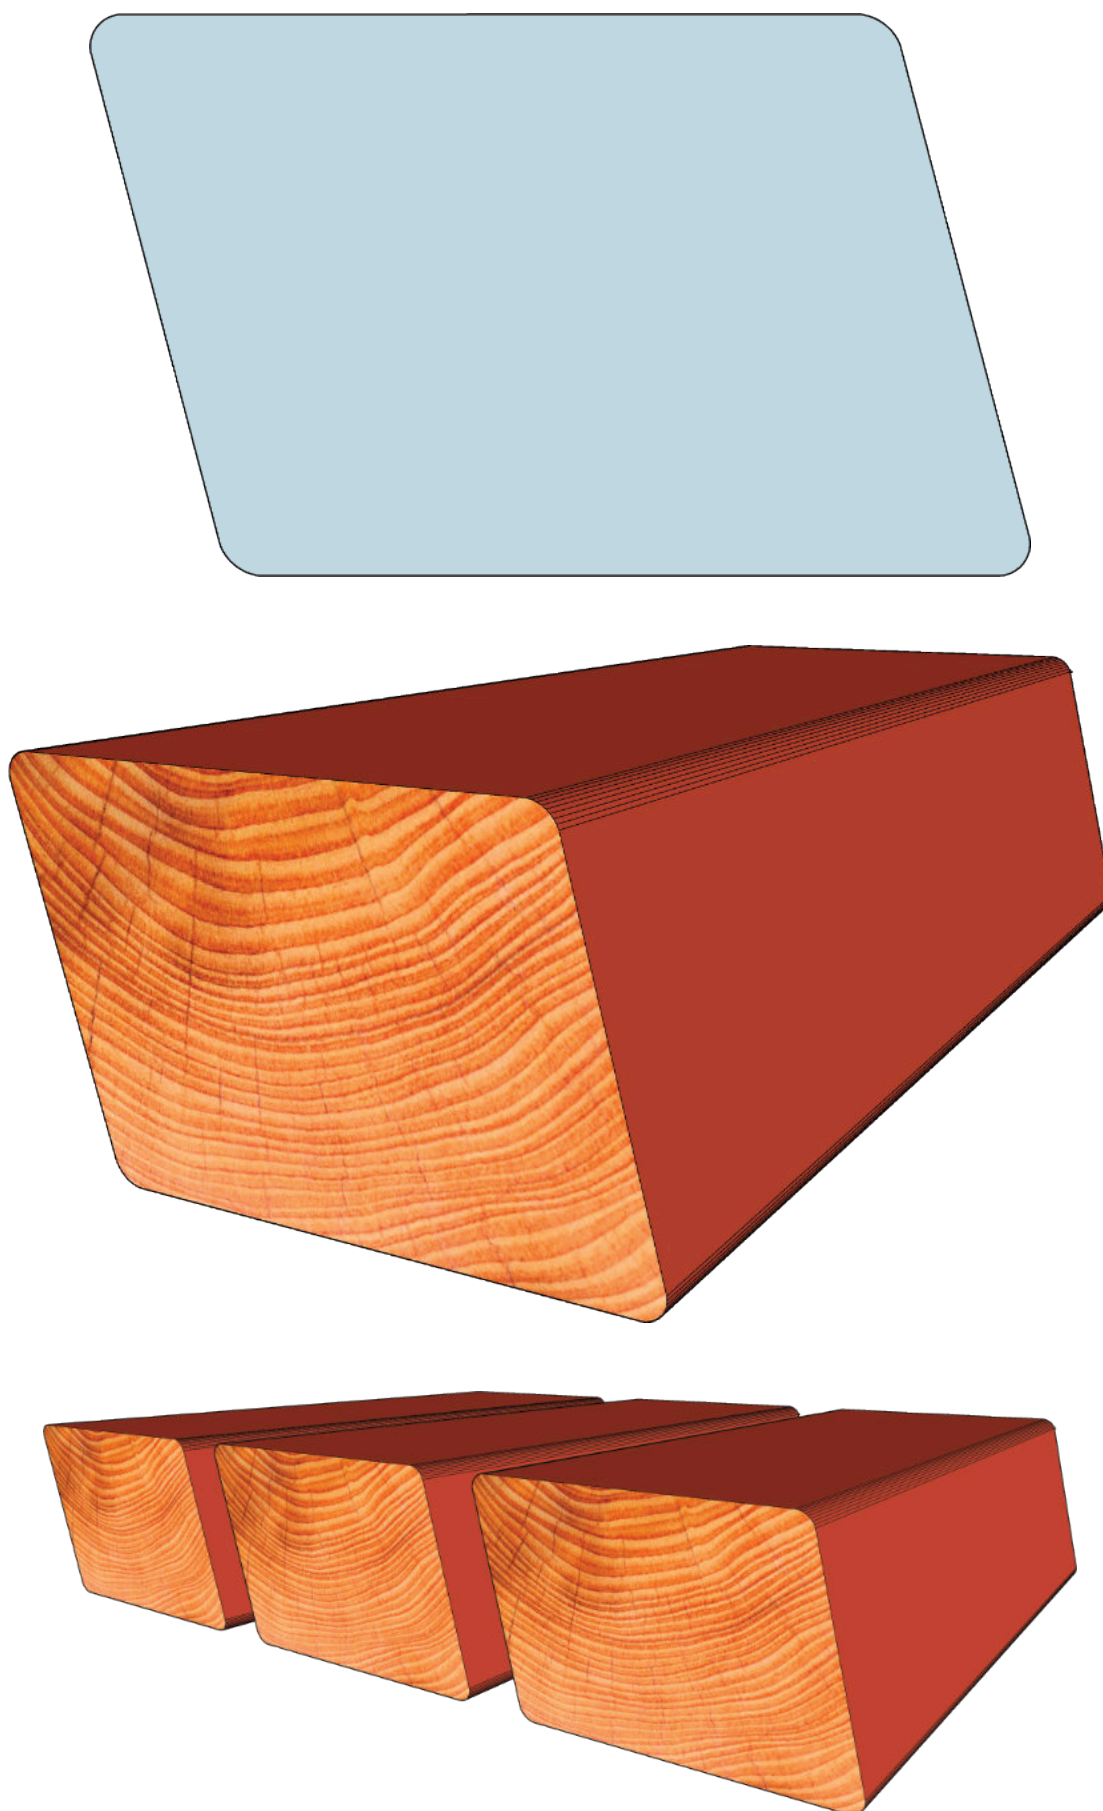

NK53: Svinerygplanke til brink

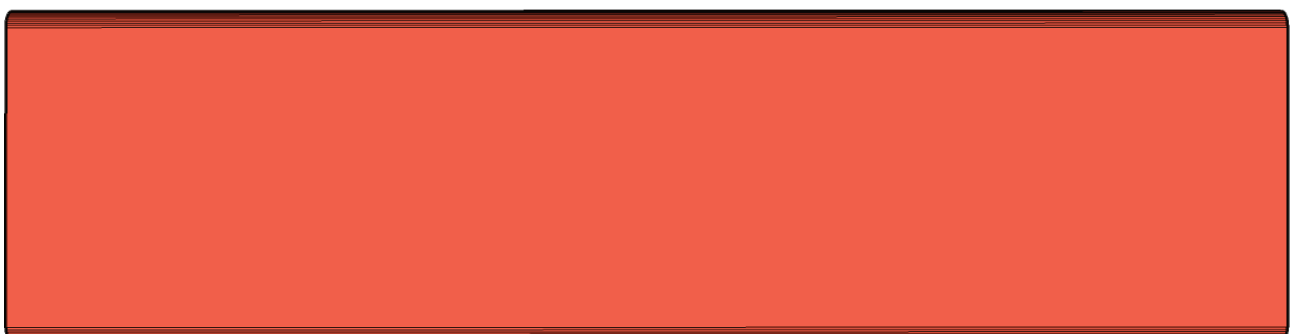

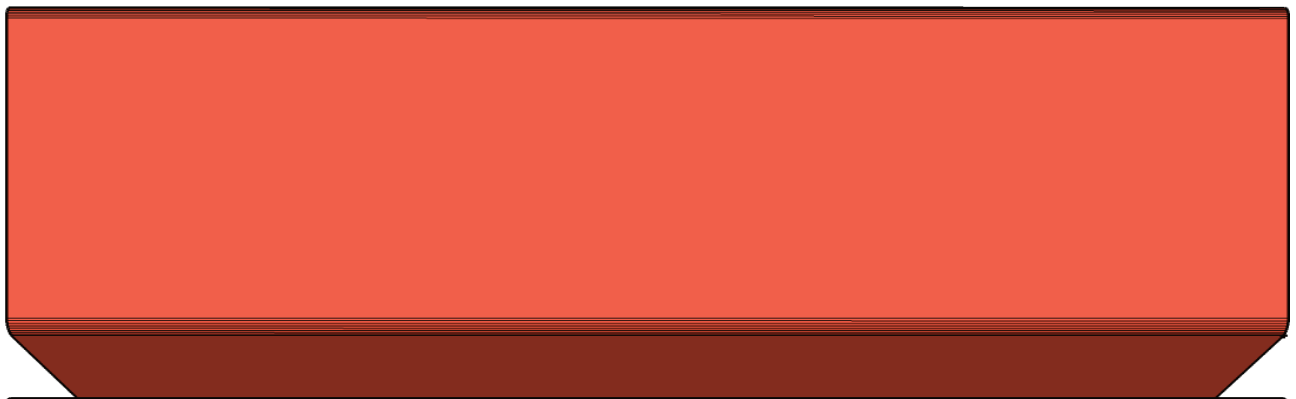

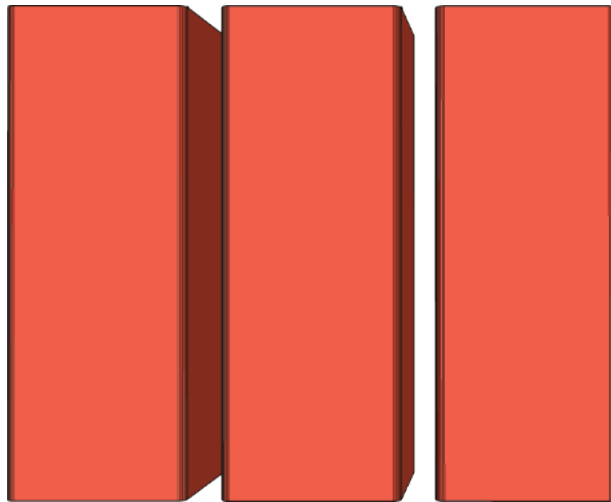

NK54: Listeprofil med runde hjørner

Listeprofil med runde hjørner 38x58 mm og 15 grader skrå kant. Kan gøres bredere, men ikke tykkere.

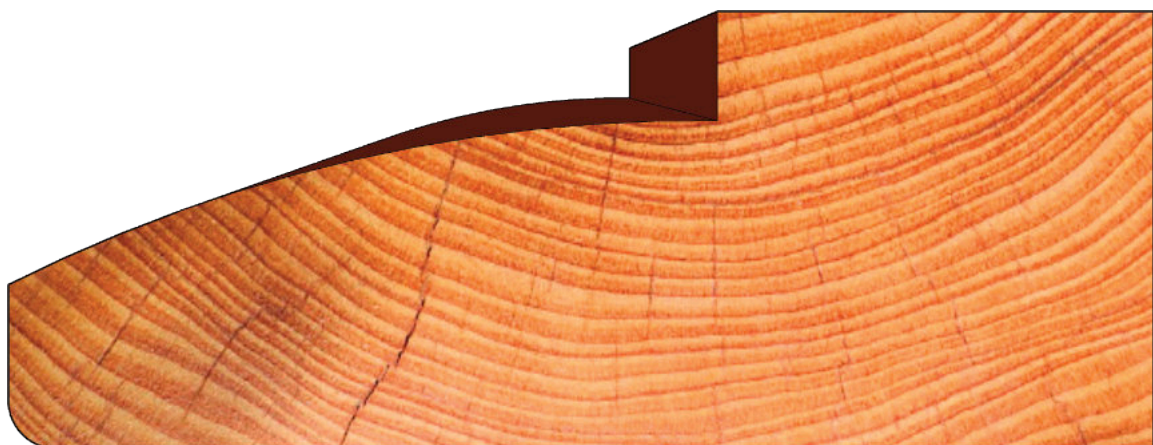

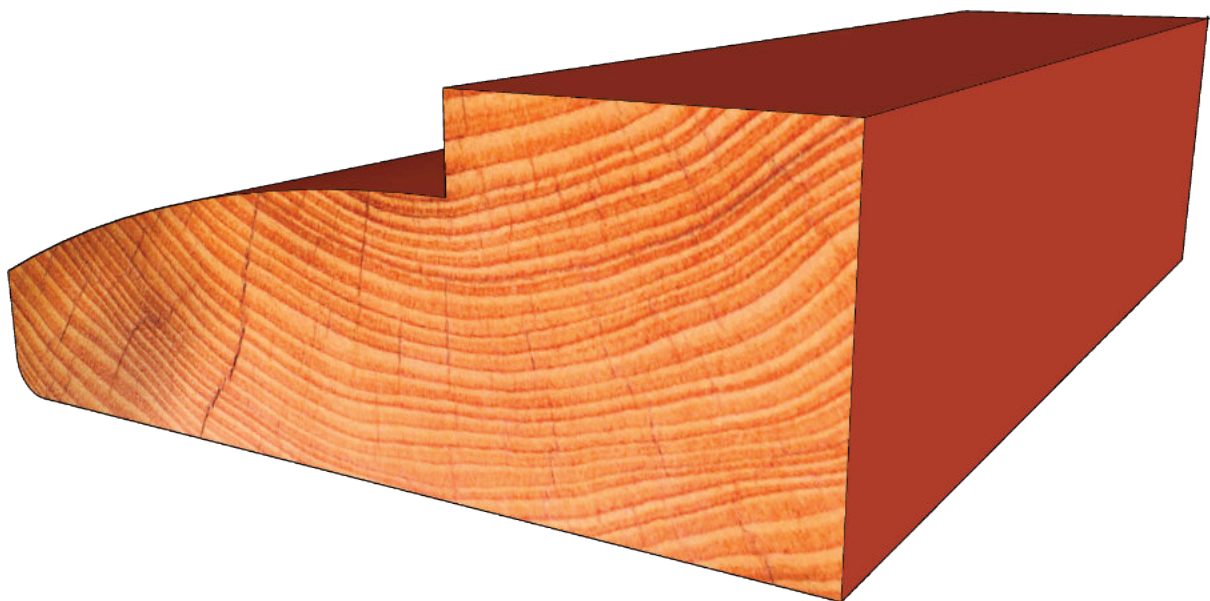

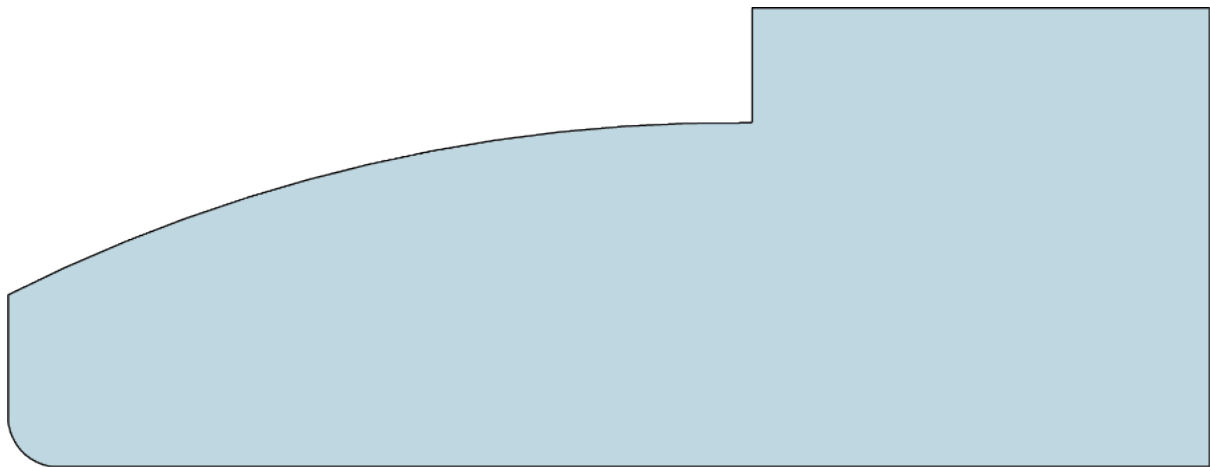

NK54: Listeprofil med runde hjørner

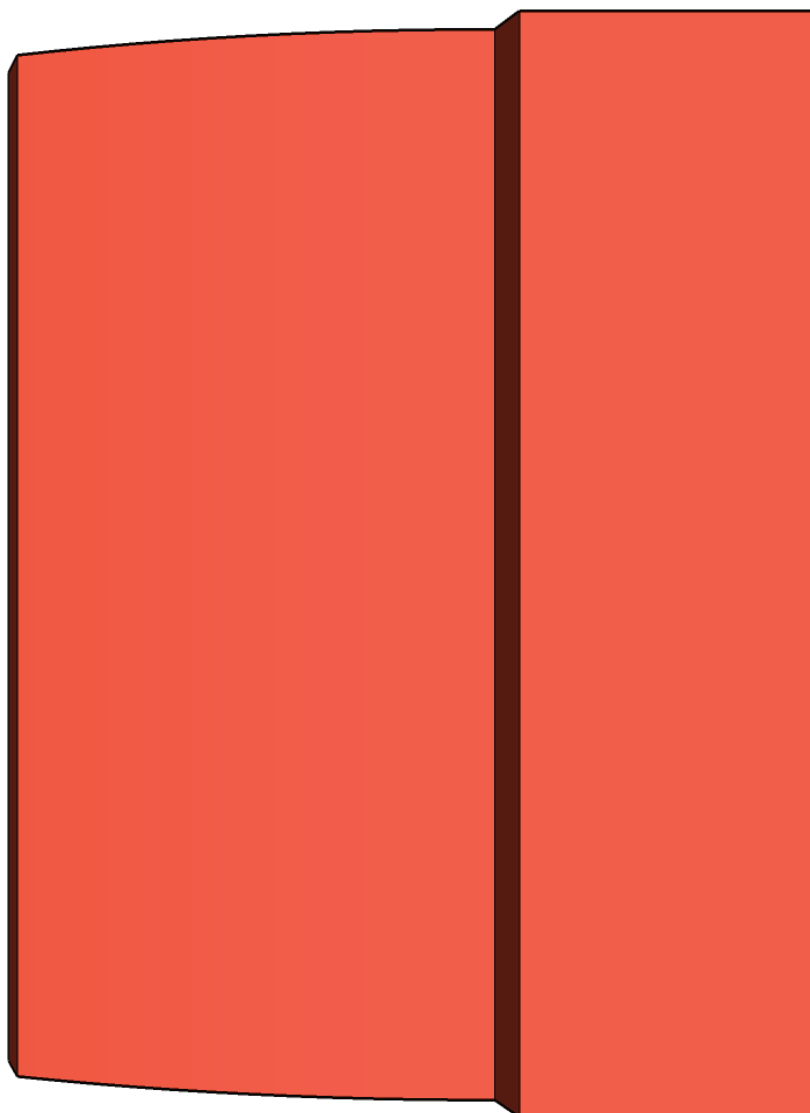

NK55: Sålbænk med stor radius

Sålbænk 45x120 mm med stor radius. Bruges under vinduer som sålbænk.

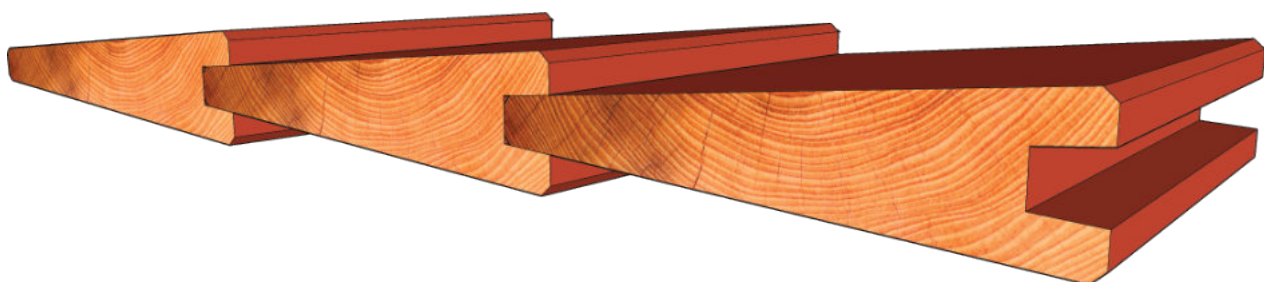

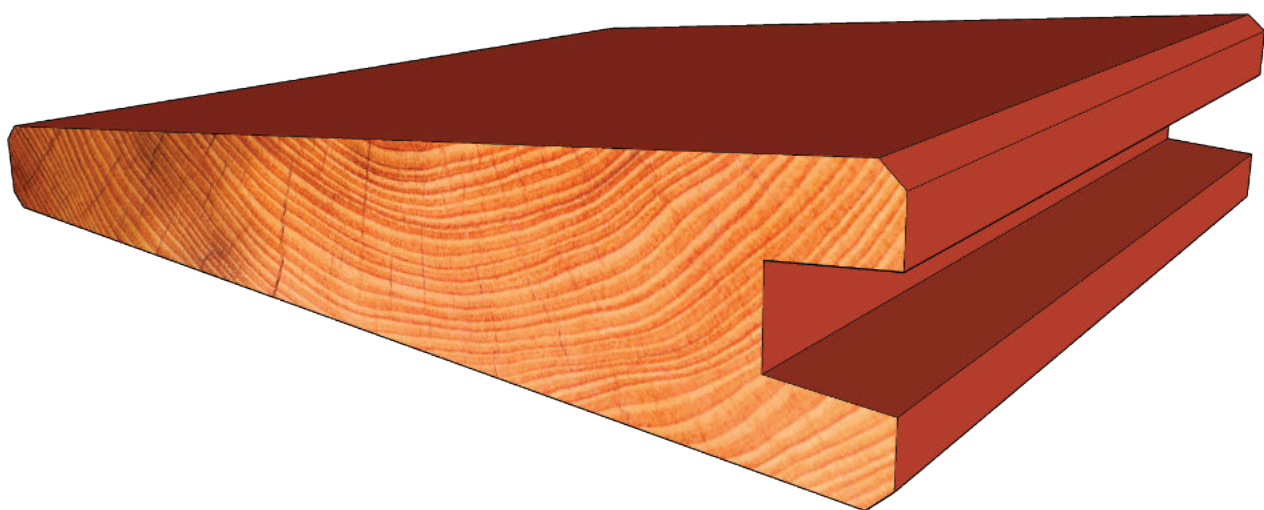

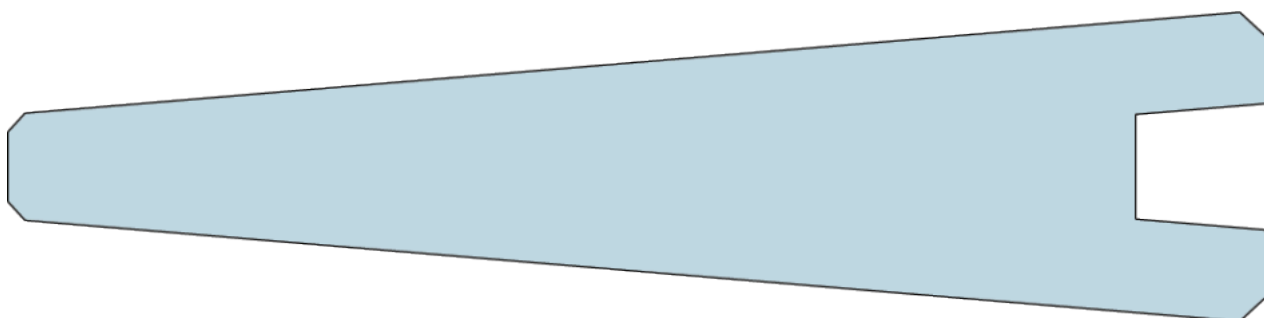

NK55: Sålbenk med stor radius

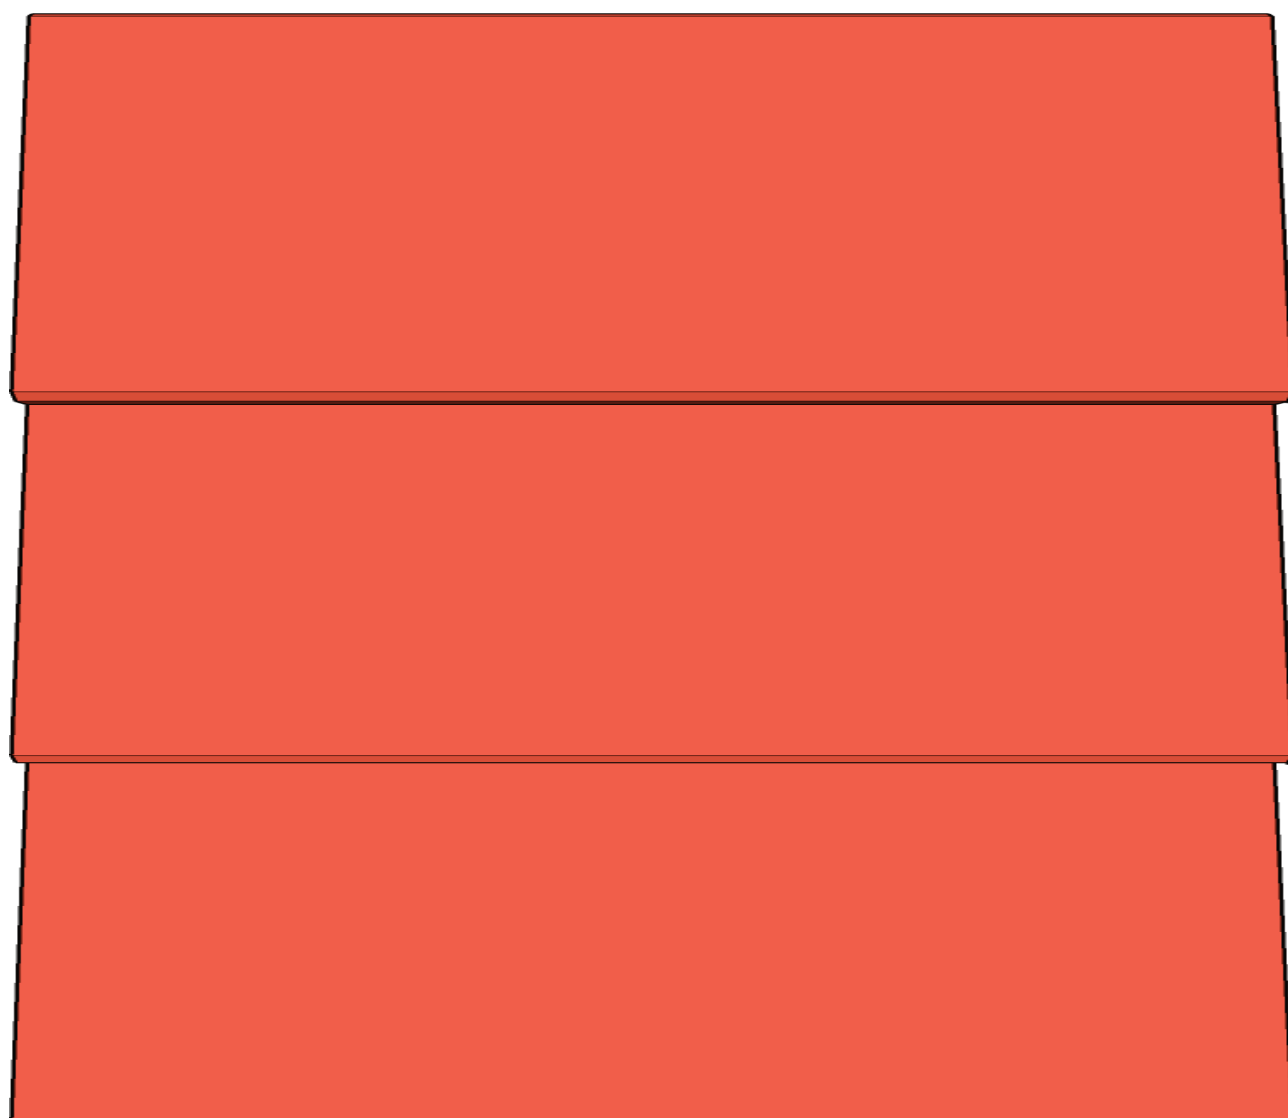

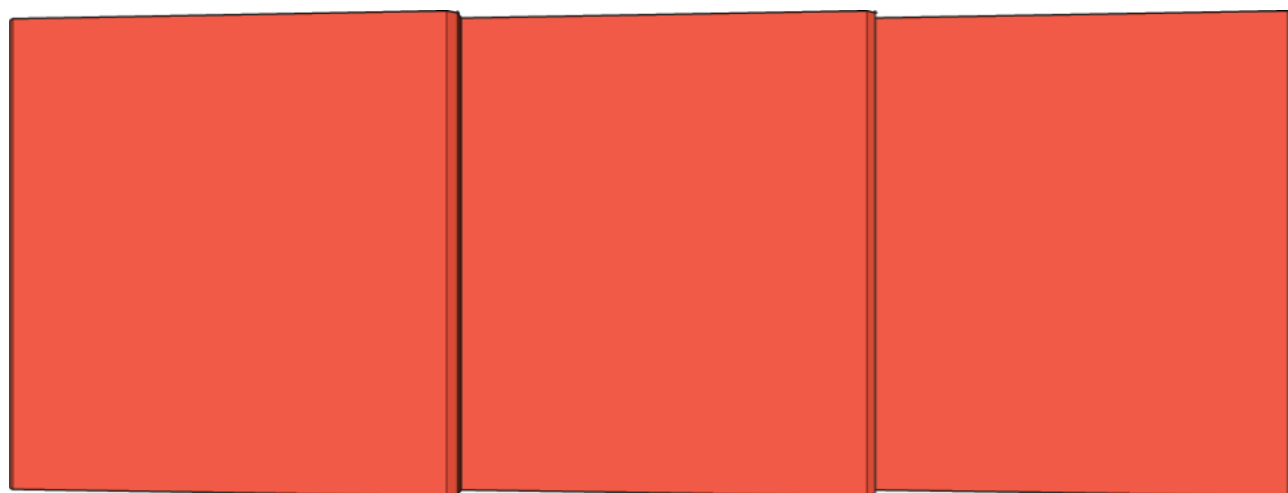

NK56: A-planke til Nabohegn

A-planke til Nabohegn. Kaldes også for dobbelt klinkbeklædning. Dimensioner: 32x145 mm med en høvlet side og én ru side samt 10 grader skrå.

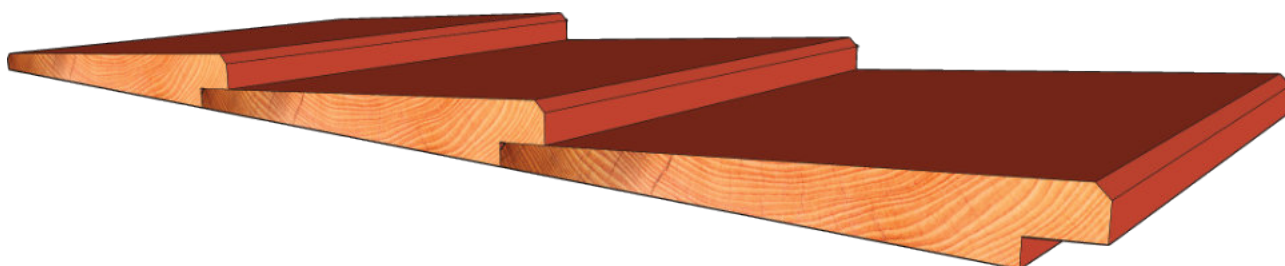

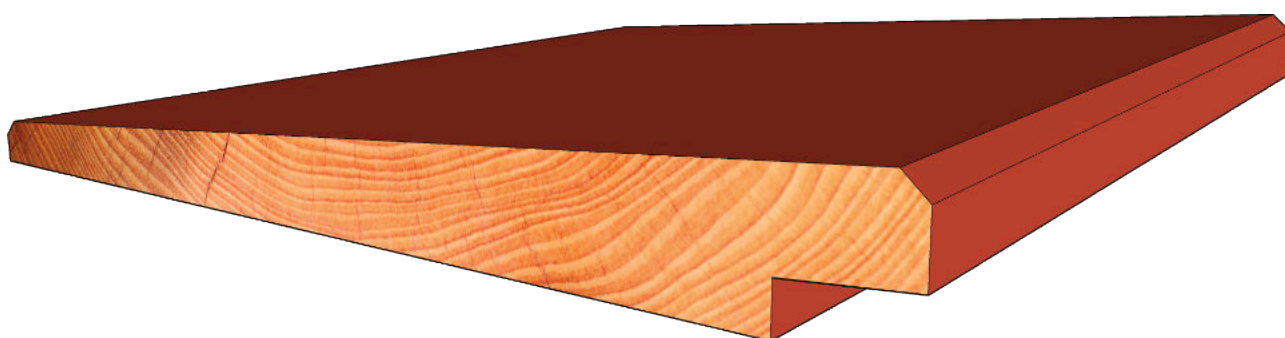

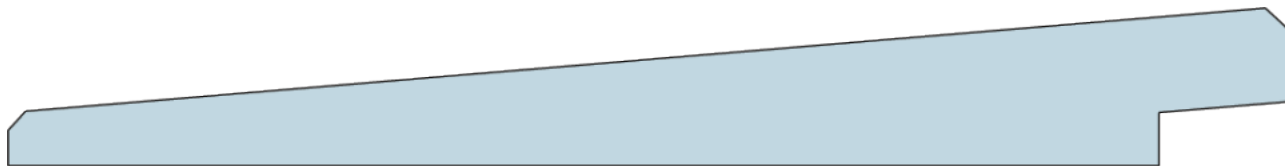

NK56: A-planke til Nabohegn

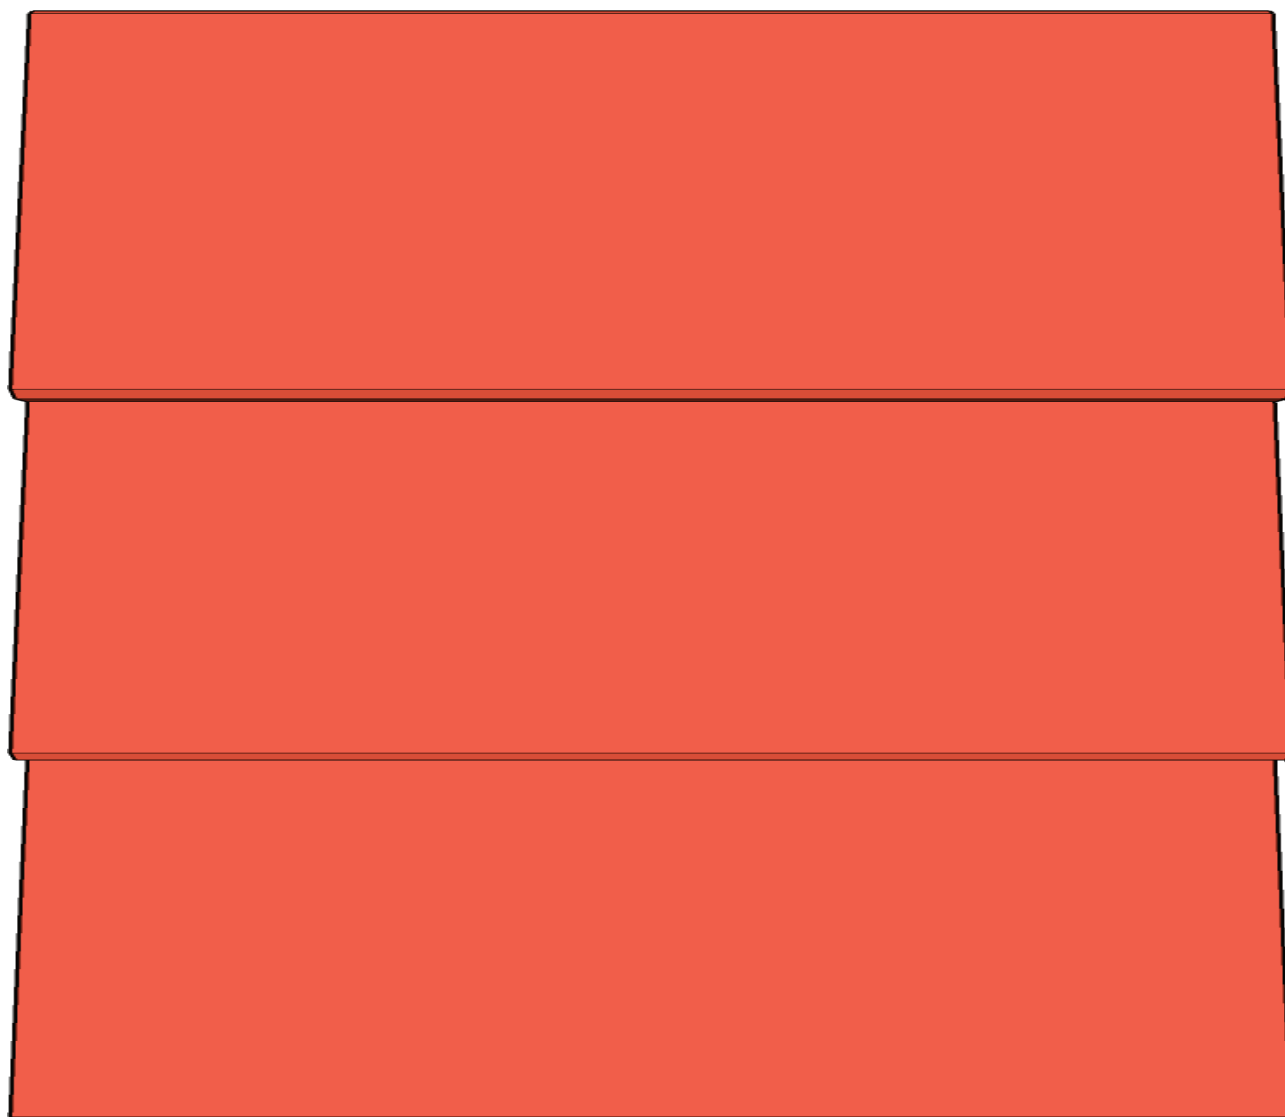

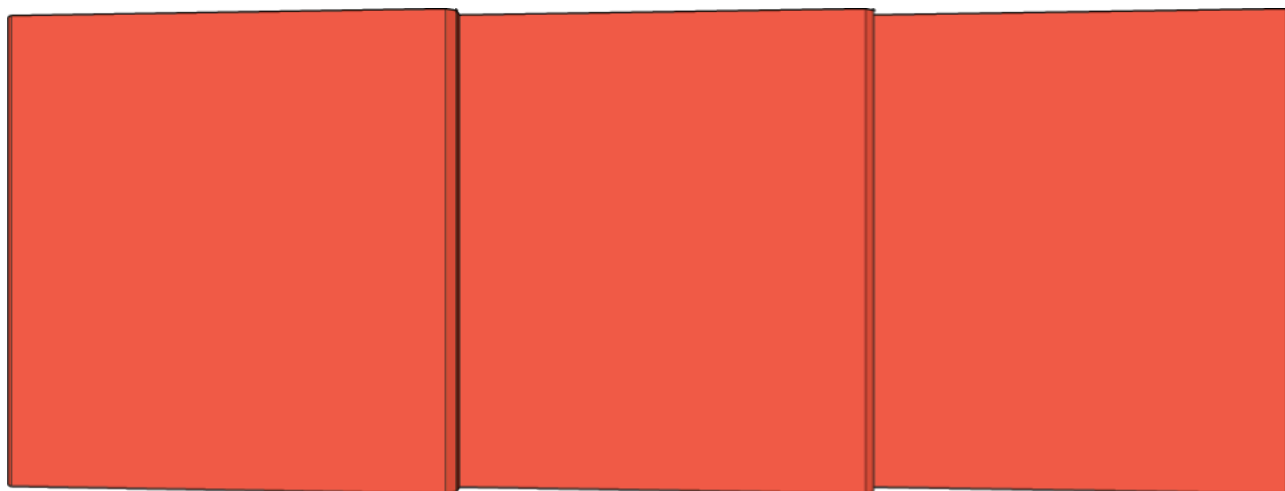

NK57: Kløvet A-planke til låger

Ligesom NK56, men kløvet. Bruges til at bygge låger i Nabohegn.

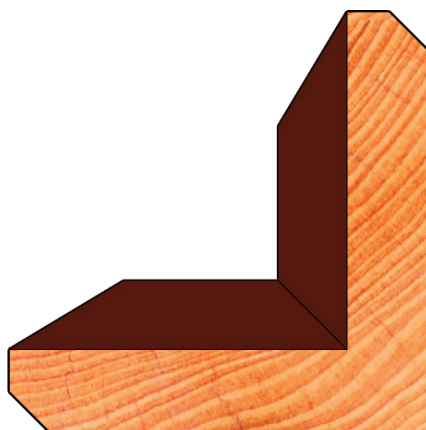

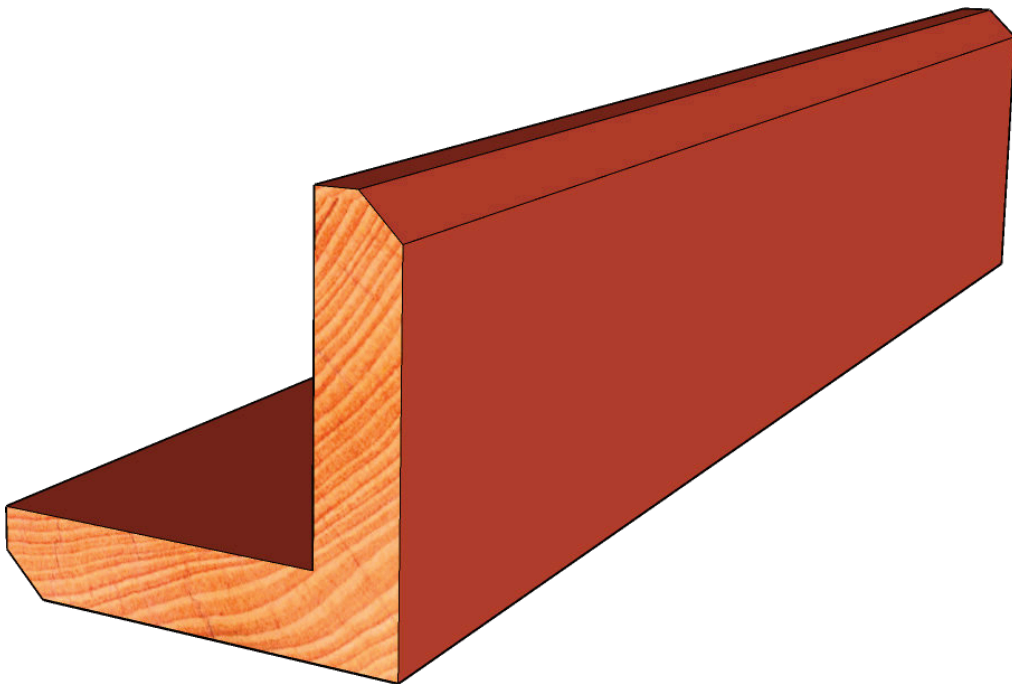

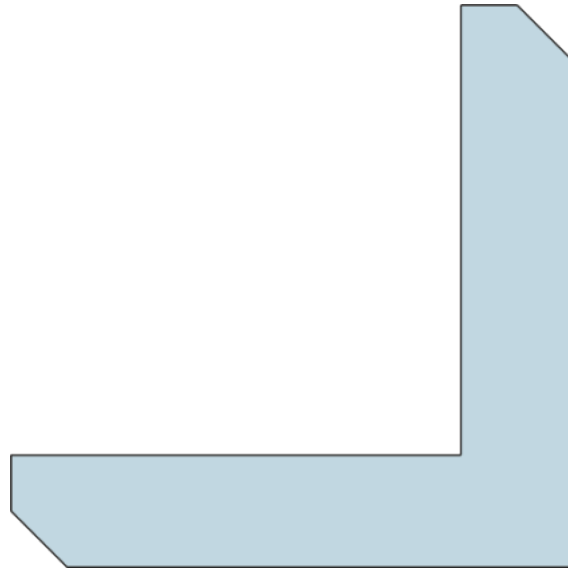

NK57: Kløvet A-planke til låger

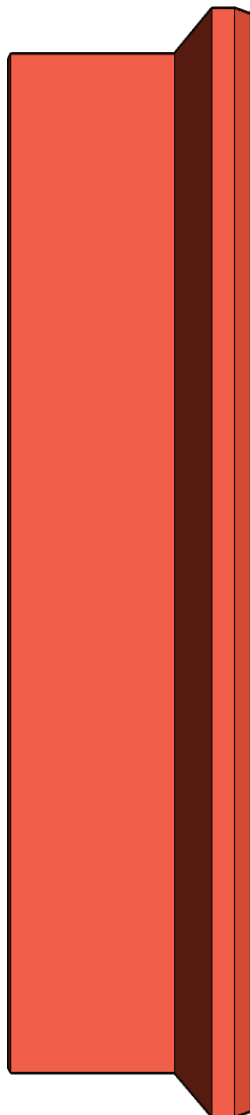

NK58: L-hjørneliste med fas

L-hjørneliste 45x45 mm med fas.

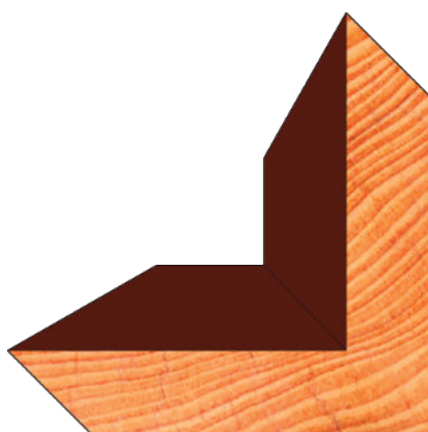

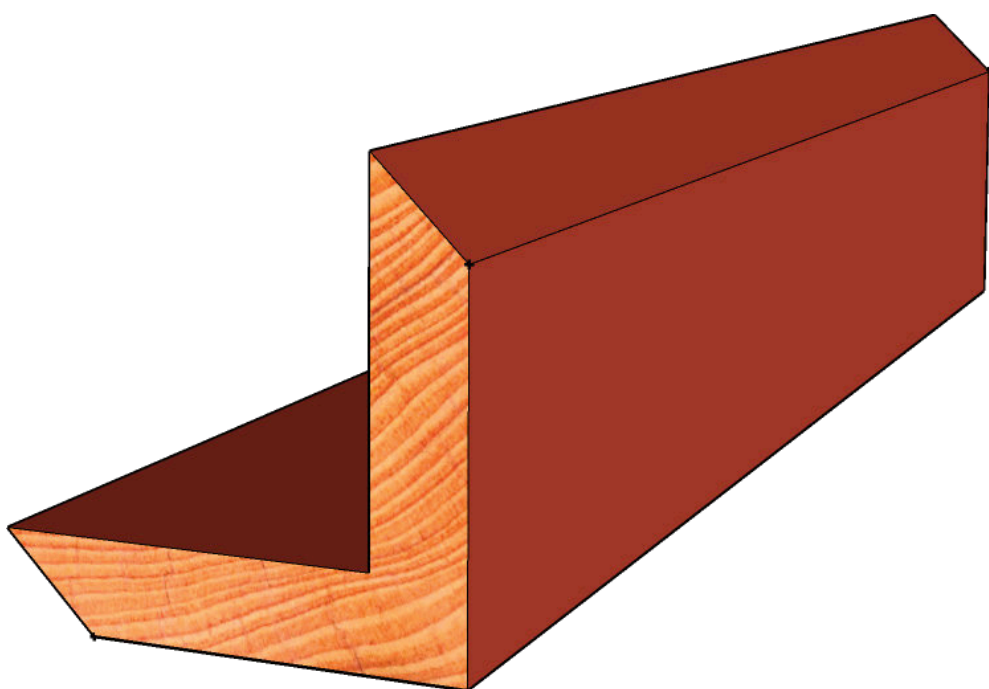

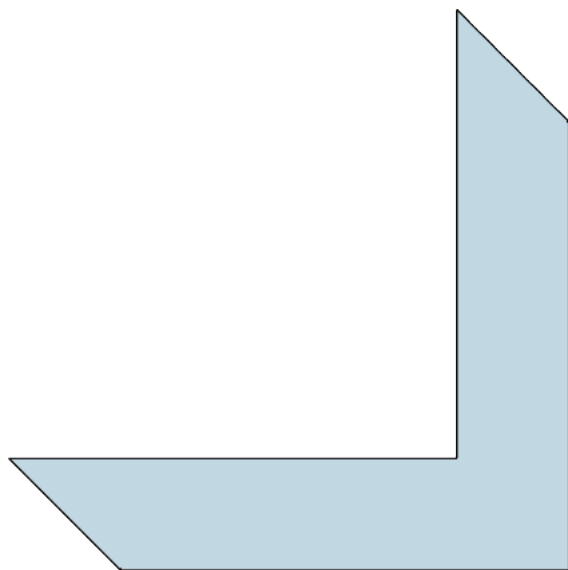

NK58: L-hjørneliste med fas

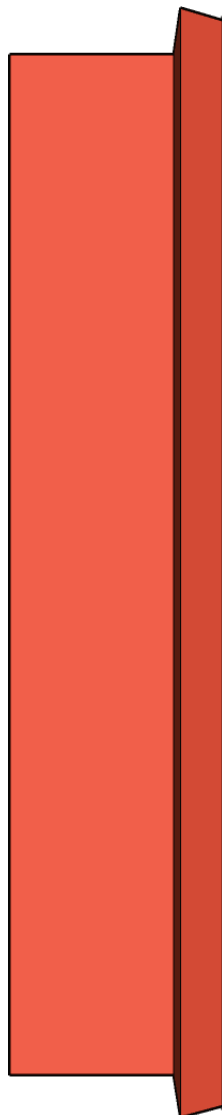

NK59: L-hjørneliste med skrå kant

Som NK58, men med helt skrå kant for at lukke tæt om facadebeklædning. Dimensioner: 45x45 mm.

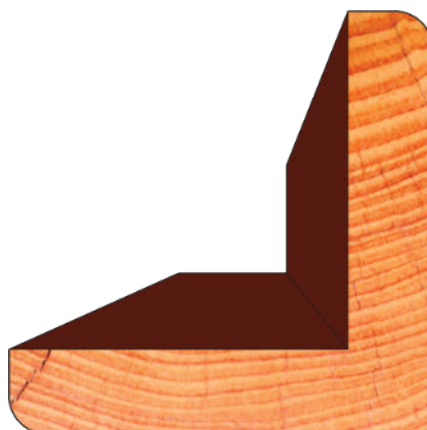

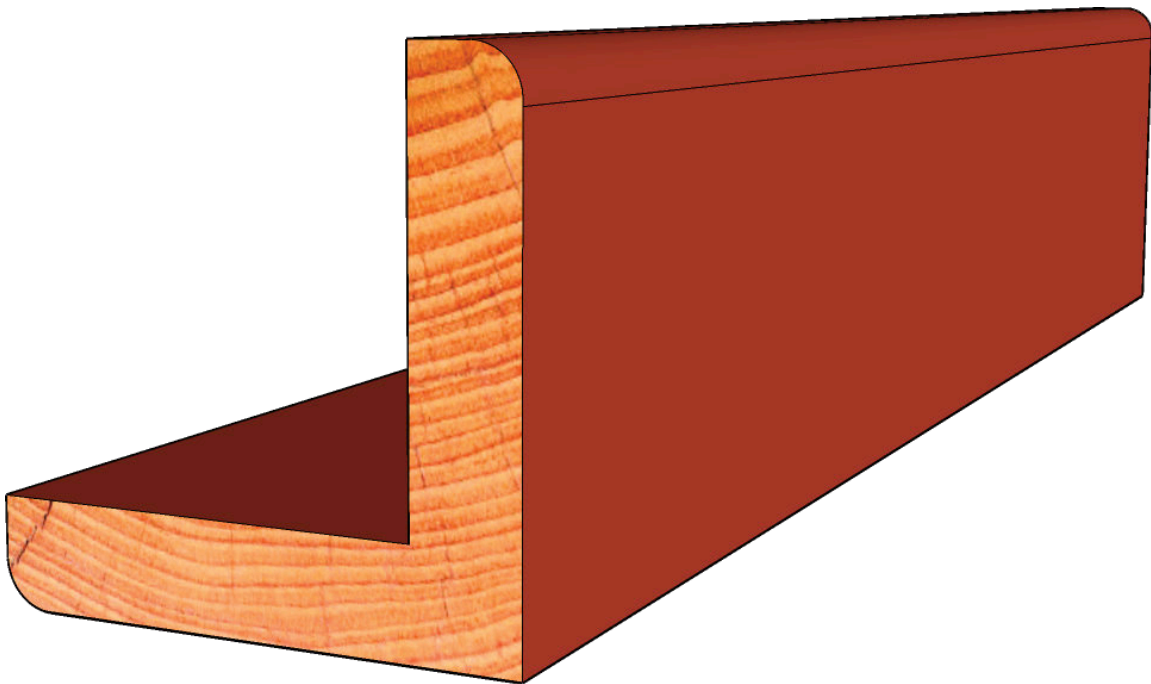

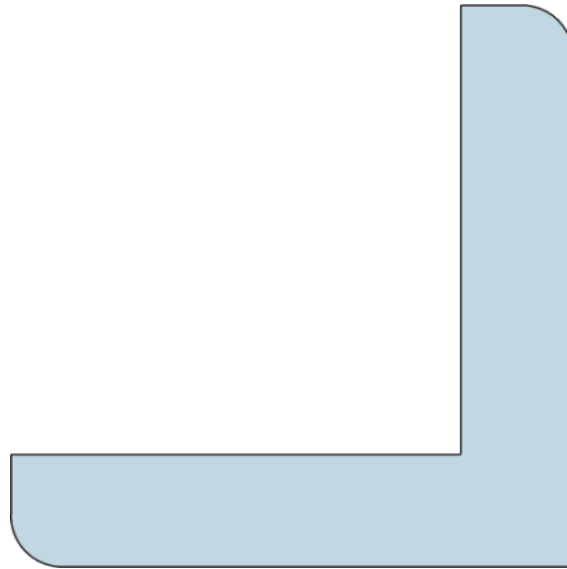

NK59: L-hjørneliste med skrå kant

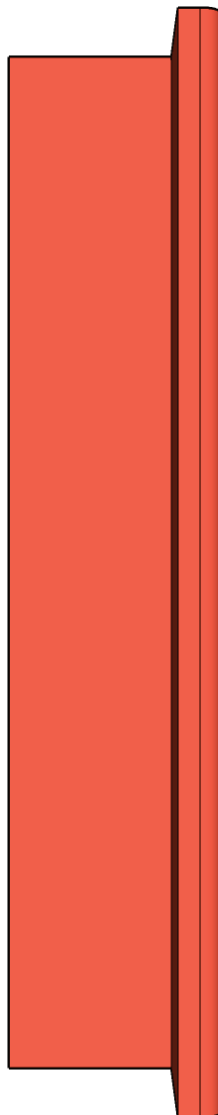

NK60: Stor hjørneliste

Hjørneliste 95x95 mm med 6 graders runding.
Listen dækker 80x80 mm. Dette er vores største
hjørneliste.

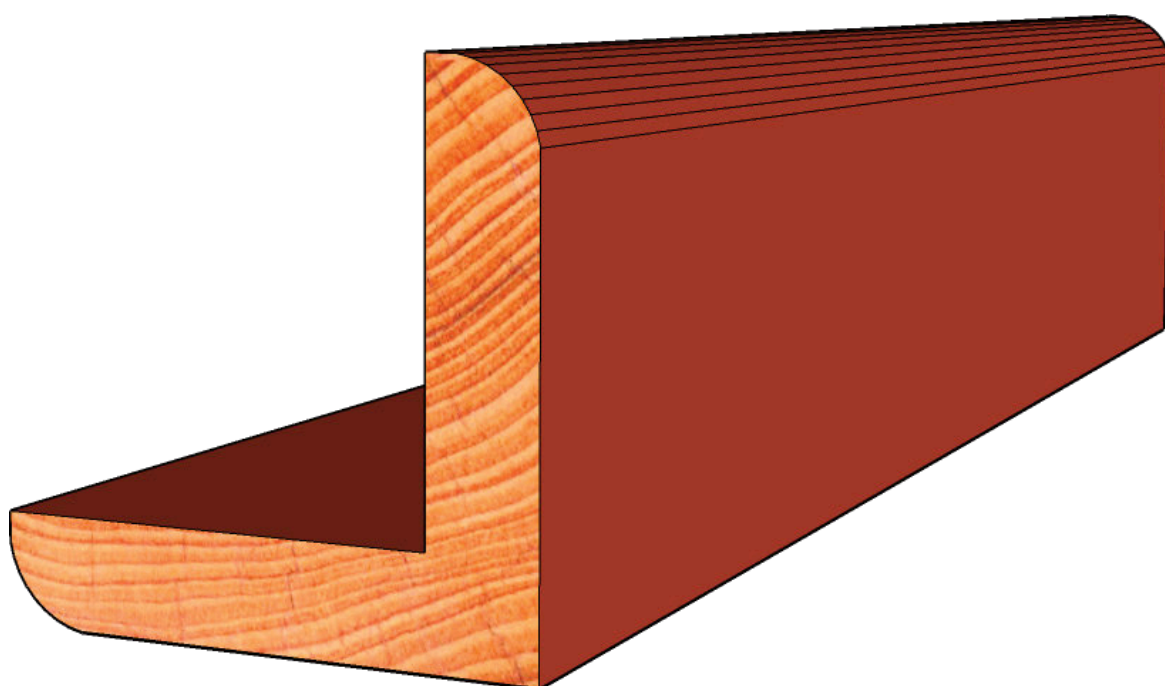

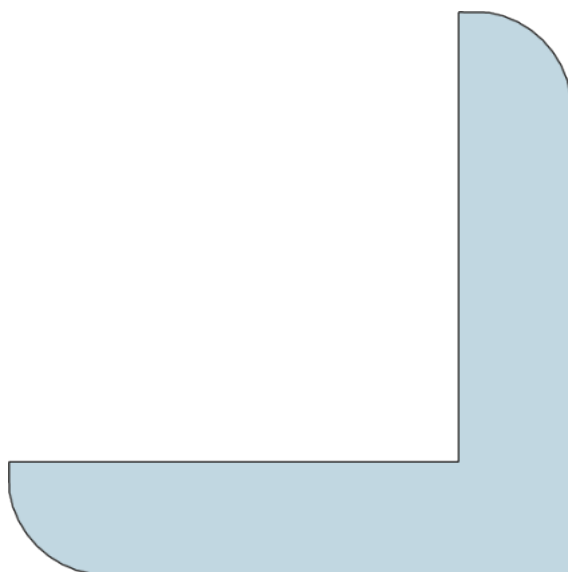

NK60: Stor hjørneliste

NK61: Hjørneliste med større radius

Som NK60, men med radius 16 hjørner.
Dimensioner: 95x95 mm.

NK61: Hjørneliste med større radius
